05/21/1996: 63-02181 is for use from another well & appears to be another right entirely. 63-02181
apparently was forfeited somewhere along the line, as the 40 acre tract was redeveloped for 63-03591 - NN

NOTES: 03/26/1996: License 63-02181, priority 09/15/1911, is unclaimed in the FRBA. This
license has a different point of diversion but the same place of use. Assume license
is unclaimed because of Non-use between 1911 and 1967. Another factor may
be that 63-02181 was issued for 150 cfs for 33 acres, as opposed to 63-03591
which was issued for 180 cfs for 80 acres. No evidence of non-use except
that parcel does not appear to be a full 40 acres of irrigation. TTD

NOTES: 03/26/1996: It appears that a replacement well was drilled in 1984 (see attached log). This well draws water from 327' to 337' down, as opposed to the old well which was described with a lift of 10'. It is unclear if this 10' lift is from a relief pond or from the well itself. If the water was being lifted 10' out of the well, then the well is drawing from another aquifer now (and was possibly drawing water from Ten Mile Creek previously). License was issued for G.W. TTT

well, 337 ft deep, water drawn from 327' to 337'. 50 HP pump to ~~water pipe~~ wheel lines. Claimant confirmed location of well in tel. conversation on 04/01/1996. Pond is used for stockwater and is not part of the irrigation system. TTT

05/21/1996: Proof of Blu mentions dug, not drilled, hole. It appears that the original "well" was probably supplied w/ Ten Mile Creek water. A true well has since been drilled, and since the license was issued for groundwater the recommended source is groundwater. TTT

State law requires that this report be filed with the Director, Department of Water Resources within 30 days after the completion or abandonment of the well.

04/01/1996: Telephone conversation w/Mr. Davis today - wheel lines cross the 10-mile Creek to the south. Also indicated that North g Road is irrigated for trees.

05/21/1996. 04/02/1996: Field exam found no irrigation on the North side of Five Ten Tile Road. Claimant may have been referencing area btwn road & the flat. This strip of land has established trees and could be reached by wheel line. Even though discrepancy of 1.7 acres is w/in IDWR's tolerance of $\pm 5\%$, it is clear that the full 40 acres are not being irrigated. The road prevents irrigation on the north side of the road. The recommended acres are all of the possible acres, to receive irrigation water. TTN

Permit No. 33532/63-3591

Carl German of Rt. 2. Kuna, Idaho
(name) (address)

State of Idaho, being first duly sworn, upon his oath deposes and says:

That he is the holder, or the duly authorized agent of the holder*, of Permit to Appropriate the Public Waters of the State of Idaho No. G-33532/63-3591.

That under the terms and conditions of said permit, work thereunder was required to be completed by April 3, 19 72.

That he has heretofore performed the following work described under said permit:

I have been negotiating with Idaho Power Company to get a
power line into this site. The proposed cost was not economically
feasible. I have now reached an agreement with them; however,
the flood conditions this winter and spring have been such that
I could not complete this well. Costing \$

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit: Just as soon as the water has receded
sufficiently for the equipment to be moved in I will have the
well completed; however, this may not give me sufficient time
to irrigate by the proof date. To be sure that I have ample
time to irrigate I respectfully request this extension.

WHEREFORE, he asks that the State Reclamation Engineer extend the time for the completion of obligations under said permit to July 1, 19 72.
