Photo 1: 63-4849, Field Exam 11-14-02: Located in the SESENE, S31, T05N, R02E. GPS location. This is one of the old system's points of diversion that is still being used. This is the South ditch from Dry Creek. Discharge west into a south gravity flow ditch. Pumps were used from other ditches to deliver water to area's not reached by gravity irrigation. A north ditch is no longer used for this right.

Photo 2: Concrete & wood dam on Dry Creek. View is to West. New system from above photo 1 POD delivers water first into an open flow ditch then underground piping into a distribution pond where the Dry Creek water is commingled with groundwater. Re-lift pumps put water in to a pressurized underground sprinkler system. See attached Enchanove Ranch Estates plats for detailed irrigation system.

Photo 3: Culvert with gravity flow from Dry Creek on East side and under McFarland Creek road.

Photo 4: Manhole with gravity flow from Dry Creek on West side under McFarland Creek road.

Photo 5: View to South along McFarland Creek road where underground pipe carry Dry Creek water to distribution pond.

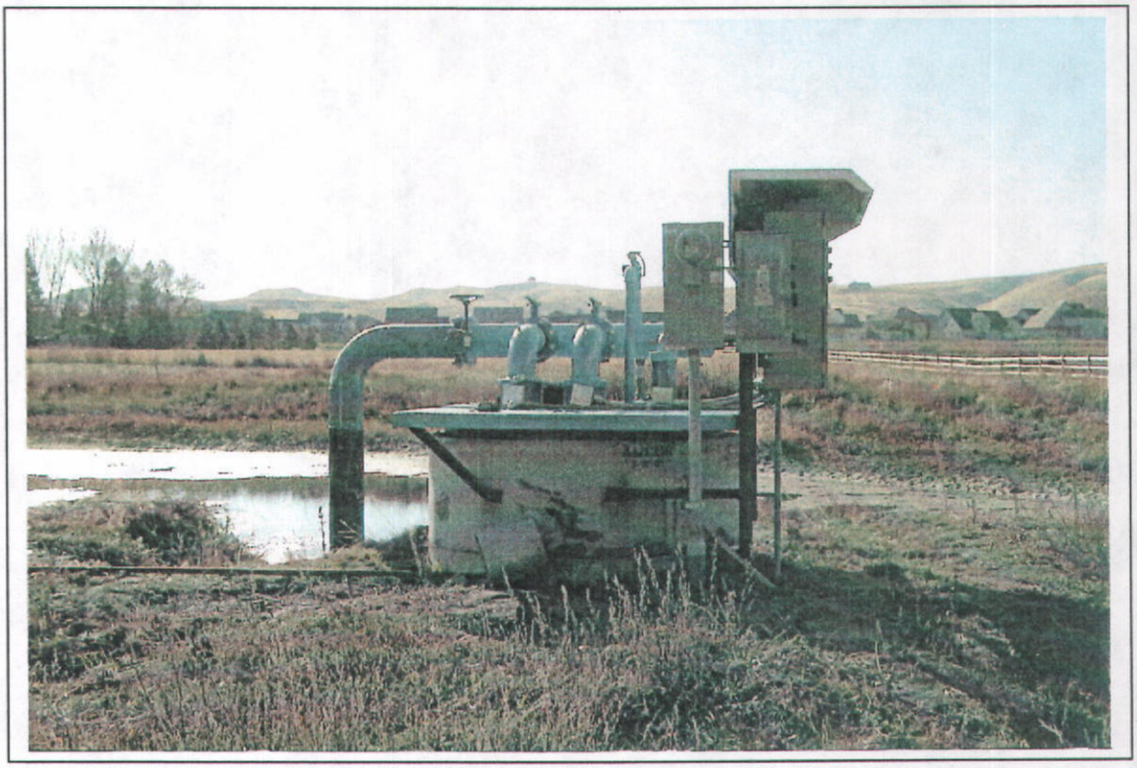

Photo 6: Distribution pond with re-lift water pumps. Piped into pressurized sprinkler irrigation system. View is to south in the SWNE, S31, T05N, R02E.

Photo 7: Distribution pond & pressurized system, view is to the east. See attached measurements. The pond has 5.17 AFA volume MAX. The well water is supplemental to surface Dry Creek right and thus the MAX combined flow is 2.78 CFS. (2.78)(1.9835) = 5.51 AFA.

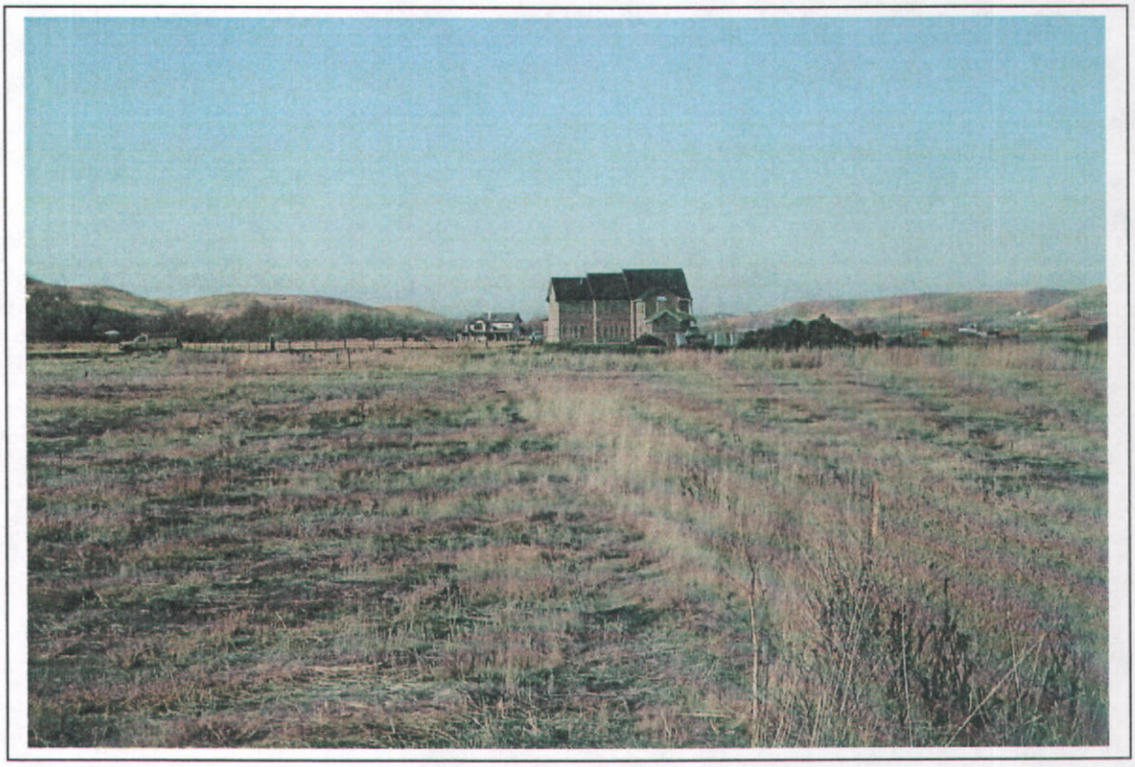

Photo 8: Place of use view to west from dirt road near Currant Creek in the NWNE S31, T05N, R02E. Irrigation shown on 1987 NAPP.

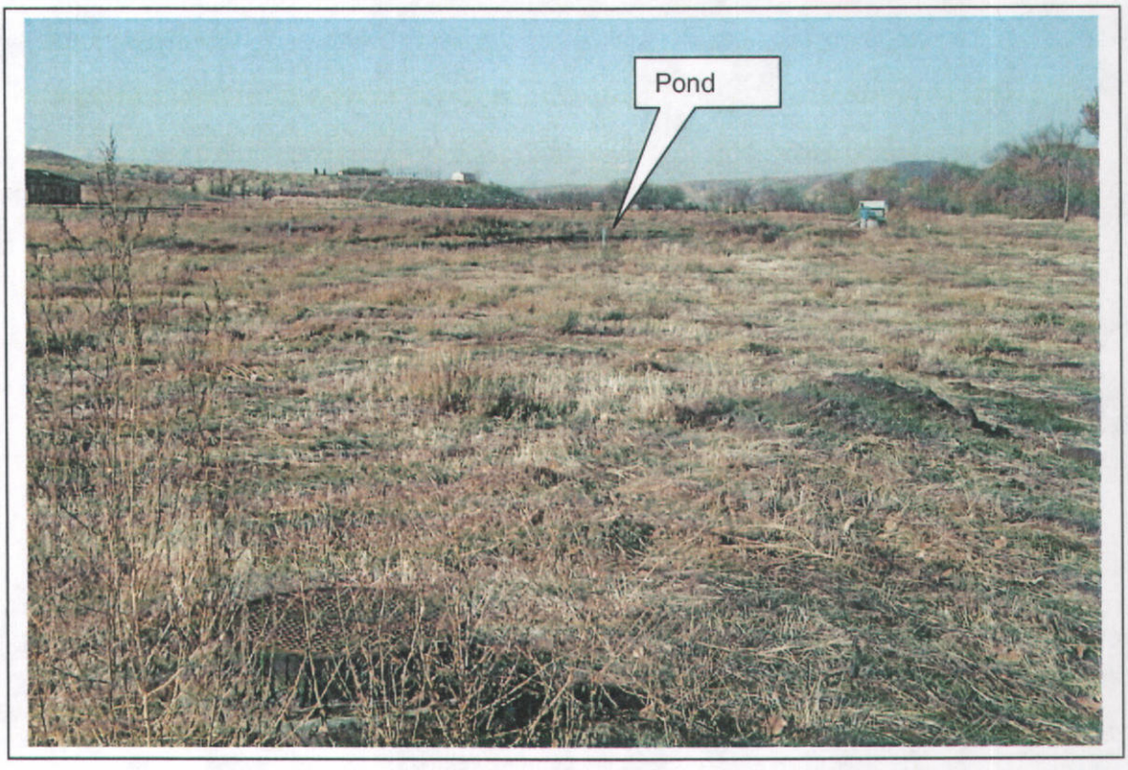

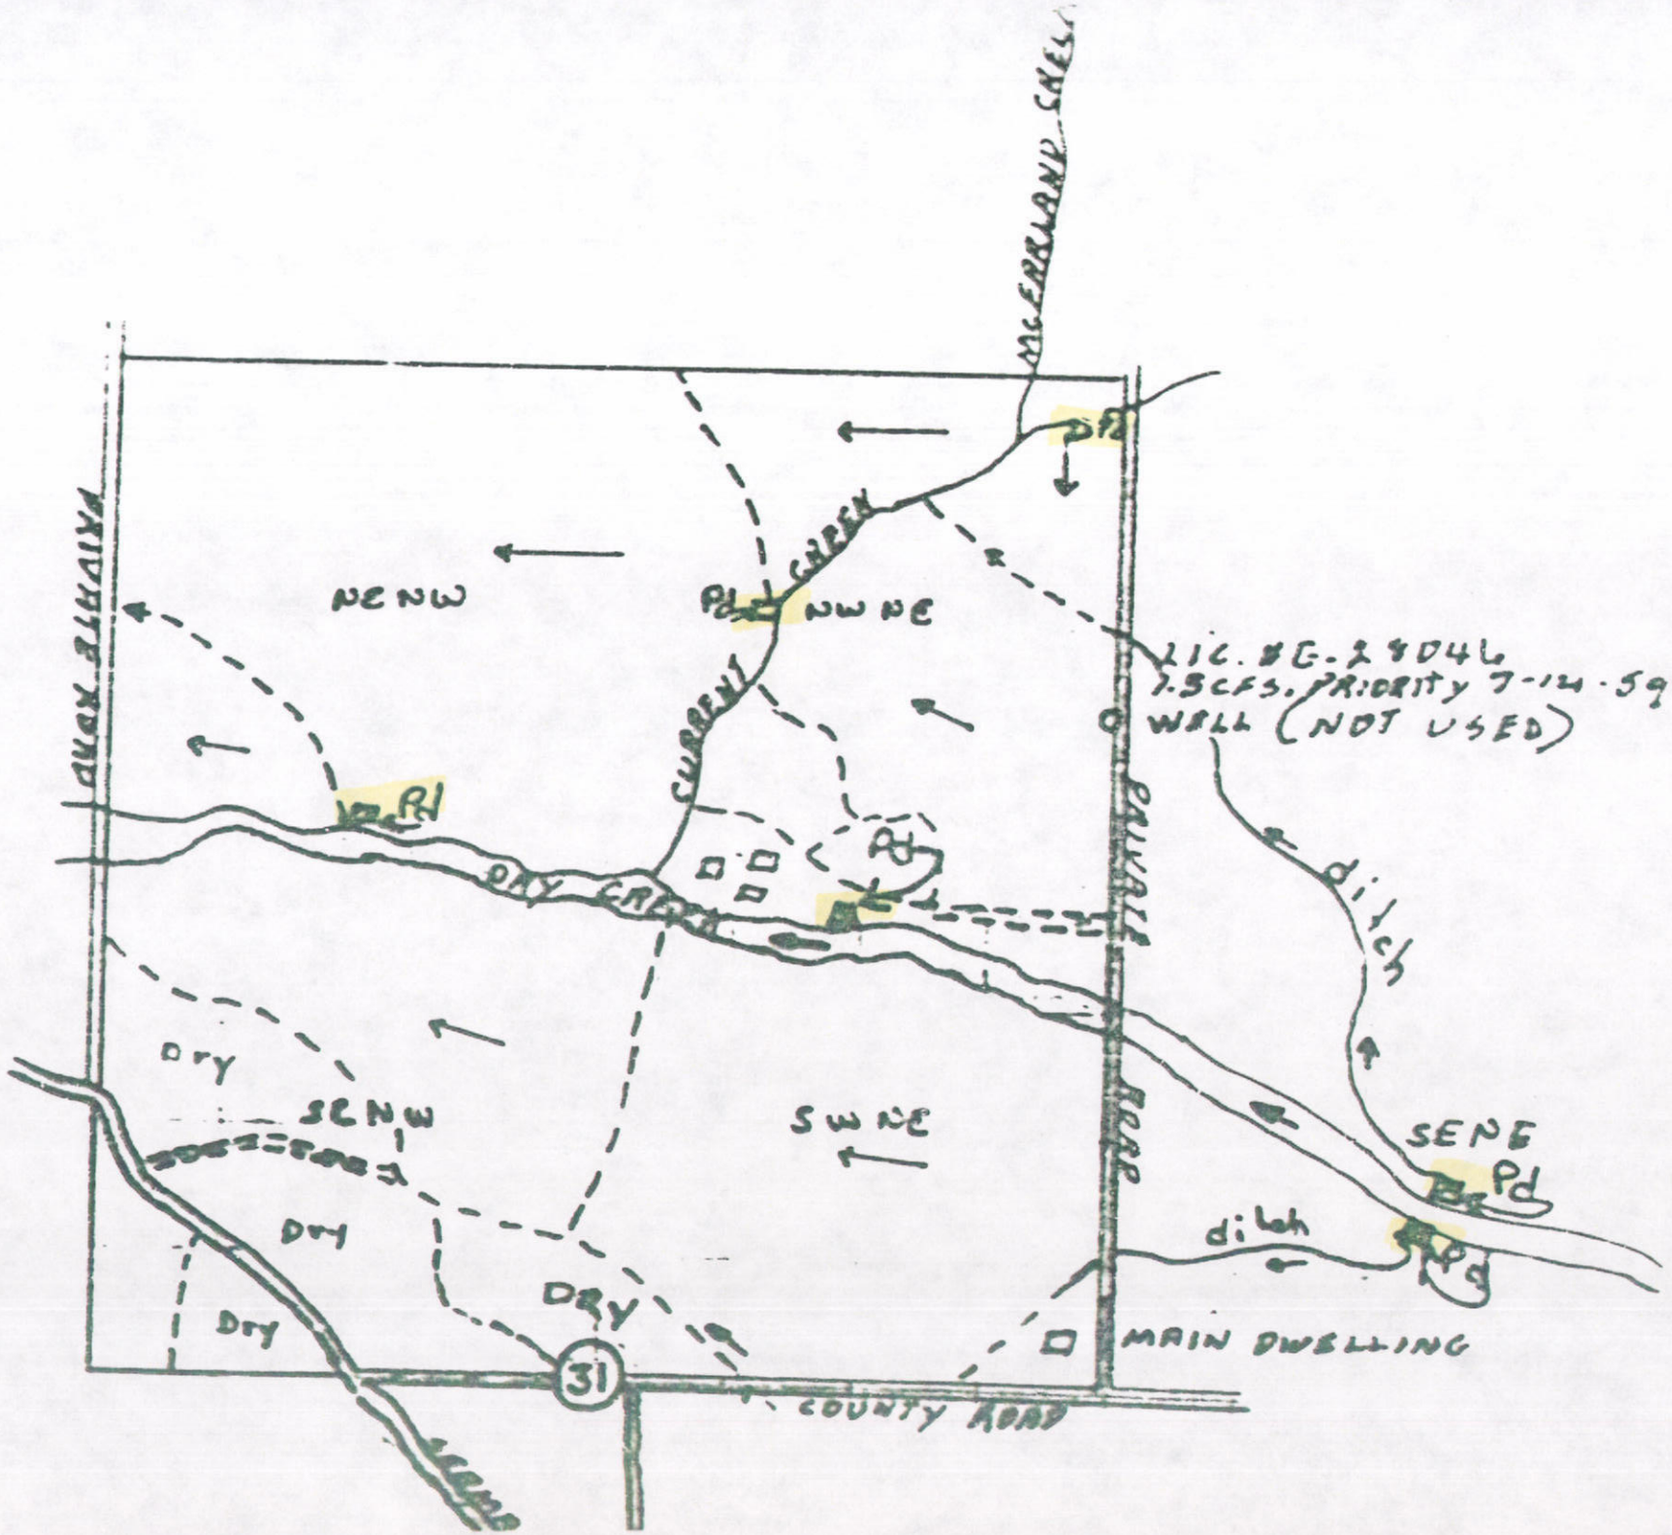

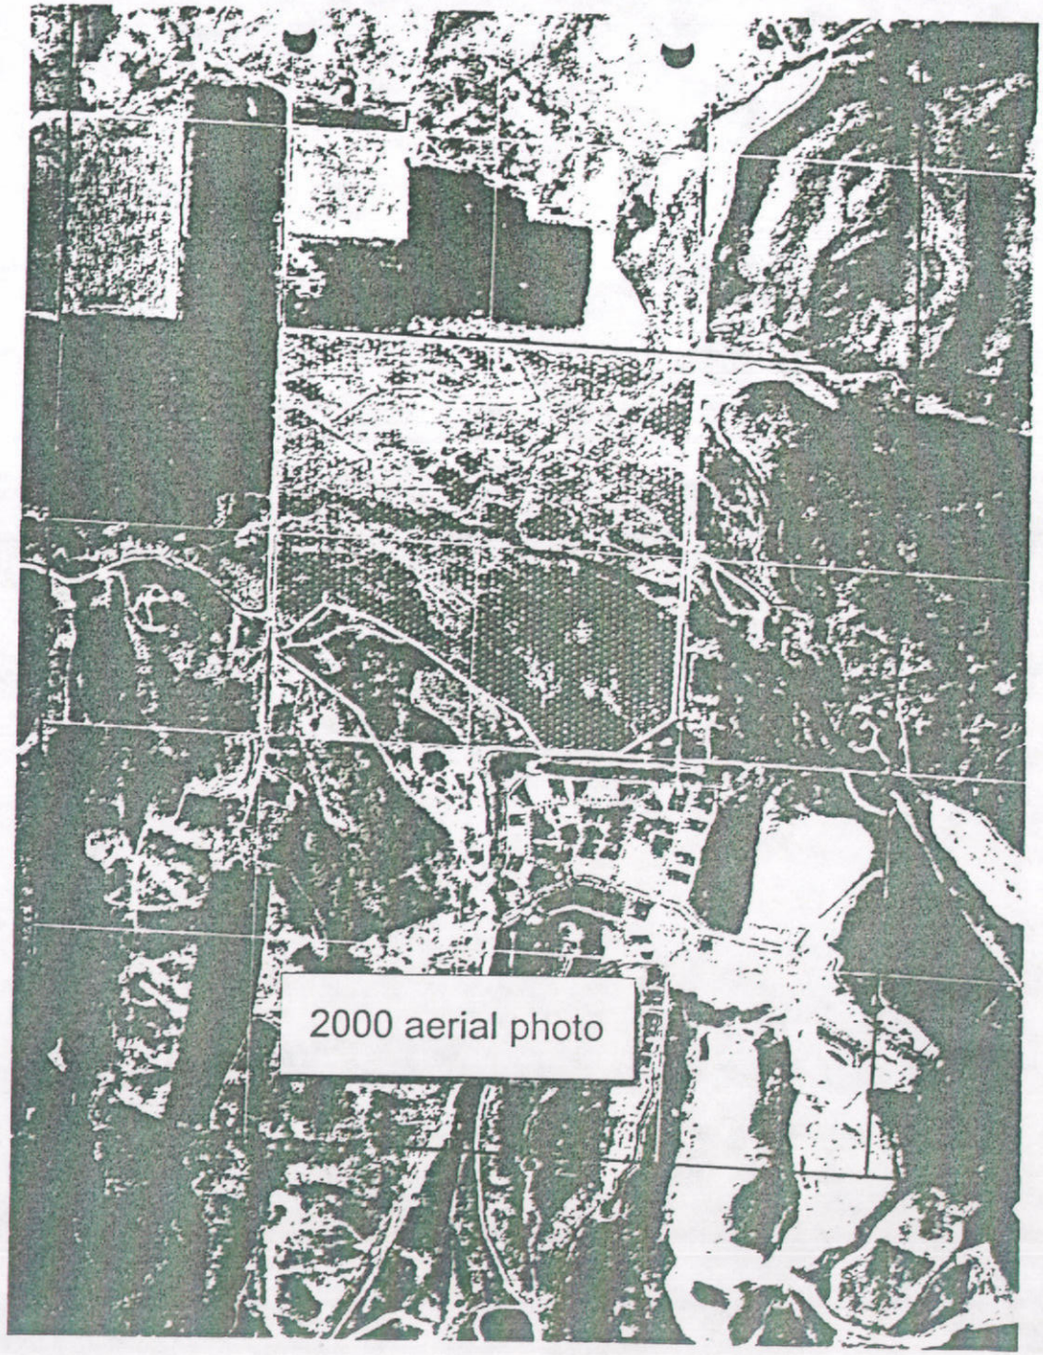

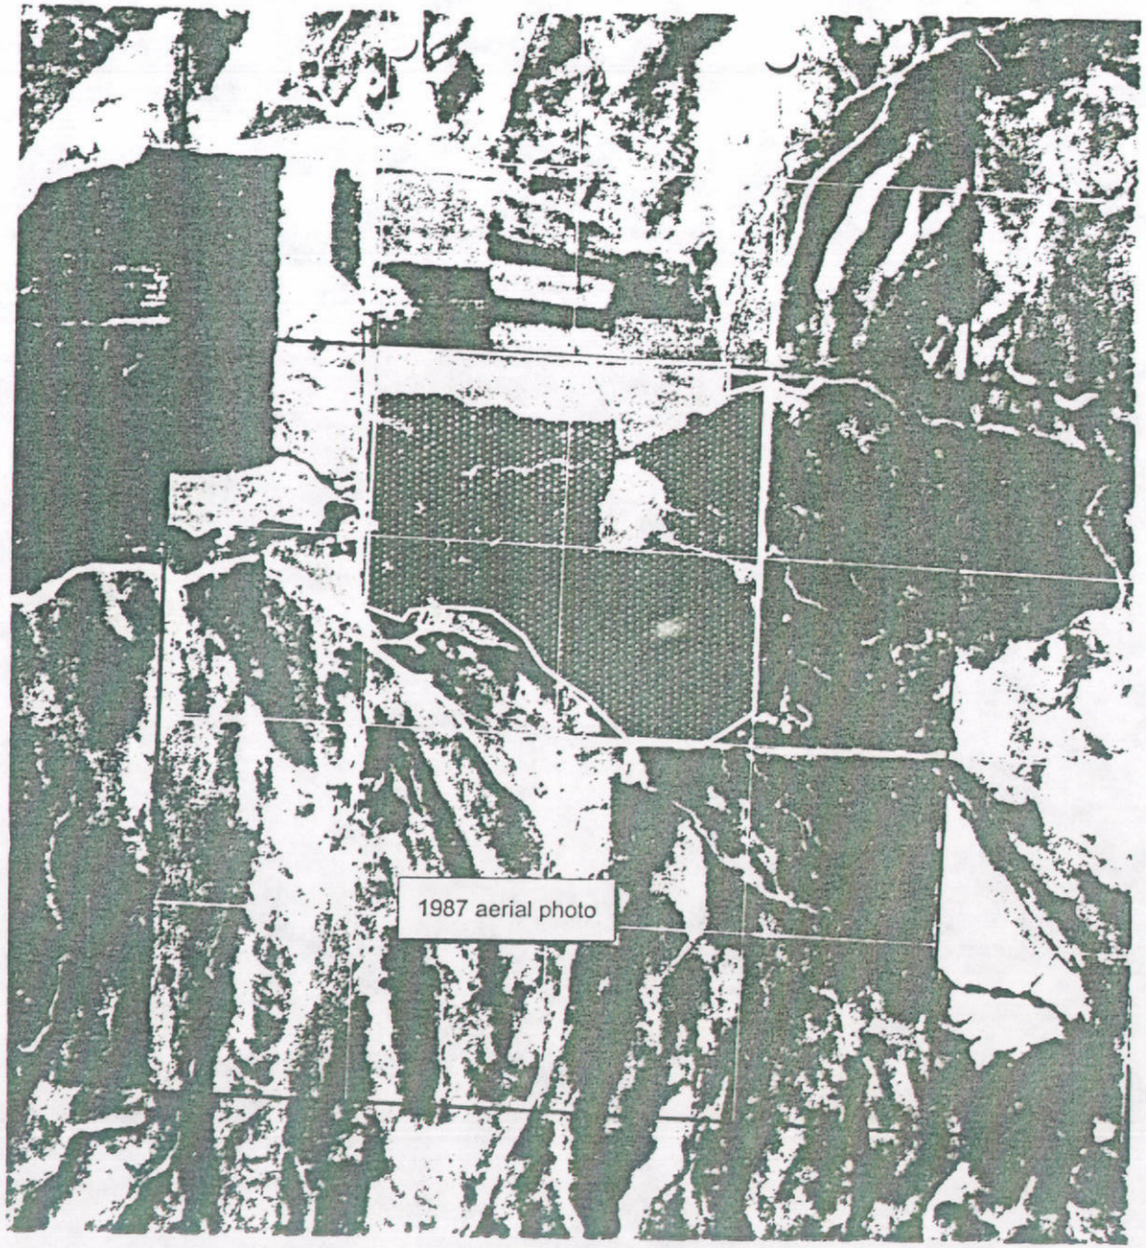

Photo 9: Place of use from dirt road. View is to west. New system pond shown in background. Re-lift pumps are on right. Manhole is part of underground system from Dry Creek. See attached Enchanove Ranch Estates plats for detailed irrigation system. Located in the SWNE, S31, T05N, R02E.

Re: Notice of Claim to a Water Right No. 63-3162 & 63-4849

Dear Claimant(s):

Enclosed is a copy of the above referenced claim(s), which reflects the change in ownership of the land and appurtenant water rights, covered under the original filing.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim was filed during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you again for your patience and cooperation, as we have had several water right changes to process. If you have any questions concerning the enclosed claim(s), please feel free to contact this office.

Sincerely,

Denise Hatfield

RE: Amended Notice of Claim for Water Right Nos. 63-4849

Dear Ron:

Enclosed is an Amended Notice of Claim for 63-4849 with an accompanying patent as support for the priority date, which we discussed earlier. As you are aware, some of the lots within the Echanove Subdivision have been sold, and therefore, this notice of claim pertains only to the lots still owned by my client, Bull Development, Inc. I do not represent the individual lot owners. Nonetheless, I understand that you will also apply evidence of the 1874 priority date to the other portions of the above-referenced water right.

I understand that the enclosed amended claim will be consistent with your recommendation to the SRBA Court. If I am correct in that regard, would you please let me know as soon as possible so I can close my file on this matter. Thank you very much.

Very truly yours,

Matt J. Howard

Subject: Amended Bull Dev. claim 63-4849

Matt,

Here is a word document that amends the date of priority date as requested for your review and to return an original copy with the appropriate signatures. It looks very much like I would recommend it, without any conditions, if all other supporting data is received.

The other elements I changed on this claim are/were reflecting what I feel the correct elements should be for the a recommendation.

Specifically:

Season of use: Standard season added
Points of diversion: Reflect the current one used
Source: Dry Creek, the only surface water source used
Acres: Remain same as claimed but specific to GIS digitizing.

You may make any changes to the amended claim before it is signed, since this is a word document, however, I would appreciate it if we talk again, if you intend to make additions or changes to the claim.

Thank you,

Delivery System Narrative: System changed from 2-Sources to only Dry Creek. POD stayed same but only one being used for changed system. Original system consisted of 4-diversions from Dry Cr, water was injected from Dry Creek into Currant Creek then rediverted out of Currant Cr. New system combines Dry Cr and groundwater into a distribution pond. Pond is too small for storage based upon combined CFS total. See detailed description of pressure systems after it leaved distribution pond. My field map shows system up to the pond. (See old system map in file.)

Comment: This transfer proposes to seperate a 1/15 th portion of water right 63-03162 to supply irrigation to one of 15 lots in the Echanove Ranch Estates subdivision. A new well will be added to supply the water for this lot and the original well will be abandoned. The remainder of the right will be split into proportionate shares to supply the other 14 lots of this subdivision with water. Each share of the original right will have its own well, 0.10 cfs diversion rate and 9.27 acres of irrigation. 15 transfers were filed, one for each lot. The following transfers are associated with these subdivision lots: 68907 = Lot 2 Block 1, 68908 = Lot 3 Block 1, 68909 = Lot 7 Block 1, 68910 = Lot 4 Block 1, 68911 = Lot 1 Block 1, 68912 = Lot 5 Block 1, 68913 = Lot 6 Block 1, 68914 = Lot 8 Block 1, 68915 = Lot 10 Block 1, 68916 = Lot 11 Block 1, 688917 = Lot 1 Block 2, 68919 = Lot 13 Block 1, 68921 = Lot 12 Block 1, 68922 = Lot 2 Block 2, 68923 = Lot 9 Block 1.

2. dnelson 2/27/2001 7:54:08 AM General Comments/Analysis
Comment: Water right 63-04849 overlaps the place of use. 63-04849 is a flood right from Dry Creek and Current Creek. This right is rarely used and some years is undeliverable. The main source of water for this 139 acres is the ground water. Upon approval of the transfer, water right 63-04849 should remain attached to each parcel and used first if available. The ditch delivering the water still exists and the new owners will have access to the creek if they wish to change the point of diversion through a transfer. However, this right was originally licensed as a primary right, since the surface water right is only a statutory claim and has not been verified. If the Snake River Basin Adjudication determines that the statutory right is not valid, then the water right associated with this transfer should maintain its primary status.

Applications for Extension of Time to Avoid Forfeiture
Water Right Nos. 63-4849 and 63-3162

Bull Development, Inc., purchased the Echanove Ranch, which includes the places of use for right nos. 63-4849 and 63-3162. Purchase of the ranch was based on a series of agreements entered into beginning in late 1997 and ending on November 5, 1998. After purchase of the Echanove Ranch, Bull Development undertook the required studies, engineering work, and related development actions to comply with federal, state, and local regulations for development of the Echanove Ranch Estates Subdivision, including required permit and plat approvals. Because of the ongoing development of the Echanove Ranch as a residential subdivision, irrigation of the Echanove Ranch has not been undertaken since 1998.

As part of the residential development, Bull Development has constructed a pressurized irrigation system to provide irrigation water to the various lots located within the original place of use. (Plans of the irrigation system were previously provided to IDWR on September 14, 2001). Lots in the Echanove Ranch Subdivision are currently being marketed and are available for sale. A five (5) year extension of time is needed to allow sufficient time for the lots to be sold, houses to be constructed, and for the new lot owners to begin irrigating their lots and putting water to beneficial use.

I would also use my supplemental ground water right, no. 63-3162, to irrigate in years when there was not enough Dry Creek water to irrigate my crops.

RE: Diversion Pond Plans – Echanove Ranch Estates

Dear Dan:

Pursuant to your earlier request, enclosed please find a copy of the diversion pond plans for the Echanove Ranch Estates. Before advising my client to move forward with construction of the diversion pond, I had conferred with Norm Young and Jeff Peppersack concerning the Department's most recent policy with respect to diversion ponds. My client also retained Dave Shaw to provide consulting on the project. I believe you should find everything in order.

If you have questions, please feel free to contact me.

Very truly yours,

RE: COMPLAINT AGAINST ENCHANOVE RANCH ESTATES

Dear Mr. Homan:

We recently received a complaint that you have constructed a large storage pond for Enchanove Ranch Estates. I have spoken to you and your representatives about constructing a small irrigation pond to deliver the water for water rights 63-3162 and 63-4849. A small irrigation is defined as being able to be filled and/or drained within a 24-hour period at the diversion rate established by your water rights.

The diversion rate for 63-3162 and 63-4849 is 1.50 cfs. A diversion rate of 1.00 cfs generally can fill a pond with a volume of 1.98-acre feet volume. This would allow you to construct a pond with a volume of approximately 3 acre-feet in conjunction with your irrigation system without acquiring a water right.

In order to address the complaint about your pond, please send the as-built plans for the pond. The plans should include the width, length, and depth of the pond. This will allow us the opportunity to review the complaint and determine if a site visit is necessary. If the pond has a larger volume than can be used in a 24-hour period, you will need to file a transfer to move water from the appurtenant irrigation land that is now covered with roads to pond storage.

Thank you for your co-operation and if you have any questions or concerns please contact Dan Nelson at the above address.

Respectfully,

Daniel A. Nelson

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

MEMORANDUM

TO: CRAIG SAXTON

FROM: DANIEL A. NELSON

DATE: 10/7/04

SUBJECT: TELEPHONE CALL REFERAL

Craig, I received a telephone call from a Mathew Castrigno regarding the Enchanove Ranch (Bull Development) water rights. Mr. Castrigno is claiming that he can move water anywhere within the 40-acre tract without filing a transfer. He said that Ron Howerton told him this was possible without filing a transfer. I am not sure what is going on in this situation, so I thought I better forward the call to you.

I did tell him that based on the transfer memo, we are bound on the allocation side to what was irrigated in 1987, and can't allow movement within a 40-acre tract without a transfer. However, I am not sure what the adjudication folks can allow on this issue, so I thought I better pass it onto you to let you give him the skinny. We are dependent on what you folks will allow, so it is probably better that you work with him directly. I hope you don't mind.

His telephone number is 939-5663.

RE: Groothuis Change in Ownership

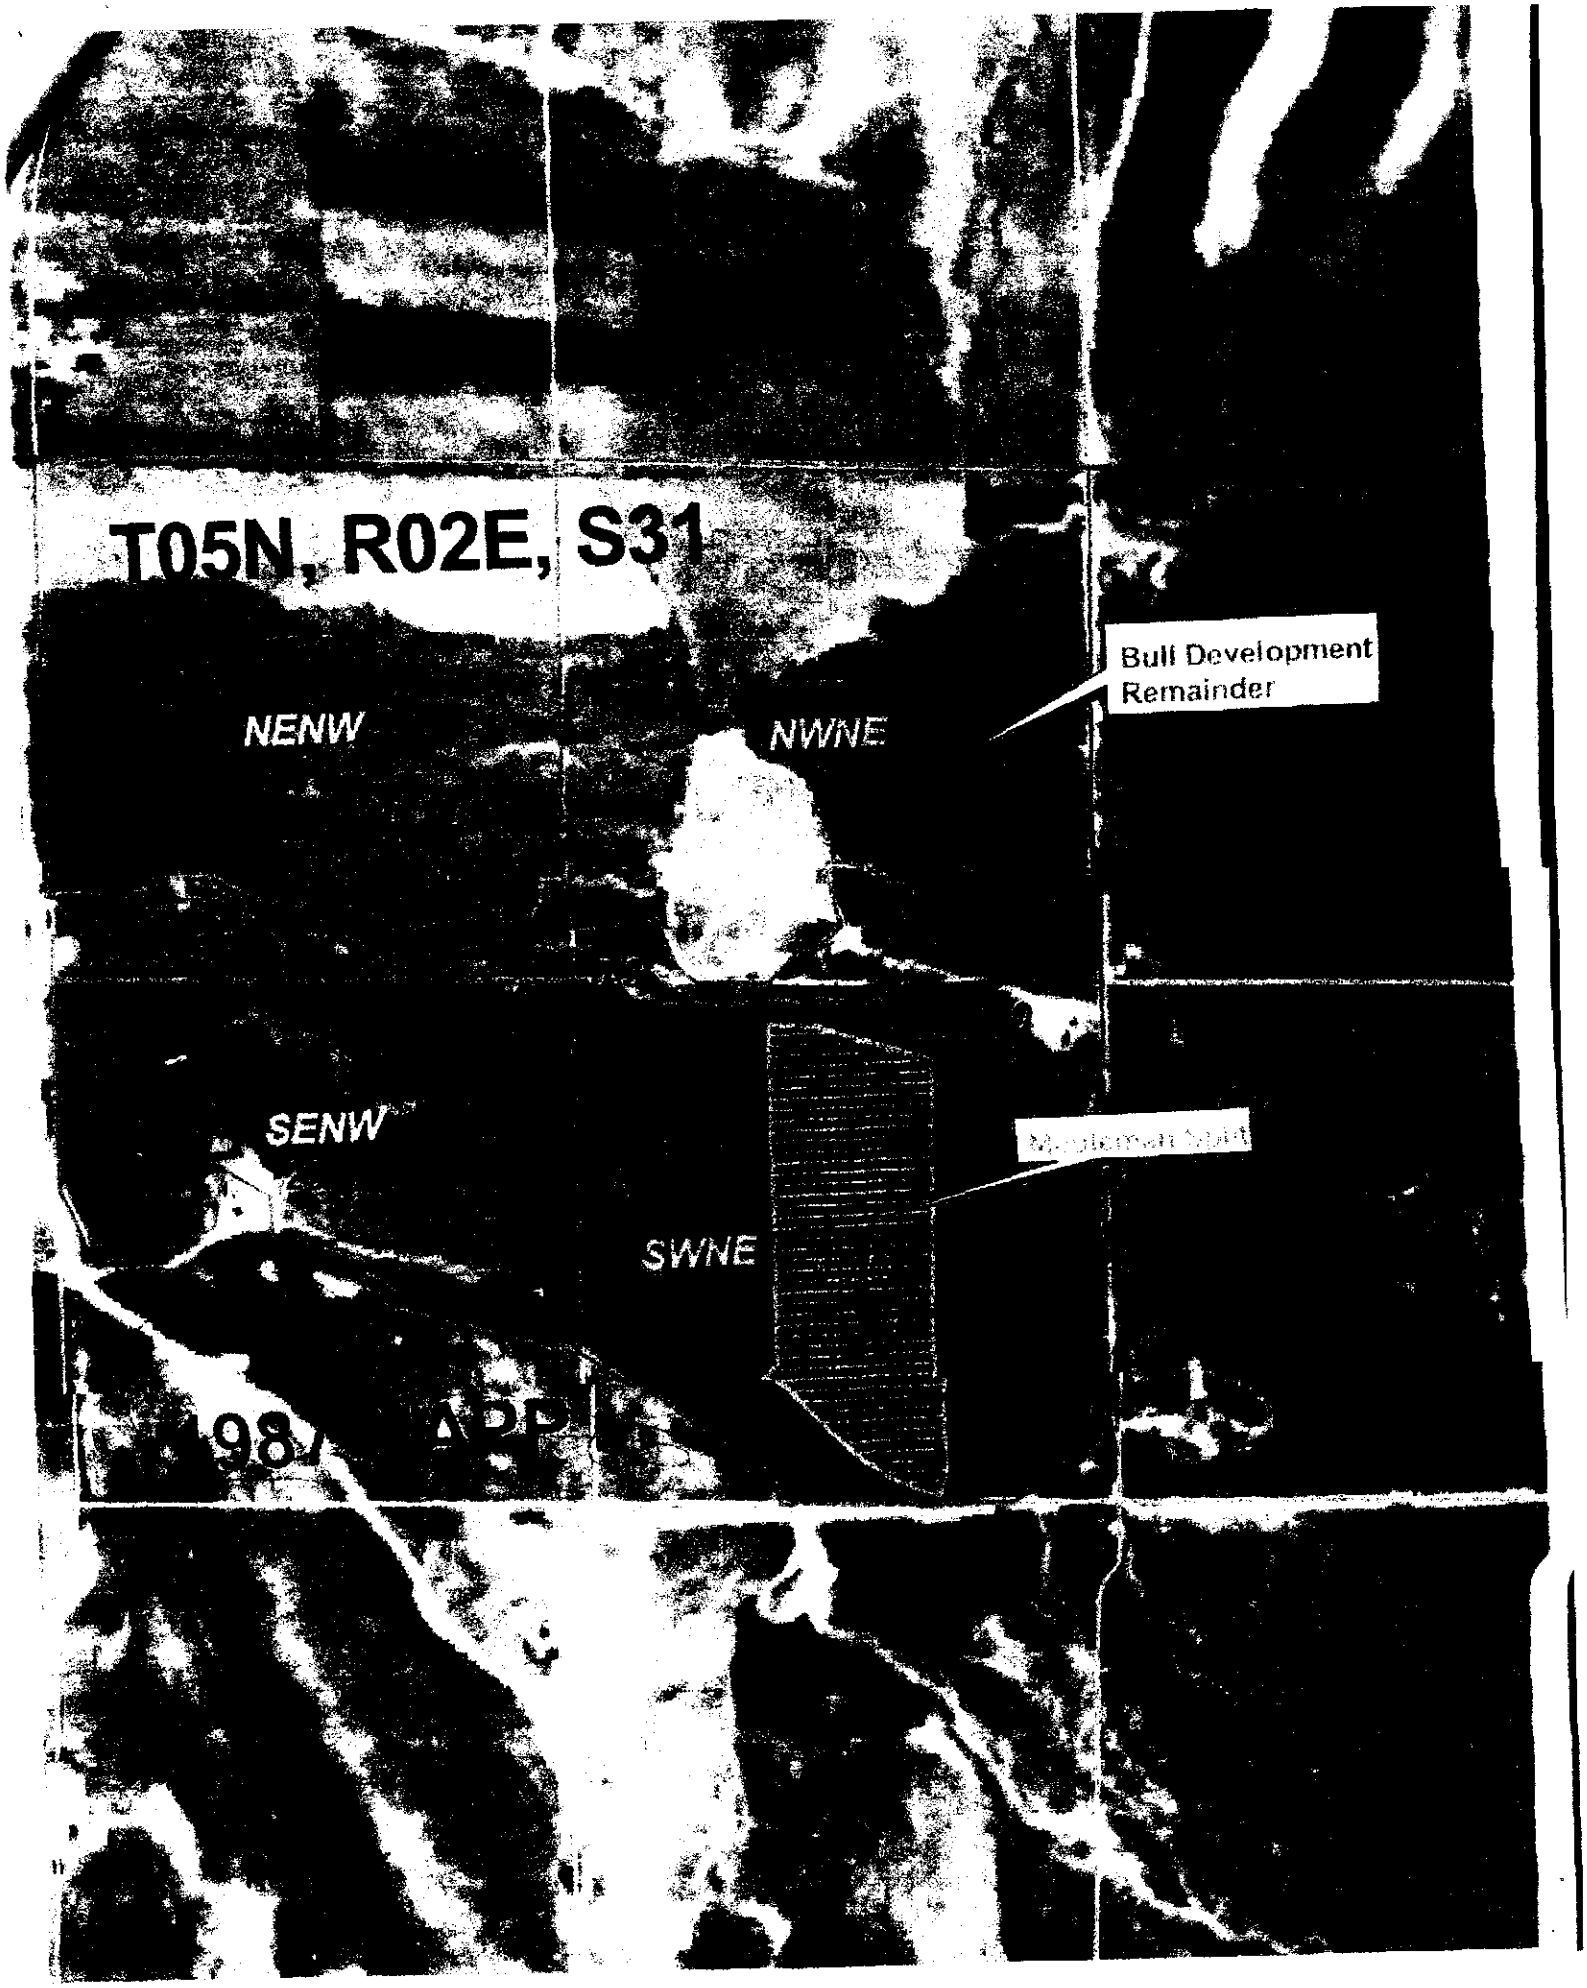

Groothuis called 9/23/04 asking how long he had to install his sprinkler system before losing his water rights. As it turns out, he purchased Lots 1 & 2, Block 2 of Echanove Estates from Bull Development. He plans to build and install a sprinkler system on his property within the next two years and did not want to lose his water rights in the process. The developer sold him Lot 1 with 8.05 acres irrigation and Lot 2 with 6.04 acres irrigation from original water rights 63-3162 (ground water) and 63-4849 (Dry Creek).

M.D. (Butch) Groothuis filed the attached change in ownership 9/23/04. When I looked at his property location, I asked him to delay installation of his sprinkler system until I had a chance to review the files and consult with an SRBA agent.

Ron Howerton did an initial review of these rights. Based on Ron's analysis and Craig Saxton's re-analysis, Groothius' property actually only has ~4.76 of the total recommended acres that Ron determined historically irrigated.

I called Groothuis with the news and he stated that he was going to confront the developer with the discrepancy. I'm sure we haven't heard the last of this one.

Re: Original Notice of Claim to a Water Right No. 63-31737, 63-31739
Renumbered Notice of Claim to a Water Right No. 63-32403, 63-32412

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim represents a split of the claim filed by a previous owner during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience, as we have had several water right changes to process. Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Adjudication Section
