RE: Snake River Basin Adjudication (SRBA)
Water Right No. 63-2942

Dear Property Owner(s):

We have been advised you may be the new owner of the property with the water right referenced above. Enclosed is a copy of the original license, water right & claim proof reports for your review.

A data entry error may have been made on the enclosed electronic profile reports in remarks, which maybe a little confusing, it states that "2 P/D (points of diversion) in SENE, Sec, 9, T2N, R2W" which would be miles away. The original license copy (enclosed) says nothing to this remark, you may ignore the remark however, If you have any questions about it or anything else in this letter, please feel free to contact me.

Before we can modify our records to reflect your ownership of this water right, we need to have the enclosed Notice of Change of Water Right Ownership form completed. Please follow the instructions attached to the form and return to this office with all of the required information.

Sincerely,

A handwritten signature in black ink that reads "Ron Howerton".

Permit No. G-24168

This proof is for Completion of Works & Beneficial Use In Water District No.

1. Name of applicant George C. Oxford
2. Source of water supply: Subterranean flow from a well
3. Location of point of diversion: Is in the S1/2SW1/4SE1/4 of Section 34
T. 5 N. R. 1 W. County of Ada
4. Describe works as they exist, giving dimensions and capacities of same: Well is 86' x 8" d.
Cased to bottom. Bottom 24' is perforated. H is 33' dd is 11'
Pump is Pomona Turbine #1283. 17 stage 4" sets at 78' down. Motor is a
Westinghouse 7 1/2 hp. 220v. 3 ph. 21 amps 32EM1232. Main line pipe is 4"
portable al. Laterals are 3" al. 36 sprinkler heads size 5/32" both nozzles
some are single and some double nozzles. Says he has used as many as
31 nozzles at a time with good pressure.
5. Water is used for: Irrigation and Domestic
6. State whether or not water has been turned into works of diversion: yes
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):
15 acres in the SE1/4SE1/4 of Sec. 34., Twp. 5 N., Rge. 1 W., B.M.

See map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: This water is a primary supply. Crops are hay and pasture.

This system was bought second hand and there is more pipe and sprinklers than necessary.

Open air delivery was measured with a bucket and stop watch at 150 gpm.
It is probable that the water supply is low at this time of year and
also that the pump is worn. This pump and motor has capacity far beyond
that called for in these two permits. See permit 22074.

This examination was made on the 8th day of February, 19 57.

See map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: This water is a primary supply. Crops are hay and pasture.

This system was bought second hand. There is more pipe and nozzle than actually needed.

Open air delivery was measured with a 5 gallon bucket and stop watch at 150 gpm. It is very probable that the water supply is low at this time of year and that the pump impellers are worn from pumping sand.

The system has much more capacity than the amount of water asked for on this permit and G-24168 a companion permit in the same well.

This examination was made on the 8 day of February 1927
