C. DESCRIPTION OF RIGHT OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. General Information

- a. Amount of water to be diverted 57.56 c.f.s. &/or _____ acre feet

Description of diverting works:

Headgates and ditches will still divert and carry well, drain ditch and Warm Springs Creek water, but will dump this water into the Snake River on the Canyon County side. The District will then use it's Snake River pumping plant located on the Owyhee County side to divert a like amount of water into it's irrigation system.

Describe the reasons for the proposed changes:

By dumping water and pumping, the District will eliminate a pipeline across the Snake River and thus reduce maintenance costs. The pipeline has a capacity of approximately 34 cfs; the Snake River pumping plant will also pump only the 34 cfs that could be delivered by the pipeline.

2. Change in point of diversion

Point of diversion NW ¼ NW ¼, Section 10 Township 1S

Range 2W, B.M., Canyon County

- a. Are there liens, mortgages, or contracts on the lands from which you propose to transfer the water right which limit your authority to make the proposed change? Yes _____ No x If yes, provide a statement agreeing to the proposed change from the holder of the lien, mortgage or contract.
- b. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer

- Draw a map indicating the new point(s) of diversion and/or the new land to be irrigated. Show clearly the land involved by section, township and range number.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

1. General Information

a. Amount of water to be diverted 57.56 c.f.s. &/or _____ acre feet

Description of diverting works:

Headgates and ditches will still divert and carry well, drain ditch and Warm Springs Creek water, but will dump this water into the Snake River on the Canyon County side. The District will then use it's Snake River pumping plant located on the Owyhee County side to divert a like amount of water into it's irrigation system.

Describe the reasons for the proposed changes:

By dumping water and pumping, the District will eliminate a pipeline across the Snake River and thus reduce maintenance costs. The pipeline has a capacity of approximately 34 cfs; the Snake River pumping plant will also pump only the 34 cfs that could be delivered by the pipeline.

2. Change in point of diversion
