Re: City of Nampa SRBA Claims

Dear Kay:

I am writing on behalf of my client, the City of Nampa, to confirm our telephone conversation the other day. As you know, the City of Nampa has pending various objections to the Director's Recommendations on its water rights. For each of its municipal water rights, the City requested that the Department recommend an annual volume.

Based on the Department's assurance that its longstanding policy remains in place (that municipal water rights are authorized to pump year-round at the authorized diversion rate), the City withdraws its request that the annual volume be stated on the face of the water right decree.

Again, I thank you for your assistance in sorting out these claims. I look forward to resolving the remaining issues via stipulation. It has been a pleasure to work with you.

C. CLAIMANT OF WATER RIGHT AS LISTED IN DIRECTOR'S REPORT

Name: City of Nampa
Address: 411 3rd Street South
Nampa, ID 83651

D. I object to the following elements as recommended in the Director's Report (Please check the appropriate box(es)).

1. ☐ Name and Address
Should be: _____

2. ☐ Source
Should be: _____

3. ☒ Quantity
Should be: 2.50 cfs (avg. daily peak flow) and 1,809.9 acre-feet
(annual volume) _____

4. ☐ Priority Date
Should be: _____

5. ☒ Point(s) of Diversion
Should be: See Appendix B (29 PODs currently in use for Integrated Non-potable Delivery System). Also see discussion under section E regarding remark on original POD(s).

6. ☐ Instream Flow Description
Should be: _____

7. ☐ Purpose(s) of Use
Should be: _____

8. ☐ Period of Year
Should be: _____

9. ☐ Place of Use
Should be: _____

11. I object because:

☐ This water right should not exist

☒ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S): _____

Corrected PODs: The City has included a corrected list of PODs associated with the integrated non-potable irrigation water delivery system. The well associated with Water Right

No. 63-5257 (the 13 Ave. N. well) was inadvertently omitted from the Amended Claim list. This well is in the same quarter-quarter as the 14th Ave. N. well.

Annual Volume: The City claims an annual volume based on use of this right for municipal purposes.

Original POD Remark: The Department included a remark for some of the City's rights stating "To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right as [original well information]." The City does not object to this remark so long as a similar remark is included for all similarly situated municipal water rights in Idaho. To the extent that the SRBA court (or other court) determines that this is an inappropriate limitation on municipal water rights, the City requests that the remark be removed from its water rights.

RE: Application for Permit No. 63-31504

Dear Mr. Cox:

The Department of Water Resources (IDWR) is reviewing Application 63-31504, which you submitted for a diversion from ground water for supplemental irrigation within the City of Nampa. Your application proposes a diversion of 4.0 cfs in addition to the 95.51 cfs of existing water rights already held by the City of Nampa. Counting beneficial use claims filed in the Snake River Basin Adjudication, the City of Nampa's existing water rights may total as much as 111.45 cfs. Please see the enclosed list for a summary of the City of Nampa's water rights.

Diverting 95.51 cfs at a constant rate will produce more than 61 million gallons per day. According to figures published on the Department of Commerce community profile for the City of Nampa, however, your actual maximum daily usage is 4.8 million gallons per day. According to the same community profile, your plant capacity is about 13 million gallons per day. These figures suggest that the City of Nampa's water rights on paper exceed actual usage. If there is, in fact, a discrepancy between "paper" water rights and actual use, it may have arisen through filing for and receiving a new water right permit each time you drilled a new well, regardless of whether the well was needed to meet increased demand or was simply a replacement for a well that was failing or had failed. IDWR is concerned that approving another permit could simply perpetuate a practice that is not in the city's best interest because the senior priority date of an existing water right may be foregone in lieu of a new right with a much junior priority.

Under the provisions of §42-222, *Idaho Code*, a water right holder may seek and obtain approval to change the point of diversion or add an additional point of diversion for an existing water right. Such a change is termed a "transfer." When a water right is transferred, it retains its original priority date, but the amount of the water right is limited to the amount of the original right. For ground water rights, the transfer provision is useful when replacing a well that has diminished in productivity or for adding a well for more efficient distribution of water.

Rather than file for a new water right that may not be needed, it could be worthwhile to review your water rights to see if a transfer would better accomplish your objective. I recommend first

City of Nampa
August 14, 2002
Page 2

determining if your peak demand is in the 95 cfs range. If so, the application you filed is probably appropriate. If not, I recommend matching the points of diversion descriptions for your recorded water rights with your active wells to determine if you hold any water rights for wells that are no longer in use. If so, you could file an application to transfer those water rights to a new well at the location proposed in your application.

While you are reviewing your water rights, another item to consider is how the City of Nampa's claims will be addressed in the Snake River Basin Adjudication. Section 42-222, *Idaho Code*, also provides for the forfeiture of a water right after five years of non-use. If the city's existing use is, in fact, far less than what has been claimed in the adjudication, water rights in excess of actual historical beneficial use may be found to have been forfeited. In addition, if a change to a water right occurred prior to November 19, 1987, the change may be claimed and decreed in the SRBA process without having to file an application for transfer.

Also, under recent legislation a municipal water provider may file an application to appropriate water for reasonably anticipated future needs. Under §42-202B, *Idaho Code*, reasonably anticipated future needs means "future uses of water by a municipal provider for municipal purposes within a service area which, on the basis of population and other planning data, are reasonably expected to be required within the planning horizon of each municipality within the service area not inconsistent with comprehensive land use plans approved by each municipality." Water appropriated for reasonably anticipated future needs is not required to be diverted and used immediately, as is the case for most new water rights. Instead, the water right can be held over a "planning horizon" in anticipation that the water will be needed to meet the municipality's needs in the future. While an application for transfer may be a better choice than an application for permit to meet your immediate needs, with additional information your existing application could possibly be converted to an application for reasonably anticipated future needs.

I will hold your application for permit for 30 days to give you time to explore this issue. Please respond by either (a) describing your diversion and distribution system(s) to show why the new water right is needed now, or (b) providing sufficient information to establish that the application is for reasonably anticipated future needs, or (c) withdrawing your application for permit. In connection with options (b) and (c), you may also wish to file an application for transfer to cover your plans to divert from the new well to meet existing needs. I have enclosed an application for transfer form for you. If I have not received a response from you within 30 days, I will recommend that your application be denied.

Normally IDWR will not issue a well drilling permit authorizing well construction until the associated water right filing is processed and approved. However, to avoid delaying your project while you are reviewing your options, IDWR will consider issuing a well drilling permit now if you accept the risk that approval to divert and use water from the well may not be granted. If this
