RE: Darling International Inc.
P.O. Box 5485
Boise, Idaho 83705

Dear Ms. Minicucci:

Pursuant to your letter of April 12, 1996, please be advised on following:

1. CHANGE OF OWNERSHIP:
Enclosed, a Certificate of Ownership changing name to "Darling International Inc."
2. ADDITION OF SECOND WELL TO THE EXISTING WATER RIGHTS PERMIT:
As per your request, Dana Young of Darling International Inc. has recently submitted evidence to show that the second well was added to the water rights(#63-7980) previous to November 19, 1987. Consequently, the second well can be added to the water right on the Snake River Basis Adjudication(SRBA).
3. APPLICATION TO RENT WATER FOR IRRIGATION:
Darling International Inc.(Darling) has recently filed an application with Water Supply Bank to rent 230 acre feet of water per year to irrigate wastewater land application site.

If you need additional information, please feel free to contact me at:
208-344-8318.

Cordially,

DARLING INTERNATIONAL INC.

INSTRUCTIONS

JUN 27 1984

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

Dear Mr. Gayleardi:

We are in receipt of your application for a permit to appropriate water. However, we need a description of how the water is going to be used for industrial purposes and justification for the quantity of water applied for that purpose.

We will also need to know what capacity that you are with the company giving you the authority to make the application for C.U.I. International.

Upon receipt of the information, our office will be able to process your application. Your cooperation is very much appreciated.

Re: Your letter of May 15, 1974
"Permit to appropriate water"

Gentlemen:

Use of water at our proposed Boise plant will be as follows:

1. Process steam
2. Showers and drinking
3. Make-up for process cooling water

We will utilize condensate return systems to conserve water, however approximately 20 - 30% of the steam used is lost thru atmosphere flashing and must be replaced.

The process cooling water must be blown down in order to prevent a build-up of suspended solids and this loss must be replaced.

After two years operation, we expect to use the water in the last lagoon pond for cooling water make-up thereby conserving water.

In answer to your last question, my capacity with C. U. I. International is Regional Manager in charge of all operations in Utah, Idaho, Wyoming and Montana.

Very truly yours,

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

The right holder shall maintain a totalizing measuring device of a type approved by the Department as a part of the diverting works.

Failure of the right holder to comply with the conditions of Transfer 4979 is cause for the Director to rescind approval of the transfer.

After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

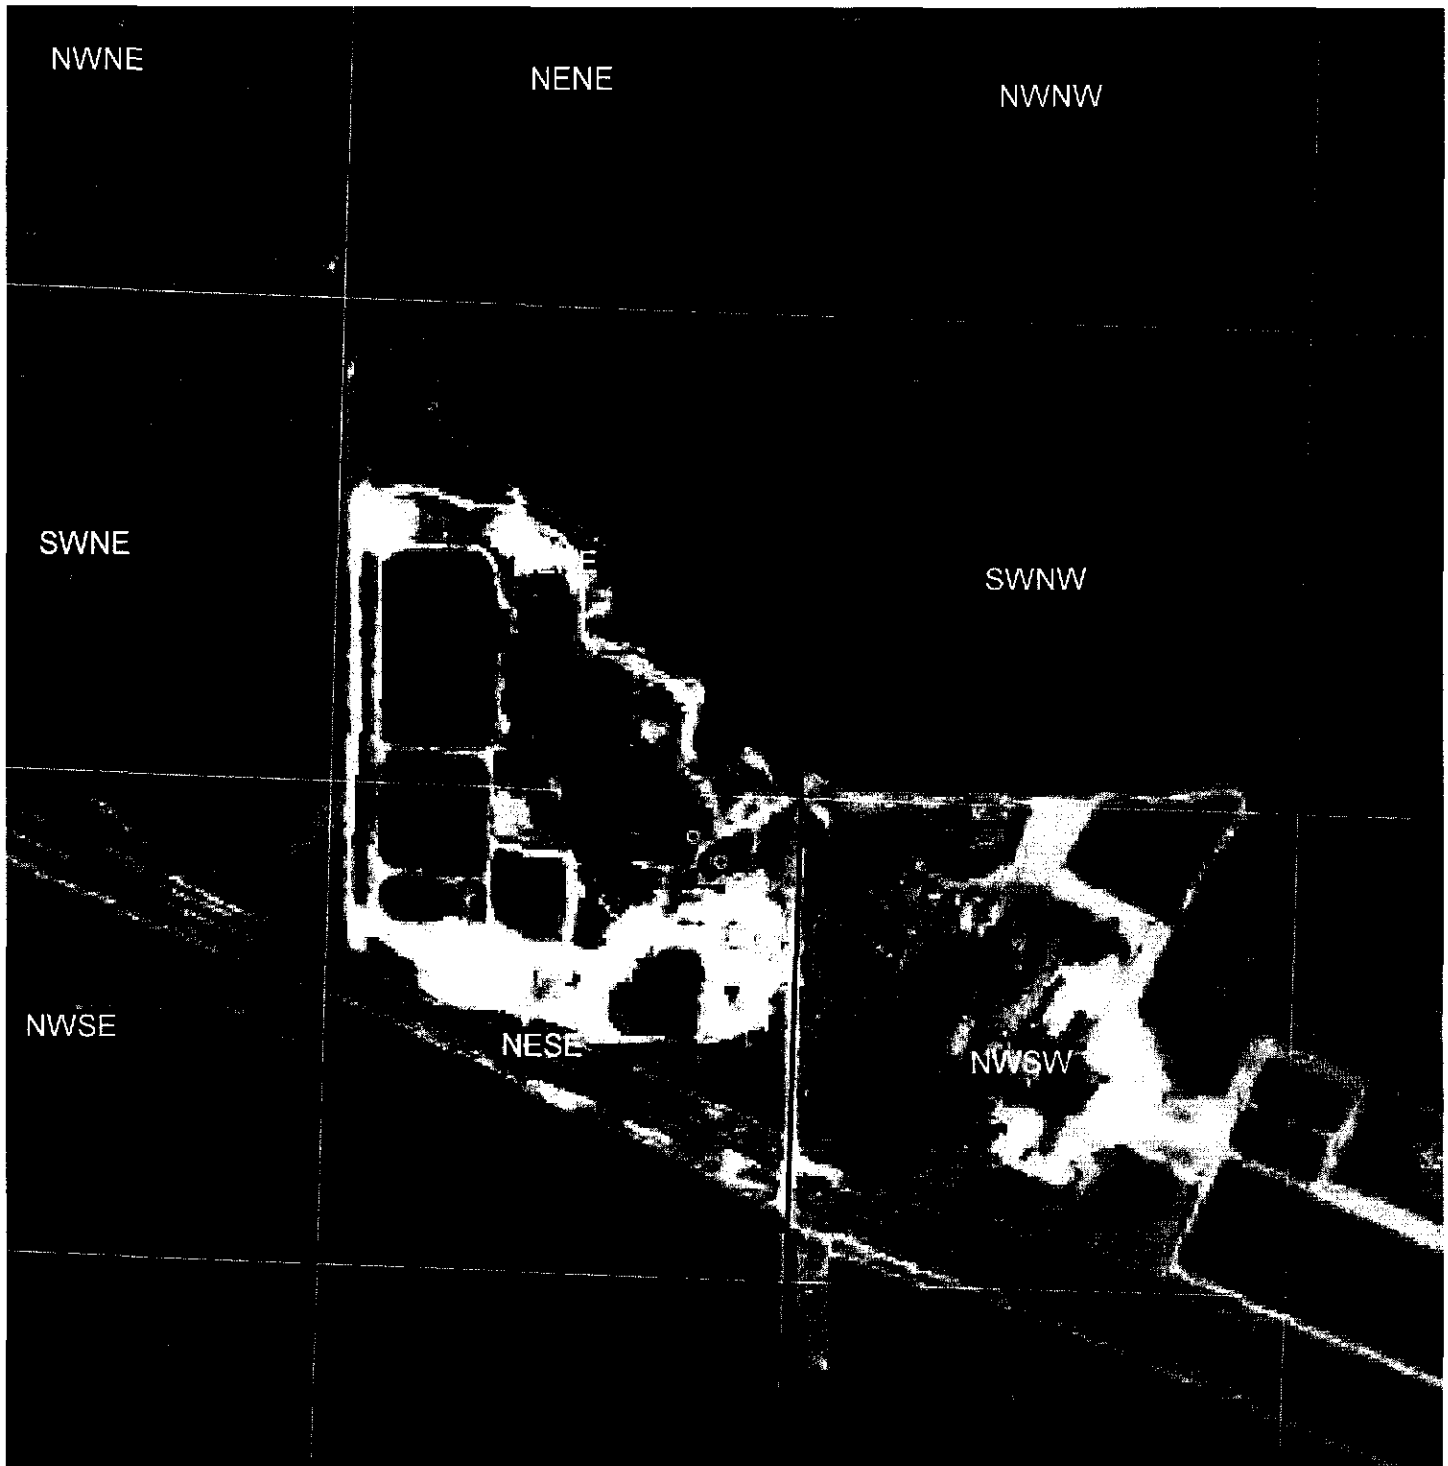

Industrial use is for a rendering plant and includes land application of resulting wastewater to comply with water quality requirements.

This right shall not exceed the total rate of diversion of 0.33 cfs and a total annual diversion volume of 238.9 af for the combined authorized uses.

WATER RIGHT LICENSE

License of Water Right No. 63-7980 Priority July 7, 1974 Amount .33 cfs

THIS IS TO CERTIFY, that C.U.I. INTERNATIONAL
of Nampa, Idaho, has complied with the terms and conditions of Permit
No. 63-7980 issued pursuant to Application for Permit dated May 13, 1974,
and has submitted proof to the Department of Water Resources on July 26, 1979,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of .33 cfs of water from a groundwater source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>November 15</u> at	<u>.03</u> cfs and	<u>4.5</u> acre feet
Domestic (1 unit)	from <u>January 1</u> to <u>December 31</u> at	<u>.04</u> cfs and	<u>1.2</u> acre feet
Industrial	from <u>January 1</u> to <u>December 31</u> at	<u>.33</u> cfs and	<u>238.9</u> acre feet

(both dates inclusive)

Subject, however, to the condition that no more than .33 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
238.9 acre feet per year, said waters to be diverted within the SE 1/4 NE 1/4, Sec. 12, Twp. 1N,
Rge. 1E, B.M. in the County of Ada

IN THE NAME OF C.U.I. INTERNATIONAL)
_____)

ORDER OF REINSTATEMENT

WHEREAS, on May 13, 1974, C. U. I. International filed with the Department of Water Resources an application for permit to appropriate 1.54 cubic feet per second of water from a groundwater source to be diverted within the SE~~ENEK~~, Sec. 12, Twp. 1N, Rge. 1E, B.M., Ada County, to be used for industrial, irrigation, and domestic purposes; and,

WHEREAS, on June 24, 1974, the Department approved said application and issued Permit No. 63-7980 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before June 1, 1979; and,

WHEREAS, on March 30, 1979, the Department notified the permit holder by certified mail that proof of beneficial use was due and instructed the permit holder as to the steps to be taken to make said proof; and,

WHEREAS, on June 14, 1979, the Department notified the permit holder that Permit No. 63-7980 had lapsed for failure to submit proof of beneficial use of water; and,

WHEREAS, Section 42-218a of the Idaho Code provides that a permit may be reinstated upon a showing of reasonable cause within 60 days from the date of the notice of lapsing; and,

WHEREAS, the permit holder has provided a reasonable showing as to why said permit should be reinstated by submitting proof of beneficial use on July 25, 1979;

IT IS, THEREFORE, HEREBY ORDERED that Permit No. 63-7980 be REINSTATED and the priority advanced to July 7, 1974.

of Nampa, Idaho, has complied with the terms and conditions of Permit
No. 63-7980 issued pursuant to Application for Permit dated May 13, 1974
and has submitted proof to the Department of Water Resources on July 26, 1979
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of .33 cfs of water from a groundwater source
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>November 15</u> at	<u>.03</u> cfs and	<u>4.5</u> acre feet
Domestic	from <u>January 1</u> to <u>December 31</u> at	<u>.04</u> cfs and	<u>1.2</u> acre feet
(1 unit)	from <u>January 1</u> to <u>December 31</u> at	<u>.33</u> cfs and	<u>238.9</u> acre feet
Industrial	from <u>January 1</u> to <u>December 31</u> at		
(both dates inclusive)			

Subject, however, to the condition that no more than .33 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
238.9 acre feet per year, said waters to be diverted within the SE 1/4, Sec. 12, Twp. 1N,

04/26/1996: Second well was drilled in 1978, as per Bill Doty well drilling. There records indicate that the second well was drilled by Frank Doty and Roger Lennick. Bill Doty's office provided a log based on the drillers field notes and did not sign the log because Bill Doty's company did not drill the well. Also, there is no legal description of the well location on the log. The legal was not included in the notes but the company name was in the notes. It is assumed that there is only one ^{animal} ~~plant~~-rendering plant owned by CUI in the Boise Valley and that the log represents the second well @ the plant. The field exam in 1979 did not note two wells, but it is not conclusive evidence that there was not another well present at the time. ~~177~~

NOTES: 04/26/1996: The application, field exam, and license all identify the point of diversion and place of use incorrectly. Field exam confirmed the POB is POB in the NESE S.12. There is more than one acre under irrigation - see Iowa code a Feb 20 1996 & April 12 1996. The company office in Irving TX has indicated that they are preparing both an application for transfer and a new application for permit. Irrigation is primarily land application of waste water from the industrial use. The wells are used in the hot weather when evaporation from the wastewater ponds limits the amount of water available for irrigation. TM

RE: Notice of Claim to a Water Right No. A63-07980

Dear Mr. Jones:

I apologize for the delay in replying to your letter received by this office May 19, 1996. Your correspondence included a Change of Ownership form and an Application for Permit.

Regarding the Change of Ownership, this office requested documentation (such as the Change of Name form which was filed with the State of Texas) from your office in Irving, Texas. This department has not received that documentation to date and it is required before the name on the claim can be changed. If your Irving office forwards that documentation, this office will complete the name change.

Secondly, the Application for Permit form that was submitted is not the correct form to apply to add a well an existing water right. The procedure to add a point of diversion (another well) to the water right is called a Transfer; an Application for Transfer form is included with this letter. However, the second well can be added to the water right on the Snake River Basin Adjudication (SRBA) claim. Evidence must be submitted to this office that shows that the well was added to the water right previous to November 19, 1987. If evidence cannot be obtained, an Application for Transfer must be filed with this department (including the \$100 fee).

Finally, our correspondence to your office in Texas discussed the fact that your water right from the well is limited to one acre of irrigation. It appears that there is more than one acre being irrigated from the well(s). Any irrigation from the well(s) beyond one acre requires an approved permit from this department. An Application for Permit form, with instructions, is included with this letter.

If you need additional information, please do not hesitate to contact me at this office. Please note that the second well cannot be recommended for decree in the SRBA unless this office receives evidence of the date it was added to the system. If the well was added after November 19, 1987, an Application for Transfer must be submitted to this office.

Sincerely,

Maria Minicucci

RE: Notice of Claim to a Water Right No. A63-07980

To Whom It May Concern:

This letter is in response to a field exam conducted on the above referenced claim filed in the Snake River Basin Adjudication (SRBA). This claim was filed on the well which provides water for your processing plant on South Cole Road in Ada County, Idaho, and is based on a previously licensed water right. There are three items which require your attention.

The first item pertains to the use of the water from the well for irrigation. The licensed water right includes the irrigation of one acre of land. During a visit to the plant, Dana indicated that the well is used to irrigate all of the lands which receive waste water from processing. Dana also indicated that the company is purchasing additional lands and is anticipating filing for water rights on those lands. At this time, there is a valid water right for one acre of irrigation from the well. Any irrigation of more than one acre from the well requires an approved Application for Permit from this department.

The second item is the name on the SRBA claim. Dana informed me that your company has changed its name. In order to keep our records accurate, the name on the claim should be updated to reflect this change. The enclosed form "Notice of Change of Water Right Ownership" is enclosed for this purpose. Please complete the form and return it to this office with documentation supporting the name change (i.e., Change of Name form filed with Secretary of State). Please include the address where correspondence regarding the SRBA, including legal notices, should be sent.

The third item which requires information from you is the date the second well was drilled at the plant. The water right license is for diversion from one well. The second well may be claimed as an accomplished transfer (adding a point of diversion) in the SRBA, but evidence of when the second well was added is required. Please submit this documentation to this office by March 22, 1996. If the requested documentation is not received by this office by March 22, 1996, the second well may not be recommended to the court for decree as a valid point of diversion.

Enclosed is a copy of the original license, a report which summarizes the SRBA claim, a Change of Ownership form (instructions on back), and an Application for Permit form (with instructions). If you have any questions or comments about this letter, please do not hesitate to contact me at this office.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Maria Minicucci'.
