

DEPARTMENT OF
WATER RESOURCES

4. From the early 1960's I remember ranch hands, my father, and I drank water directly out of the pipe (and trough) from the spring on the ranch that presently supplies water to the house;
5. From the early 1960's I remember ranch hands, my father, and I filled our canteens (for drinking water) directly out of the pipe from the springs on the ranch that presently supplies water to the house;
6. From the looks of the metal pipe during the 1960's it appeared to have been in place a long time; the springs were developed before or shortly after my grandfather's ownership of the property; I remember my dad saying that some of the springs were developed before my family purchased the ranch including the springs that is servicing the current home; the springs were improved upon as maintenance and repairs required; the springs were always developed for as long as we owned and operated that portion of the ranch; and I remember very well working upon repairing spring boxes, piping and troughs on all of the developed springs including the springs that is servicing the current home;
7. My grandfather purchased the Little Salmon River portion of the Dryden and Sons Ranch in the late 1940's and early 1950's, and I have no reason to believe my grandfather and father just started drinking out of the pipe when I came along;
8. The State of Idaho constructed pipe and concrete troughs in about 1962 or 1963 by the highway directly below the house and south as well; and these springs also supplied drinking water to men and livestock.

Dated this 4 day of Feb, 2008.

MARSHALL DEAN DRYDEN

Subscribed and sworn to before me this 4 day of Feb, 2008.

Cindi Kutner
Notary Public for Idaho
Residing at McCaill
My Commission Expires 8-23-13
