1. The area outlined in red is a residential zone. It contains several large, multi-story apartment buildings and smaller houses. The area is surrounded by a mix of commercial and industrial buildings. The red outline highlights a specific area within the residential zone, possibly a school or a community center. The area is located in the center-left of the image, near a large building complex. The red outline follows a path that starts near a large building complex, moves south, then east, and finally north, enclosing a smaller area.

INSTRUCTIONS

Department of Water Resources

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

Vickie, I think the
only thing we can do is
add the remark to
Dry Creek's recommendation
that it's "Believed through

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source): Claimant concurs with the recommendation for water right number 63-164E, provided the claim is recommended by the Director as part of water right number 63-164D which is to be recommended. This water is delivered through the Farmers Union Canal and Farmers Union requests the water right be recommended as held by Dry Creek Cemetery under water right no. 63-164D. Review of the Department records does not however, currently reflect water right number 63-164D as a recommended right.
2. Describe the changes you wish to make in the proposed recommendation: Farmers Union requests the recommendation be changed to reflect a requirement that Dry Creek Cemetery's water is delivered through the Farmers Union canal, and that delivery through the canal is necessary for the operation of the Farmers Union canal, and therefore cannot be transferred out of the Farmers Union canal.
3. Give a brief explanation as to why you disagree with these portions:

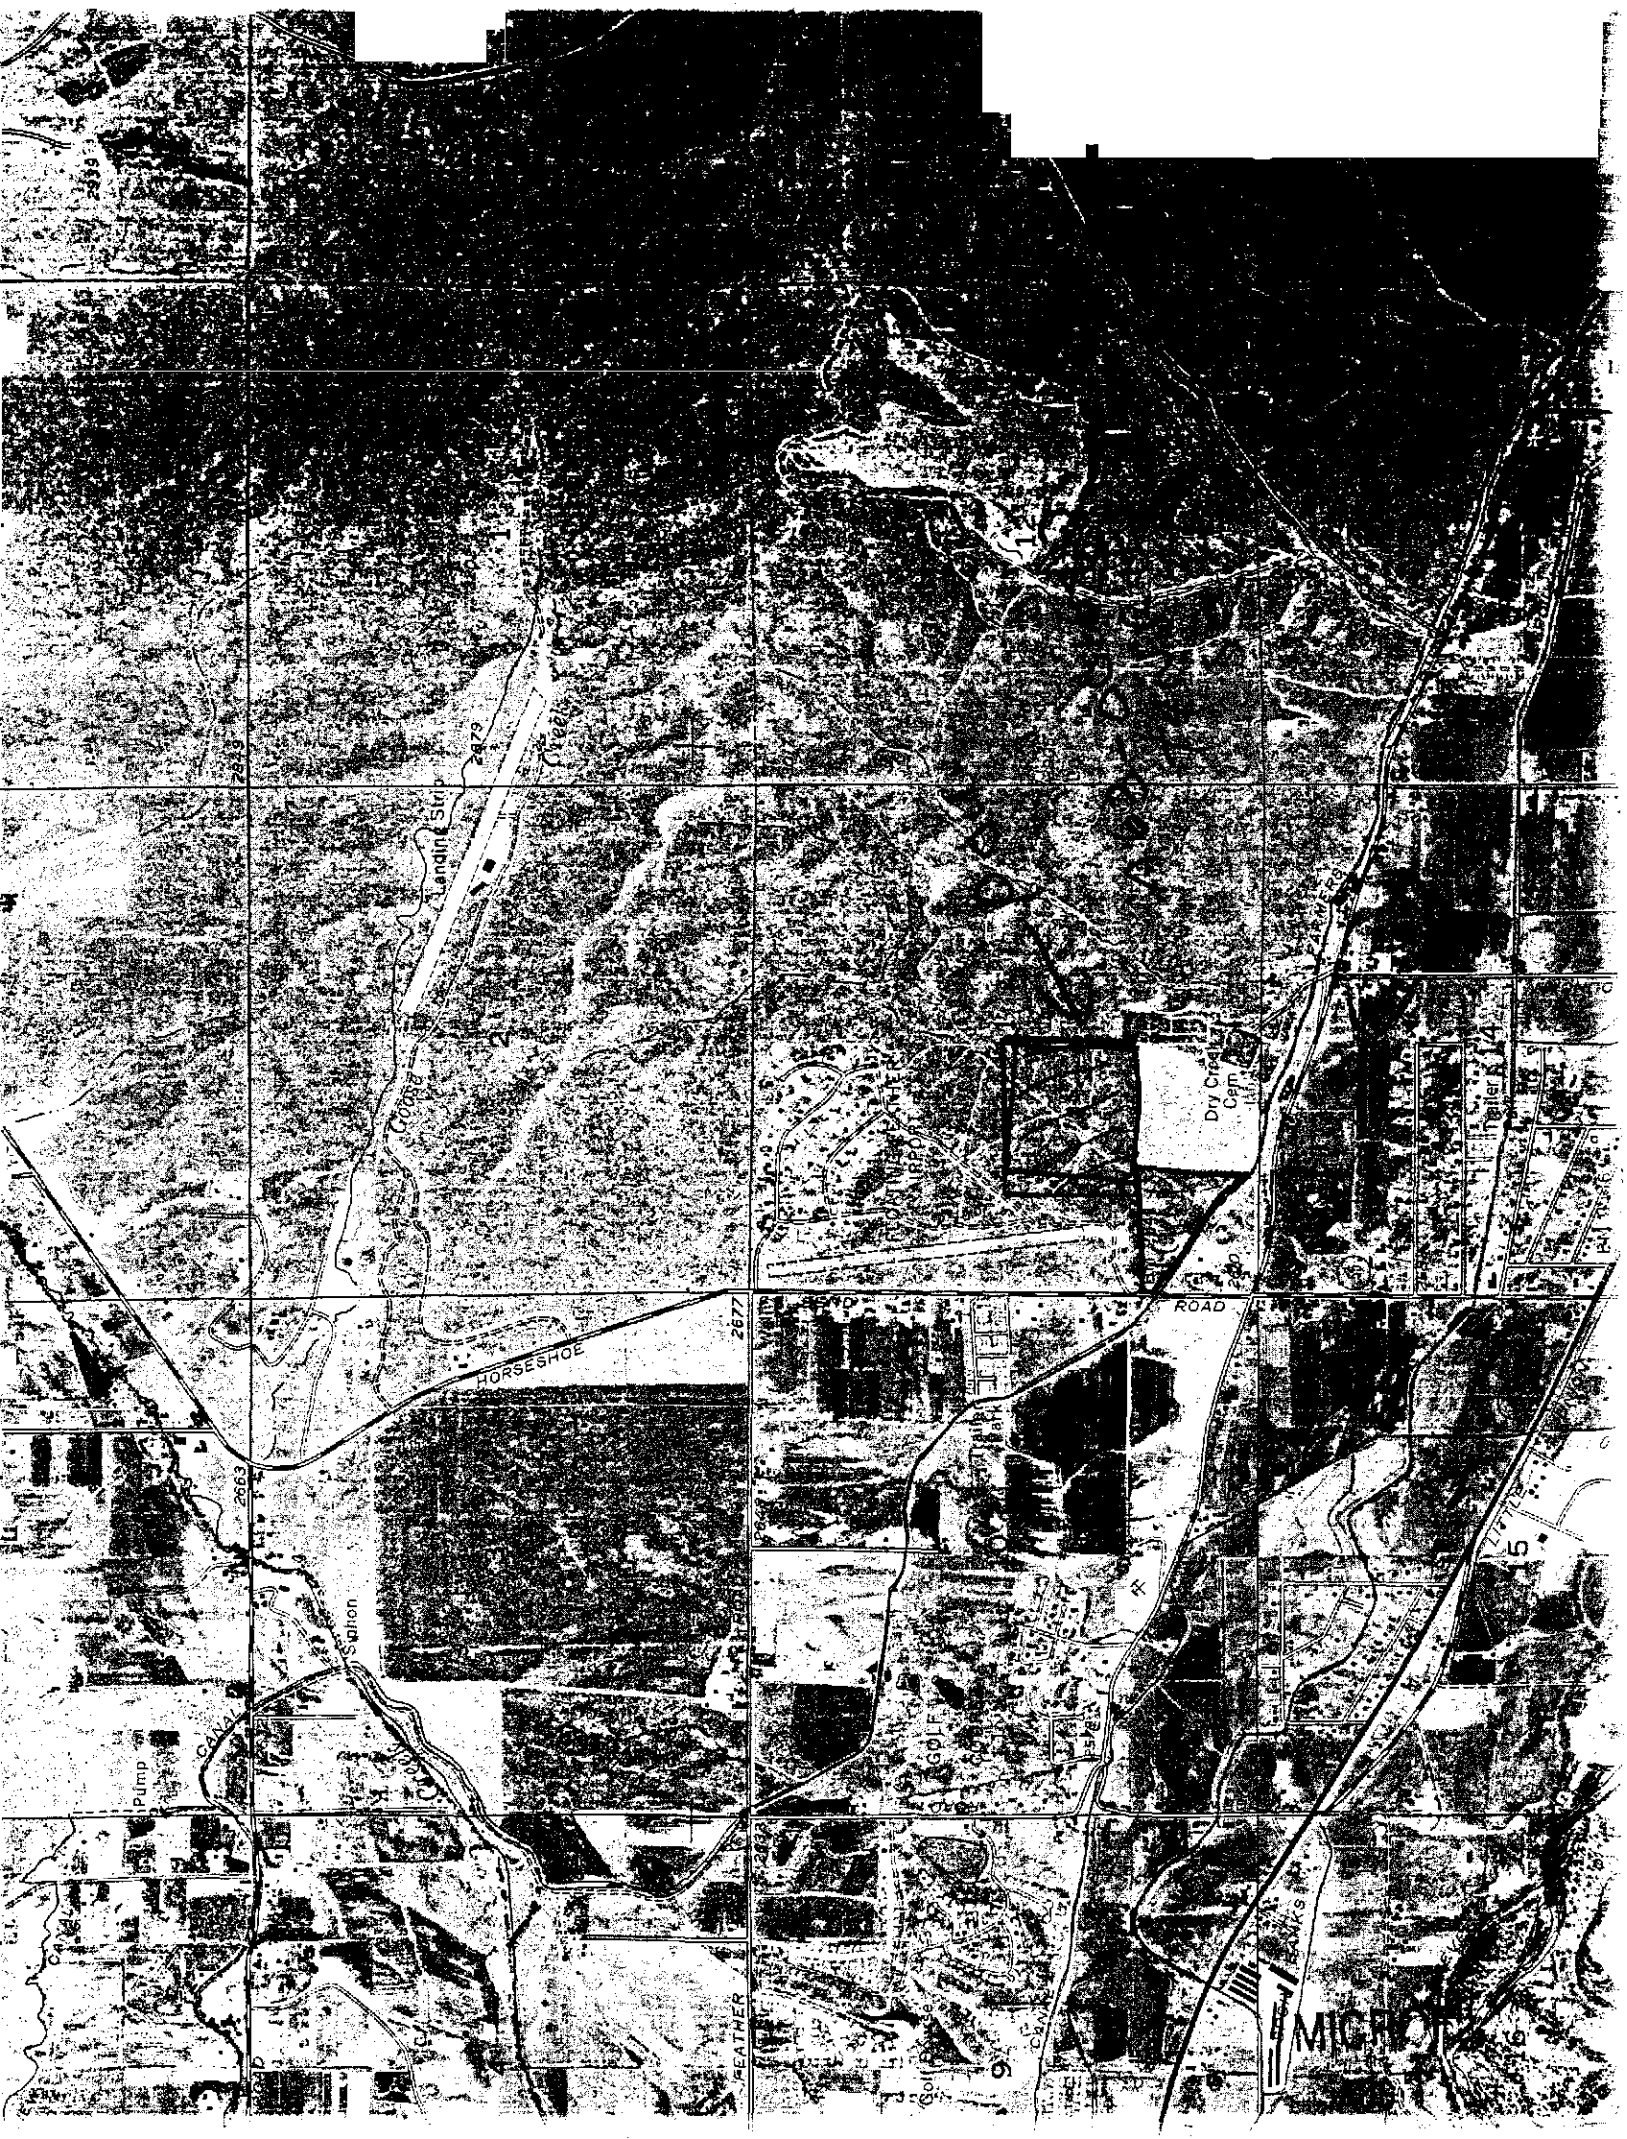

_____ I AGREE with this proposed recommendation: no changes need to be made.

BOISE ID 83703

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 0.480 CFS

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

This right when combined with Right Nos. 63-3480, 63-7362, 63-7399 and 63-17476 shall provide no more than .02 cfs per acre.

The rights listed below are limited to the irrigation of a combined total of 29 acres in a single irrigation season. Combined Right Nos.: 63-164D, 63-3480, 63-7362, 63-7399 and 63-17476.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

This right is also designated as Right No. 32 in the Boise River Decree and the Water Distribution Report.

This right is a split from former right 63-164B.

Water is delivered through the Farmers Union Ditch Co.

MEMORANDUM TO CLAIM FILE

TO: CLAIM FILE NO. 63-164D
FROM: VICKY L MUSIC, SR WATER RESOURCE AGENT, IDWR / WESTERN
REGION
SUBJECT: BASIS FOR RECOMMENDATION – REDUCTION IN ACRES
DATE: 8/23/2005, 10/24/2005
CC:

This claim is a Boise River decreed right no. 32. The quantity was decreed - 175 inches [3.5 cfs]. There were no # of acres decreed. There were subsequent splits and transfers and transfer no. 1855 in 1975 split the right in C and D. 63-164D was transferred in the name of Syringa Gardens and transferred the pod and pou; 72 acres of irrigation, 1.8 cfs to the right in the current location, with the water to be carried and delivered through the Farmers Union ditch. SRBA claim is for irrigation and settling pond. 2 ? small ponds are seen in 1987 and 2003 aerials.

Overlapping rights, all in T4N R1E Section 11, are licenses:

63-3480	2/15/66	19 acres in SWSW	.39 cfs	ground water
63-7399	2/22/71	15.2 acres in SWSW	.32 cfs	ground water
63-7362	8/17/1970	<u>7 acres</u> in SESW	.22 cfs	ground water
TOTAL		26 acres		

and overlapping beneficial use rights are :

63-16957	1967	domestic, no irrigation	ground water
63-17476	1900	domestic, irrigation – 3 acres	ground water
		<u>2 acres</u> – SESW, 1 acre – SWSE	
TOTAL		3 acres	

Sr. Water Resource Agent, Kimberly Brown, found a combined total of 26 acres irrigated under the 3 licenses during her claims review. We don't know why, but Dry Cr. Cemetery licenses are for the same acres in the SWSW Section 11. They cannot be additive because the cemetery does not own the remaining approximately 21 acres of the SWSW. Additionally, Kimberley recommended 3 acres under 63-17476 [for a total of 29 acres irrigation] which is for the original cemetery dating back to the turn of the century. She did a site visit in March 2005.

I reviewed aerial photos for the years 1964, 1987, 1995 and 2003. In 1987, I found approximately 57.4 acres that appeared to be irrigated or cultivated/cleared. In

1995 and 2003 photos the same 57+ acres appeared irrigated. In 2003, I calculated 57.6 acres irrigated.

However, it does not appear that a water right for 72 acres was developed. The total acreage owned by the cemetery district is 88 acres. The entire north portion of the property, though claimed, has not appeared irrigated in any of the aerals. Additionally, the acres irrigated in the 1995 and 2003 aerals in the SESW are not claimed or licensed. It appears that the only acres the cemetery has licenses for and has claimed that are irrigated are the 19 acres in the SWSW, the 7 acres in the SESW, and the 3 acres in the SWSE.

I cannot recommend any of the cemetery property that has been developed as an accomplished transfer in place of use because there are no acres claimed or licensed from which to transfer the acres.

Based on the above, I reduced the number of acres to 19 and the quantity under this right to .48 cfs based on the transferred duty of water of 0.025/acre.

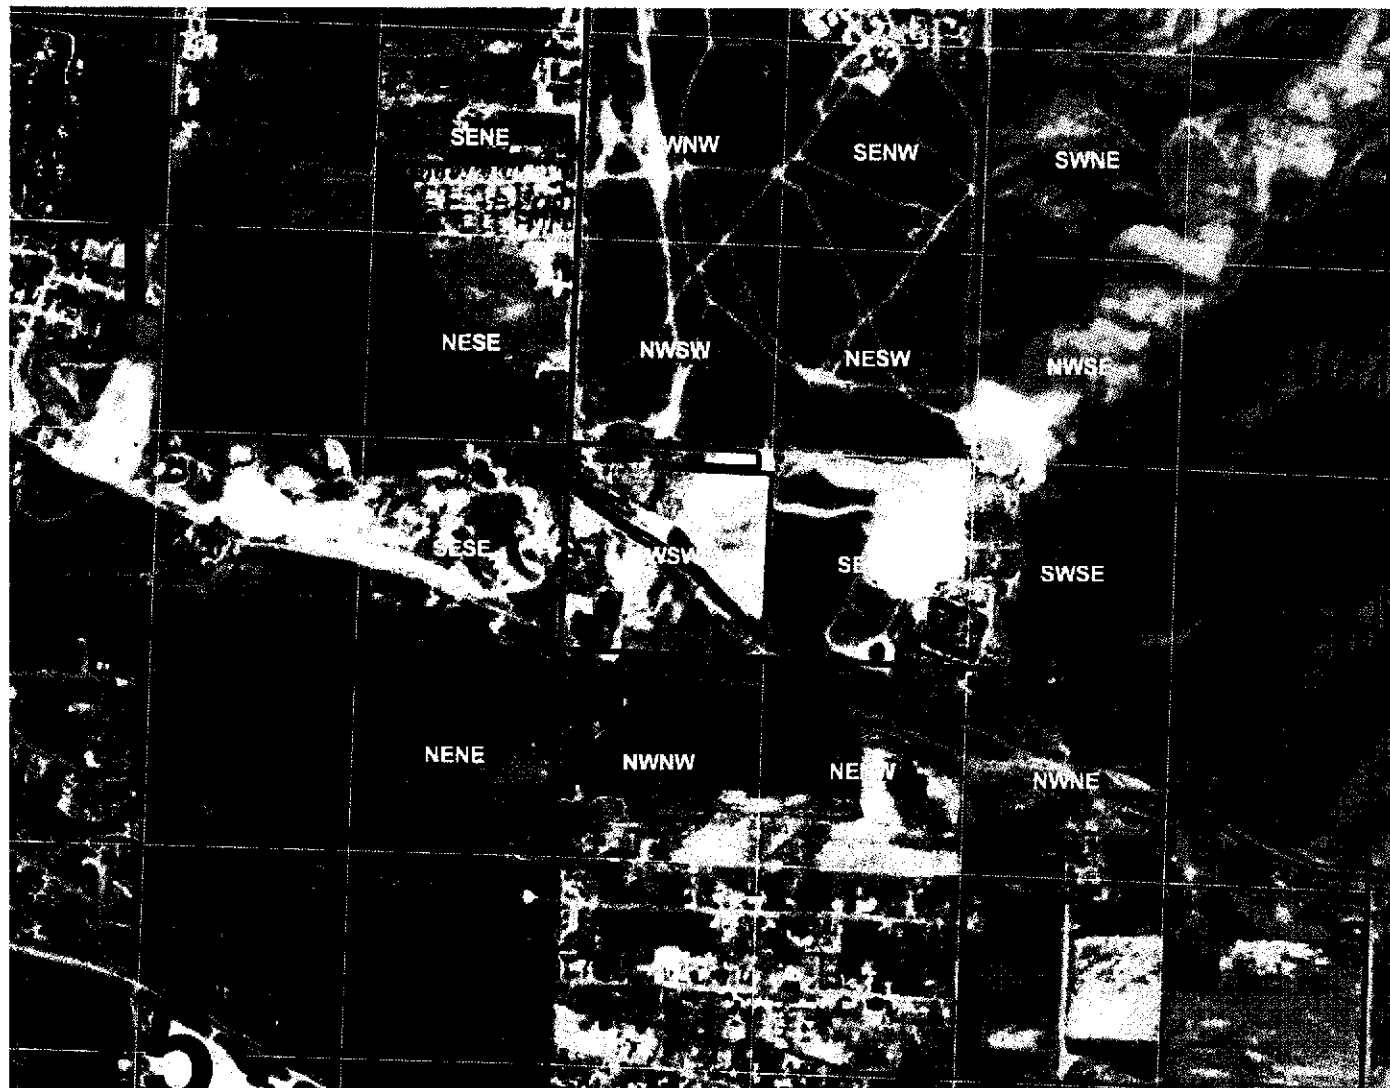

Lastly, someone from Farmers Ditch called Mel several months ago to request that we recommend this right with a requirement that the delivery of the right always be from Farmers Ditch but this is beyond the scope of review and recommendation by IDWR.

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source): Claimant concurs with the recommendation for water right number 63-164E, provided the claim is recommended by the Director as part of water right number 63-164D which is to be recommended. This water is delivered through the Farmers Union Canal and Farmers Union requests the water right be recommended as held by Dry Creek Cemetery under water right no. 63-164D. Review of the Department records does not however, currently reflect water right number 63-164D as a recommended right.
2. Describe the changes you wish to make in the proposed recommendation: Farmers Union requests the recommendation be changed to reflect a requirement that Dry Creek Cemetery's water is delivered through the Farmers Union canal, and that delivery through the canal is necessary for the operation of the Farmers Union canal, and therefore cannot be transferred out of the Farmers Union canal. *Con. 7 Dr*
3. Give a brief explanation as to why you disagree with these portions:

_____ I AGREE with this proposed recommendation: no changes need to be made.

MEMORANDUM TO CLAIM FILE

TO: CLAIM FILE NO. 63-164D
FROM: VICKY L MUSIC, SR WATER RESOURCE AGENT, IDWR / WESTERN
REGION
SUBJECT: BASIS FOR RECOMMENDATION – REDUCTION IN ACRES
DATE: 8/23/2005, 10/19/2005
CC:

This claim is a Boise River decreed right no. 32. The quantity only was decreed - 175 inches [3.5 cfs] only. There were no # of acres decreed. There were subsequent splits and transfers and transfer no. 1855 in 1975 split the right in C and D, D in the name of Syringa Gardens and transferred the pod and pou; 72 acres of irrigation, 1.8 cfs to the right in the current location, with the water to be carried and delivered through the Farmers Union ditch. SRBA claim is for irrigation and settling pond. 2 ? small ponds are seen in 1987 and 2003 aeriels.

Overlapping rights, all in T4N R1E Section 11, are licenses:

63-3480	2/15/66	19 acres in SWSW	.39 cfs	ground water
63-7399	2/22/71	15.2 acres in SWSW	.32 cfs	ground water
63-7362	8/17/1970	7 acres in SESW	.22 cfs	ground water

and overlapping beneficial use rights are :

63-16957	1967	domestic, no irrigation	ground water
63-17476	1900	domestic, irrigation – 3 acres	ground water
		2 acres – SESW, 1 acre - SWSE	

Sr. Water Resource Agent, Kimberly Brown, found a combined total of 26 acres irrigated under the 3 licenses during her claims review. We don't know why, but Dry Cr. Cemetery licenses are for the same acres in the SWSW Section 11. They cannot be additive because the cemetery does not own the remaining approximately 21 acres of the SWSW. Additionally, Kimberley recommended 3 acres under 63-17476 [for a total of 29 acres irrigation] which is for the original cemetery dating back to the turn of the century. She did a site visit in March 2005.

I reviewed aerial photos for the years 1964, 1987, 1995 and 2003. In 1987, I found approximately 57.4 acres that appeared to be irrigated or cultivated/cleared. In 1995 and 2003 photos the same 57+ acres appeared irrigated. In 2003, I calculated 57.6 acres irrigated.

However, it does not appear that a water right for 72 acres was developed. The total acreage owned by the cemetery district is 88 acres. The entire north portion of the property, though claimed, has not appeared irrigated in any of the aerals. Additionally, the acres irrigated in the 1995 and 2003 aerals in the SESW are not claimed or licensed. It appears that the only acres the cemetery has licenses and claimed that are irrigated are the 19 acres in the SWSW, the 7 acres in the SESW, and the 3 acres in the SWSE.

I cannot recommend any of the cemetery property that has been developed as an accomplished transfer in place of use because there are no acres claimed or licensed from which to transfer the acres.

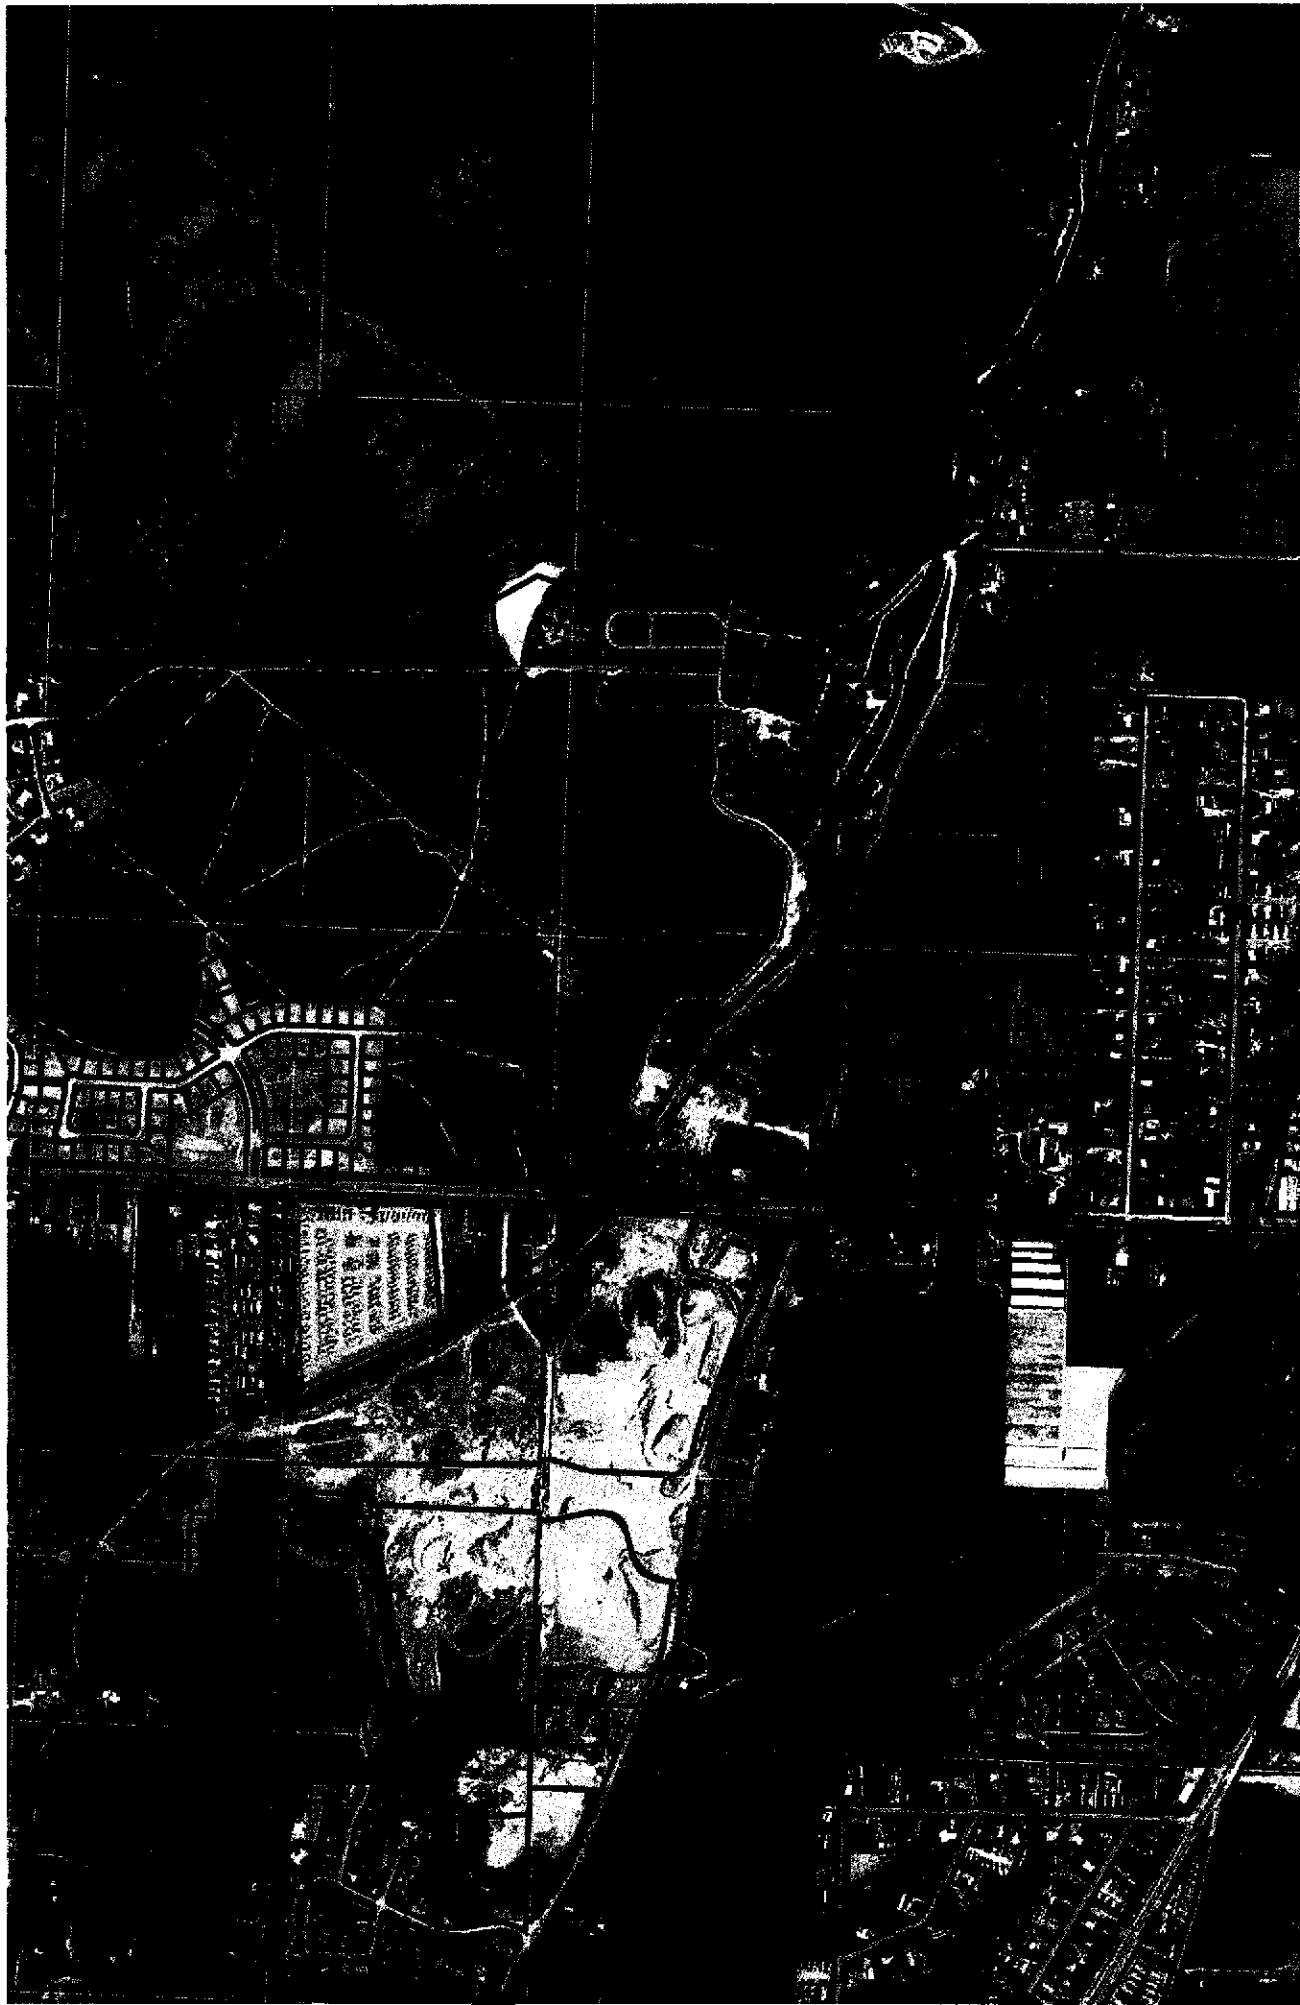

Based on the above, I reduced the number of acres to 19 and the quantity under this right to .48 cfs based on the transferred duty of water of 0.025/acre. Because this is a Boise R decreed right, the original point of diversion must be recommended, not the transferred pod.

Lastly, someone from Farmers Ditch called Mel several months ago to request that we recommend this right with a requirement that the delivery of the right always be from Farmers Ditch but this is beyond the scope of review and recommendation by IDWR.

WATER RIGHT LICENSE

License of Water Right No. 63-7362 Priority August 17, 1970 Amount 0.22 cfs

THIS IS TO CERTIFY, that Dry Creek Cemetery District
of Boise, Idaho, has complied with the terms and conditions of Permit
No. 63-7362 issued pursuant to Application for Permit dated August 17, 1970,
and has submitted proof to the Department of Water Resources on August 20, 1975,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.22 cfs of water from a ground water source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>April 1</u> to <u>Oct. 15</u>	<u>0.22</u> cfs and	<u>31.5 acre feet or</u> <u>4.5 af per acre</u>
