Provincer Irrig. Dist.

A63-00224 etc

✓ has main maps with boundaries

A63-02275 Plm $\approx$ 34,000 acres but does not totally agree with maps in A63-00224 (for example - lots of Caldwell is left out of d'base in A63-02275).

Need something in d'base to let people know that land list is subject to change.

Add remark ?

Plm list is subject to change per review. See A63-00224 for complete boundaries of irrig district as shown on 3 maps.

Can S.O. do this to simplify database updating?

Thanks,

JL

DISCHARGE MEASUREMENTS FOR PIONEER IRRIGATION DISTRICT

OCTOBER 17, 2006

At the request of Mr. Scott Campbell of Moffatt Thomas Barrett Rock & Fields, Chtd, representatives of ERO Resources Corp. measured the discharge of five diversions operated by Pioneer Irrigation District.

1. **Johnson Well** (Reference Water Right No. 63-5200) located in the NE1/4NE1/4SE1/4 Section 34, T4N R2W). **Discharge = 3.51 cfs.** (Note that the legal description differs from the claimed location. The GPS plotted location is very close to the boundary line between the NE and SE quarters of this section. The GPS receiver used for this measurement is not survey grade and is accurate to a few 10's of feet. However, unless a legal survey plat, deeds or easements or other information is available to indicate that the location as claimed is correct, the GPS location or both locations should be listed on the claim.)
2. **Brandt Well** (Reference Water Right No. 63-5200) located in the SW1/4NW1/4 Section 1, T3N R2W. **Discharge = 4.05 cfs.**
3. **Indian Creek Diversion** (Reference Water Right No. 63-5237 located in the NW1/4NE1/4SW1/4 Section 26, T4N R3W. **Discharge = 21.9 cfs.** (Note that the GPS reading taken at the site matches that listed on the claim, but the location is very near the corner common to four 40-acre parcels. Without a survey, the location is not certain, but the available information indicates that the description listed on the claim is correct.)
4. **Pipe Gulch Draw Diversion** (Reference Water Right No. 63-21713) located in the NW1/4NW1/4 Section 27, T4N R4W. **Discharge = 11.2 cfs.**
5. **Indian Creek Pump Diversion** (Reference Water Right No. 63-5219) located in the SE1/4SW1/4NE1/4 Section 22, T3N R2W. **Discharge = 18.4 cfs**

The discharge from the Johnson Well was measured on October 13, 2006, using an ultrasonic meter (Polysonics Model DCT 7088, serial no. 33508) attached to the pipe leading from the pump to open discharge into a concrete stilling basin. The location of the measurement and the installation of the transducers are shown in Photograph No.1 (Attachment 1). The unobstructed length of the 10-inch diameter pipe was less than

needed to fully comply with the recommendations for use of the polysonic meter. The discharge pipe flowed full when the pump was initially started, but the flow had to be impeded at the discharge to create pipe-full discharge after the pump had been operating for about 15 minutes. The meter showed a discharge of 1790 to 1850 gpm (about 4 cfs). However, the meter reading was not stable and the signal strength was less than recommended. For these reasons, the well discharge was then measured using a current meter at a point in the Miller Lateral just downstream from the stilling basin. The discharge from the well was the only flow in the lateral. This measurement indicated the pump was discharging 3.51 cfs. Because of the variability of the readings of the Polysonic meter, the current meter measurement is the more reliable estimate of the discharge. The discharge measurement notes and current meter record are included in Attachment No. 1.

The discharge into Graves Branch Lateral from the Brandt Well was measured on October 13, 2006, using a Badger Meter (No. M0646708 installed in an 8-inch diameter PVC pipe) was attached to the discharge pipe from the well using a canvas bag (See the photograph included in Attachment No. 2). The discharge was monitored until the well discharge stabilized. The meter indicated that the well was discharging 1000 gallons in 33 seconds (1818 gpm) or 4.05 cfs.

The discharge of the diversion from Indian Creek was measured on October 13, 2006, using a current meter in a section of the diversion channel leading from Indian Creek to the concrete check structure at the head end of the buried pipeline. Photographs included in Attachment No. 3 show the diversion and the current meter measurement sites. This measurement indicated the flow being diverted was 21.9 cfs. The discharge measurement notes and current meter records are included in Attachment No. 3.

The discharge of the diversion from Pipe Gulch Creek was measured on October 13, 2006, at a location in the diversion ditch about 30 feet downstream from the head gate controlling flow into the ditch. This measurement indicated the flow being diverted was 11.2 cfs. The discharge measurement notes and current meter records are included in Attachment No. 4.

The discharge of the Indian Creek Pump was measured on September 19, 2006, on the 22-inch diameter steel discharge pipe outside of the pump house. The discharge

was measured with a Polysonics Model DCT 7088 transit time sonic meter, serial no. 33508. The location of the measurement and the installation of the transducers are shown in the photograph included in Attachment No. 5. The meter showed a discharge of 8,250 gpm or 18.4 cfs.

Re: Pioneer Irrigation District / Water Right Nos. 63-5219 and 63-21714
MTBR&F File No. 18-946.6

Dear Dave:

In response to your correspondence dated February 21, 2006, wherein you request additional information regarding the priority date and historic use of several of Pioneer Irrigation District's water rights, I am enclosing documentation sufficient to establish the priority dates of water right nos. 63-5219 and 63-21714, as follows:

63-5219

Pioneer asserts a priority date of May 1, 1961 for this water right. Enclosed is an electric service agreement between Pioneer and Idaho Power, dated August 1, 1961, for Pioneer's pump in Indian Creek. The agreement identifies a "point of delivery of power . . . where the Company's wires or apparatus are connected with those of the Customer" which matches the existing point of diversion (township, range & section) as claimed.

63-21714

Pioneer asserts a priority date of October 3, 1963 for this water right. Enclosed please find a well driller's log showing a well completion date of March 29, 1963. Also enclosed is a copy of a letter from Pioneer's Secretary/Treasurer, Naida Kelleher, wherein Ms. Kelleher indicates that she has paid the power bill on an annual basis continuously since 1987.

Please note that as previously indicated, we are in the process of reviewing Pioneer's historical documentation and will respond to your request for proof establishing the priority dates of

If you have any questions, please do not hesitate to contact me. In the event I am unavailable, please feel free to contact my paralegal, Tiffiny Hudak. She can be reached at 385-5435.

Re: Evidence of Priority Date

Dear Claimants:

RESPONSE DEADLINE
MARCH 21, 2006

The Notices of Claim to a Water Right (claim) identified with the numbers shown above your name have been filed in the Snake River Basin Adjudication (SRBA). The claims indicate your water usage is based on "Beneficial Use." Water rights of this type are established by the historic use of water, dating back to when water was first used for the purpose claimed, and are termed beneficial use rights. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. Since the priority date and historic use of a beneficial use right cannot be confirmed by field examination, **proof must be provided by the claimant** supporting the priority date claimed and the historic use of the water.

Enclosed you will find a computer printout of the irrigation district's claims and the pamphlet entitled "Evidence of Priority." The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

PLEASE NOTE: IDWR will recommend the SRBA Court decree the claim disallowed if no evidence of the priority date and of the historic use is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement should be in the form of a notarized affidavit.

Please submit the required evidence supporting the priority date and the historic use by the date shown above, referencing all documents with the corresponding claim number. If you have questions not covered by this letter or the enclosed pamphlet, please contact this office. Our toll free number is 1-800-451-4129.

Sincerely,

David R. Tuthill, Jr.

Re: Water Rights and Diversion Points

Dear Russ:

This letter is faxed as requested for your November 5 meeting and will also be mailed to you. We toured part of your irrigation system last week and discussed issues related to your diversion points. I completed some water right research after our visit and found the story is more complex than I originally thought.

Caldwell Lateral Irrigation District (CLID) obtains irrigation water from Pioneer Irrigation District (PID). I understand CLID recently converted to a pressurized distribution system, which resulted in some changes to the way in which you obtain water from PID. The following information discusses our field visit to three diversion sites.

Site #1 – Pump Station on Indian Creek at 6th and Blaine

This pump station has been used but is now idle due to changes in your system. You expressed an interest in possible resumption of use of the pump station. PID has water right no. 63-5255 to divert 2.17 cubic feet per second (cfs) from this Indian Creek diversion located in the SW ¼ of Section 22, T4N, R3W. No other water rights are found to divert water from the creek in this area.

Prior to our visit, I assumed PID held various water rights from Indian Creek and that each water right listed all the PID diversion points. Such an arrangement suggests that idling a given diversion point would not necessarily jeopardize any given water right. This is because a given water right could be fully diverted from any combination of diversion points under my previously mentioned assumption, allowing a single diversion point to remain unused without jeopardizing the water right in question. But a situation in which a diversion point is only described by one water right with a single diversion point is a different case. In such a case, non-use of the diversion implies non-use of the single water right authorized to be diverted at that point.

The water right in that case might be subject to forfeiture if non-use continues for more than five consecutive years and a defense to forfeiture does not exist. Your ability to use the Site #1 pump station might be compromised because only one water right with a single diversion point is found. However, the situation might also be interpreted in other ways under the broader umbrella of PID water rights. You might benefit from discussing this with PID and seeking written clarification from PID protecting your future use of this diversion point. For example, PID might amend its Snake River Basin Adjudication (SRBA) claims for Indian Creek water to list all diversion points on each Indian Creek water right. Alternately, PID might provide some other feasible explanation for legal protection to use this pump station after five years of non-use (commingling of water, redirection points etc.). PID retains a very experienced and highly skilled attorney who might shed more light on this than I can.

Site #2, Pump Station for Ground Water near 5th and Paynter

The second site located in the NE ¼ of Section 28, T4N, R3W hosts a shallow ground water diversion system west of Paynter. The diversion is not a drilled well. You said the pump is set at about 30 feet below land surface if I remember your comments correctly. This of course is not Indian Creek water supplied by PID.

The City of Caldwell holds three water rights to divert ground water in the NE ¼ of Section 28 for municipal and irrigation uses. Those rights include nos. 63-5053, 63-8299 and 63-11259 covering drilled wells east of Paynter.

The ground water diversion at Site #2 is not protected by a water right recognized by the Idaho Department of Water Resources (IDWR). Use of this diversion without a recorded water right would be an illegal diversion of water. The City and/or CLID should abandon this diversion point if it will not be used in the future. The City and/or CLID should obtain water right protection for this diversion if it will be used in the future. One of two ways to secure water right coverage can be used.

One, file a *SRBA Claim* if the ground water use started before March 25, 1963 (cutoff date for "grandfather rights" from ground water). This would protect the older priority (seniority) date of this diversion. Two, file an *Application for Permit* for a new water right if use started on or after March 25, 1963. The older priority date could not be protected in that case since it started after the cutoff date for "grandfather rights", but a new right with a new priority date could be established.

Once water right coverage for this diversion is recognized by IDWR, the City and/or CLID could act to protect future use of the pump station. I can discuss those options with you in more detail later.

Site #3, Diversion Ditch from Indian Creek Southeast of Chicago and 21st

CLID diverts its PID water from Indian Creek at this location in the SW $\frac{1}{4}$ of Section 26, T4N, R3W. The ditch delivers water to your pump station located near your office. PID holds water right no. 63-5237 for 16.0 cfs for this diversion. CLID does not need to address any water right issues associated with this diversion from the creek.

IDWR forms to file a SRBA Claim or an Application for Permit are available from the Internet as noted in the enclosed information. I hope this letter provides adequate information for your upcoming meeting. Please let me know if you need more information in this regard.

Per Dave Tuthill please file these in the claim files at your office. May want to run them by Jan so she is aware they are there. Keith Anderson, who is doing some work for City of Nampa, brought these into the office on Monday, thought we would like to have the discrepancy information.

So, I copied you can "file". Have a nice day.

RE: Snake River Basin Adjudication (SRBA)
Change in Notice of Appearance of Counsel on the Snake River
Basin Adjudication Claims for Owen Ranches, Pioneer
Irrigation District and Settlers' Irrigation District

Dear Scott:

Following your letter request to David Shaw of December 10, 1993, attached is an adjudication report denoting the claims filed by your clients referenced above that have been changed. We have also updated water right 57-00040 for Pioneer Irrigation as you requested.

Please note water rights claims showing Richard L. Owen as claimant were not changed in our database. You may wish to file another Notice to the court if you are representing Richard L. Owen as well as Owen Ranches, each of whom have filed claims as if they were unrelated parties.

Call me if you have questions.

Sincerely,

Donald V. Shaff
Manager, Adjudication Section
