12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

The right holder shall accomplish the change authorized by Transfer 70964 within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the

amount of water diverted from power records and shall annually report the information to the Department.

The right holder shall install and maintain totalizing flow meters as part of the diverting works. The right holder shall provide reasonable access for department personnel to inspect the flow meter in order to monitor the ground water aquifer. The right holder shall maintain records of the amount of water diverted.

The total instantaneous diversion of water from all points of diversion under Right 63-8437B shall not exceed 0.71 cfs, nor a total combined annual volume of 159.8 af.

The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3-15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Domestic use is for Eagle High School.

15. Basis of Claim: License

WATER RIGHT NO. 63-8437B

CONDITIONS OF APPROVAL

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

WATER RIGHT NO. 63-8437B
As Modified by Transfer No. 70964

CONDITIONS OF APPROVAL

5. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
6. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
7. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
8. The right holder shall install and maintain totalizing flow meters as part of the diverting works. The right holder shall provide reasonable access for department personnel to inspect the flow meter in order to monitor the ground water aquifer. The right holder shall maintain records of the amount of water diverted.
9. The total instantaneous diversion of water from all points of diversion under Right 63-8437B shall not exceed 0.71 cfs, nor a total combined annual volume of 159.8 af.
10. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
12. Domestic use is for Eagle High School.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

A. PURPOSE OF TRANSFER

1. ☒ Change point of diversion ☐ Add diversion point(s) ☐ Change place of use
☐ Change nature of use ☐ Change period of use ☐ Other _____

2. Describe the reason for the proposed changes Water right 63-8437B (Meridian Joint School District No. 2) currently shares an irrigation well in the SWNE Section 12, T4N, R1W with water right 63-8437A. The well is located adjacent to Eagle High School on property that is not owned by the School District. The School District proposes to drill a new well on the High School property for use by 63-8437B. After the new well is constructed, the old well will be used by 63-8437A only.

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use
<u>63-8437B</u>	<u>02/14/1977</u>	<u>0.55 cfs</u>	<u>Irrigation</u>	<u>3/15</u> to <u>11/15</u>
<u>63-8437B</u>	<u>02/14/1977</u>	<u>0.71 cfs</u>	<u>Domestic</u>	<u>1/01</u> to <u>12/31</u>
				to _____

2. Total amount of water being transferred 0.71 cubic feet per second and/or _____ acre-feet per annum.

3. Source of water ground water tributary to _____

4. Point(s) of Diversion:

Lot	¼	¼	¼	Sec	Twp	Rge	County	Local name for diversion
		SE	SW	5	4N	1E	Ada	Floating Feather Well
2		SW	NW	7	4N	1E	Ada	Redwood Creek Well
		SW	NE	12	4N	1W	Ada	Eagle High School Well (proposed)

5. Lands irrigated or place of use:

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
4N	1W	12		14	14														28
4N	1W	12			D														

Total Acres 28

PART 1**6. General Information:**

- a. Description of diversion system Irrigation will be provided from a new well (8" x 300' maximum depth) with electric submersible pump in the SWNE of Section 12. Domestic water is provided from the Redwood Creek Well (SWNW Section 7) and the Floating Feather Well (SESW Section 5). The Redwood Creek and Floating Feather wells are currently owned and operated by United Water Idaho.
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
_____ Yes X No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes. NA. No change in place of use.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
NA. No change in place of use.
- d. Remarks:
Water is used for irrigation and domestic purposes at Eagle High School.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____

And the said application is hereby _____, subject to the following conditions:

Witness my hand this _____ day of _____, 20 _____.

For the Director

STATE OF IDAHO

Attachment 1

TRANSFER SUMMARY

Project Overview. Eagle High School is being built on a 52-acre parcel which includes 36 acres in the SWNE Section 12, T4N, R1W and 16 acres in the NWNE Section 12, T4N, R1W. The school will accommodate approximately 2000 students and staff. A portion of the site is currently irrigated using groundwater diverted from a well (the Ricks Well) in the SESWNE Section 12, T4N, R1W, under water right license 63-08437. Joint School District No. 2 proposes to continue to utilize the Ricks Well for school site irrigation and to use two other existing wells to serve the High School domestic and fire protection requirements. The domestic and fire protection wells are the Redwood Creek Well and the Crandlemire Well. These wells will be operated by United Water Idaho, doing business as either Eagle United Water Company or EM2.

Description of the Existing Water Right. Water right 63-08437 is licensed for 2.67 cfs for the irrigation of 135.4 acres and an annual diversion volume of 609.3 acre-feet. In recent years, as evidenced by SRBA claim A63-08437, the Ricks Well has been used to irrigate only 77 acres. This area includes 40 acres in the SWNE Section 12 and 37 acres in the NESW Section 12. Total consumptive use claimed in the SRBA is 269.5 acre-feet per annum (3.5 acre-feet per acre). Claimed diversion rate is 1.54 cfs. The claim also includes stockwater for 50 head of cattle.

The reduction in the water right occurred as a result of subdividing a portion of the licensed place of use for residential development (Flint Estates). The subdivided lands included 34.2 acres in the NESE Section 12 and 34.3 acres in the NWSE Section 12. After the land was subdivided, water from the Ricks Well was no longer made available to the place of use in the NESE and NWSE Section 12. These lands appear to have undergone a period of five or more consecutive years of not utilizing the water from the well. At the same time, the place of use was increased in the SWNE Section 12 from 37.8 to 40 acres and in the NESW Section 12 from 29 to 37 acres, resulting in the SRBA claim of 77 acres.

Description of the Water Right After the Transfer. This transfer proposes to split license 63-08437 into two rights, 63-08437A and 63-08437B. The transfer is summarized on Table 1 and detailed below.

- Water right 63-08437A would continue to provide supplemental irrigation to the claimed irrigated area not associated with the High School. This includes 37 acres in the NESW of Section 12 and 4 acres in the SWNE of Section 12, for a total irrigated area of 41 acres. Diversion rate would be 0.82 cfs (0.02 cfs/acre). Annual diversion volume would be 184.5 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 143.5 acre-feet (3.5 acre-feet per acre). Water right 63-08437A would also include stockwater for 50 head of cattle with an annual diversion volume of 0.7 acre-feet. The Ricks Well would remain the point of diversion for this right.

- Water right 63-08437B will provide supplemental irrigation for 28 acres of the High School property. Place of use will be 14 acres in the SWNE Section 12, T4N, R1W and 14 acres in the NWNE Section 12. Diversion rate for irrigation would be 0.56 cfs (0.02 cfs/acre). Annual diversion volume would be 126.0 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 98 acre-feet (3.5 acre-feet per acre). Point of diversion for irrigation will be the Ricks Well.

The transfer would add domestic as a new use for water right 63-08437B. Diversion rate for domestic use would be 0.72 cfs. Estimated annual domestic diversion volume (assuming 2000 students and staff, 25 gallons per person per day, and 220 school-use days per person per year) would be 11 million gallons per year, or about 33.8 acre-feet per year. The total irrigated area for license 63-08437 has been reduced by 8 acres (i.e., 8 acres at 4.5 acre-feet per acre equals 36 acre-feet) to account for the 33.8 acre-feet estimated annual domestic diversion volume under right 63-08437B and the 0.7 acre-feet estimated annual diversion volume for stockwater under right 63-08437A.

Two additional points of diversion will be added to 63-0437B because (1) IDHW-DEQ regulations require two water sources for a public drinking water system and (2) DEQ will not allow use of the Ricks Well for Eagle High School domestic use due to sanitary concerns related to well location and construction. The two new points of diversion will be the Redwood Creek Subdivision Well No. 1, located in SENW Section 7, T4N, R1E, and the Crandlemire Well, located in SESW Section 5, T4N, R1E.

The proposed transfer is summarized in Table 1.

MEMORANDUM

TO: Transfer File No.

FROM: Lori Graves

DATE: 12/2/03

RE: Evaluation of Sufficiency of Information Submitted

Brief: Applicant proposes drilling a new well on school district property to irrigate their irrigation portion of license 63-8437B rather than sharing a irrigation well that is located on property they do not own.

Contact person for the applicant is Scanlan Engineering.

Authority to File: Applicants are the current owners of record.

Water Right Validity: Right presumed valid since the right was claimed in 1989 and beneficial use occurred within the five years prior to that date as indicated on a 1987 aerial photo.

Please note that parent right 63-8437 was licensed for 135 acres, but claimed in the SRBA for 77 acres due to non-use. 63-8427B is part of the 77 acres claimed, which was verified in 1995 per approved transfer no. 4589.

This transfer proposal was reviewed and approved by Kimberly Brown, the SRBA agent reviewing the claims associated with parent right 63-8437.

Injury to Other Water Rights: Protesters and parties on record that were interested in previous proposals involving the wells listed on this application will be notified.

Enlargement of Use: No change in nature of use has been proposed.

Local Public Interest: No negative impacts are anticipated.

Beneficial Use/Conservation of Water Resources: Applicant proposed beneficial use consistent with irrigation standards for the area.

Review of the application finds there is no clear inconsistency with criteria of I.C. § 42-222 preventing processing of this application.

Additional Information: The current well used for irrigation is aka the Ricks well and is only shared with 63-8437A. The other two wells listed on the applicant's license are aka the Floating Feather/Crandlemire well and the Redwood Creek well, which are shared with United Water, Eagle Middle School and the City of Eagle. No changes are

proposed for these two p/ds, which will continue to be used for applicant's domestic needs. Please see the attached P/D Overlap Review. Data entry appeared to affect the correct record.

Conditions: Assuming protests are not filed and/or other information does not contradict the above analysis, and assuming it is determined the application should be approved, the conditions listed on the draft transfer approval should be applied.

Comments:

1. SLESTER 4/11/1995 TRANSFER NO. 4589

Comment: Three existing wells (aka Ricks, Redwood Creek & Crandlemire wells) will be integrated for use in two transfers for Joint School District #2 and for one application for permit for Eagle United Water (municipal). T4589 will use all three wells for 63-08437B where the other two applications will only use two well sites, Redwood Creek & Crandlemire. 63-08437A is proposed for 41 acres from Ricks well only. Final approval split right into parts A and B.

NOTICE OF PROPOSED CHANGE
OF WATER RIGHT NO. 63-08437
TRANSFER NO. 4589

Notice is hereby given that Joint School District #2 of Meridian, ID has applied to the Department of Water Resources to Change the Point of Diversion, Place & Nature & Period of Use of the following described water right to be changed pursuant to Section 42-222 of Idaho Code:

WATER RIGHT AS RECORDED:

BASIS	License
PRIORITY DATE	2-14-1977
SOURCE	Groundwater
AMOUNT	2.67 cfs
USE	Irrigation from 4-1 to 9-30
POINT OF DIV	SWNE, S12, T4N, R1W, Ada County
PLACE OF USE	SWNE, NESW, NESE & NWSE, S12, T4N, R1W (135 acres total)

RIGHT AS RECORDED IN SNAKE RIVER BASIN ADJUDICATION:

Claimed by Keith Ricks as claim #A63-08437 for same as above license except states 1.54 cfs for 77 acres in SWNE & NESW of Section 12.

PORTIONS OF RIGHT TO BE CHANGED AS FOLLOWS:

NAME	RICKS	JOINT SCHOOL DISTRICT #2
NUMBER	63-08437A	63-08437B
AMOUNT	.82 cfs	.72 cfs
USE	Irrigation 4-1 to 9-30	Irrigation 4-1 to 10-31
	Stockwtr. 1-1 to 12-31	Domestic 1-1 to 12-31
POINT OF DIV	SESWNE, S12	SESWNE, S12, T4N, R1W; SESESW, S5 & SESWNW, S7, T4N, R1E
PLACE OF USE	SWNE & NESW, S12 (41 acres total) (Section 12 in T4N, R1W)	NWNE & SWNE, S12 (28 acres total)
TOTAL USE A + B	1.54 cfs for 69 acres, misc. stockwater, and domestic for Eagle High School.	
REMARKS	S12 well aka Ricks Well, S5 well aka Crandlemire Well, & S7 well aka Redwood Creek Well. These wells are also involved with Transfer #4590 (Joint School Dist. #2) and Appl. for Permit #63-12192 (Eagle United Water for municipal use).	

Any protest against approval of the proposed water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705, together with a protest fee of \$25 on or before May 8, 1995. The protestant must also send a copy of the protest to the applicant.

Attachment 1

TRANSFER SUMMARY

Project Overview. Eagle High School is being built on a 52-acre parcel which includes 36 acres in the SWNE Section 12, T4N, R1W and 16 acres in the NWNE Section 12, T4N, R1W. The school will accommodate approximately 2000 students and staff. A portion of the site is currently irrigated using groundwater diverted from a well (the Ricks Well) in the SESWNE Section 12, T4N, R1W, under water right license 63-08437. Joint School District No. 2 proposes to continue to utilize the Ricks Well for school site irrigation and to use two other existing wells to serve the High School domestic and fire protection requirements. The domestic and fire protection wells are the Redwood Creek Well and the Crandlemire Well. These wells will be operated by United Water Idaho, doing business as either Eagle United Water Company or EM2.

Description of the Existing Water Right. Water right 63-08437 is licensed for 2.67 cfs for the irrigation of 135.4 acres and an annual diversion volume of 609.3 acre-feet. In recent years, as evidenced by SRBA claim A63-08437, the Ricks Well has been used to irrigate only 77 acres. This area includes 40 acres in the SWNE Section 12 and 37 acres in the NESW Section 12. Total consumptive use claimed in the SRBA is 269.5 acre-feet per annum (3.5 acre-feet per acre). Claimed diversion rate is 1.54 cfs. The claim also includes stockwater for 50 head of cattle.

The reduction in the water right occurred as a result of subdividing a portion of the licensed place of use for residential development (Flint Estates). The subdivided lands included 34.2 acres in the NESE Section 12 and 34.3 acres in the NWSE Section 12. After the land was subdivided, water from the Ricks Well was no longer made available to the place of use in the NESE and NWSE Section 12. These lands appear to have undergone a period of five or more consecutive years of not utilizing the water from the well. At the same time, the place of use was increased in the SWNE Section 12 from 37.8 to 40 acres and in the NESW Section 12 from 29 to 37 acres, resulting in the SRBA claim of 77 acres.

Description of the Water Right After the Transfer. This transfer proposes to split license 63-08437 into two rights, 63-08437A and 63-08437B. The transfer is summarized on Table 1 and detailed below.

- Water right 63-08437A would continue to provide supplemental irrigation to the claimed irrigated area not associated with the High School. This includes 37 acres in the NESW of Section 12 and 4 acres in the SWNE of Section 12, for a total irrigated area of 41 acres. Diversion rate would be 0.82 cfs (0.02 cfs/acre). Annual diversion volume would be 184.5 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 143.5 acre-feet (3.5 acre-feet per acre). Water right 63-08437A would also include stockwater for 50 head of cattle with an annual diversion volume of 0.7 acre-feet. The Ricks Well would remain the point of diversion for this right.

MICROFILMED
OCT 08 1996

- Water right 63-08437B will provide supplemental irrigation for 28 acres of the High School property. Place of use will be 14 acres in the SWNE Section 12, T4N, R1W and 14 acres in the NWNE Section 12. Diversion rate for irrigation would be 0.56 cfs (0.02 cfs/acre). Annual diversion volume would be 126.0 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 98 acre-feet (3.5 acre-feet per acre). Point of diversion for irrigation will be the Ricks Well.

The transfer would add domestic as a new use for water right 63-08437B. Diversion rate for domestic use would be 0.72 cfs. Estimated annual domestic diversion volume (assuming 2000 students and staff, 25 gallons per person per day, and 220 school-use days per person per year) would be 11 million gallons per year, or about 33.8 acre-feet per year. The total irrigated area for license 63-08437 has been reduced by 8 acres (i.e., 8 acres at 4.5 acre-feet per acre equals 36 acre-feet) to account for the 33.8 acre-feet estimated annual domestic diversion volume under right 63-08437B and the 0.7 acre-feet estimated annual diversion volume for stockwater under right 63-08437A.

Two additional points of diversion will be added to 63-0437B⁸ because (1) IDHW-DEQ regulations require two water sources for a public drinking water system and (2) DEQ will not allow use of the Ricks Well for Eagle High School domestic use due to sanitary concerns related to well location and construction. The two new points of diversion will be the Redwood Creek Subdivision Well No. 1, located in SENW Section 7, T4N, R1E, and the Crandlemire Well, located in SESW Section 5, T4N, R1E.

The proposed transfer is summarized in Table 1.

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 2

(Attach one copy for each right)

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:

- a. Decree No. _____ Decreed to _____
in case of _____ vs. _____
dated _____ in _____ county of _____
- b. License No. 63-8437 issued by the Idaho Department of Water Resources.
- c. Claim No. _____ on file with the Idaho Department of Water Resources.
- d. Transfer No. _____ which produced this right.

2. Attach a copy of last year's tax notice for the property to which the water right is appurtenant or other documents which show ownership. Label document as attachment A. Check appropriate box below:

☐ Tax Notice

☐ Warranty Deed

☐ Other _____

3. Source of water groundwater tributary to _____

4. Date or priority February 14, 1977

5. Water is used for the following purpose:

amount 2.67 cfs for irrigation purposes from April 1 to September 30
(cfs/ac-ft)
amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft)
amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft)

6. Total amount of water under right 2.67 cubic feet per second and/or 609.3 acre-feet per annum.

7. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge.	County	Local name for diversion
		SW	NE	12	4N	1W	Ada	<u>Ricks Well</u>

WATER RESOURCES
WESTERN REGION

April 18, 1995

Mr. Steve Lester *SL*
Western Region Water Rights Supervisor
Idaho Department of Water Resources
2735 Airport Way
Boise, ID 83705

Subject: Application for Transfer of Water Right License 63-8437

Dear Steve:

As we discussed in your office today, I would like to amend the application for Transfer of Water Right for license 63-8437 to accurately reflect current ownership of the lands associated with the water right. The amendment would involve the 4 acres of irrigation located in the SW1/4, NE1/4 Section 12, T4N, R1W that was listed on page 2 of the transfer application. I understand that this property has been purchased from Keith and Ona Ricks by the Corporation of the Presiding Bishop of the Church of Jesus Christ of Latter-Day Saints, a Utah Corporation Sole.

The transfer should reflect the change in ownership by identifying this 4-acre portion of the water right as 63-8437C. Enclosed as pages 2a and 2b are two replacement pages describing the Ricks and LDS portions of water right 63-8437 after the proposed change. These pages should replace page 2 of the application. Also enclosed, as replacement pages 4 through 6, is a revised description of the transfer.

I have asked Mr. Larry Maurer of the Church of Jesus Christ of Later-Day Saints Physical Facilities Office North America, Northwest Area, to submit proof of ownership for the 4-acre property to you.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan

TRANSFER SUMMARY

Project Overview. Eagle High School is being built on a 52-acre parcel which includes 36 acres in the SWNE Section 12, T4N, R1W and 16 acres in the NWNE Section 12, T4N, R1W. The school will accommodate approximately 2000 students and staff. A portion of the site is currently irrigated using groundwater diverted from a well (the Ricks Well) in the SESWNE Section 12, T4N, R1W, under water right license 63-08437. Joint School District No. 2 proposes to continue to utilize the Ricks Well for school site irrigation and to use two other existing wells to serve the High School domestic and fire protection requirements. The domestic and fire protection wells are the Redwood Creek Well and the Crandlemire Well. These wells will be operated by United Water Idaho, doing business as either Eagle United Water Company or EM2.

Description of the Existing Water Right. Water right 63-08437 is licensed for 2.67 cfs for the irrigation of 135.4 acres and an annual diversion volume of 609.3 acre-feet. In recent years, as evidenced by SRBA claim A63-08437, the Ricks Well has been used to irrigate only 77 acres. This area includes 40 acres in the SWNE Section 12 and 37 acres in the NESW Section 12. Total consumptive use claimed in the SRBA is 269.5 acre-feet per annum (3.5 acre-feet per acre). Claimed diversion rate is 1.54 cfs. The claim also includes stockwater for 50 head of cattle.

The reduction in the water right occurred as a result of subdividing a portion of the licensed place of use for residential development (Flint Estates). The subdivided lands included 34.2 acres in the NESE Section 12 and 34.3 acres in the NWSE Section 12. After the land was subdivided, water from the Ricks Well was no longer made available to the place of use in the NESE and NWSE Section 12. These lands appear to have undergone a period of five or more consecutive years of not utilizing the water from the well. At the same time, the place of use was increased in the SWNE Section 12 from 37.8 to 40 acres and in the NESW Section 12 from 29 to 37 acres, resulting in the SRBA claim of 77 acres.

Description of the Water Right After the Transfer. This transfer proposes to split license 63-08437 into two rights, 63-08437A and 63-08437B. The transfer is summarized on Table 1 and detailed below.

- Water right 63-08437A would continue to provide supplemental irrigation to the claimed irrigated area not associated with the High School. This includes 37 acres in the NESW of Section 12 and 4 acres in the SWNE of Section 12, for a total irrigated area of 41 acres. Diversion rate would be 0.82 cfs (0.02 cfs/acre). Annual diversion volume would be 184.5 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 143.5 acre-feet (3.5 acre-feet per acre). Water right 63-08437A would also include stockwater for 50 head of cattle with an annual diversion volume of 0.7 acre-feet. The Ricks Well would remain the point of diversion for this right.

SEP 14 1995

- Water right 63-08437B will provide supplemental irrigation for 28 acres of the High School property. Place of use will be 14 acres in the SWNE Section 12, T4N, R1W and 14 acres in the NWNE Section 12. Diversion rate for irrigation would be 0.56 cfs (0.02 cfs/acre). Annual diversion volume would be 126.0 acre-feet (4.5 acre-feet per acre). Annual consumptive use would be 98 acre-feet (3.5 acre-feet per acre). Point of diversion for irrigation will be the Ricks Well.

The transfer would add domestic as a new use for water right 63-08437B. Diversion rate for domestic use would be 0.72 cfs. Estimated annual domestic diversion volume (assuming 2000 students and staff, 25 gallons per person per day, and 220 school-use days per person per year) would be 11 million gallons per year, or about 33.8 acre-feet per year. The total irrigated area for license 63-08437 has been reduced by 8 acres (i.e., 8 acres at 4.5 acre-feet per acre equals 36 acre-feet) to account for the 33.8 acre-feet estimated annual domestic diversion volume under right 63-08437B and the 0.7 acre-feet estimated annual diversion volume for stockwater under right 63-08437A.

Two additional points of diversion will be added to 63-0437B because (1) IDHW-DEQ regulations require two water sources for a public drinking water system and (2) DEQ will not allow use of the Ricks Well for Eagle High School domestic use due to sanitary concerns related to well location and construction. The two new points of diversion will be the Redwood Creek Subdivision Well No. 1, located in SENW Section 7, T4N, R1E, and the Crandlemire Well, located in SESW Section 5, T4N, R1E.

The proposed transfer is summarized in Table 1.

Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

ground

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

the

The right holder shall install and maintain totalizing flow meters as part of diverting works. The right holder shall provide reasonable access for department personnel to inspect the flow meter in order to monitor the ground water aquifer. The right holder shall maintain records of the amount of water diverted.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: License

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

The right holder shall install and maintain totalizing flow meters as part of the diverting works. The right holder shall provide reasonable access for department personnel to inspect the flow meter in order to monitor the ground water aquifer. The right holder shall maintain records of the amount of water diverted.

IDAHO DEPARTMENT OF WATER RESOURCES
Adjudication Claim Report 63-8437B

Conditions of Approval:

1. ~~R65~~ This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 af per acre at the field headgate for irrigation of the lands above.
2. WB4 The total instantaneous diversion of water from all points of diversion under Right 63-8437B shall not exceed 0.71 cfs, nor a total combined annual volume of 159.8 af.
3. ~~X61~~ The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3-15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval. (covered under 804)

Remarks:

1. ~~Purpose of Use~~ Domestic use is for Eagle High School.
2. Explanatory The right holder shall install and maintain totalizing flow meters as part of the diverting works. The right holder shall provide reasonable access for department personnel to inspect the flow meter in order to monitor the ground water aquifer. The right holder shall maintain records of the amount of water diverted.
- Exp. 3. Explanatory After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
- Exp. 4. Explanatory Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
5. Explanatory The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
6. Explanatory If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
- Exp. 7. General The right holder shall accomplish the change authorized by Transfer 70964 within one (1) year of the date of ~~this~~ ^{the} approval.
- Exp. 8. Explanatory Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
