Re: Objection to Water Rights No. 63-2611A and 63-2611B

Dear Paul:

This letter responds to your letters dated September 26, 2007 to Mallard Farms and W & H Partnership LLC. Our client W & H Limited Liability Company owns Water Right No. 63-2611A and our client Mallard Farms Limited Liability Company owns Water Right No. 63-2611B (the "Water Rights"). The source for both of the Water Rights is the Baldridge and Meadows Drain (the "Drain").

The letters allege that the water subject to the water rights is wastewater. Riverside's Objection to the Water Rights, filed in the Snake River Basin Adjudication ("SRBA") states that the Water Rights are not subject to a lawful appropriation, the water is "wastewater" from Riverside Irrigation District's ("Riverside") water system, and continued use is a trespass on Riverside's system. You requested that my clients resolve the Objection by signing an SF5 settlement form, agreeing to add a "wastewater" notation on the water rights. Your and Riverside's characterization of the two water rights is incorrect.

We attach for your review a copy of the water rights profile of original water right 63-2611 (predecessor of both of the Water Rights); a copy of the License and Certificate of Water Rights for 63-2611; the Report of Engineer for Water Right 63-2611; the Application for Permit to Appropriate the Public Waters of the State, including the State Engineer's Remarks regarding historic water appropriation and use on the land and including a Consent of the Riverside Irrigation District to the appropriation of water from the Drain, and a copy of the District's signed consent.

As the enclosed material shows, the Water Rights are licensed private appropriations from the natural flow in the Drain. Neither the initial license nor the Engineer's remarks indicate this is a wastewater appropriation. The Drain flows year round, and has water in it for the appropriations regardless of whether Riverside's wastewater also flows in the Drain. Riverside in 1944 consented to this appropriation. There is no trespass.

HOLLAND & HART^{LLP}
ATTORNEYS AT LAW

Mr. Paul L. Arrington
December 10, 2007
Page 2

We attach two SF5 forms reflecting the correct characterization of these Water Rights. Historically, there was no "wastewater" label or condition on the License for Water Right 63-2411, and there should not be one now. When the SRBA Recommendation was published, we assume the wastewater label was included inadvertently simply because the Water Rights place of use and diversion falls within the Riverside District boundaries. The label should not have been placed on the Water Rights.

With the enclosed SF5 forms, the owners seek to correctly characterize the Water Rights and to resolve Riverside's Objection and the U.S. Bureau of Reclamation's ("BOR") Response to the Objection. We also have corrected on the SF 5 forms the listing of the point of diversion ("POD"). There is one POD, the Baldrige and Meadows Drain. We also correct the listings of the owners' names.

We request that Riverside and the copied representatives of the Department of Water Resources ("DWR") and BOR execute the enclosed SF5 forms and return the original signatures to me. We will take care of filing the fully-executed SF5 forms with the Court.

Please give me a call if you want to discuss this matter.

Sincerely,

HOLLAND & HART^{LLP}

 Beneficial use of water appropriated in accordance herewith, to be made on or before July 15, 1944

Witness my hand this 15th day of April, 1944

MARK R. KULP
 State Reclamation Engineer.

IN TESTIMONY WHEREOF, We, C. A. BOTTOLFSEN, Governor of the State of Idaho, and GEO. H. CURTIS, Secretary of State of the State of Idaho, have caused this instrument to be executed in the name of the State of Idaho, and caused the Great Seal of the State of Idaho to be hereunto affixed, this 15th day of April, 1944.

(SEAL) By GEO. H. CURTIS, Secretary of State. By C. A. BOTTOLFSEN, Governor.

Remarks: That from the time water for this land was first appropriated and used from the Boise River until a few years ago, it was carried through what was known as the "Ammon Ditch." Since the construction of the drainage canals in that territory above and East of this farm, it has been impossible to use the "Ammon Ditch, and the said water right # 70 has been diverted 14. from the Boise River for the past several years through what is known as the Haas Canal. This canal is not high enough (Continued

Remarks (Continued) to irrigate all of the lands of this farm as described herein except during the time of high water in the Boise River. Therefore, it has been necessary to divert water from the Meadows Drain about 200 feet south of the point where it empties into the Boise River and delivered to the lands described herein through a ditch higher in elevation than the Haas Canal. That in order to irrigate it all from the Haas Canal during the low water period in the Boise River, it would be necessary to maintain a very high and expensive dam across the river and also high checks in the Haas Canal, which were tried for a few years but proved ruinous to the land by causing the alkali to raise to the surface. Therefore, this filing is made, not to take the place of the decreed right from the river, but merely to supplement it during the low water period of the Boise River.

CONSENT

We, the undersigned, Commissioners of the Riverside Irrigation District (a drainage district organized and existing under the laws of the State of Idaho), hereby give and grant on behalf of the said Riverside Irrigation District, a permit to Charlotte D. MEMORANDUM TO CLAIM FILE

TO: CLAIM FILE NOS. 63-2611 A & B
FROM: VICKY L MUSIC, SR WATER RESOURCE AGENT, IDWR / WESTERN REGION
SUBJECT: CLAIM ANALYSIS
DATE: 9/12/2006
CC:

Water rt. no. 63-2611 was a license issued to Charlotte Allen for 5.1 cfs from the Meadows and Baldrige drains tributary to the Boise R. for irrigation of 255 acres in 5N 5W S 21 and 22. The duty of water is 0.02 cfs/acre. The Allens sold the property and license to the Walkers in 1981. During claims taking, Mallard Farms and the Walkers claimed portions of the license. Mallard Farms claimed 241 acres and 4.82 cfs and the Walkers claimed 114 acres and 2.62 cfs. Hence, the license is overclaimed by 100 acres and 2.41 cfs.

In 2001, the Walkers sold their portion of the licensed right and appurtenant land to W & H Partnership LLC. The deed states that the appurtenant water right consists of 131.14 " (2.62 cfs). IDWR ran a metes and bounds from the legal description in the deed which indicates that 188.5 acres was sold. Interestingly, the same people own both Mallard Farms and W&H. According to the Canyon Co. assessor information on Arcview, the current owner of all of the property is W&H. No change of ownership has been filed on the A portion.

Though the B claim is for 2.62 cfs, only 114 acres are claimed so I had to reduce the quantity to 2.28 cfs. For the A portion, based on the original licensed acres and the property owned and conveyed under B, I recommended 114 acres and 2.28 cfs. The additional acres claimed in the A portion were owned by the Walkers or were never licensed.

It is just a coincidence that the acres are the same as B. The property also has appurtenant Boise R. decreed rights (Haas Ditch Co.) so there is no way to really establish an accomplished transfer in POU. So, the A portion overclaimed and the B portion underclaimed the license. The licensed water is carried by the Riverside Irrigation District.

Seems like the best thing to do is recombine the splits into the parent. If the claimant contacts me, will suggest an amended claim for the parent.
