Re: Canyon County Claims to Water Rights

Dear Vic:

*Wells

when
exam
done
7/87*

I have finally had a chance to go through the claim files, previously assigned to Kimberly Brown, and find we need to have additional documentation in regard to these claims prior to conducting the field examinations.

We have not received any evidence of priority for the following claims: 63-21537 (stock water & commercial uses), 63-21541, 63-21557, 63-21559, 63-21561, 63-21598 (all stock water claims) and 63-22210 (expansion of Rt. 63-2291 from Bardsley Gulch). We need some type of documentation of the date of priority for these claims in order to change the recommendations that were previously made.

We also need to have some documentation showing when the rights utilizing the 14 wells and 14 pumps were integrated into one system. Claims 63-2731, 63-3107, 63-4968, 63-5036, 63-5037, 63-5038, 63-5039, 63-7244, 63-7678, 63-10034, 63-21537, 63-21538, 63-21539, 63-21540, 63-21541, and 63-21595 are the rights I find under the claimed combined system. Information in our files does not indicate when the wells were incorporated into one system and until we receive some documentation to show that they were integrated before November 19, 1987, we will not be able to recommend the water rights as claimed. The recommendations will reflect the rights as previously recorded unless we receive this information.

It is also noticed that our Department has previously requested completion of "Industrial Use Volume" questionnaires for the rights that include industrial and/or commercial uses. Please note that a portion of Adjudication Memo No. 34 states:

1. Ground water rights

All rights recommended with a source of ground water are to include annual diversion volume, except for ground water rights or portions of ground water rights used solely for:

- a. small D&S purposes as defined by Idaho Code §§ 42-111 or 42-1401A (5) and (12), in which a diversion volume has not been previously determined.
- b. municipal purposes,
- c. fire protection purposes.

2. Other rights

All other rights to be recommended based on a license or decree that stated an annual diversion volume limitation are to include annual diversion volume.

We would certainly appreciate any information you can supply that would assist us in determining the volumes to be attached to the rights that are being used for industrial and/or commercial uses. If you need to have the questionnaire form sent to your again, please do not hesitate to contact me. If no information is received we will base the volume amounts on what we determine is necessary for the claimed uses.

Please submit all the requested information on or before **September 28, 2007**. Once we receive the information we will need to conduct field examinations and the SRBA Court has indicated they would like the field inspections done this fall so we can submit revised recommendations on the rights that have been objected to. If you have any questions concerning this letter, or if you need additional time to submit the requested information, please do not hesitate to contact me at 334-2190.

Sincerely,

KAY WALKER

D. CLAIM BASED ON PERMIT

1. Permits for which a proof due notice was filed prior to commencement

If the claim is based on a permit for which a proof due notice was filed prior to commencement, then contact water allocations staff at the state office before proceeding with review of this claim. See Intro Part M for a general discussion of claims in this category. If the claim is to be recommended with a basis of permit, then proceed with the analysis below.

2. Claim matches permit

If the claimed PU for each NU matches the permit, then no further review of this item is required.

3. Claim less than permit

a. Check to see if this claim is part of a water right that was split, but was fully claimed by various claimants, or if it was claimed under another claim. Check to see if this is a permit that is not required to be claimed. If this resolves the discrepancy, then no further review of this item is required.

b. If it is apparent that there is a portion of the original permit that should be claimed by this claimant, claimant contact should be made. (Generally, there is reason to believe that the claimant simply made a mistake in claiming less than the full right, because partial forfeiture is generally not an issue with claims in this category.) The claimant should be notified that the claimant may file an amended claim asserting the permitted PU(s); otherwise, the claimant will be deemed to have waived the right to the unclaimed portion. If the claimant files an amended claim that matches the permit, then no further review of this item is required. If the claimant does not file an amended claim, then the discrepancy is resolved, and the PU recommended should not exceed the PU claimed.

c. If the determinations above cannot be made, then the place of use of the unclaimed portion should be added to the parcel list for second round service, unless the PU has already been included as part of the second round service done at the state office.

4. Claim different or greater than permit

If the PU for any NU is different or greater than the PU shown on the permit (as amended by any approved amendments to the permit), then the PU shown on the permit should be recommended.

further review by legal staff. See Parts E - G below as to injury. Second, the sufficiency of the evidence as to the date of the change may vary depending on the circumstances. For example, if the claimant asserts that the change occurred in 1967, but the claimant's evidence only supports a date of 1969, but there are no junior appropriators between those two dates, then the lack of further evidence makes little difference.

If the evidence supports a finding as to a date of change on or after November 19, 1982, but before November 19, 1987, then proceed to Part D below (Injury).

NOTE: Generally, the date of the change for a claim based on a decree may not be the same as or earlier than the cut-off date of the decree (or the effective date of the most recent approved transfer, whichever is later). If the agent encounters a claim where the evidence supports a finding that the change occurred prior to the cut-off date of the decree, and the difference between the two dates is critical to the recommendation, then the claim should be referred for further review by legal staff. The date of the change for a claim based on a license may not be earlier than the date the proof due notice was submitted (or the effective date of the most recent approved transfer, whichever is later). It may not be earlier than the date of the licensing field exam, if the licensing field exam did not confirm the change. (This is similar to claimed expansions of a permit, see Intro Part M.)

C. CLAIM BASED ON PERMIT

1. Permits for which a proof due notice was filed prior to commencement

If the claim is based on a permit for which a proof due notice was filed prior to commencement, then contact water allocations staff in the state office before proceeding with review of this claim. See Intro Part M for a general discussion of claims in this category.

2. PD claimed different than PD on permit

If the claim is to be recommended with a basis of permit, and if the PD claimed is different than the PD shown on the permit (as amended by any approved amendments to the permit), then the PD shown on the permit (as amended by any approved amendments to the permit) should be recommended.

A change in PD may not be recommended for a claim based on a permit, because the accomplished transfer statute does not apply to permits. The only way to change the PD on a permit is to file an application to amend the permit with IDWR.

D. CLAIM BASED ON BENEFICIAL USE (INCLUDING STATUTORY CLAIM, POSTED NOTICE, SECOND PRESUMPTION, CRITICAL GW EXPANSION)

Note that the PD of a claim based on the second presumption or a critical GW expansion may not be different than the PD of the original claim.

1. Verify actual PD

If the actual PD is different than the claimed PD, then treat the actual PD as the claimed PD. An amended claim will not be required if the right is to be recommended with the actual PD.

2. Has change occurred?

Is there some reason to believe that there has been a change in PD since the priority date to be recommended? (If not, then review of this item is complete.)

(A different PD on a statutory claim or a posted notice is some reason to believe that the PD was different at the time of filing the claim or posting the notice.)

If so, then make a reasonable effort to determine whether a change in PD has occurred. If the evidence supports a finding that a change has occurred, then proceed to Part 3 below. Otherwise the claimed PD should be recommended.

NOTE: Where the PD is different than the PD stated on the most recent approved transfer, then a change in PD will be deemed to have occurred, and it will be deemed to have occurred no earlier than the effective date of the transfer.

3. Claimant contact

The claimant should be notified that the claimant must submit evidence either that there has been no change in PD, or must submit the date of change and some evidence tending to support that date; if no evidence is submitted then the claim will be recommended for disallowal due to lack of evidence of a change without injury or a new appropriation not in violation of the mandatory permit statute. (If the change occurred after November 19, 1987, then a specific date is not necessary, and the evidence need only support that the change occurred sometime after that date.)

If the evidence supports a finding that no change in PD occurred, then the claimed PD should be recommended.

If the evidence does not support any finding as to the date of the change, and the PD of the entire right was changed, then the claim should be recommended for disallowal, and should include the

RE: AMENDED CLAIM

Snake River Basin Claim No(s): A63-10034

Dear Claimants,

A discrepancy of 40 acres exists between the 959.0 acres of irrigation claimed in the Snake River Basin Adjudication under the *Notice of Claim to a Water Right* submitted in 1990 and the 999 acres of irrigation approved for the *Amended Application for Permit* in 1983. In order for you to claim the permitted place of use, you must sign and file the enclosed *Amended Notice of Claim to a Water Right* with our department.

The signed and notarized *Amended Notice of Claim to a Water Right* needs to be submitted to our department by **June 6, 2006**. If you do not file the *Amended Notice of Claim* within the time allotted, I will conclude that your company has waived the right to the unclaimed portion and the place of use that will be recommended will not exceed the place of use that was originally claimed.

Respectfully Submitted,

A handwritten signature in cursive script that reads 'Kimberly Brown'.

MEMORANDUM

RECEIVED

NOV 20 2001

Department of Water Resources

TO: FILE 63-10034

FROM: DANIEL A. NELSON

DATE: 10/23/01

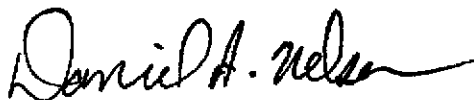

SUBJECT: RESOLUTION OF CONVERSATION MEMORANDUM DATED
3/19/1990

Over the past few months I have been working with Vic Conrad of JR Simplot in order to resolve the questions he raised with Steve Lester in a memo dated 3/19/1990. In our discussions I mentioned the 11/20/1986 memo from Don Martin of JR Simplot outlining their water rights included with the field exam and the Supplemental Information submitted by the field examiner, Carter Fritschle. All of the information provided in the field exam suggested that the Ethanol Plant use was covered under previous rights.

After discussing this information with Mr. Conrad, we agreed that the Ethanol Plant was covered under the other rights since the entire system is tied together. The industrial use has shifted from one use to another through conservation efforts of JR Simplot, but the amount of water use has not changed. All of the uses including the Ethanol Plant deal with potato processing, and should not be considered different than the original potato processing uses listed on the original licenses. The Ethanol Plant was in place prior to 1987, which would also qualify it for an accomplished transfer through the adjudication process.

Therefore, my review of the field exam for this permit is that it should be licensed as Mr. Fritschle recommended during his field exam and not include the industrial use under this permit.

Respectfully,

Daniel A. Nelson
Sr. Water Right Agent

Supplemental Information

Simplot has five active wells that are the sources for water rights 63-2731, 63-3107, 63-4968, 63-5036, 63-5037, 63-5039, 63-7244, and this water right. All seven of these water rights overlap this right either for the point of diversion or the place of use or both. However, the actual amount of water being used does not appear to exceed the amount of water licensed for water rights 63-2731 and 63-3107. These two water rights have a combined diversion rate of 12.748 cfs (5721 gpm). The maximum industrial usage appears to be 12.48 cfs (5600 gpm). This makes the industrial portion of the four claims and license 63-7244 superfluous. Also, the extent of the irrigation claimed on 63-5036, 63-5037, and 63-5039 seems unlikely since much of the land claimed has not yet been incorporated into their wastewater reuse system. The following information on the wells was obtained 7-1-87 and 7-8-87. The estimated flow rates were supplied by Don Martin.

Well # 4: Located in the SE 1/4 of the NE 1/4 of Section 19. It has a Fairbanks Morse 60 HP motor (SN 269460) and a Pomona turbine pump with an estimated flow of 400 gpm.

Well # 6: Located in the NW 1/4 of the SE 1/4 of Section 19. It has a General Electric 100 HP motor (SN SVJ 519117) and a Peerless turbine pump with an estimated flow of 1000 gpm.

Well # 8: Located in the NE 1/4 of the SW 1/4 of Section 20. It has a U.S. Motors 125 HP motor (SN C-2949-01-272) and a Peerless turbine pump with an estimated flow of 2700 gpm. This estimate may be too high, since the field exam for 63-7244 shows a flow of 2350 gpm from what appears to be Well # 8.

Well # 9: Located in the NE 1/4 of the SE 1/4 of Section 19. It has a U.S. Motors 125 HP motor (SN R-9982-03-826) and a Peerless turbine pump with a measured flow of 1500 gpm.

Well # 10: Located in the NW 1/4 of the SW 1/4 of Section 20. It has a U.S. Motors 125 HP motor (SN R-9982-05-953) and a Peerless turbine pump with a measured flow of 2700 gpm.

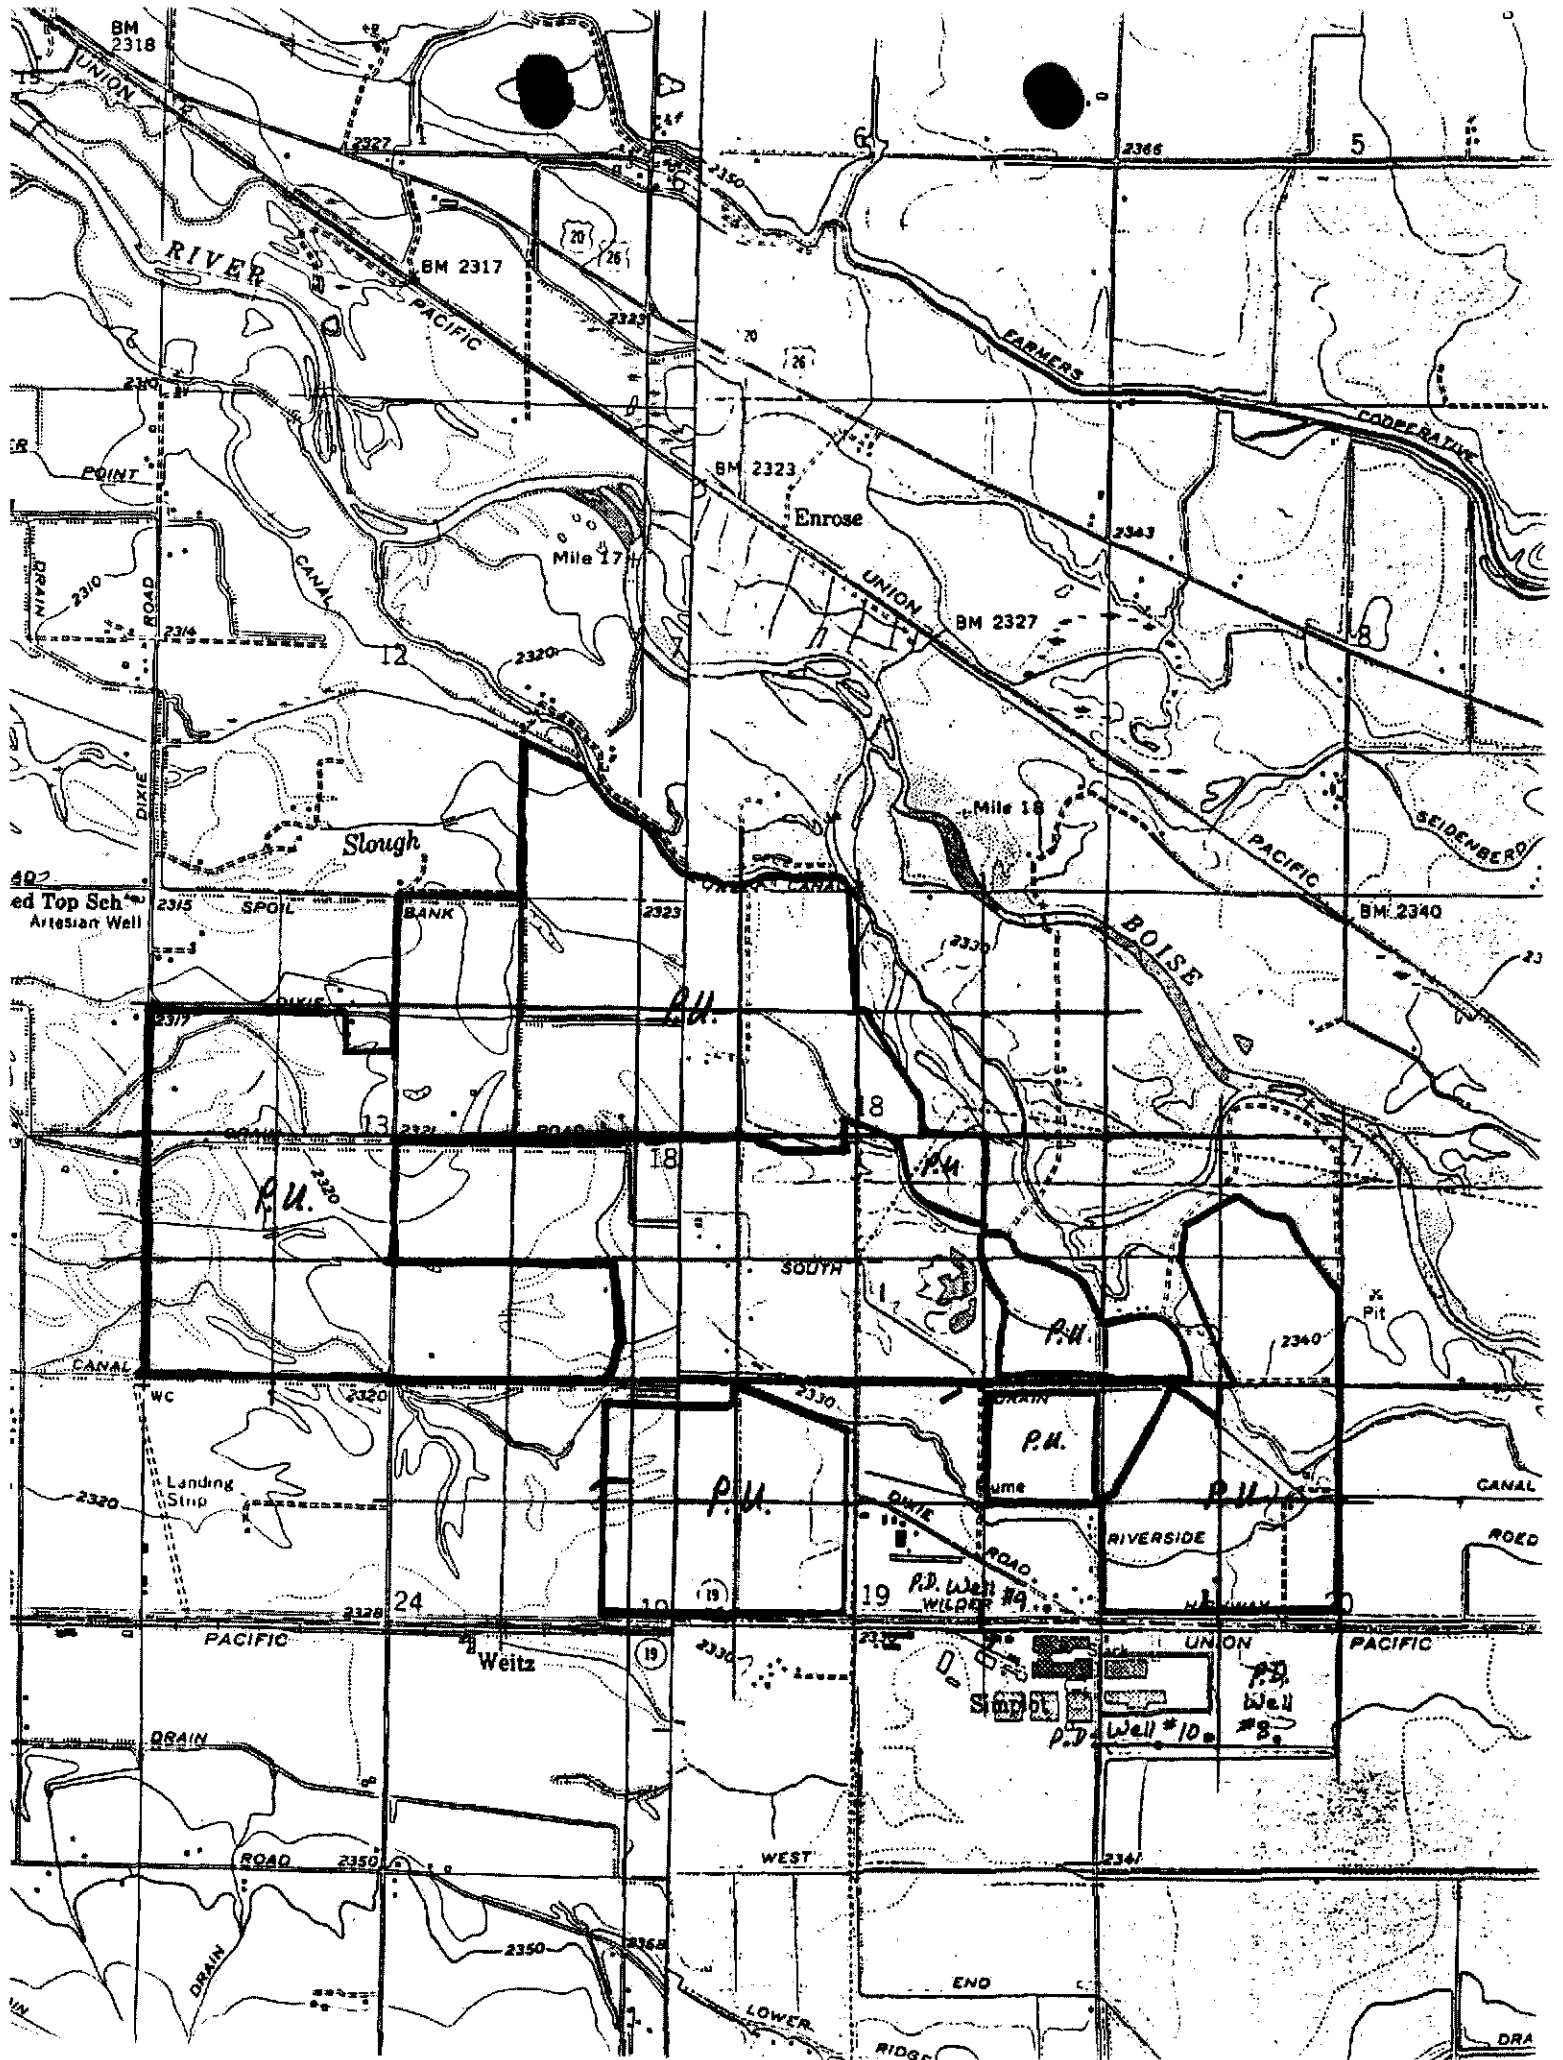

Wells # 1, # 2, # 3, # 5, and # 7 are no longer in service.

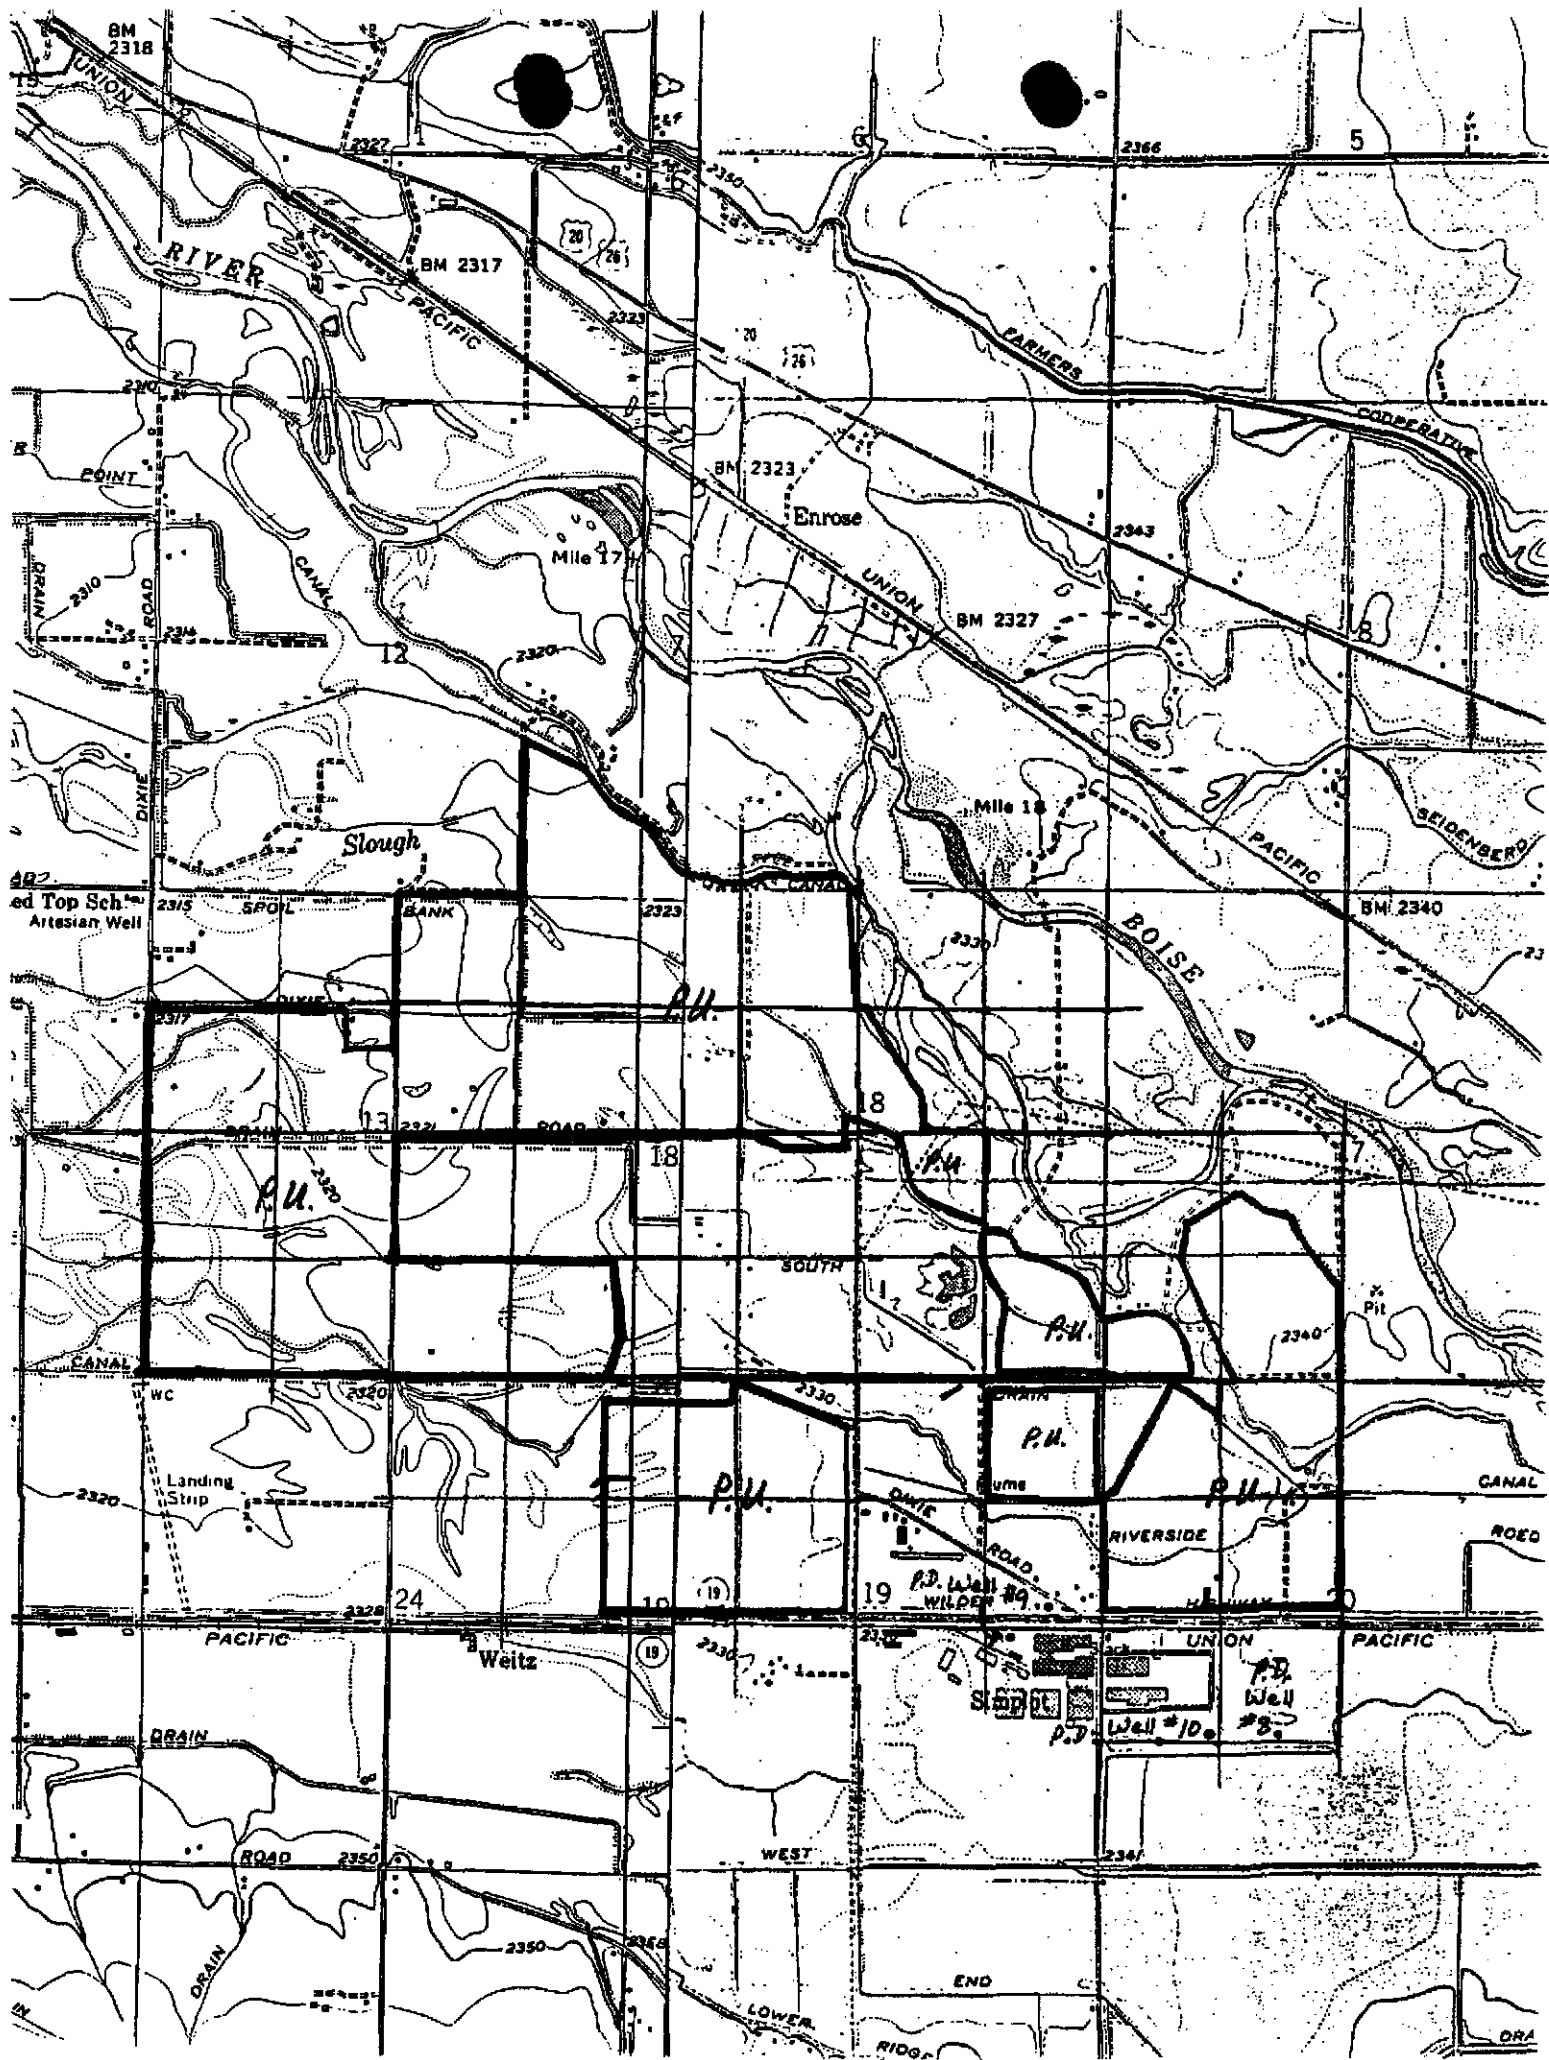

The water from Wells # 8 or # 10 supply Plant II. The water from Well # 9 supplies Plant I and can be piped to either of two storage tanks. A 250,000 gallon storage tank is west of the well, and a 100,000 gallon storage tank is east of the well. Two 75 HP centrifugal pumps located in the building on the south side of the 100,000 gallon storage tank pump water from the storage tank to Plant I. A 10 HP centrifugal pump is used to supply domestic water when the plant is not in production.

Supplemental Information (continued)

The waste water from the processing plants is collected on the south side of State Highway 19, and it is piped through a 20" concrete tile to the recovery plant on the north side of State Highway 19. The five 75 HP Fairbanks Morse centrifugal pumps ("potato pumps") pump the water into an 18" PVC underground pipe with seven discharge points (the lagoon and open ditches). Approximately 75 % of the irrigation water required for these lands can be supplied by the wastewater from the plant. Three relift pumps recirculate the tailwater from the fields back into the irrigation system so none of the wastewater from the processing plants leaves the land as surface runoff. The crops being grown are corn, grass for green chop hay, barley, and a research plot with 12 acres of trees.

I was not shown the well described in water right 63-7678 that is licensed for stockwater use at the feedlot.

Common Systems Descriptions

The following is a list of legal descriptions for wells involved in two separate common water systems. The first common system is located at Simplot Feedlot #3 near Caldwell, Idaho. The primary function of this system is to provide stockwater for the feedlot #3, water for 4 domestics, and water to the offices.

The second common system is located at Simplot's food processing plant near Caldwell, Idaho. The primary function of this system is to provide industrial water to the food processing and waste recovery system.

Any one well from either system is considered an alternative point of diversion for any other well from either system.

RE: Snake River Basin Adjudication (SRBA)
Co-counsel for J. R. Simplot Company

Dear Ms. Pepe:

Our records were modified May 19, 1994, to reflect Terry Uhling and Gray Young as co-counsel for J. R. Simplot Company. Bruce Belzer was removed from the water right claim records on which he appeared as counsel.

Thank you for your assistance. If you have any questions, please contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Sally Sherman'.

RE: Snake River Basin Adjudication
Case No. 39576 and Subcase Nos. 36-13320 & 57-02203A

Dear Mr. Shaff:

In response to your letter of March 24, 1994, please modify your records to reflect that Terry T. Uhling and Gray Young are co-counsel of record in the above referenced matter. Mr. Uhling and Mr. Young are in-house counsel for J. R. Simplot Company, and, therefore, would be apprised of all matters relating to the claims of Simplot and its related company subsidiaries and affiliates as a matter of course. The attached Exhibit A does represent all water rights we are aware of at this time to which the Notice applies.

For your information, I have also enclosed a copy of a letter and attached Notice of Withdrawal from Diana Delaney, Chief Deputy Clerk of the Snake River Basin Adjudication Clerk's Office, which indicates that Bruce Belzer never was recorded as being counsel for J. R. Simplot Company.

If you have any questions, feel free to call me at 389-7201.

Sincerely,

Holly Pepe

RE: Appearance of J. R. Simplot in Subcase Nos. 36-13320 and 57-02203A

Dear Mr. Young and Mr. Uhling:

Enclosed I am returning your *Notice of Withdrawal of Counsel* which was received by the court on April 5, 1994, and which stated that Bruce L. Belzer was withdrawing as counsel for J. R. Simplot Company in the above-referenced subcases.

After a search of the files for the above subcase, I am unable to locate any appearance by Bruce L. Belzer. However, on January 28, 1994, a *Notice and Entry of Appearance* was filed on behalf of J. R. Simplot in these subcases. That notice listed Gray Young and Terry Uhling as counsel for J. R. Simplot.

Sincerely,

Diana R. Delaney

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

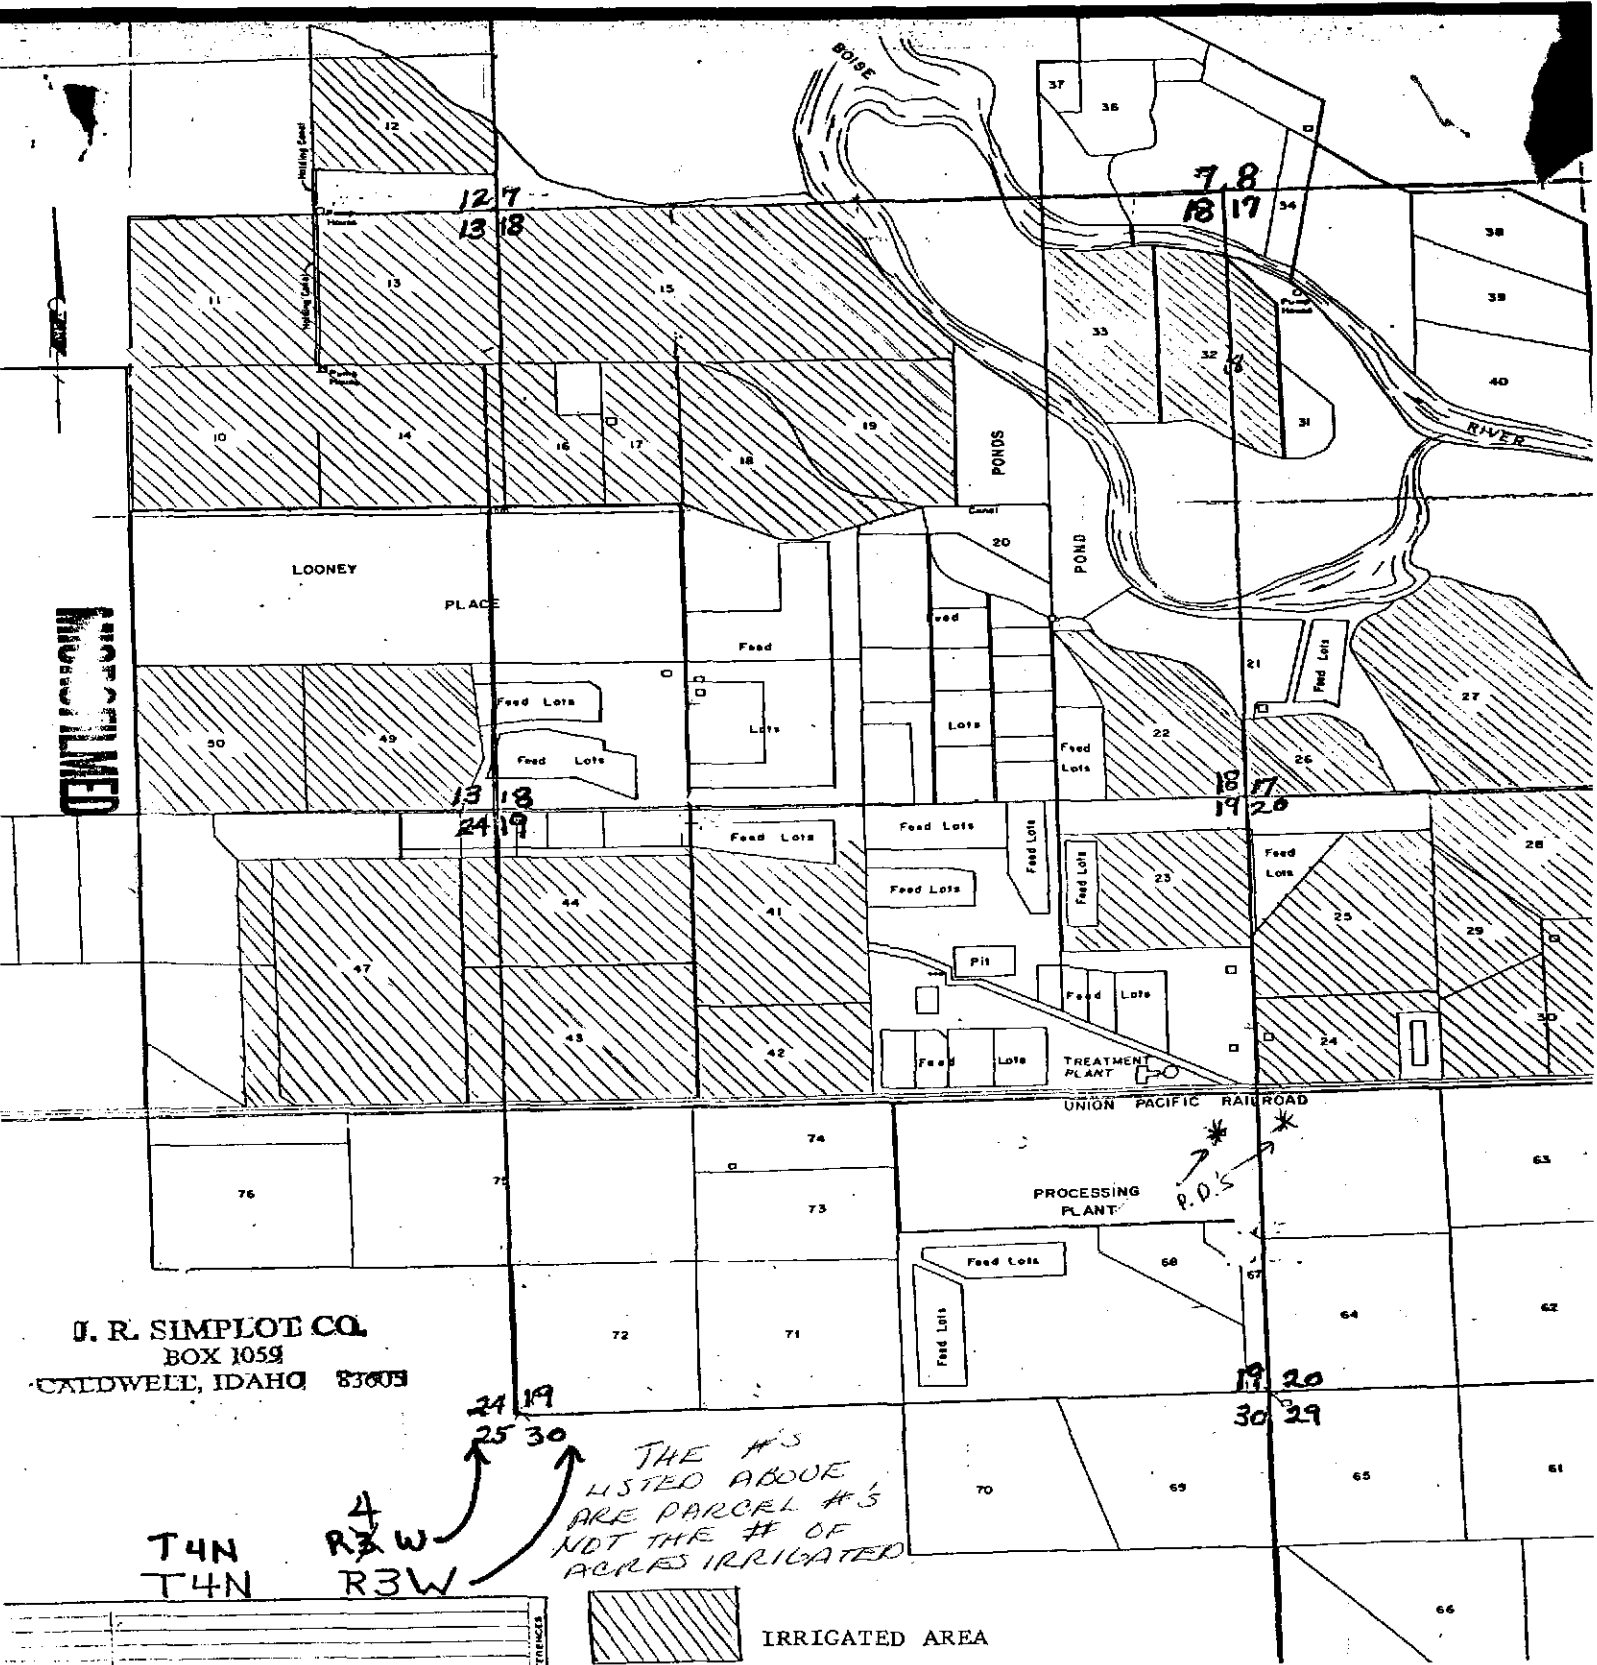

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-10034, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before November 1, 19 84.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 17 day of October, 1983.

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

The system has 3 wells supplying water to a 2 potato processing plants. The waste water from the processing plants is used for irrigation. This water comes from Simplot's well #9 (plant I) and Simplot's wells #8 or #10 (plant II). The wells for plant II (wells #8 & #10) are used on an alternating basis. Water from the wells can be discharged into the waste water recovery system
