1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is essential to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing resources.

3. Once the information is gathered, the next step is to analyze it. This involves breaking down the problem into smaller, more manageable parts and identifying the key factors that influence the outcome.

4. After analysis, a plan or strategy should be developed. This plan should outline the steps that need to be taken to solve the problem, taking into account the resources available and the potential challenges.

5. The final step is to implement the plan. This involves putting the strategy into action and monitoring the progress. If necessary, adjustments should be made along the way to ensure that the goal is achieved.

"EVIDENCE OF PRIORITY"

We purchased the property of claim number 63-21520 and 63-21521 (Legal description T04N, R04W, S16) in May of 1968 .

The original owner, William Altig informed us that he had taken the place our of sage brush in 1904.

There is a natural drain from the City of Greenleaf that enters the property near the SW corner of the SWSE of section 16. There is also a natural spring about 200-300 feet to the north. This water was co-mingled with other sources and/or used for livestock water and irrigation by William Altig and another owner then by us.

For many years the spring was also used for domestic and livestock water until we stopped using it for domestic water about 1989.

The spring and run off water were also use for corral livestock water on the south side of SWNE. This is used from 1-20 days per year.

Please advise if any more information is needed.

Respectfully,

John Redmon

RE: EVIDENCE OF PRIORITY

Snake River Basin Claim No(s): A63-21520 & -21521

Dear Claimants,

In the past, the Redmons submitted the above referenced claim(s) during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated print-out of the claim(s) for your reference only, it is not necessary to return this print-out. The Redmons indicated, when this claim was filed, that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled, **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date."**

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right(s) if water availability problems arise in the future.

The required evidence supporting the priority date(s) requested needs to be submitted by March 16, 2006. Please let me know if you may not be able to submit proof of priority or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, field exams are now being conducted by Department water resource agents to verify claims in this area. In the near future, you may be receiving a call from us in order to set-up an appointment for a field exam.
