Remarks:Comments:

1. Igraves 9/28/2006 Source

Comment: After reviewing the topo map, it was questioned whether the claimants ditch actually diverted off Ross East End Drain. The field exam indicated that the claimant controlled all the water diverted into his ditch from the slough. After reviewing aerial photos and the field exam findings, it appears that excess diverted water not used for irrigation can either be sent back into Dixie Slough or down Ross East End Drain. Based on the above analysis, source was not clarified to Ross East End Drain and was recommended as claimed. See file for 2004 photo indicating the slough, ditch, drain and possible overflow points.

2. Igraves 9/28/2006 Flow Rate

Comment: The field exam indicates that there is adequate ditch capacity to recommend irrigation at one inch/acre.

3. Igraves 9/28/2006 Overlaps

Comment: The examiner verified that no other rights are used.

4. Igraves 9/29/2006 Priority

Comment: Priority date was advanced to 1950 based on the affidavit submitted by the owner and the 1939 photo.

Delivery System Narrative: diversion ditch runs north, piped under Bluff Ln, control gate diverts all water west of bordered up, or allows some to flow east back to Dixie Slough. Diversion ditch flows west, north then west again (dirt ditch) then comes into concrete control box which can divert water north or south in concrete ditch. North + south field have concrete ditches on east border running north to south. (gravity flow east to west w/ 1 1/2" siphon tubes). SE field has concrete ditch on east, ~~south~~ south + SW border, gravity flow east to west w/ 1 1/2" siphon tubes, N/A

$$V = 8 \text{ ft} / 7 \text{ sec} = 1.14 \text{ ft/sec}$$

$$Q = 1.66 \frac{\text{ft}}{\text{sec}} \times 9.45 \text{ ft}^2 = 15.68 \text{ cfs}$$

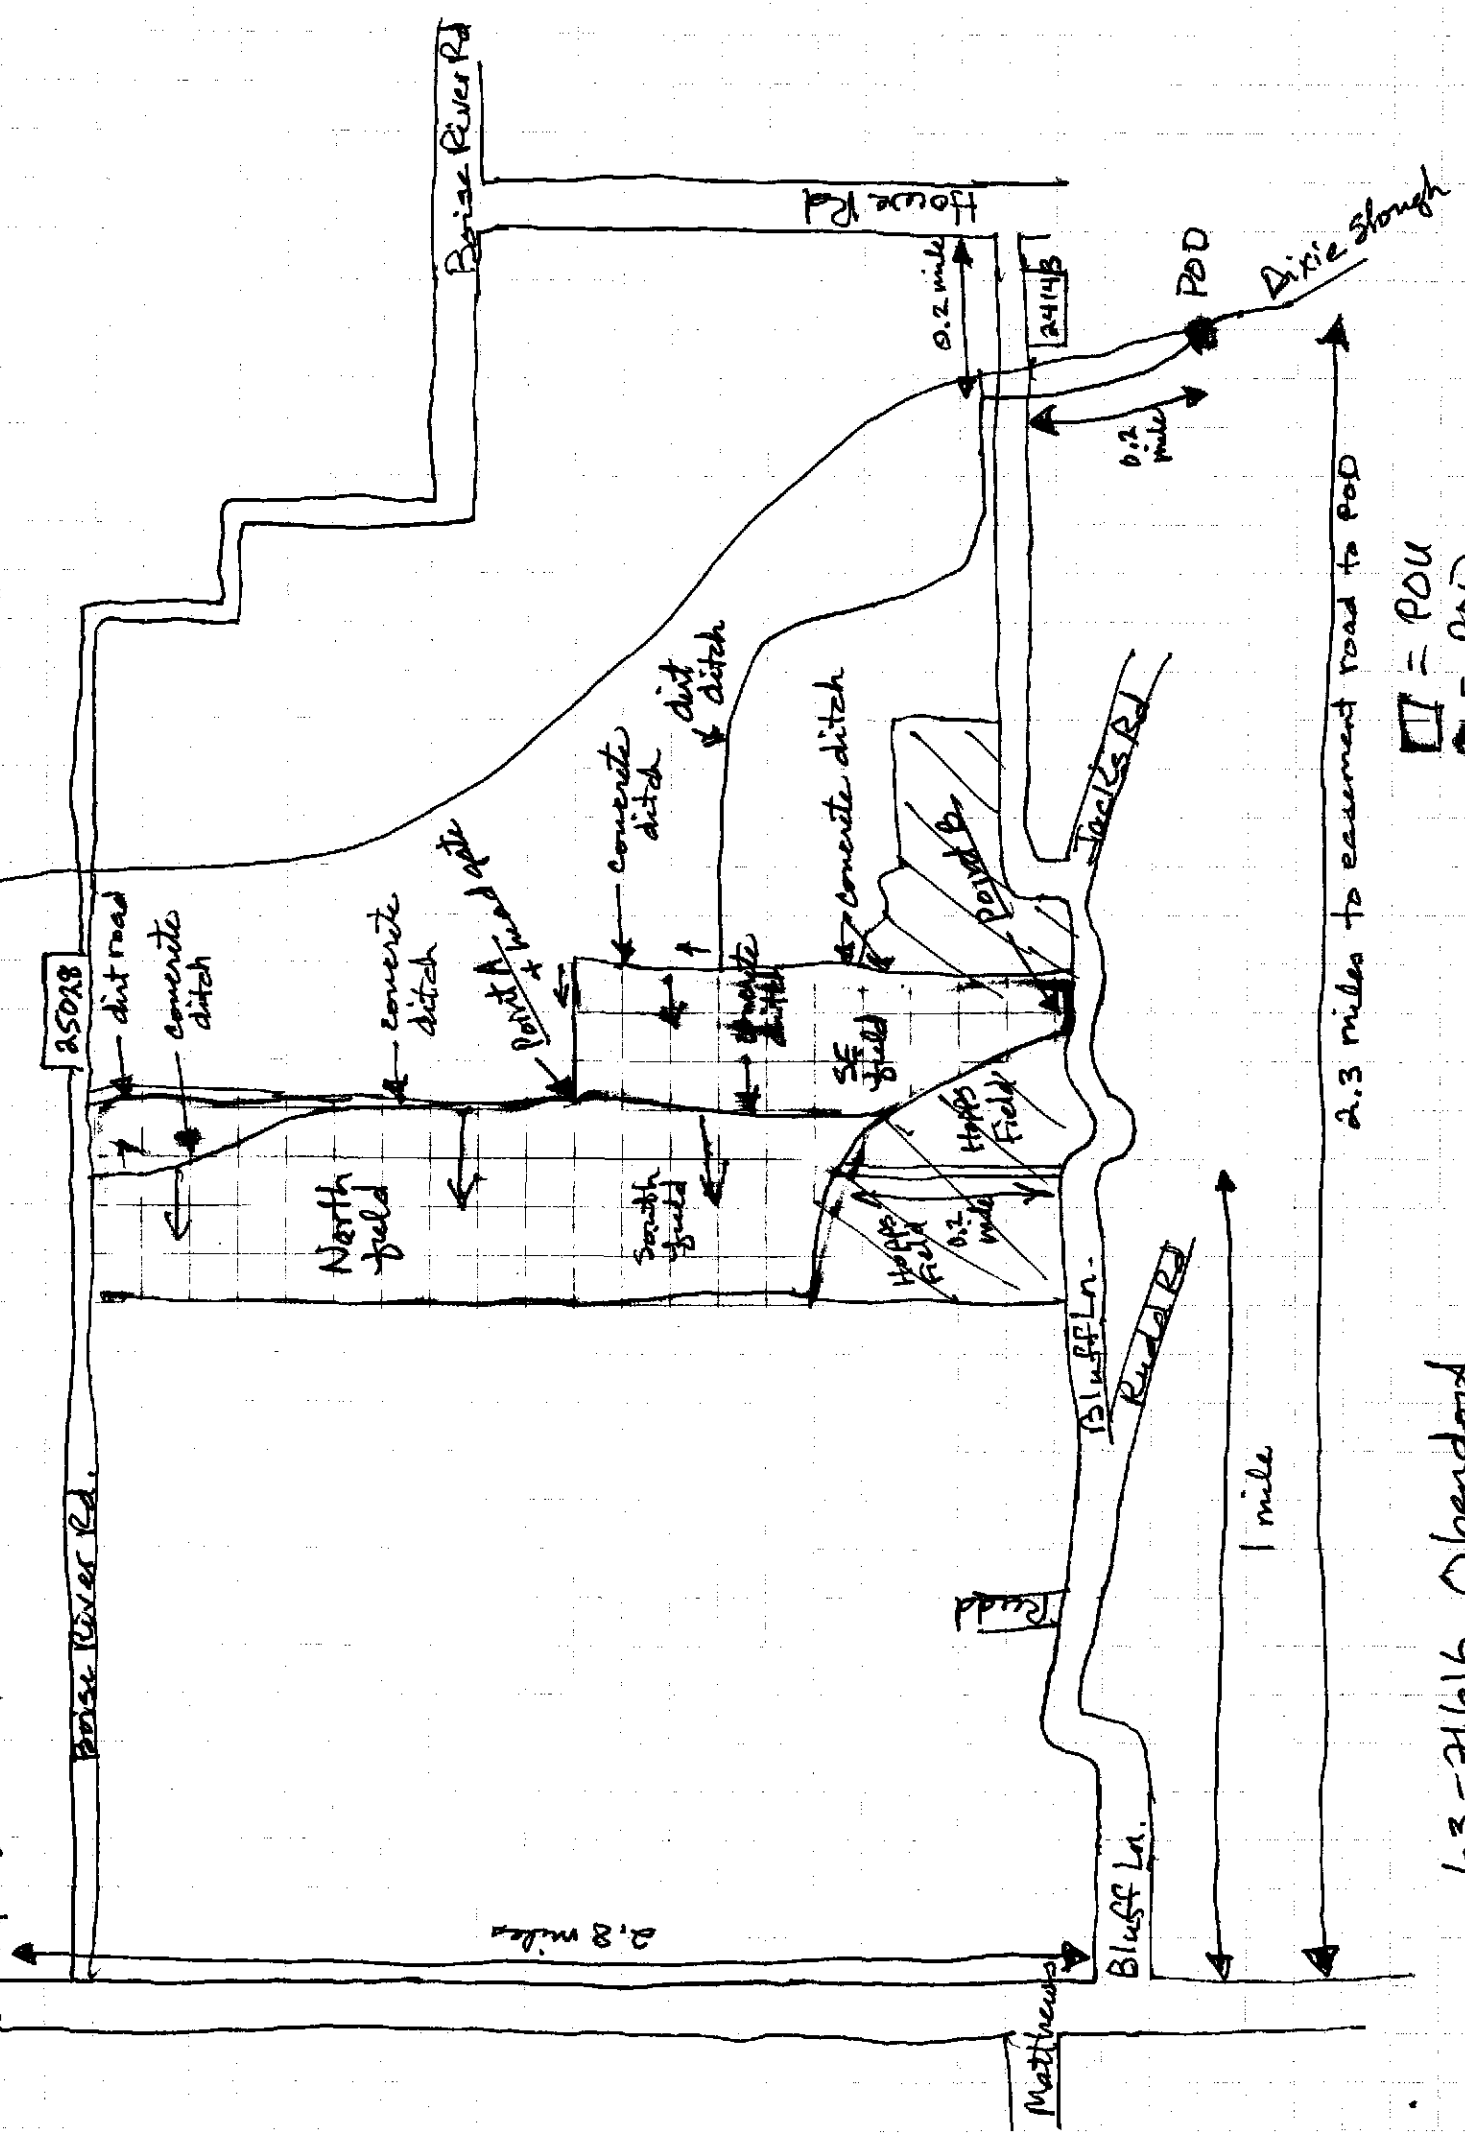

Point B (Orange Peel):

$$V = 10 \text{ ft} / 5 \text{ sec} = 2 \text{ ft/sec}$$

$$A = 3.33 \text{ ft} \times 0.66 \text{ ft} = 2.197 \text{ ft}^2$$

RE: A63-21616

Hey Sandy, Ray Obendorf submitted proof of priority for the above beneficial use right. Now it can be examined. Please determine the following:

- Locations of P/D and Rediversion points
- Number of acres irrigated
- System diagram
- System capacity
- Number/type of stock
- Water from Riverside Irrigation District also used?
-

I've included a copy of the claim proof report, claim map and 2004 photo. Thx Sandy.

RE: EVIDENCE OF PRIORITY
Snake River Basin Claim No: A63-21616

Dear Claimant,

In the past, you submitted the above referenced claim during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated print-out of the claim for your reference only, it is not necessary to return this print-out. You indicated, when this claim was filed, that the water right was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date."

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right if water availability problems arise in the future.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, an accurate location of your pump and acres irrigated needs to be identified on the attached aerial photo. Please also provide as much detail about your diversion works as possible including pump make, horsepower, operating pressure, approximate water lift (in feet) to acres irrigated, type and number of sprinklers, etc. If more information is needed, you will be receiving a call from us in order to set-up an appointment for a field exam.

Page 2

The above requested information needs to be submitted by June 1, 2006. Please let me know if you may not be able to submit the information or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

Respectfully,

A handwritten signature in cursive script, appearing to read "Lori Graves".
