Re: Well Location for Water Right No. 63-2858B

Dear Ms. Taylor:

You wrote to the Idaho Department of Water Resources (IDWR) last December regarding the correct well location for the above referenced water right. You indicated that your water right did not include the correct well.

Please see the enclosed information that includes the following:

- Copy of decreed water right 63-2858B. The decree resulted from the Snake River Basin Adjudication (SRBA).
- Copy of IDWR Adjudication Recommendation for 63-2858B. This recommendation was used by the Court to decree the right.
- Copy of IDWR aerial map that reflected the adjudication recommendation. It was too late under SRBA procedures to change the recommendation map by last December because the SRBA notice of error process was already completed by then.

Your water right authorizes the use of one well located in the SE ¼ SE ¼ of Section 34. This means you can use any single well to irrigate the acres described by your water right. It does not mean you must use the well marked on the aerial photo. Provided you limit use of this water right to a single well in the SE ¼ SE ¼ of Section 34, you do not have to make any formal change to your water right. IDWR could not make any formal change to your water right under these circumstances.

However, if you want to use more than one well for this right, you would need to make a formal change to your water right by filing an Application for Transfer subject to IDWR approval. This does not appear to be the case based on your letter.

Mary Taylor
May 1, 2007

IDWR will keep your letter in the water right file in case additional questions come up regarding which well you use for water right 63-2858B.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 334-2190 if you need more information.

Sincerely,

Re: Water Right # 63-2858B
Point of diversion

Dear Mr. Lester,

This letter is a house cleaning item in an effort to help IDWR correct the attached map. In regard to the above mentioned water right, my point of diversion is incorrect on the attached IDWR map. This water right point of diversion should be moved from point "A" to "B", the sight of my well.

Along with my letter, please find another from Jan Combe correcting her point of diversion for her water right #63-2858A.

We have both attached letters of request and maps showing the corrections needed. If it is possible, we would appreciate a copy of the map after it is corrected. It is not necessary to mail it. I would be happy to pick it up at your office. Please call me when the correction is made, or if you have any questions. Thank you for your help.

Sincerely,

BOISE, IDAHO

REPORT OF ENGINEER

Permit No. 22074

This proof is for Completion of Works & Beneficial Use In Water District No.

1. Name of applicant G. L. VanHoover

2. Source of water supply: Subterranean flow from a well

3. Location of point of diversion: Is in the SE 1/4 of Section 34

Twp. 5 N., Rge. 1 W., B.M. County of Ada

4. Describe works as they exist, giving dimensions and capacities of same: Well is 86' x 8" d.

Cased to bottom. Bottom 24' is perforated. H is 33' dd is 11'

Pump is a Pomona Turbine #1283. 17 stage 4" sets at 78' down. Motor is a Westinghouse 7 1/2 hp. 220v. 3 ph. 21 amps #32EMI232. Main line pipe is 4" d. portable aluminum. Laterals are 3". Sprinklers are size 5/32" both nozzles. Some of the heads use but one nozzle. 36 sprinkler heads.

Says he has used as high as 31 at one time with good pressure.

5. Water is used for: Irrigation and Domestic

6. State whether or not water has been turned into works of diversion: yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

10 acres in the NE 1/4 of Sec. 34, Twp. 5 N., Rge. 1 W., B.M.

See map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: This water is a primary supply. Crops are hay and pasture.

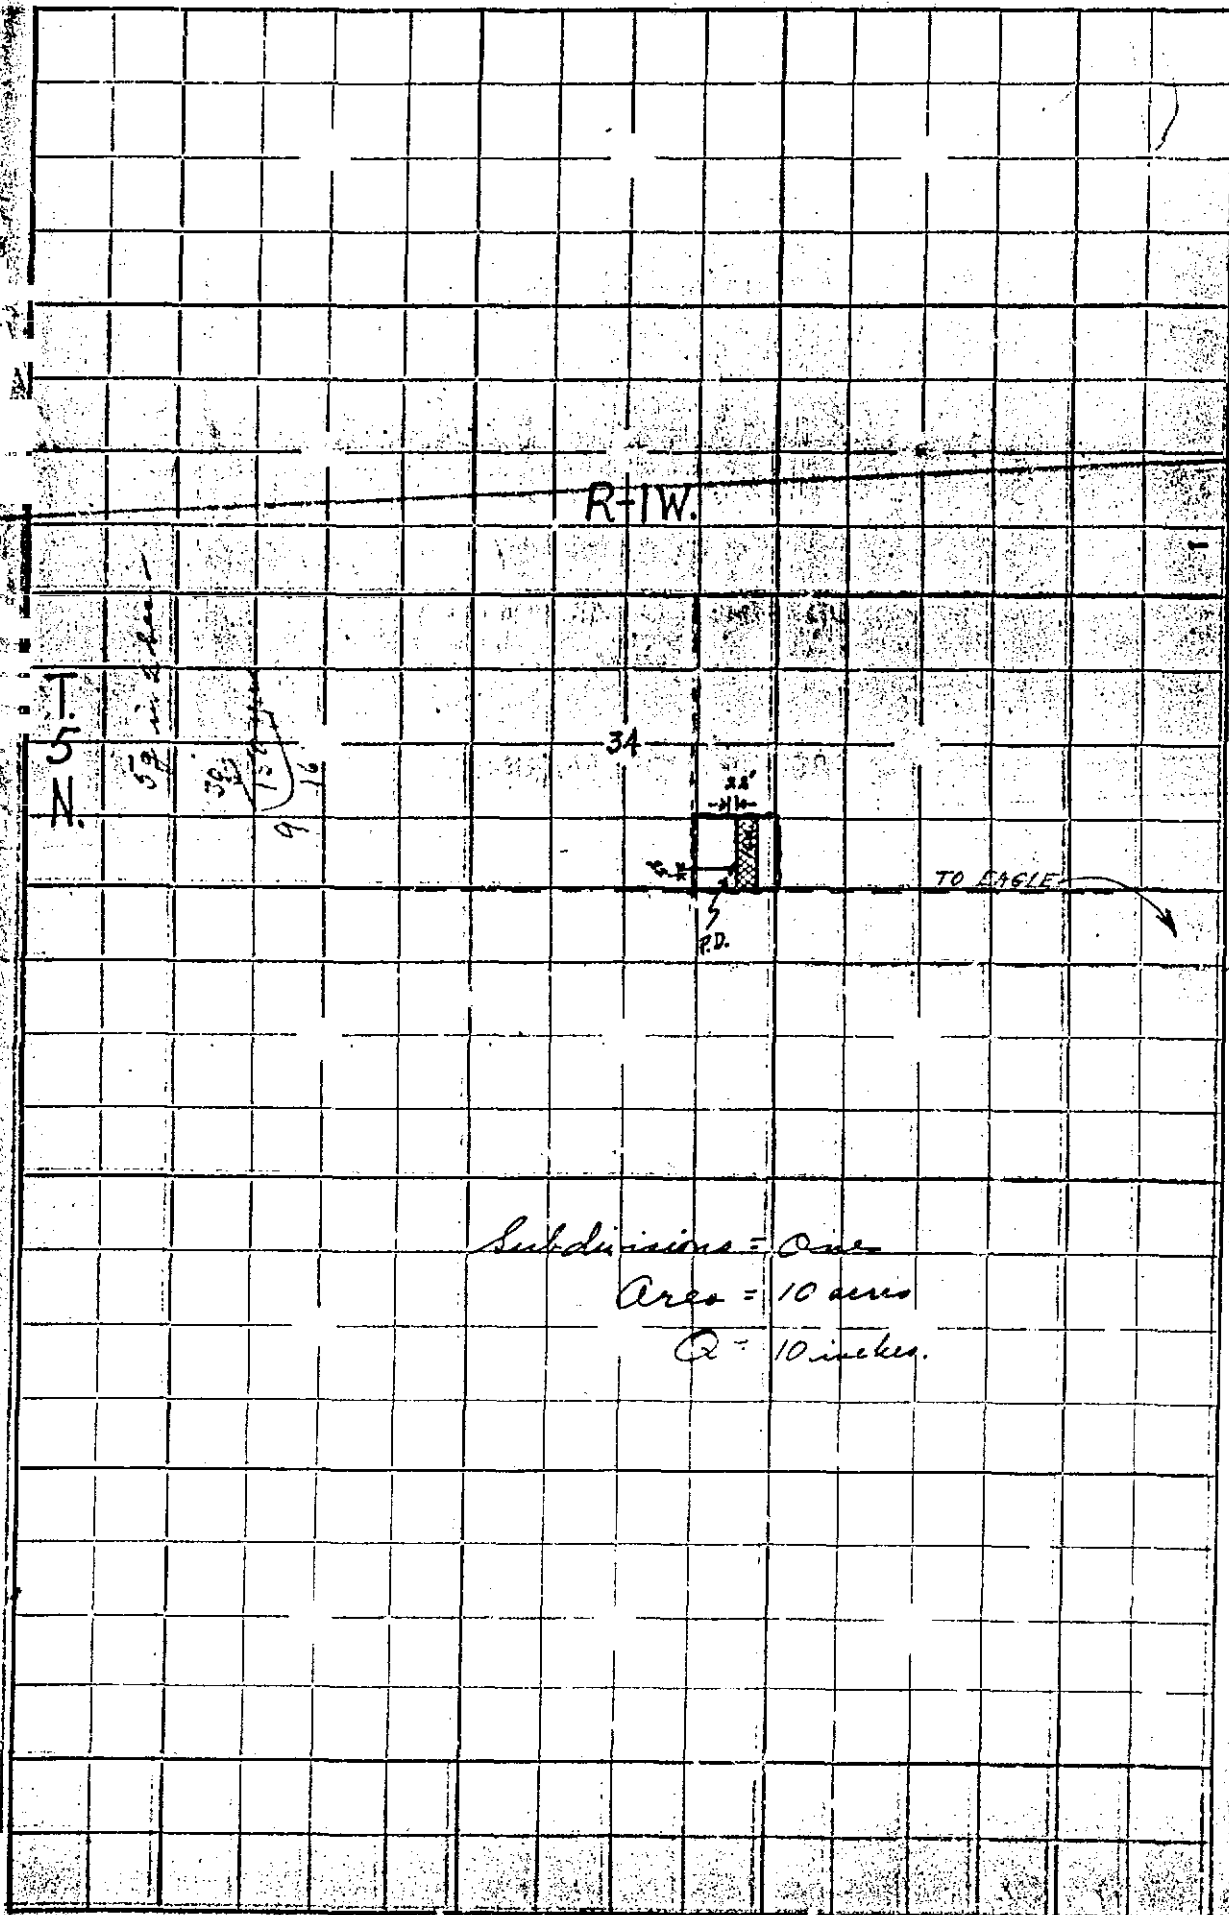

This system was bought second hand. There is more pipe and nozzle than actually needed.

Open air delivery was measured with a 5 gallon bucket and stop watch at 150 gpm. It is very probable that the water supply is low at this time of year and that the pump impellers are worn from pumping sand.

The system has much more capacity than the amount of water asked for on this permit and G-24168 a companion permit in the same well.

This examination was made on the 8 day of February 1907
