					Section Acres	5
					Total Acres	5

11. Place of use in counties: ADA

12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.

This right does not grant any right-of-way or easement across the land of another.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Rights 63-8402, 63-9658 and 63-10818 shall not exceed 0.42 cfs, nor a total combined annual volume of 28.1 af.

This right is limited to the irrigation of 4.8 acres within the place of use described above in a single irrigation season.

Rights 63-8402 and 63-10818 when combined for irrigation purposes shall not exceed a total diversion rate of 0.12 cfs, a total annual diversion volume of 21.6 af and the irrigation of 5.8 acres.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

Rights 63-9658 and 63-10818 are also diverted through the points of diversion described above.

STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA

Case 39576

A. Subcase 63-8402

(Insert water right number)

STANDARD FORM 1

OBJECTION

Please fill in the following information:

B. NAME AND ADDRESS OF PERSON OBJECTING

Name: Lakewood No. 4 Homeowners Assoc.

Address: 3156 Woodbrook PL

Boise, Id 83706

Daytime Phone: 208-363-0208

Name & Address of Attorney, if any:

C. CLAIMANT OF WATER RIGHT AS LISTED IN DIRECTOR'S REPORT

Name: Lakewood No. 4 Homeowners Assoc.

Address: 3156 Woodbrook PL

Boise, Id 83706

D. I object to the following elements as recommended in the Director's Report.

(Please check the appropriate box(es)):

1. ☐ **Name and Address**
Should be: _____
2. ☐ **Source**
Should be: _____
3. ☒ **Quantity**
Should be: See Section E
4. ☐ **Priority Date**
Should be: _____
5. ☐ **Point of Diversion**
Should be: _____
6. ☐ **Instream Flow Beginning and Ending Point**
Should be: _____
7. ☐ **Purpose(s) of Use**
Should be: _____
8. ☐ **Period of Year**
Should be: _____
9. ☐ **Place of Use**
Should be: _____
10. **I object because:**
 - ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with
the _____ elements described above.

E. **REASONS SUPPORTING OBJECTION(S):**

- 1) In the "Quantity" section of the recommendation for this right, the 22.4 afy volume provision should be clarified to apply only to the "Irrigation" and "Aesthetic Storage" purposes listed under the "Purpose and Period of Use" section of the recommendation. Similarly, the combined annual volume of

28.1 af in the seconded sentence under the "Quantity" section should be clarified to apply only to "Irrigation" and "Aesthetic Storage" purposes. Diversion and use of water for the purpose listed as "Aesthetic" under the "Purpose and Period of Use" section of the recommendation for this right should not be subject to these annual volume limits, in accordance with the development and use of the right and as licensed by IDWR. Water in addition to that required for irrigation and to fill the pond has always been diverted to flow through the pond to maintain the quality of water in the pond.

- 2) The 21.6 af volume for irrigation in the first sentence under the "Quantity" section in the recommendation for this right is a clerical error. The numbers have been transposed from 26.1 af licensed under Right No. 63-10818.
- 3) Paragraphs related to conditions of approval from Transfer No. 71237 that are no longer applicable should be dropped from the "Other Provisions Necessary for Definition or Administration of this Water Right" and the "Explanatory Material" sections of the recommendation for this right; i.e. Paragraph 2 under "Other Provisions..." section and Paragraphs 3 and 5 under "Explanatory Materials" section should be deleted from the recommendation for this right. The new well for the change in point of diversion approved by the transfer has been constructed and the old well has been abandoned. Drillers' reports have been filed with IDWR documenting compliance.

F. VERIFICATION (Must be Completed)

State of Idaho)
) ss.
County of Ada)

I, Dale Matthews, duly sworn, upon oath, deposes and says:
(Name of person filing objection)

That I am the party/claimant filing this objection, as defined by I.C. §§ 42-1401A (1) and (6) or that I am the attorney for the party/claimant objecting and that I have read this objection, know its contents and believe that the statements are true to the best of my knowledge.

5 ACRES TOTAL

USE OF THIS RIGHT WITH RIGHT NO. 63-10818 IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 5.8 ACRES IN A SINGLE IRRIGATION SEASON.

This right is limited to the irrigation of 4.8 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Water Right 63-8402

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The right holder shall accomplish the change authorized by Transfer 71237 within one year of the date of this approval.

EXPLANATORY MATERIAL: License

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

This right does not grant any right-of-way or easement across the land of another.

IDAHO DEPARTMENT OF WATER RESOURCES
Adjudication Recommendation Report 63-8402 V1

Comments:

1. csaxton 5/10/2004 Overlap

Comment: This right overlaps with rights: 63-08402, 63-09658, and 63-10818. Note: 63-10818 was not filed on in the adjudication and was not required to be. A transfer has been filed on these rights to change/add one point of diversion.

2. csaxton 5/10/2004 Claimed POD

Comment: Claimed 2 points of diversion, but was only licensed for one POD in NENW section 26. No evidence to show that the second POD was in place prior to 1987. Recommend as licensed. Transfer needs to be filed.

3. csaxton 5/10/2004 POU Aesthetic

Comment: Place of use for Aesthetics claimed use in Section 23, SESW, however that use was not licensed in that QQ. No evidence that the change took place prior to 1987. Recommend as license. Transfer needs to be filed.

4. Iharris 12/28/2004 Approved Transfer

Comment: Recommendation amended per Transfer 71237 approved 11/1/04.

5. ~~csaxton~~ 1/18/2005 POD

~~Comment: Approved Transfer #: 71237 on 11/1/04, added second POD in NENW of section 26, T3N, R2E. Recommended to reflect TR 71237.~~

CONDITIONS OF APPROVAL

1. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.
4. This right does not grant any right-of-way or easement across the land of another.
5. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
6. After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

WATER RIGHT NO. 63-8402
As Modified by Transfer No. 71237

CONDITIONS OF APPROVAL

7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
8. The total instantaneous diversion of water from all points of diversion under Rights 63-8402, 63-9658 and 63-10818 shall not exceed 0.42 cfs, nor a total combined annual volume of 28.1 af.
9. This right is limited to the irrigation of 4.8 acres within the place of use described above in a single irrigation season.
10. *Ant* Rights 63-8402 and 63-10818 when combined for irrigation purposes shall not exceed a total diversion rate of 0.12 cfs, a total annual diversion volume of 21.6 af and the irrigation of 5.8 acres. *POU*
11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
12. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
13. *POD* Rights 63-9658 and 63-10818 are also diverted through the points of diversion described above.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Dated this 1st day of November, 2004

Chief, Water Allocation Bureau

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
TRANSFER OF WATER RIGHT
TRANSFER NO. 71237

This is to certify that: LAKEWOOD UNIT NO 4 HOMEOWNERS ASSN
3156 WOODBROOK PL

A. PURPOSE OF TRANSFER

- 1.
- ☒
- Change point of diversion
- ☐
- Add diversion point(s)
- ☐
- Change place of use

☐ Change nature of use ☐ Change period of use ☐ Other _____

2. Describe the reason for the proposed changes
- REPLACE WELL IN NWNE WITH
-
- A NEW WELL IN NEKW

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use
<u>63-10818</u>	<u>6-22-89</u>	<u>0.12/26.1</u>	<u>IRRIGATION</u>	<u>3-1</u> to <u>11-15</u>
<u>63-9658</u>	<u>3-1-81</u>	<u>0.42 CFS</u>	<u>DIVERSION TO STORAGE</u>	<u>10-1</u> to <u>4-15</u>
<u>63-9658</u>	<u>3-1-81</u>	<u>11.0 AFA</u>	<u>AESTHETIC STORAGE</u>	<u>1-1</u> to <u>12-31</u>
<u>63-8402</u>	<u>1-11-77</u>	<u>0.30 CFS</u>	<u>AESTHETIC</u>	<u>1-1</u> to <u>12-31</u>
<u>63-8402</u>	<u>1-11-77</u>	<u>0.10/21.4</u>	<u>IRRIGATION</u>	<u>3-15</u> to <u>11-15</u>
<u>63-8402</u>	<u>1-11-77</u>	<u>1.0 AFA</u>	<u>AESTHETIC STORAGE</u>	<u>1-1</u> to <u>12-31</u>

2. Total amount of water being transferred
- 0.42
- cubic feet per second and/or
- 22.1
- acre-feet per annum.

3. Source of water
- GROUNDWATER
- tributary to
- N/A

Director at Large:

Bill Heath 336-5359

5-10-04: Overlap for Aesthetic Storage with 63-09658.

However, Dan Nekone's calculations said maximum Pond Volume is 2.61 afc of storage. License's 63-09658 and 63-08402 don't show Volume Limiters, and in combination do not exceed Pond Capacity. Since 63-09658 was licensed in 2002 and shows a limiter on rate but not Vol, I see no reason to add a diversion Volume limiter. Remaining Storage Vol of 0.61 AFA can be covered in Pending Permits.

: Aesthetic and Aesthetic Storage only licensed for POU in NENW 526. Can only Recommend Aesthetic in that QA.

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. **Measurements:** During my visit there was a blown mainline on the sprinkler system. Therefore, the applicant could not run both pumps to get an adequate measurement. I performed a theoretical for each well and used the pump curve determine the capacity of each system.

E. NARRATIVE/REMARKS/COMMENTS

This system IS supplied by 2 wells. The first well is known as the Carter Well. This well is located in the NWNE of S 26. The well open discharges into a small vault approximately 35 feet northeast of the well. The water is transported from the vault through a buried mainline in a northeasterly direction to the northeast corner of the NENW of S 26 where it enters another vault. The water from this point travels southwest to the Carter Irrigation Vault. The water in the Carter Irrigation Vault can be diverted through a 7.5 Hp irrigation pump that delivers irrigation water to the homes on the east side of the subdivision. The 7.5 Hp pump diverts approximately 140 gpm or 0.31 cfs into the irrigation system. All remaining water is delivered to the series of ponds in the subdivision. The water from the ponds can flow into the irrigation vault if the Carter well is not being operated.

The second well is known as the Raindrop Well. This well is the main well for the system. The water from the Raindrop well is connected to the irrigation system that supplies the subdivision lots on the eastern side of the subdivision. The subdivision has a timer set to switch the Raindrop well to the irrigation system at night and then switch it back to the ponds during the day. The Raindrop well open discharges directly into the ponds. There is a 10 Hp circulation pump in the Raindrop well pump house that pulls water already in the pond and delivers it to 4 places in the pond system to keep the water circulating through the pond system. The Raindrop Re-circulation pump diverts water at a rate of 600 gpm or 1.34 cfs and only pumps water already diverted into the ponds.

The ponds are all connected and the water flows from one pond to another. The lowest elevation point is located at the Raindrop pump house. This area has an overflow drain that feeds into the City of Boise's storm drain system. This drain is used to regulate the water levels in the pond. The circulation pump is used to keep the water moving within the system as much as possible to avoid over pumping the wells. The entire system is tied together and either well can fill the pond system and irrigated the grounds associated with the Carter Irrigation Vault. The irrigation line from the Raindrop well can only be supplied by the Raindrop well.

The pond system is actually one large pond varying in size and proportions to a few feet wide to several feet wide. I used the GIS system to determine a surface area of the pond of .87 acres and an average depth of 3 feet. This equates to a total pond volume of 2.61 acre-feet. The irrigation out of this system was calculated at 5.8 acres of irrigation.

OVERLAP

Water right 63-8402 was the original water right for this subdivision. This water right allows for 5 acres of irrigation at 0.10 cfs (0.02 cfs/acre) and 21.4 acre feet (4.28 afa/acre); Aesthetic use for 0.30 cfs continuous flow; and Aesthetic storage for 1 acre feet of volume. This right only used the Raindrop well for this system. Permits 63-09658 and 63-10818 were filed to add the Carter well and to bring the original right up to the full capacity of the system. Although the capacity of the system has increased with the addition of the new well, the ability to put that water to use is minimal. The maximum pond volume that could be allowed is 2.61 afa minus the 1 afa from 63-8402 equals 1.61 afa of storage for these permits. The irrigation will also be limited by 5.8 acres total irrigation minus 5 acres from 63-8402 equals 0.80 acres left to license for irrigation.

RECOMMENDATIONS:

I recommend that this permit be licensed for 0.42 cfs for diversion to storage and 1.6 afa for aesthetic storage. The remainder of the aesthetic uses are covered under water right 63-8402. When combined with water rights 63-8402 and 63-10818 the total allowable diversion at anytime from these two wells will be 0.42 cfs and when combined with 63-8402 the total annual volume for aesthetic storage should be limited to 2.6

FM6-FB6

afa.

Have conditions of permit approval been met? X yes no

F. FLOW CALCULATIONS

YES Additional Computation Sheets Attached

Measured Method:

95 GPM FOR EACH WELL x 2 WELLS = 190 GPM CAPACITY FOR SYSTEM

190 GPM CAPACITY / 448.8 = .42 CFS MAXIMUM ALLOWABLE DIVERSION RATE.

THIS PERMIT IS LIMITED TO .78 SO THE MAXIMUM ALLOWABLE DIVERSION RATE IS THE SYSTEM CAPACITY OF .42 CFS.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

 $V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$ $V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$ $V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} =$

B

2. Volume Calculations for Other Uses:

SURFACE AREA WAS CALCULATED AT 0.87 ACRES AT AN AVERAGE DEPTH OF 3 FEET. THEREFORE, THE TOTAL VOLUME OF STORAGE IS $0.87 \times 3 = 2.61$ AFA. $2.61 \text{ AFA} - 1.00 \text{ AFA FROM 63-8402} = 1.61 \text{ AFA VOLUME ALLOWABLE FOR THIS PERMIT}$ **H. RECOMMENDATIONS**

1. Recommended Amounts

D. FLOW MEASUREMENTS

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. **Measurements:** During my visit there was a blown mainline on the sprinkler system. Therefore, the applicant could not run both pumps to get an adequate measurement. I performed a theoretical for each well and used the pump curve determine the capacity of each system.

E. NARRATIVE/REMARKS/COMMENTS

This system IS supplied by 2 wells. The first well is known as the Carter Well. This well is located in the NWNE of S 26. The well open discharges into a small vault approximately 35 feet northeast of the well. The water is transported from the vault through a buried mainline in a northeasterly direction to the northeast corner of the NENW of S 26 where it enters another vault. The water from this point travels southwest to the Carter Irrigation Vault. The water in the Carter Irrigation Vault can be diverted through a 7.5 Hp irrigation pump that delivers irrigation water to the homes on the east side of the subdivision. The 7.5 Hp pump diverts approximately 140 gpm or 0.31 cfs into the irrigation system. All remaining water is delivered to the series of ponds in the subdivision. The water from the ponds can flow into the irrigation vault if the Carter well is not being operated.

The second well is known as the Raindrop Well. This well is the main well for the system. The water from the Raindrop well is connected to the irrigation system that supplies the subdivision lots on the eastern side of the subdivision. The subdivision has a timer set to switch the Raindrop well to the irrigation system at night and then switch it back to the ponds during the day. The Raindrop well open discharges directly into the ponds. There is a 10 Hp circulation pump in the Raindrop well pump house that pulls water already in the pond and delivers it to 4 places in the pond system to keep the water circulating through the pond system. The Raindrop Re-circulation pump diverts water at a rate of 600 gpm or 1.34 cfs and only pumps water already diverted into the ponds.

The ponds are all connected and the water flows from one pond to another. The lowest elevation point is located at the Raindrop pump house. This area has an overflow drain that feeds into the City of Boise's storm drain system. This drain is used to regulate the water levels in the pond. The circulation pump is used to keep the water moving within the system as much as possible to avoid over pumping the wells. The entire system is tied together and either well can fill the pond system and irrigated the grounds associated with the Carter Irrigation Vault. The irrigation line from the Raindrop well can only be supplied by the Raindrop well.

The pond system is actually one large pond varying in size and proportions to a few feet wide to several feet wide. I used the GIS system to determine a surface area of the pond of .87 acres and an average depth of 3 feet. This equates to a total pond volume of 2.61 acre-feet. The irrigation out of this system was calculated at 5.8 acres of irrigation.

OVERLAP

Water right 63-8402 was the original water right for this subdivision. This water right allows for 5 acres of irrigation at 0.10 cfs (0.02 cfs/acre) and 21.4 acre feet (4.28 afa/acre); Aesthetic use for 0.30 cfs continuous flow; and Aesthetic storage for 1 acre feet of volume. This right only used the Raindrop well for this system. Permits 63-09658 and 63-10818 were filed to add the Carter well and to bring the original right up to the full capacity of the system. Although the capacity of the system has increased with the addition of the new well, the ability to put that water to use is minimal. The maximum pond volume that could be allowed is 2.61 afa minus the 1 afa from 63-8402 equals 1.61 afa of storage for these permits. The irrigation will also be limited by 5.8 acres total irrigation minus 5 acres from 63-8402 equals 0.80 acres left to license for irrigation.

RECOMMENDATIONS:

I recommend that this permit be licensed for .02 cfs for irrigation of 0.8 acres of ground. The total volume for this permit should be licensed for 4.7 afa for irrigation to bring the entire volume for the 5.8 acres to the 4.5 acre feet of water per acre for the entire place of use. When combined with water rights 63-8402 and 63-9658 the total allowable diversion at anytime from these two wells will be 0.42 cfs and when combined with 63-8402 the total annual volume for irrigation should be limited to 26.1 afa.

Have conditions of permit approval been met? X yes no

F. FLOW CALCULATIONS

YES Additional Computation Sheets Attached

Measured Method:

95 GPM FOR EACH WELL x 2 WELLS = 190 GPM CAPACITY FOR SYSTEM**190 GPM CAPACITY / 448.8 = .42 CFS MAXIMUM ALLOWABLE DIVERSION RATE.****THIS PERMIT IS LIMITED TO .02 CFS/ACRE TIMES 0.8 ACRES = .02 CFS****G. VOLUME CALCULATIONS**

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 0.8 \text{ ACRES} \times 4.5 = 3.6 \text{ AFA}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.02 \times 260 \times 1.9835 = 9.5 \text{ AFA}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 3.6 \text{ MAXIMUM ALLOWABLE}$$

PLEASE NOTE: The maximum allowable for all 5.8 acres is 26.1 afa (5.8 acres x 4.5 = 26.1 afa). Only 21.4 afa has been licensed for the 5.8 acres. Therefore, I recommend that 4.7 afa be licensed under this permit.

BY: Daniel A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$$Q = \frac{(8.8) \times (5 \text{ hp}) \times (0.70)}{[(19) + (10 \times 2.31)]} = \frac{30.8}{42.1} = .73 \text{ CFS}$$

NOTES ON PUMP:

Motor Make, Serial or ID

Pump Make, Serial or ID, rating

REMARKS: Pumping level was calculated
by subtracting total well depth minus
static water level and dividing by 2.
43 FT - 9 1/2 = 17 FT. + 10 FT for
this did not seem reasonable so
I calculated pumping level by
adding 10 FT to static level on
19 FT.
Pressure was calculated at 10 PSI.

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA) SPECIAL MASTER'S REPORT
Case No. 39576)
) FINDINGS OF FACT AND
) CONCLUSIONS OF LAW
)
) FOR WATER RIGHTS 63-08402
) and 63-09658

I. FINDINGS OF FACT

A notice of claim was filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On April 11, 2006, the claimant of these water rights, the Lakewood No. 4 Homeowners Association, filed objections to the *Director's Report*. On December 1, 2006, the parties to the subcases filed a *Standard Form 5 - Stipulated Elements of a Water Right*, which resolved the objection. The Idaho Department of Water Resources concurred in the stipulation.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Forms 5*, IT IS RECOMMENDED that water rights 63-08402 and 63-09658 be decreed with the elements as set forth in the attached *Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b)*.

NOTICE OF ISSUANCE OF
SPECIAL MASTER'S
RECOMMENDATION

Water Right(s): 63-08402
63-09658

On December 19, 2006, Special Master THEODORE R. BOOTH issued a SPECIAL MASTER'S RECOMMENDATION for the above subcase(s) pursuant to SRBA Administrative Order 1 (AO1), Section 13a.

Pursuant to SRBA Administrative Order 1, Section 13a, any party to the adjudication including parties to the subcase, may file a Motion to Alter or Amend on or before the 28th day of the next month.

Failure of any party in the adjudication to pursue or participate in a Motion to Alter or Amend the SPECIAL MASTER'S RECOMMENDATION shall constitute a waiver of the right to challenge it before the Presiding Judge.

STANDARD FORM 5

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties and IDWR agree and stipulate that the elements of this water right should be described per the attached. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages.

5 ACRES TOTAL

USE OF THIS RIGHT WITH RIGHT NO. 63-10818 IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 5.8 ACRES IN A SINGLE IRRIGATION SEASON.

~~This right is limited to the irrigation of 4.8 acres within the place of use described above in a single irrigation season.~~

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

~~The right holder shall accomplish the change authorized by Transfer 71237 within one year of the date of this approval.~~

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

This right does not grant any right-of-way or easement across the land of another.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

After specific notification by the Department, the right holder shall record the quantity of water diverted or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
