H. REMARKS AND OVERLAP REVIEW ANALYSIS

THE PERMIT WAS ORIGINALLY FOR DOMESTIC USE
 WITH UP TO 1/2 ACRE OF IRRIGATION NOW IT IS ONLY
 USED FOR THE IRRIGATION OF LAWN AROUND BUSINESS,
 SINCE THE BUSINESS HOOKED INTO CITY WATER FOR
 ITS DOMESTIC USES BUT SAME IRRIGATION
 IS FOR LESS THAN 1/2 ACRE AND IS USED
 FOR IRRIGATION THEN IT CAN STILL BE CALLED
 DOMESTIC.

Director

November 9, 2005

Dear Water Right Claimant(s):

The Idaho Department of Water Resources (IDWR) has completed its initial investigation of your water right claim(s) in the Snake River Basin Adjudication (SRBA). We have enclosed a printout showing our preliminary recommendation for reporting your claim(s) to the SRBA District Court later in 2005.

Please review the preliminary recommendation carefully. If there is any information on the printout that you believe is inaccurate, please fill out the enclosed reply indicating what changes you believe should be made. Further instructions to assist you with review are enclosed. For water rights with an irrigation water use, a map produced from Geographic Information System (GIS) computerized images of the place of use for your water right is also enclosed.

If you have questions concerning your recommendation, please contact the Department's Western Regional Office at (208) 334-2190. If needed, an appointment with a water resource agent can be made. Please bring any and all information you have which could help IDWR understand your claim(s) and recommend the claim(s) accurately, which is my directive to the staff.

This preliminary recommendation process is intended to ensure IDWR recommends your water right accurately to the SRBA District Court. This is the easiest and least costly means for you to identify corrections you believe should be made to our recommendation. Completion of this process is an important step toward the overall success of the adjudication in Idaho. Your participation is necessary and appreciated by IDWR to provide accurate information is provided to the SRBA District Court.

We look forward to hearing from you.

Sincerely,

Karl J. Dreher
Director

Dear Water Right Claimant:

To help you with your water right claim(s) in the Snake River Basin Adjudication, this letter of explanation is being sent to you along with information sent by the Idaho Department of Water Resources (IDWR). Included are the following important documents which I ask you to please read carefully because they give you the opportunity to save a great deal of time and money:

1. **Preliminary Recommendation.** This is IDWR's *initial* finding and conclusion about your water right and how it should be reported to the SRBA Court. This preliminary recommendation is not filed with the court, but is provided to you to help correct errors or resolve any disagreement you may have over its content. This document has been prepared following IDWR's investigation and may be different than the claim(s) you actually filed.

Therefore, please review this preliminary recommendation carefully to find any errors or disagreements you have with IDWR's findings.

2. **Error Correction/Settlement Process.** This preliminary recommendation is a special service provided to you by IDWR to help you correct errors and resolve any other disagreement you have before the actual recommendations are ultimately filed with the court.

A description of how to work with IDWR is included. Our experience in the SRBA shows that by working in cooperation with IDWR most errors and differences can be addressed before coming into court. It's well worth your time to take full advantage of IDWR's helpful service. If your disagreement cannot be resolved, you will be able to file an objection to IDWR's actual recommendation when it is filed in court and have the final decision made by the Presiding Judge.

This error correction service is an important opportunity for you to work together with IDWR to make sure your water right claim(s) are decreed accurately. There is no cost to you other than your time reviewing the preliminary recommendation and talking to IDWR about any problem you see. Of course, you may always employ the services of an attorney if you wish.

The goal of the SRBA is to see that your water right(s) are decreed by the court as accurately and fairly as possible. It is important to me that this is done efficiently in order to reduce your costs and present you with your decree.

I strongly encourage you to take full advantage of this opportunity to use the fine and courteous services provided by IDWR.

Sincerely yours,

John M. Melanson
Presiding Judge
Snake River Basin Adjudication

EXPLANATION OF ELEMENTS OF A WATER RIGHT

To assist you in reviewing the preliminary recommendation of your claim are the following explanations:

Water right number: This number is assigned by IDWR to identify your claim. The first two digits indicate the sub-basin of the Snake River Basin where your claim is located.

Name and address of claimant: This is the name and address shown on the notice of claim form, or on the most recent *Notice of Change of Water Right Ownership* (see enclosed form if you need to change this information) that was filed with IDWR as required by statute.

Source: The source is the natural water body to which the claimant has a right. For surface water sources, the natural water body to which the source is tributary is also shown.

Priority Date: This is the calendar date which is used to determine the relative priority of the right in relation to other rights from the same source, and is determined based on the method of appropriation (see basis of right, below). When there is insufficient water available to satisfy all existing rights, the water right holders with the oldest priorities are entitled to have their water rights satisfied before right holders with newer priorities are entitled to water.

Purpose of Use: Purpose of use indicates the general type of use made on the water, such as irrigation, domestic, or stockwater.

Period of Use: The period of use is the portion of the calendar year when water may be used for a particular purpose.

Quantity: The quantity of the right is the rate of diversion in cubic feet per second (CFS), the volume of water diverted in acre feet per calendar year (AFY), and/or the volume of water stored in AFY. The quantity for each purpose of use is shown, as well as the total quantity.

Non-irrigation Uses: If your preliminary recommendation includes purposes of use other than irrigation, then this element further describes the other purposes of use.

Point of Diversion: The point of diversion is the point at which water is diverted from the source, and is generally described by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot within which the point of diversion is located. In some instances the point of diversion is described by a legal description of the 10 acre tract (1/4 1/4 1/4 section or 1/64 section) within which the point of diversion is located.

"B" and "E" suffixes indicate the beginning and ending points of an instream flow right. "I" and "R" suffixes indicate points of injection and rediversion. Points of injection and rediversion are indicated where water is diverted from one source, injected into another source, and then rediverted, or where water from one source is exchanged with water from another source.

Place of Use: The place of use is the location where water is used, which is indicated by a legal description of the 40 acre tract (1/4 1/4 section or 1/16 section) or government lot where the water is used. For irrigation rights, the number of irrigated acres in each 40 acre tract or government lot is listed.

Remarks: Remarks, if any, further describe the particular right. PLEASE REVIEW THE REMARKS CAREFULLY.

Basis of Right: The basis of right may be a decree (where the water right was previously determined by a court); posted notice (an historical method of appropriation that is no longer available); beneficial use (another historical method of appropriation that is available today only in very limited circumstances); permit (where IDWR has granted an application seeking approval of a proposed appropriation); or license (where an appropriation has been completed pursuant to permit).

DEPARTMENT OF WATER RESOURCES

**INSTRUCTIONS FOR FILING
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP**

This form has been prepared to assist all claimants and owners of water rights to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. All claimants and owners of water rights are required to notify the Department of Water Resources (IDWR) of any change in mailing address or change in ownership of all or part of a water right. In addition, all purchasers of water rights within a pending general adjudication area must inquire whether a notice of claim has been filed and, if not, shall file a notice of claim if necessary.

Effective July 1, 2000, the Idaho Legislature amended Section 42-248, Idaho Code to include a provision for fees to file a Notice of Change in Water Right Ownership. Please see details at Item 8, below, to determine if fees are required for your filing.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, **the seller should be able to provide you with the water right or adjudication claim number(s).** Please enter the number(s) at **Item 1.** Corresponding water right and adjudication claim numbers should be listed next to each other on the form. You may have purchased only a portion of the water right(s) held by the seller. If so, the water right(s) held by the seller may need to be "split" to provide you your share of each right. Indicate if a split is required by checking in the space provided next to each water right.

If you receive water from a municipal provider, an irrigation district or other water delivery organization, where the water rights are held by the organization, please do not use this form to record a change. You may need to contact the water delivery organization to determine if any action is necessary.

If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If adjudication claims for the rights are required and have not been filed, IDWR will so advise you.

2. The information described at **Item 2** is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. **Do not** obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner/claimant(s) of the water right(s) at **Item 3.**
4. The name, mailing address, and telephone numbers of the new owner/claimant(s) is entered at **Item 4.** Please indicate the relationship between multiple owners by using the connector "and", "or", or "and/or." If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign; however, only one of the named parties is required to sign.
5. At **Item 5**, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.

6. You may have purchased only a portion of the water right(s) held by the seller. If this change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. For each water right requiring a split between owners, fill in the appropriate spaces in the box(es) at **Item 6**. Copy the page as many times as necessary to fully describe each water right after the change. Include documentation as necessary to describe nonstandard agreements or arrangements regarding division of the water right(s). **If the water right(s) will not be split, skip Item 6 and go to Item 7.**
7. The new owner(s) must sign the form in the space(s) provided at **Item 7**. If an "and" connector is used at **Item 4**, all parties must sign this form. If an "and/or" or "or" connector is used, all parties may sign; however, only one of the named parties is required to sign. If someone other than the owner signs the notice, evidence of authority to sign for the owner must be attached. If the new owner is a corporation or other organization, the person signing the notice must be an officer of the corporation or otherwise have authority to sign for the organization and must include their title with the signature.
8. The Legislature has waived the fee to file a Notice of Change in Water Right Ownership for any water right pending in a general water right adjudication such as the Snake River Basin Adjudication. This waiver ends when a partial decree is issued for the water right that has been claimed. For water rights not pending in a general adjudication, the filing fee is \$25 per water right, except for those water rights which will be divided as a result of the change in ownership. The filing fee for division of a water right is \$100 per water right to be divided. When complete, you should retain a copy and return the original form to the IDWR office nearest you:
