14. Remarks:

Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

LTD. PARTNERSHIP ESTABLISHED IN 1980.

CLAIM AMENDED PER TRANSFER NO. 4137 APPROVED 6/17/1993.

SEE ALSO ADDITIONAL CONDITIONS OF APPROVAL AS LISTED ON THE COPY OF MEMORANDUM DECISION AND ORDER DATED 6/17/1993.

THE CLAIMANT SHALL COMPLY WITH THE DRILLING PERMIT REQUIREMENTS OF SECTION 42-235, IDAHO CODE.

THE WELL LOCATED IN THE NWNW, S35, T04N, R01W, SHALL BE EITHER SHALLOWER THAN 100' OR CAGED AND SEALED TO A MINIMUM DEPTH OF 200'. THE MOTOR INSTALLED FOR DIVERSION FROM THIS WELL SHALL BE LIMITED TO A 15 HORSEPOWER RATING.

DIVERSION UNDER THIS RIGHT IS ALLOWED FROM ALL 5 WELLS.

THIS RIGHT IS SUBJECT TO ALL PRIOR WATER RIGHTS.

THE RIGHT HOLDER IS NOT AUTHORIZED TO INCREASE THE HORSEPOWER ON THE EXISTING WELLS OVER THAT ALREADY INSTALLED AND OPERATING DURING THE 1992 IRRIGATION SEASON.

PRIOR TO DIVERSION OF WATER IN 1993, A MEASURING DEVICE OF A TYPE ACCEPTABLE TO THE DEPT. SHALL BE INSTALLED AND MAINTAINED IN CONJUNCTION WITH EACH WELL THAT DIVERTS WATER UNDER THIS TRANSFER. IN ADDITION, THE RIGHT HOLDER SHALL PROVIDE TO THE DEPT. A PLAN LIMITING DIVERSIONS TO NO MORE THAN 0.02 CFS PER ACRE FOR IRRIGATION PURPOSES ON IRRIGATED LAND FROM ALL SOURCES. THIS PLAN MUST BE APPROVED BEFORE PUMPAGE UNDER THIS TRANSFER IS AUTHORIZED.

THE CLAIMANT IS RESPONSIBLE TO ENSURE THAT WATER PUMPED UNDER THIS TRANSFER DOES NOT CAUSE THE WATER LEVEL IN ANY IRRIGATION WELL TO EXCEED THE REASONABLE PUMPING LEVEL, UNLESS THE HOLDER OF THE PRIOR WATER RIGHT RECEIVES REASONABLE COMPENSATION OR

MITIGATION FOR THE REDUCED WATER LEVEL CAUSED DIRECTLY OR INDIRECTLY BY THE WITHDRAWAL OF WATER UNDER THIS TRANSFER.

THE CLAIMANT IS RESPONSIBLE TO ENSURE THAT WATER PUMPED UNDER THIS TRANSFER DOES NOT DIRECTLY, AS DETERMINED BY THE DIRECTOR, CAUSE THE WATER LEVEL IN ANY DOMESTIC WELL DRILLED PRIOR TO MARCH 29, 1978, TO BE LOWERED SO AS TO REQUIRE MODIFICATION TO THE WELL OR PUMPING SYSTEM OR TO CAUSE THE WATER LEVEL IN ANY OTHER WELL HAVING A PRIOR RIGHT TO EXCEED A REASONABLE PUMPING LEVEL, UNLESS THE APPLICANT PROVIDES REASONABLE COMPENSATION OR MITIGATION, AS DETERMINED BY THE DIRECTOR, TO THE PRIOR WATER RIGHT HOLDER FOR THE REDUCED WATER LEVELS.

WATER DIVERTED UNDER THIS TRANSFER IS TO BE USED FOR SUPPLEMENTAL PURPOSES ONLY, IN CONNECTION WITH THE PRIMARY SURFACE WATER RIGHTS FROM THE BOISE RIVER. THE SURFACE WATER RIGHTS DEDICATED TO THIS LAND MUST BE UTILIZED TO THEIR FULL EXTENT DURING ANY YEAR THAT THESE SUPPLEMENTAL GROUND WATER RIGHTS ARE UTILIZED.

APPROVAL OF THIS WATER RIGHT TRANSFER DOES NOT GRANT ANY RIGHT-OF-WAY OR EASEMENT ACROSS THE LAND OF ANOTHER.

THE PROTESTS OF PARTIES WHO DID NOT ATTEND THE HEARING ARE SET ASIDE AND THOSE PROTESTANTS ARE BOUND BY THIS DECISION TO THE SAME EXTENT AS THOSE THAT DID ATTEND THE HEARING.

THE APPLICANT SHALL COMPLETE THE CHANGE AUTHORIZED BY THIS TRANSFER WITHIN 1 YEAR OF THE DATE OF FINAL APPROVAL.

RIGHT NO. A63-08825 IS LIMITED TO THE IRRIGATION OF 17.3 ACRES IN THE PLACE OF USE DESCRIBED ABOVE IN A

This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for irrigation of the lands above.

This right is a split from former right 63-8825 .

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
 Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

**New owner has acquired 8% (35 of 434 acres) of rights described by the above licenses, claims, and Transfer No 4137.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

FINAL MEMORANDUM DECISION AND ORDER
DENYING IN PART AND APPROVING IN PART
APPLICATION FOR TRANSFER

On May 13, 1993, the Department of Water Resources (department issued a Proposed Memorandum Decision and Order in connection with the above captioned matter. On May 27, 1993, protestant Catherine L. Nelson filed exceptions to the decision.

The department has reviewed the exceptions and responds to each as follows:

A) ATTACHMENT A of the decision has been changed to show that Catherine L. Nelson is an intervening protestant. The department allowed protestant Nelson to fully participate in the February 25, 1993 hearing conducted by the department.

B) The department has not included the water right principle of forfeiture in its decision, since the protestants did not allege forfeiture and the issue is not critical to the decision of the department. The primary objection of the protestants to the application for transfer was alleged injury to their water rights.

C) The more adequate supply of surface water in the Boise River drainage during 1993 means that irrigators will rely less on

MICROFILMED

wells which are used to provide a supplemental supply of water.

After reviewing the exceptions which have been filed and based upon his understanding of the law, the Director makes the following Findings of Fact, Conclusions of Law, Analysis and Order:

FINDINGS OF FACT

1. On November 13, 1992, Larry James submitted an application for transfer to the Department of Water Resources to add points of diversion to licensed water rights nos. 63-8825, 63-10713 and 63-10872 (application). The points of diversion are referenced herein as follows:

<u>Well No.</u>	<u>Location</u>	<u>Status</u>
1	NESE, Sec. 27, Twp. 4N, Rge. 1W, B.M.	Existing
2	NENE, Sec. 34, Twp. 4N, Rge. 1W, B.M.	Existing
3	SESE, Sec. 26, Twp. 4N, Rge. 1W, B.M.	Existing
4	NENE, Sec. 36, Twp. 4N, Rge. 1W, B.M.	Existing
5	NWNW, Sec. 35, Twp. 4N, Rge. 1W, B.M.	Proposed
6	NESW, Sec. 25, Twp. 4N, Rge. 1W, B.M.	Proposed

Under the existing licenses, water right no. 63-8825 utilizes well nos. 1 and 2; water right no. 63-10713 utilizes well no. 3; and water right no. 63-10872 utilizes well no. 1. The application for transfer (application) proposes to add wells nos. 3, 4, 5 and 6 to water right no. 63-8825; to add wells nos. 4, 5 and 6 to water right no. 63-10713; and to add wells nos. 2, 3, 4, 5 and 6 to water right no. 63-10872. The combined rate of flow under these water rights is 6.79 cubic feet per second (cfs), for the irrigation of 434 acres.

2. Notice of the application was published in the Idaho Statesman on December 3 and 10, 1992. The deadline established for protests was December 21, 1992.

3. Protests against approval of the application were received from the persons in the "Original Protestants" list on Attachment A, incorporated herein by reference.

protestant, testified that his domestic well collapsed in 1990 and had to be replaced.

13. Many of the currently used wells in the vicinity of the proposed diversions provide water for single family domestic uses. Some of the wells have been drilled and used prior to March 29, 1978.

14. Relative to public interest, the protestants objected to economic costs related to increased pumping depths and well deepening. The applicant predicts economic gains for itself via more assured water supplies.

CONCLUSIONS OF LAW

1. Idaho Code, Sec. 42-222 states in part as follows:

The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is consistent with the conservation of water resources within the state of Idaho and is in the local public interest as defined in section 42-203A(5), Idaho Code...

2. Consideration of the local public interest criterion of Idaho Code, Sec. 42-203A(5) is defined by Water Appropriation Rule 5,1,5. to include:

... the effect the project will have on the economy of the local area affected by the proposed use as determined by the employment opportunities, both long and short term, revenue changes to various sectors of the economy, short and long term, and the stability of revenue and employment gains; the effect the project will have on recreation, fish and wildlife resources in the local public area affected by the proposed use; and compliance with applicable air, water and hazardous substance standards, and compliance with planning and zoning ordinances of local or state government jurisdictions.

3. Idaho Code, Sec. 42-226, states in part as follows:

The traditional policy of the State of Idaho, requiring the water resources of this state to be devoted to beneficial use in reasonable amounts through

appropriation, is affirmed with respect to the ground water resources of this state as said term is hereinafter defined and, while the doctrine of "first in time is first in right" is recognized, a reasonable exercise of this right shall not block full economic development of the underground water resources.

4. Domestic wells drilled prior to [March 29,] 1978 are exempt from the provisions of Idaho Code, Sec. 42-226. Parker v. Wallentine, 103 Idaho 506,510 (1982).

5. A junior water right holder is responsible to compensate or to mitigate adverse impacts to owners of senior domestic wells drilled and used prior to March 29, 1978, if the junior water right holder's use directly causes such a domestic well to become unusable or require modification of the well or pumping system in order to obtain the domestic water.

6. Use of water under the application will not be enlarged if the use of water under the transfer is properly conditioned by the department.

7. Use of water under terms of the application will not injure other water rights if the transfer is accomplished in compliance with the conditions of approval shown below.

8. Approval of the application is not against the local public interest.

9. The maximum rate of diversion for irrigation purposes in Idaho is 0.02 cfs per acre unless justification for a larger rate has been provided to the satisfaction of the department.

10. New wells which do not withdraw water from the layer 100' to 200' below land surface will minimize interference with existing water rights.

11. The department should partially approve the application with certain conditions and limitations.

ANALYSIS

The protestants in this matter expressed a number of concerns relative to the addition of two new proposed wells, and relative to

operation of the irrigation system from ground water.

Regarding the addition of new wells, the applicant demonstrated that additional water will not be pumped if well no. 5 is allowed because it will share in producing the diversion capacity already licensed for well no. 3. Both of these wells are located on lands irrigated by the applicant. On the other hand, the applicant failed to provide a convincing need for well no. 6, in part due to its proposed location outside of the area which is irrigated under the water right licenses, and in part providing the potential for increased diversion under the rights. Thus, approval of the addition of well no. 6 should be denied.

Regarding the operation of the irrigation system, one concern expressed by the protestants is the potential for excessive diversions for irrigation of lands served by the wells, when combined with surface water flows provided from the Boise River. Diversions from the wells identified herein should be measured by the water right holder to ensure that excessive flows are not diverted, and to provide that surface water supplies are used to the maximum extent to minimize impact on the ground water aquifers. In addition, the applicant should be required to ensure that no more than 0.02 cfs per acre is applied to the irrigated land at any time from all available water sources.

Concerns about the aquifer are two-fold. One aspect is related to the amount of water available for appropriation. In this regard, information in the file and records of the Department demonstrates that there is ample water in the aquifer to provide for the uses identified in these water rights, while providing for other water rights in the basin. The other aspect is related to the impact of diversions under these water rights on artesian pressures and water levels within the aquifer. Parker v. Wallentine allows domestic users with rights prior to March 29, 1978 to seek mitigation or compensation from any groundwater user determined to adversely affect the domestic uses.

The concern expressed by the protestants about unapproved use of a surface water canal system by the applicant for delivery of

diverted ground water is a private matter between the applicant and the owner/operator of the canal and need not be considered by the Department since approval of the transfer does not grant a right-of-way.

ORDER

IT IS, THEREFORE, HEREBY ORDERED that Application for Transfer of Licensed Water Rights Nos. 63-8825, 63-10713 and 63-10872 is DENIED IN PART AND APPROVED IN PART as described below:

~~A.~~ The construction and use of well no. 6, proposed to be located within the NESW, Sec. 25, Twp. 4N, Rge. 1W, B.M. is DENIED.

B. The addition of well no. 5, located within the NWNW, Sec. 35, Twp. 4N, Rge. 1W, B.M. is APPROVED, subject to the following conditions and limitations:

efp ~~1.~~ The applicant shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

efp ~~2.~~ Well no. 5 ^{NWNW, S. 35} shall be either shallower than 100 feet, or cased and sealed to a minimum depth of 200 feet. The motor installed for diversion from this well shall be limited to a 15 horsepower rating.

omit ~~3.~~ Diversion under water rights nos. 63-8825 and 63-10872 is allowed from wells nos. 1 through 5. Diversion under water right no. 63-10713 is allowed from wells nos. 3 through 5.

~~4.~~ ~~These water rights are subject to all prior water rights.~~ *omit*

ok ~~5.~~ These rights, when combined with all other rights, shall provide no more than .02 cfs per acre nor more than 4.5 af per acre for the lands above.

efp ~~6.~~ The right holder is not authorized to increase the horsepower on the existing wells over that already installed and operating during the 1992 irrigation season.

efp 7. Prior to diversion of water in 1993, a measuring device of a type acceptable to the Department shall be installed and maintained in conjunction with each well that diverts water under these water rights. In addition, the water right holder shall

provide to the Department a plan limiting diversions to no more than 0.02 cfs per acre for irrigation purposes on irrigated land from all sources. This plan must be approved before pumpage under this transfer is authorized.

8. The applicant is responsible to ensure that water pumped under this transfer does not cause the water level in any irrigation well to exceed the reasonable pumping level, unless the holder of the prior water right receives reasonable compensation or mitigation for the reduced water level caused directly or indirectly by the withdrawal of water under this transfer.

9. The applicant is responsible to ensure that water pumped under this transfer does not directly, as determined by the Director, cause the water level in any domestic well drilled prior to March 29, 1978, to be lowered so as to require modification to the well or pumping system or to cause the water level in any other well having a prior right to exceed a reasonable pumping level, unless the applicant provides reasonable compensation or mitigation, as determined by the Director, to the prior water right holder for the reduced water levels.

10. Water diverted under these water rights is to be used for supplemental purposes only, in connection with the primary surface water rights from the Boise River. The surface water rights dedicated to this land must be utilized to their full extent during any year that these supplemental ground water rights are utilized.

11. Approval of this water right transfer does not grant any right-of-way or easement across the land of another.

12. The protests of parties who did not attend the hearing are set aside and those protestants are bound by this decision to the same extent as those that did attend the hearing.

13. The applicant shall complete the change authorized by this transfer within one (1) year of the date of final approval.

14. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the transfer approval should not be rescinded.

15. Approval of this transfer does not preclude the

opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Dated this 17TH day of JUNE, 1993.

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	0.220 CFS 77.70 AFY

The use of water for irrigation under this right may begin as early as March 1, provided other elements of the right are not exceeded. The use of water before March 15 under this remark is subordinate to all water rights having no subordinated early irrigation use and a priority date earlier than the date a partial decree is entered for this right.

PLACE OF USE: IRRIGATION Within ADA County

T04N R01W S28 SESE 35.00

35 ACRES TOTAL

This right is limited to the irrigation of 17.3 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

This right is a split from former right 63-8825 .

Failure of the right holder to comply with the conditions of Transfer No. 4137 is cause for the Director to rescind approval of the transfer.

Use of this right is combined with water from Settlers Irrigation District.

Use of this right is combined with water from Nampa Meridian Irrigation District.

The applicant is responsible to ensure that water pumped under Transfer No. 4137 does not directly, as determined by the Director, cause the water level in any domestic well drilled prior to March 29, 1978, to be lowered so as to require modification to the well or pumping system or to cause the water level in any other well having a prior right to exceed a reasonable pumping level, unless the applicant provides reasonable compensation or mitigation, as determined by the Director, to the prior water right holder for the reduced water levels.

The applicant is responsible to ensure that water pumped under Transfer No. 4137 does not cause the water level in any irrigation well to exceed the reasonable pumping level, unless the holder of the prior water right receives reasonable compensation or mitigation for the reduced water level caused directly or indirectly by the withdrawal of water under Transfer No. 4137.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Water diverted under these water rights is to be used for supplemental purposes only, in connection with the primary surface water rights from the Boise River. The surface water rights dedicated to this land must be utilized to their full extent during any year that these supplemental ground water rights are utilized.

Well no. 5, located within the NWNW, Sec. 35, Twp. 4N, Rge. 1W, B.M. shall be either shallower than 100 feet, or cased and sealed to a minimum depth of 200 feet. The motor installed for diversion from this well shall be limited to a 15 horsepower rating.

Prior to diversion of water in 1993, a measuring device of a type acceptable to the Department shall be installed and maintained in conjunction with each well that diverts water under these water rights. In addition, the water right holder shall provide to the Department a plan limiting diversions to no more than 0.02 cfs per acre for irrigation purposes on irrigated land from all sources. This plan must be approved before pumpage under Transfer No. 4137 is authorized.

Approval of Transfer No. 4137 does not grant any right-of-way or easement across the land of another.

The right holder is not authorized to increase the horsepower on the existing wells over that already installed and operating during the 1992 irrigation season.

STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

Re: Original Notice of Claim to a Water Right No. 63-8825
Renumbered to Notice of Claim to a Water Right No. 63-32318

Dear Sir or Madam:

We have received and processed a Change of Ownership for a portion of the Claim to a Water Right Number as referenced above. This change of ownership resulted in a split of the original claim.

When a portion of the original water right claim has been conveyed to another and the original right has been split, then the original claim number is renumbered by issuing a new water right number to represent each split. Each split contains only the portion of the original right for each separate owner. The above referenced new claim number reflects your remaining portion of the original claim after the change of ownership. Enclosed is a copy of this new water right for your records. Please refer to your new claim number when corresponding with our office.

Also enclosed is a copy of the Notice of Completed Administrative Proceedings, which has been sent to the Snake River Basin Court as notification of the change.

If you have any questions concerning this ownership change, or the enclosed information, please feel free to contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Lori Harris". The signature is written in dark ink and is positioned above the printed name and title.

Subject: Ownership change and split of 63-8825, 63-10713, & 63-10872

On behalf of my client, enclosed is an ownership change notice for the above three referenced rights. We had earlier submitted ownership change notices for other portions of these rights. This change is concerning property located at T04N R01W Section 28 SESE, to which 35 acres of the "James" rights are appurtenant.

Please let me know if you have any questions or require any additional information.

Sincerely,

Subject: Ownership change and split of 63-8825, 63-10713, & 63-10872

On behalf of my client, enclosed are ownership change notices for the above three referenced rights. These documents refer to about 80% of these rights. EL and Shirley Bews own 49% of the rights in their name. Primeland Development Company owns 31% of the rights, and Mr. & Mrs. Bews are authorized to sign as partners in the company. The enclosed map describes the respective parcels. Also enclosed is a check for \$200 which should cover the required fees.

It is my understanding that Bews also owns T04N R01W Section 28 SESE, to which another 35 acres of the James rights are appurtenant. However, I do not have appropriate documentation of their ownership at this time. When it becomes available, I will forward to your office. Then, Bews will show ownership of 57% of the rights.

Please let me know if you have any questions or require any additional information.

Sincerely,

Scott N. King, P.E.
