HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

6. Water is claimed for the following purposes:

(both dates are inclusive)

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

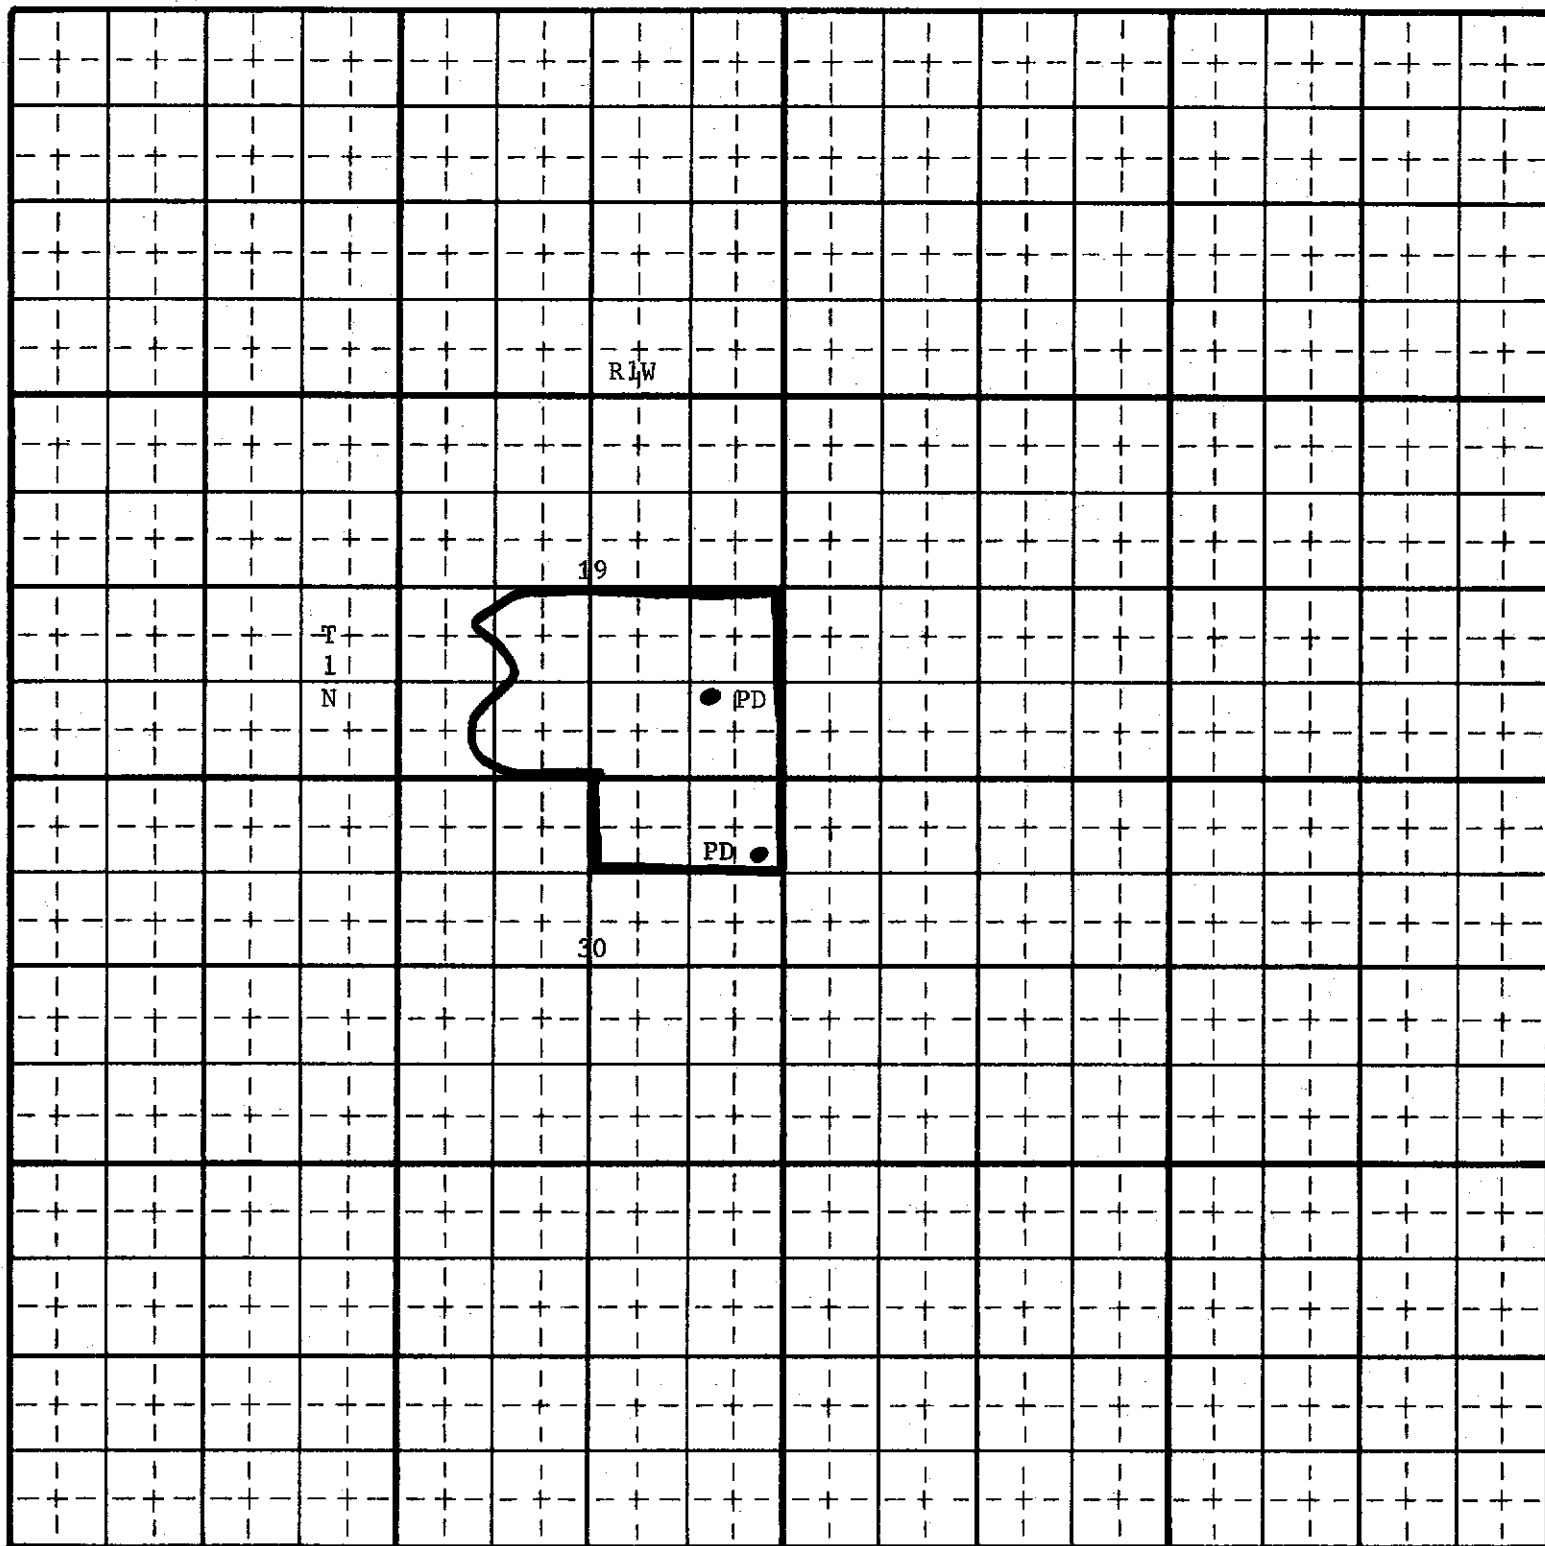

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

Remarks:Comments:

1. MMINICUC 1/19/1996 COPIED FROM REMARKS
 Comment: TRANS. 1986. POD'S FIELD EXAM FOR LOCATION. WELL IS S. 19 IS VERY CLOSE TO THE LINE BETWEEN SESE & SWSE. CONFUSION HAS RESULTED FROM THE FACT THAT THE MAINLINE RUNS N-S FROM THE WELL, BUT IS NOT ON THE QQ LINE. ALSO, WELL IN S. 19 WAS ADDED BACK TO THE SYSTEM BY AT LEAST 1986 (FIELD EXAM IN '86 FOUND MOTOR ON WELL, ASSUME MOTOR INDICATES USE). DETAILED EXPLANATION IN FILE. POU LICENSE 63-07897 WAS FILED FOR MORE WATER FOR THE SAME ACRES PLUS ADDITIONAL ACRES. THE FIELD EXAM FOR THAT LICENSE FOUND THE ACRES TO BE SLIGHTLY DIFFERENT THAN LICENSED IN 63-03495. THIS RECOMMENDATION REFLECTS THE ACRES FOUND IN THE MORE RECENT (1986) FIELD EXAM, AND MOVES THE REMAINING ACRES TO THE NEW LOCATIONS AS FOUND IN 1986. ACCOMPLISHED XFER.

POINT OF DIVERSION REVIEW

A63-03495 & A63-07897

There is some question as to whether or not the well in section 19 has been in continual use. The licensing field exam (06/21/1971) for 63-03495 found one well, located in s. 19, SWSE. On 12/13/1973 application 63-07897 was filed for additional water for the same acres as 63-03495 plus some additional acres. This application shows three points of diversion, including the well in s. 19. On 06/21/1976 the claimant filed Transfer No. 1986 on 63-03495 which moved the point of diversion from SWSE s. 19 to NENE s. 30. On 09/12/1986 the licensing exam for 63-07897 found two points of diversion (SESE s. 19 & NENE s. 30) but only the well in s. 30 was licensed.

The well in s. 19 is actually in SWSE, as originally licensed, but is very close to the line. If the field examiner assumed the N-S mainline was on the QQ line it would appear that the well is in the SESE. However, the mainline is west of the QQ line, and the well is actually in the SWSE, as licensed.

The field examiner for 63-07897 found the well in s. 19 with the motor intact and listed both wells as points of diversion, but measured only the well in s. 30 (the well in s. 19 had been previously measured for 63-03495). The exam description of the diversion system includes only the well in s. 30. The licensing analysis worked off the system capacity of this well (see IDWR memo of 03/05/1989). The owner did not object to the license at the time it was issued.

I discussed these issues with the claimant during my field exam. He indicated that he has consistently used both wells. It was his understanding that Transfer 1986 added a well to the system rather than replaced one with the other. He also indicated that the well in s. 19 has always had problems and has been down for repair.

According to IDWR records, the well in s. 19 is not a part of either water right. However, a field exam in 1986 found a motor in place on the well. The claimant indicates he has been using the well for both rights since 1979 (see Attachment F). It appears that the well was probably in use in 1986. The addition of the well in s. 19 to both of the water rights can be considered a transfer accomplished prior to commencement of the SRBA.

RE: Notices of Claim to a Water Right Nos: A63-03495, A63-07897

Dear Mr. Noe:

Please read this letter carefully, as important information about your water rights is required by IDWR (Idaho Department of Water Resources).

IDWR's initial investigation of the Notices of Claims listed above indicates that there has been a change in the point of diversion as described below:

Previous point of diversion: Twp. 01N, Rge. 01W, s. 30 NE $\frac{1}{4}$ NE $\frac{1}{4}$
New points of diversion: Twp. 01N, Rge. 01W, s. 30 NE $\frac{1}{4}$ NE $\frac{1}{4}$ &
Twp. 01N, Rge. 01W, s. 19 SE $\frac{1}{4}$ SE $\frac{1}{4}$

According to IDWR records, water right no. 63-03495 was originally licensed with the point of diversion in Twp. 01N, Rge. 01W, s. 19 SW $\frac{1}{4}$ SE $\frac{1}{4}$. In June of 1976 Transfer No. 1986 was approved to move the point of diversion to s. 30 NE $\frac{1}{4}$ NE $\frac{1}{4}$. In June of 1986 the beneficial use exam for water right no. 63-07897 found the point of diversion for both water rights to be a well located in s. 30 NE $\frac{1}{4}$ NE $\frac{1}{4}$.

At this time IDWR has no record of an irrigation well located in Twp. 01N, Rge. 01W, s. 19 SE $\frac{1}{4}$ SE $\frac{1}{4}$.

A water right owner who has made a change in use of a water right prior to commencement of the SRBA (Snake River Basin Adjudication) without prior IDWR approval may claim the change in the SRBA. IDWR may recommend a right as changed, however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

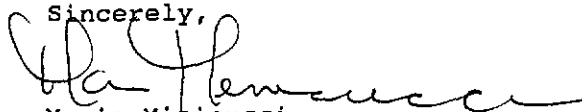

Before IDWR may recommend your claim, you must provide IDWR with the date the change was made and some evidence tending to support that date. An information sheet is enclosed that describes the types of evidence that can be submitted for showing the date of the change.

Page 2.

Noe

Your response must be received by this office by the response date shown above. If no response is received, then your claim to water from the new point of diversion will not be recommended to be decreed.

Sincerely,

NOTES: 01/18/1996: A field exam was conducted on 09/12/1986 for these same acres for another licensee (63-07897). This exam found reduced acres in some QQ's and additional acres in others (mostly along the east side of the SE 1/4 S. 19). After reviewing the ASCS maps from both field exams, plus the 1987 ASCS map, it appears that the acres described in the 1986 exam are accurate. The recommendation for this claim transfers the acres from the QQ's found to have less acres to the QQ's found to have more acres. To be most accurate the right should probably be recommended as a Permissible Place of Use (280 acres within the 302 acre parcel) at the licensed rate of flow. However the claim was filed as licensed, so the acres are all recommended, but in slightly different QQ's, (although still within the licensed QQ's).
