	)	63-05340, 63-05342, 63-15291,
_____	)	and 63-15292,

I. FINDINGS OF FACT

Notices of claim were filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of these water rights.

On January 31, 2003, the previous claimant of the water right, Boise Cascade Corporation, through its attorney Bruce M. Smith, filed an objection to the *Director's Report*, asserting that the water right should be decreed as claimed. On May 5, 2008, the parties filed a *Standard Form 5 – Stipulated Elements of a Water Right* in each of the subcases, which resolved the objections. The Idaho Department of Water Resources concurred with the stipulations.

It should be noted by the parties that this Special Master has recommended a remark under the “point of diversion” element of each right that was not present in the *Standard Forms 5*, as follows: “WATER FOR COMMERCIAL USE IS DIVERTED FROM THE STREAM REACH(ES) DESCRIBED HEREIN.” This remark is not intended to modify the elements of the water right or limit its use by the claimant; rather the remark is intended to clarify that the water right is for both an instream (stockwater) use and a diversionary (dust abatement) use.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Forms 5*, IT IS RECOMMENDED that water rights 63-05335, 63-05340, 63-05342, 63-15291, and 63-15292 be **decreed** with the elements as set forth in the attached *Recommendations for Partial Decrees Pursuant to I.R.C.P. 54(b)*.
