Dear Mr. Rettig:

We have received the application for permit filed by Dean & Roselyn Wilson for three springs to be used for domestic and irrigation purposes. However, before processing can begin, additional information is needed.

In your letter you stated a check for \$30 was enclosed, however, when the letter was first opened no check was found. This fee must be paid before we can begin processing the application. Please mail the fee when the application is resubmitted.

On the source of water there was some question concerning whether or not the source is springs or Goose Creek. From the diagram it appears the perforated pipelines lie in the creek bed. If Goose Creek only flows for a short period of time in the spring and early summer, with spring seepage during mid and late summer, then the source can be springs, tributary to Goose Creek. However, if Goose Creek flows all year round, fed by spring seepage, then the source should be Goose Creek, tributary to Dry Creek. Please change your application accordingly.

One more item concerns the amount of water and purposes for which it will be used. For three acres of irrigation the Department recommends at least one inch per acre be applied for and does allow up to one and one-half inches for acreage under five acres. At one inch per acre the amount of water for three acres would be .06 cfs. If domestic use is separate (in-house use) then .02 cfs is recommended. The total would then be .08 cfs which has the same fee as .02 cfs. The advantage of this increase is that if you end up using more than 10 gallons per minute after development, then you will have enough water on the permit to cover that use. Basically, however much water you use will be licensed based on an on-site inspection by one of our field examiners after completion of the project.

Please complete the application as requested and return it to this office with the above mentioned fee. If you have any questions concerning this matter, feel free to contact me.
