He is planning to subdivide the property and planning and zoning required the water right to be changed to the new name before his subdivision plat could be approved. I changed the ownership and gave him a copy of water right report showing the name change this morning.

MEMORANDUM

TO: ADJUDICATION FILES 63-17695, 63-17696, AND 63-17697

FROM: DANIEL A. NELSON

DATE: 11/9/06

SUBJECT: CLAIM FIELD EXAM

All three of the above claims were field by the same claimant, so I performed a field exam on all three exams on 10/27/2006. All three systems are basically separate as far as the wastewater use is concerned. Wastewater cannot be moved around from field to field. However, the Boise Kuna Irrigation District water is piped to each diversion point, so Boise Kuna water does overlap all three rights. All three rights use wastewater from neighbors fields. There are two separate neighbors that supply the wastewater. All three rights are located in Section 6, Township 1 South, Range 1 West in Ada County. All three rights request a diversion rate well over the allowable inch per acre, but no ditch loss information was submitted. Therefore, I suggest each right be limited to the standard inch or 0.02 cfs per acre standard. I will address the specific of each water right separately below:

63-17695:

The water for this right is captured in a drain ditch that enters the claimant's property in the NWSW. The ditch travels down the 40 acre tract line, and then turns just prior to entering the claimants property. I am very confident with the location of the point of diversion. The water in the ditch then goes to a small pond where Boise Kuna water is diverted, and both sources are delivered to the property. I couldn't use the pump for a measurement, since Boise Kuna water is needed to maintain the water supply for the pump.

Therefore, I performed a Mannings equation on the ditch. The Mannings equation shows that the ditch has the capacity to supply 0.43 cfs of water. There are 20 acres irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.40 cfs. These numbers seem reasonable. I suggest that this claim be recommended as follows:

0.40 cfs for irrigation from 3/1 to 11/15

For irrigation of 20 acres described as 6.9 acres in the NWSW, 0.6 acres in the NESW, 6.4 acres in the SWSW, and 6.1 acres in the SESW

With the condition that Boise Kuna Irrigation District water is also used on these lands.

63-17696:

The water for this right is captured in a drain ditch that enters the claimant's property in the NWSE. The ditch travels down the center of the 40-acre tract. The water in the ditch then goes to a small pond where Boise Kuna water is diverted, and both sources are delivered to the property.

I performed a Mannings equation on the ditch just after it entered the property. The Mannings equation shows that the ditch has the capacity to supply 1.05 cfs of water. There are 15.2 acres irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.30 cfs. These numbers seem reasonable. I suggest that this claim be recommended as follows:

0.30 cfs for irrigation from 3/1 to 11/15

For irrigation of 15.2 acres described as 7.6 acres in the SESW and 7.6 acres in the SWSE

With the condition that Boise Kuna Irrigation District water is also used on these lands.

63-17697:

The water for this right is captured in a drain ditch and pipeline that enters the claimant's property in the NWSE. The ditch travels down the eastern border of the 40-acre tract line, and enters the field being irrigated. Boise Kuna water is diverted into the same ditch that wastewater enters.

I performed a Mannings equation on the supply ditch, since it was the only mechanism for measurement. The Mannings equation shows that the ditch has the capacity to supply 31.20 cfs of water. This measurement seemed extremely high, and very unreasonable. I estimated the ditch capacity at approximately 1.00 cfs to 2.00 cfs capacity, but the only section of the ditch that could be measured was difficult to get to, and provided a poor measurement site.

However, only 5.6 acres are irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.11 cfs. This ditch does have the capacity to supply the 0.11 cfs, so I suggest that this claim be recommended as follows:

0.11 cfs for irrigation from 3/1 to 11/15 for irrigation of 5.6 acres in the SWSE

With the condition that Boise Kuna Irrigation District water is also used on these lands.

Re: Claim No(s). A63-17695

A63-17696, A63-17697

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
