SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 20.000 CFS

Whenever it becomes necessary for the watermaster to deliver this right the following condition shall apply. This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

Ladies and Gentlemen:

As counsel for Riverside, I am submitting the attached Notice of Error Replies for each of these water rights held by Riverside Irrigation District Ltd. As the comments and Notice of Error generally apply to all of the rights, please consider this letter as incorporated into each of the Notice of Error Replies.

OK DM

1. Riverside Irrigation District objects to the place of use. The proposal shows 9433 acres total. The place of use should be 9845 acres based on the modifications contained in the attached maps dated September 15, 2006, plus those additional areas depicted on the attached maps enclosed herewith. Also enclosed are affidavits of the Directors of the Riverside Irrigation District explaining the use of certain areas as indicated in the maps. The modifications consist of irrigated areas not included in the September 15, 2006 calculations, plus irrigated areas on drain banks as described in the affidavits. Riverside believes that the total acreage is in excess of 10,000 acres, but have not been able to calculate the additional acres that should have been included using the Department's ArcView program. Riverside requests that the Department update the total acreage within the place of use based upon the modifications to the maps as attached hereto, and utilize the acreage resulting from that re-calculation in describing the place of use.

SCANNED
OCT 03 2006

The place of use also states that there are 9433 acres within the "Idaho boundary" of the District. Riverside Irrigation District straddles both Idaho and Oregon, and the total acreage is combining Idaho and Oregon acreage. Riverside also believes that the 4009 acres described as irrigated within the State of Oregon is inaccurate and does not capture all the Oregon acreage. Riverside questions the need to describe acreage in Oregon or Idaho, as the water right is appurtenant to the entire place of use and water can be moved within the place of use regardless of political boundaries. Riverside requests that the reference to specific acres in Oregon be deleted. If necessary to include specific amounts of Oregon acreage, the totals should be recalculated to show the acreage on the attached maps, prepared on September 15, 2006, along with the modifications shown on these maps.

2. Period of use. Was the subordination language in the period of use for storage intended to apply to diversions out of the Boise River below Star such as the Riverside Canal? Riverside understood that language was used above Star only.

3. Water right number 63-2374. Enclosed is a copy of the original, signed Notice of Claim filed with the Department. The Department requested a re-execution of this Notice of Claim. Riverside has since located this previously executed copy.

4. With respect to water right numbers 63-4007 (Meadows Gulch Drain) and 63-4010 (West End Drain), Riverside objects to the quantity proposed. In the case of 63-4007, the quantity proposed is 5 cfs. The amount claimed was 10 cfs. The Department has not explained the basis for reduction in the amount claimed. With respect to 63-4010, the quantity recommended by the Department is 30 cfs. The quantity claimed by Riverside is 70 cfs. Again, the Department has not explained a basis for reduction of the claims. The amount should be recommended as claimed.

With respect to water right number 63-4007, 63-4008, and 63-4010, enclosed are the original Claims for Water Right that were filed with the Department in 1967, long before the commencement of the Adjudication, demonstrating the quantity and location of the water right. The Department has requested a flow measurement for water right numbers 63-4007, 63-4008, and 63-4010. These drains run into the Riverside Canal and dump water directly into the Riverside Canal without a measuring device. The Department did not make the request for a flow measurement until the end of this summer, at which point a measurement would not accurately capture the volume of water flowing into the Riverside Canal from these three drains. Accordingly, Riverside, at this late point in the season, cannot provide the Department with the requested flow measurements.

Finally, there does not appear to be a preliminary recommendation for water right number 63-4009. It should be recommended as claimed, with the same adjustments for the place of use and acreage as with all the Riverside water rights.

The water from this stream enters the canal at the level of the
water in the canal and is carried in the canal. The source of this
water is drainage water from the Wilder Irrigation District and
stops with the end of irrigation.

Permit No. 11826 was filed with the Department of Reclamation. Proof
of completion of works was submitted and fees paid. However, beneficia
use of water was never made. This claim is filed to replace this
permit in order to retain the original priority.

DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant Riverside Irrigation District, Ltd.
post office address Parma, Idaho
2. The point of diversion is in SE $\frac{1}{4}$ of NE $\frac{1}{4}$ Section 16 Township 4N
Range 4W B.M. located on West End Drain
(name of source)
tributary to Boise River in Canyon County.

3. Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/01 11/15	20.000 CFS

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only when the natural flow in the Boise River below the Star Bridge in Township 04 North, Range 01 West, Section 18, NE¼ of the SE¼ of the SE¼, Boise Meridian (approximate river mile 33.9) is sufficient for water to be available for diversion at the point of diversion described above, provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

9433 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right when combined with Right Nos. 63-227, 63-228, 63-229, 63-299, 63-300, 63-2279, 63-2374, 63-2389, 63-4007, 63-4008, 63-4009 and 63-4010 can be used to irrigate up to 9433 acres within the boundary of the Riverside Irrigation District.

Place of use includes the irrigation of 4009 acres within the State of Oregon.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

This right is designated as No. 91 in the Stewart Decree and the Boise Water Distribution Report.

Right includes accomplished change in point of diversion pursuant to Section 42-1425, Idaho Code.
