1. csaxton 1/31/2005 Resumption

Comment: Use of this portion of 63-03016 has been resumed. 2003 photography shows evidence of irrigation.

2. csaxton 1/31/2005 Diversion Rate

Comment: Diversion rate recommended at licensed diversion rate of 0.013 cfs per acre.

3. csaxton 1/31/2005 POD(1)

Comment: POD digitized based on map provided in licensing field exam map.

4. csaxton 1/31/2005 POD(2)

Comment: Property developed in 1987 according to Ada Co taxlot data. Recommend licensed POD. Transfer needs to be file to change to current POD. Recommended POD is in the same QQ as licensed. However, the original well must be recommended as the POD which could be different than what is currently being used.

5. jshurte 11/27/2005 Change in POD

Comment: Per a meeting with Mr. Milam at the public meeting for notices of error, the pod on the shapefile was changed from the seswsw to the swswsw. It is considered an accomplished transfer due to the fact that Mr. Milam has a decreed right number 63-16646 with an 8-24-1987 priority date for this same well. This date is prior to the 11-19-1987 date of commencement and a decreed right can be considered evidence of an accomplished transfer. This does not change the legal description of the well on this right, only the location on the shapefile. I will be sending Mr. Milam a copy of the shapefile with the change in location. Since the location was that of the original license the accomplished transfer of a pod condition will be added to this right. Arcview has been updated to reflect the new location.

Ben Milam
P.O. Box 1059
Eagle, ID 83616

Subject: Irrigation Water Right Claim

Dear Ben:

Enclosed for your review and signature is a water right claim for irrigation of your property near Eagle.

The claim is based on water right license 63-3016 which authorizes irrigation of 125 acres (including the entire 40 acres within the SWSW of Section 29) at a diversion rate of 1.64 cfs. I have assumed that your claim is for irrigation of 5 acres at a rate of 0.066 cfs (5/125 of the 1.64 cfs water right). The 0.066 cfs diversion rate is equivalent to a pumping rate of 29.5 gallons per minute.

The claimed point of diversion is your existing domestic well. I understand that the domestic well was drilled prior to November 1987. Therefore, it could probably be considered as an "accomplished transfer" to add an additional diversion point to water right 63-3016.

If the application is acceptable to you, I recommend that you sign where indicated and submit it to the Idaho Department of Water Resources. Your signature must be notarized. The application fee is \$55 (\$50 flat fee plus \$1 per acre irrigated), payable to the Idaho Department of Water Resources.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E.
