The photo to the left shows the location of the point of diversion. The diversion is a pipeline that enters the ditch, and wastewater from the neighbor's fields. I wasn't able to get a picture of the actual diversion due to the weed growth, which was well over my head.

The photo below shows the ditch path to the field and the fence on the other side of the fence.

DEPARTMENT OF
WATER RESOURCES

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

3. Name and Address of Former Owner/Claimant(s)

5. Date you acquired the property

July 28 and Sept 15-2004

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

MEMORANDUM

TO: ADJUDICATION FILES 63-17695, 63-17696, AND 63-17697

FROM: DANIEL A. NELSON

DATE: 11/9/06

SUBJECT: CLAIM FIELD EXAM

All three of the above claims were field by the same claimant, so I performed a field exam on all three exams on 10/27/2006. All three systems are basically separate as far as the wastewater use is concerned. Wastewater cannot be moved around from field to field. However, the Boise Kuna Irrigation District water is piped to each diversion point, so Boise Kuna water does overlap all three rights. All three rights use wastewater from neighbors fields. There are two separate neighbors that supply the wastewater. All three rights are located in Section 6, Township 1 South, Range 1 West in Ada County. All three rights request a diversion rate well over the allowable inch per acre, but no ditch loss information was submitted. Therefore, I suggest each right be limited to the standard inch or 0.02 cfs per acre standard. I will address the specific of each water right separately below:

63-17695:

The water for this right is captured in a drain ditch that enters the claimant's property in the NWSW. The ditch travels down the 40 acre tract line, and then turns just prior to entering the claimants property. I am very confident with the location of the point of diversion. The water in the ditch then goes to a small pond where Boise Kuna water is diverted, and both sources are delivered to the property. I couldn't use the pump for a measurement, since Boise Kuna water is needed to maintain the water supply for the pump.

Therefore, I performed a Mannings equation on the ditch. The Mannings equation shows that the ditch has the capacity to supply 0.43 cfs of water. There are 20 acres irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.40 cfs. These numbers seem reasonable. I suggest that this claim be recommended as follows:

0.40 cfs for irrigation from 3/1 to 11/15

For irrigation of 20 acres described as 6.9 acres in the NWSW, 0.6 acres in the NESW, 6.4 acres in the SWSW, and 6.1 acres in the SESW

With the condition that Boise Kuna Irrigation District water is also used on these lands.

63-17696:

The water for this right is captured in a drain ditch that enters the claimant's property in the NWSE. The ditch travels down the center of the 40-acre tract. The water in the ditch then goes to a small pond where Boise Kuna water is diverted, and both sources are delivered to the property.

I performed a Mannings equation on the ditch just after it entered the property. The Mannings equation shows that the ditch has the capacity to supply 1.05 cfs of water. There are 15.2 acres irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.30 cfs. These numbers seem reasonable. I suggest that this claim be recommended as follows:

0.30 cfs for irrigation from 3/1 to 11/15

For irrigation of 15.2 acres described as 7.6 acres in the SESW and 7.6 acres in the SWSE

With the condition that Boise Kuna Irrigation District water is also used on these lands.

63-17697:

The water for this right is captured in a drain ditch and pipeline that enters the claimant's property in the NWSE. The ditch travels down the eastern border of the 40-acre tract line, and enters the field being irrigated. Boise Kuna water is diverted into the same ditch that wastewater enters.

I performed a Mannings equation on the supply ditch, since it was the only mechanism for measurement. The Mannings equation shows that the ditch has the capacity to supply 31.20 cfs of water. This measurement seemed extremely high, and very unreasonable. I estimated the ditch capacity at approximately 1.00 cfs to 2.00 cfs capacity, but the only section of the ditch that could be measured was difficult to get to, and provided a poor measurement site.

However, only 5.6 acres are irrigated out of this wastewater system. Using the standard inch per acre or 0.02 cfs per acre, the maximum allowable diversion rate is 0.11 cfs. This ditch does have the capacity to supply the 0.11 cfs, so I suggest that this claim be recommended as follows:

0.11 cfs for irrigation from 3/1 to 11/15 for irrigation of 5.6 acres in the SWSE

With the condition that Boise Kuna Irrigation District water is also used on these lands.

FIELD EXAM 63-17697
CEMENT DITCH FLOW CALCULATIONS
BY DAN NELSON

Water for this right flows through a cement ditch. In order to measure the maximum capacity of the ditch, I needed to take into account the maximum flow of the ditch. I used the Mannings Equation to calculate the maximum capacity of the ditch. The following are my calculations:

Mannings equation $\rightarrow Q = [(1.49/n) (R)^{2/3} (S)^{1/2}] \times A$

Below is a diagram of the cement ditch and the measurements taken. In order to do the Mannings formula, I first needed to determine the area and Hydraulic radius. My calculations are shown below the diagram.

$$\text{Area} = (\text{Top} + \text{Bottom} / 2) \times \text{Height}$$

$$\text{Area} = (3.61 \text{ ft} + 2.25 \text{ ft} / 2) \times 0.81 = 2.37 \text{ ft}^2$$

$$\text{Hydraulic Radius} = \text{Area} / \text{Wetted Perimeter}$$

$$\text{Wetted Perimeter} = 2C + \text{Bottom}$$

$$C = \sqrt{A^2 + B^2}$$

$$C = \sqrt{(0.81)^2 + (0.68)^2} = 1.06 \text{ ft}$$

$$\text{Wetted Perimeter} = 2(1.06) + 2.25 = 4.37$$

$$\text{Hydraulic Radius} = 2.37 / 4.37 = 0.54$$

CALCULATION:

n = 0.013	Cement Ditch in Open Channel Hydraulics, Ven Te Chow 1959, McGraw-Hill
R = 0.54	SEE ABOVE
S = 0.03	(I measured a length of ditch 30 feet long with a 0.83 feet difference in elevation using an automatic level. I measured 7.84 feet downstream and 7.01 feet upstream. Slope is determined by Rise/Run, therefore, 0.83 ft /30ft = 0.03 slope.)
A= 2.37 ft ²	SEE ABOVE

Mannings Calculation →

$$Q = [(1.49/0.013) (0.54)^{2/3} (0.03)^{1/2}] \times 2.37$$

$$Q= 31.2 \text{ cfs}$$

This seems unreasonably high for this ditch, but it definitely has the capacity to carry the 1.00 cfs requested and the 0.20 cfs allowable at 0.02 cfs for 10 acres.

The photo to the left shows the location of the point of diversion. The diversion is a pipeline that enters the ditch, and wastewater from the neighbor's fields. I wasn't able to get a picture of the actual diversion due to the weed growth, which was well over my head.

The photo below shows the ditch path to the field and the field on the other side of the fence.

Dennis P. Charters being first duly sworn,
deposes and says: ^{I am} ~~He is~~ a resident of Ada County
having been born & raised on the property
in which the waste water right is in
question. The farm was purchased by
my grandfather Harry Charters in the late
20's or early thirties, & was then operated
by his father Harry Charters Jr. during
my childhood until my teenage years
in the sixties in which I had an active
part in the farm management until
such time I purchased this farm & later
acquired the Hager property from my father's
estate. At all times the waste water on the
above mentioned claims were utilized.

Re: Claim No(s). A63-17695
A63-17696, A63-17697

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
