13. Other Water Rights Used:

14. Remarks:

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Right 63-198AJ is limited to the irrigation of 40 acres within the authorized place of use.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

In administering water rights from Mores Creek and its tributaries, the diversion and use of water under this right from the Green Ranch diversion shall be subordinate to other rights from Mores Creek and its tributaries, existing prior to November 20, 2001, with the following exception: this right, when diverted at the Green Ranch diversion, shall not be administered as subordinate to other rights from Mores Creek and its tributaries to the extent of a recognized delivery call from any Boise River water right holder against Mores Creek that is necessary to serve the water requirements of the senior right holder while making reasonable use of existing natural flow and storage water rights available to the right holder.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

15. Basis of Claim: Decreed

WATER RIGHT NO. 63-198AJ

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Right 63-198AJ is limited to the irrigation of 40 acres within the authorized place of use.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
5. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

6. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.
7. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
8. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
9. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
10. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
11. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
12. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
13. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
14. In administering water rights from Mores Creek and its tributaries, the diversion and use of water under this right from the Green Ranch diversion shall be subordinate to other rights from Mores Creek and its tributaries, existing prior to November 20, 2001, with the following exception: this right, when diverted at the Green Ranch diversion, shall not be administered as subordinate to other rights from Mores Creek and its tributaries to the extent of a recognized delivery call from any Boise River water right holder against Mores Creek that is necessary to serve the water requirements of the senior right holder while making reasonable use of existing natural flow and storage water rights available to the right holder.
15. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
16. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by these rights from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under these rights each year shall not exceed the reported amounts.
5. The amount of water diverted from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights these rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. The number of acres available for irrigation under these rights from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs per acre.
7. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under these rights.
8. Diversion and use of water for industrial purposes under these rights shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under these rights.

WHEREAS, the District published notice of the filing of the petition in the Idaho Press-Tribune and The Idaho Statesman and no objections were made to the petition either prior to or during the annexation hearing.

WHEREAS, the Board of Directors of Nampa & Meridian Irrigation District deem it in the best interest of the District to annex the above-described property to the District.

IT IS HEREBY ORDERED BY THE MEMBERS OF THIS BOARD OF DIRECTORS:

1. That the above-described lands consisting of 50.00 Ridenbaugh Acres be annexed to the Nampa & Meridian Irrigation District.
2. That a period of ninety (90) days from the date of this Order be allowed for presentation to the Board of a petition signed by two percent (2%) of the landowners of the District requesting an election to approve or disapprove said annexation.
3. That this Order shall not become effective until said ninety (90) days have passed without such petition being presented or until approval of the annexation at an election.
4. That this Order shall be recorded at the Ada County Recorder's office and shall be made a Minute entry of the Minutes of the Board.

Weick seconded the motion made by Aschenbrenner to adopt the Resolution and Order for Annexation, it passed unanimously, and the Resolution and Order for Annexation was adopted and approved.

Dated 5 June 2001.

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by these rights from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under these rights each year shall not exceed the reported amounts.
5. The amount of water diverted from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights these rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. The number of acres available for irrigation under these rights from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs per acre.
7. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under these rights.
8. Diversion and use of water for industrial purposes under these rights shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under these rights.

TRANSFER NO. 5273
WATER RIGHT NO(S). 63-00120F/63-00198Q/63-00199B/63-00200B

CONDITIONS OF APPROVAL AND REMARKS

9. The rate of flow diverted under these rights at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. When the authorized diversion of water under these rights is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under these rights at the Surprise Valley diversion must also be reduced by an equivalent proportion.
11. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
12. The annual volume of water used for industrial and groundwater recharge purposes shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
13. Place of use is within the Nampa and Meridian Irrigation District boundaries.
14. Right 63-00198Q is limited to the irrigation of 40 acres within the authorized place of use.
15. The place of use for industrial and groundwater recharge purposes under these rights is limited to the lands served by the Surprise Valley diversion.

Dated this 27TH day of JANUARY, 2000.

Re: Snake River Basin Adjudication (SRBA)
Preliminary Recommendations #63-198AJ, 63-199B, 63-200B and 63-30181

Dear Mr. Steenson,

The points you made in your letter dated September 28, 2006, and in the subsequent Notice of Error for each of the above referenced water right recommendations have been addressed. I want to thank you, Dan, for the careful review you made for the value added that contributed to the quality of the IDWR report to the Court later this year.

You will notice at the outset on the enclosures many of the remarks or conditions formerly in Explanatory Material have been moved and associated with elements of the water right recommendations. Your attention to the Explanatory Material was well spent considering the revised descriptions of the recommendations.

The triangular parcel Darren Coon identified has been added to the boundary for NMID. The volume quantity for the Green Ranch diversion has been modified consistent with the condition in the Transfer 69594. You will notice the Total Acres for NMID has been adjusted by 28 acres to 69,495 acres in each of the recommendations enclosed. You can expect to see the same Total Acres in each of the NMID water rights that will be recommended to the Court in December.

The recommendation for 63-30181 was modified consistent with Transfer 69594 to have a consistent statement regarding the authorized rate of flow for the Surprise Valley diversion.

I think you will find the order of the remarks consistent among the revised recommendations.

IDWR will go forward in the recommendations with respect to the Surprise Valley place of use remark consistent with the conditions of the amended transfer taking notice of your thoughts with respect to I.C. § 43-335. The conditions in the amended transfer issued December 21, 2005, were the result of extensive review and input from NMID and are appropriate in their entirety in the recommendations to the Court.

I have enclosed the Preliminary Recommendations you received earlier with highlighting to denote the changed items noted above. The revised recommendations are correspondingly highlighted for those changes with the objective to speed the review for you and save you time.

As always, Dan, working with you results to the benefit of your client and the State for administering water rights. Thank you for doing no small part.

Sincerely,

TRIBUTARY: SNAKE RIVER
TRIBUTARY: BOISE RIVER

QUANTITY: 0.400 CFS

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

PRIORITY DATE: 06/01/1877

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	0.400 CFS

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

69495 ACRES TOTAL

This right when combined with Right Nos. 63-199B, 63-200B, 63-2392B, 63-2968 and 63-30181 can be used to irrigate up to 69,467 acres within the boundary of the Nampa Meridian Irrigation District.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

This right is limited to the irrigation of 40 acres within the authorized place of use.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

This right is designated as No. 65 in the Stewart Decree and the Boise Water Distribution Report.

Water right 63-30181 has the shorter statement regarding the authorized rate of flow for the Surprise Valley diversion, but does not have the language relating to the amount of water to be used from the Surprise Valley diversion that is in 63-198AJ, 63-199B and 63-200B. *Corrected*

If possible, it would be helpful for future reference if the remarks could be in the same order in each of the water rights.

Don has corrected the items that need to be changed.
Today you confirmed that the explanatory material is included in the recommendations for internal IDWR record-keeping purposes only, so that, for ease of reference in IDWR's files, transfer conditions are associated with SRBA decrees. The court will not consider the explanatory material, and it will not be included in NMID's decrees. There is, therefore, no opportunity or need for NMID to object to any of the statements in the explanatory material. Any inaccuracies in those statements can be corrected later at an appropriate time. *Corrected by Don*

I have, nonetheless, reviewed the statements in the explanatory material sections of each of the recommendations for NMID's water rights. The following statement in the recommendations for water rights 63-199B and 63-200B concerns me: "The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion." I recognize that the statement is one of the conditions in the water right as a result of the transfer to add the Surprise Valley diversion and lands served by it. I think the statement is correct as to groundwater recharge, but I think it is not entirely accurate with respect to industrial use in light of I.C. § 43-335, which allows an irrigation district to lease water rights for use on industrial lands within its boundaries under certain circumstances:

LEASING OF WATER RIGHTS BY IRRIGATION DISTRICT WITHIN THE DISTRICT BY DISTRICT'S WHERE LANDOWNER CAN RECEIVE WATER THROUGH THE DISTRICT'S IRRIGATION SYSTEM. Any irrigation district which has within its boundaries residential, commercial or industrial lands, or any combination of those lands, and which holds water rights for those lands, shall have the right to lease, to any municipality, municipal provider, public utility, domestic water users organization which furnishes water service to those lands, or to any other entity for the distribution of water to those lands for uses other than culinary purposes, those water rights which are held for any residential, commercial or industrial lands for which the owner has elected not to receive his proportionate share of the irrigation district's water through the irrigation system of the district; provided, however, that no water right under which water is delivered through a community ditch shall be leased without the written consent of the ditch users who do not elect not to receive water from the district. For purposes of this chapter, the terms "municipality" and "municipal provider" shall be defined as provided in section 42-202B, Idaho Code; "culinary purposes" shall mean the use of water for direct human consumption, cooking, sanitary purposes, and other such uses. Nothing in this chapter shall be construed as amending or affecting the laws of Idaho pertaining to the control and regulation of public utilities, municipal providers or water corporations.

Since the statements in the explanatory material are not at issue in the SRBA process, this is really an academic issue at this point. The situation contemplated by the statute is, I believe, the only one in which the referenced statement in the explanatory material and the water right is not entirely accurate.

As we discussed over the phone, we are verifying the 40 acre limitation in water right 63-198AJ. Subject to double-checking, it appears that NMID does not have any other concerns with the preliminary recommendations.

**RE: Snake River Basin Adjunction – Idaho Department Water Resources (IDWR)
Service Area Boundary Map**

Dear Dan:

Subsequent to your request of 20 September 2006 for the District to review and compare the Irrigation District map with the service area boundary map provided by IDWR the task was completed. As a result of the comparison, it was determined the Department omitted a parcel of land in Section 15, Township 3 North, Range 2 East, in the Northeast Quarter of the Southwest Quarter (copy of map enclosed).

Per our discussion of today's date, I am providing you a copy of the map for your use in follow-up with IDWR in this matter and any other you deem appropriate to bring to their attention.

Please keep in mind the scale at which the map was prepared by IDWR and the scale of the District map itself may not allow for recognition of very minute variances between the maps; however, generally speaking, the comparison proved accurate between the two.

Should you have any questions concerning this subject, please feel free to call on me.

Sincerely,

Daren R. Coon, Secretary/Treasurer

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

69467 ACRES TOTAL

This right when combined with Right Nos. 63-199B, 63-200B, 63-2392B, 63-2968 and 63-30181 can be used to irrigate up to 69,467 acres within the boundary of the Nampa Meridian Irrigation District.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

This right is limited to the irrigation of 40 acres within the authorized place of use.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

This right is designated as No. 65 in the Stewart Decree and the Boise Water Distribution Report.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of .72 cfs.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B.

PRIORITY DATE: 05/01/1878

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

This right when combined with Right Nos. 63-198AJ, 63-200B, 63-2392B, 63-2968 and 63-30181 can be used to irrigate up to 69,467 acres within the boundary of the Nampa Meridian Irrigation District.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

The annual volume of water used for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

This right is also designated as Right No. 67 in the Boise River Stewart Decree and Boise River Water Distribution Report.

Subject: NMID Irrigated Acres

Dan, John and Daren,

This am we reviewed where we are at in computing NMID acres. Here is an approach that might fit the unique situation for NMID:

1. We are finding that the irrigation delivery organizations in the Treasure Valley have been able to identify sufficient irrigated acres to justify the acres originally assigned water in their plat books. This target of irrigated acres count has widely been achieved.
2. Lands irrigated under the NMID service area have changed greatly over the years due to urbanization. To the extent that land was not removed from the rolls, the irrigation water right remains.
3. NMID place of use includes both the tax roll and rental roll lands.
4. In some cases NMID water is used on land that was originally platted as too high to receive water. In other cases NMID water is not used on land that was platted to be irrigated with NMID water. It is our understanding that originally unplatted land now receiving NMID water has been added to the rolls on an acre-by-acre basis under the supervision of NMID.
5. Darren advised us at the last meeting in our office that he had counted the acreage in the plat books, but we are not aware of a tabulated copy of this information.
6. To justify the acreage in the original plat books we need a tabulated copy of the information.
7. IDWR has assisted different water delivery organizations in different ways via the SRBA process -- this is not a one-size-fits-all process.
8. IDWR recognizes that there is only one copy of the plat book. Accordingly we would be willing to visit your offices during normal business hours, and tabulate the acres to which water was originally provided by keying into a laptop the number of irrigated acres per tract as described in the plat book. We would be willing to share the resulting spreadsheet with you and ask for a double-check. This listing could be used to back up a count of acres irrigated by the project.

How does this approach sound? Please advise if you would suggest improvements to the approach. Our goal is to create a defensible count of acres -- hopefully one that both NMID and IDWR can support as we make our recommendations to the SRBA Court.

Thanks, Dave

P.S. Anita, would you please place a copy of this email in our NMID file?

~ 66,000 acres irrigable in Nampa Meridian ID
(does not include high ground acres)

Lee Sisco's report: NMID 67,000+
(Nampa Meridian
+ Ridenbaugh)

Demand early in year - Ridenbaugh
Then water is provided by Natural flow + storage from
Boise Project

As demand increases, ~ 50,000 acres receive commingled
water

13,800 receive water only from New York Canal

Perkins lateral has only Ridenbaugh
Feeders from New York Canal
Locust Grove - 100 cfs - Uppermost (10 mile feeder)
Rausser Feeder 10-15 cfs
Mason Cr feeder 110-120 cfs
Lake Lowell feeder

NMID is taking additional acres as exclusive deliveries over
time

Ridenbaugh water ~~was~~ use = $\pm$ 50k acres

* NMID - Needs to provide rental roll places of use to IDWR
(as compared w/ Tax Roll)

* Total No. of acres irrigated by Federal project -
NMID is not aware of this number

~~*~~ Federal water is delivered through the Ridenbaugh Canal -
This needs to be reviewed / This is only storage

PLACE OF USE: SEE CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
4. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
5. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

6. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
7. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
8. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
9. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
10. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
11. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
12. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
13. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.
14. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
15. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
4. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

5. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.
6. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B.
7. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.
8. The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
9. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. The annual volume of water used for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
11. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
12. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
13. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
14. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
15. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
16. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
17. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

18. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
19. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

PLACE OF USE: SEE CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
4. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

5. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.
6. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B.
7. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.
8. The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
9. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. The annual volume of water used for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
11. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
12. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
13. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
14. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
15. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
16. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
17. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

18. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
19. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
