this building is a missionary church but is not affiliated with the campground

63-21536 field exam (was Bible Missionary Church Northwest Dist)

Pump is submersible. Claimant is checking on horsepower and lift, but general consensus is the well produces 25-30 gallons per minute. Claim also includes 35 RV hook-ups, but the facility has a conditional use permit with the county that only provides for 5 RV hook-ups at any given time.

The main church building, not pictured, is on the south side of the property approximately 35 yards southeast of the pump house and has 5 toilets, 1 urinal and 3 sinks spread among three bathroom facilities in the building.

Bath house is located approximately 50 yards northwest of the pump house. Bath house has two sides, one for men and one for women. Each side contains 6 sinks, 6 toilets and 6 showers for a total of 12 sinks, 12 toilets and 12 showers for the building. The current owners state they will probably tear down the bath house because they do not wish to use the facility as a campground and do not have a use for the bath house.

SCANNED
JUL - 7 2008

This cinder block building has several purposes and it located about 100 yards north/northeast of the pump house.. It has bathroom facilities for men and women on either side (4 toilets and 4 sinks in all; photo of women's side on lower right), an in-ground baptistery not visible in this picture, and an outlet to connect the sprinklers seen operating in the lower left picture. The outlet for the sprinklers can be seen in the left third of the top picture. The in-ground baptistery can not be seen in the picture, but it is located in the center of the cement pad, roughly 4 feet in front of the gray door in the picture. Approximate dimensions of the in-ground baptistery are 6 feet by 8 feet by 5 feet. New owners anticipate continuing to use this facility after some renovation work.

SCANNED
JUL - 7 2008

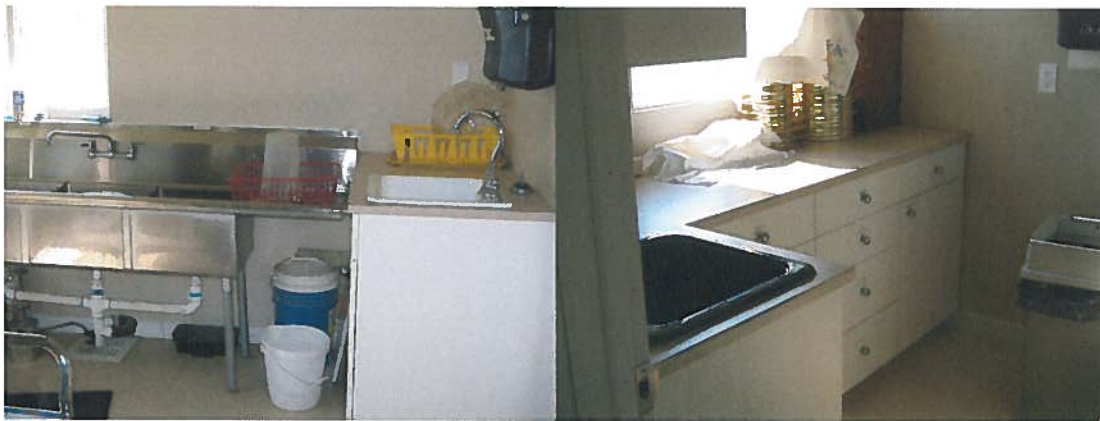

The caretaker's house is located about 125 yards northeast of the pump house. We did not enter the house during the field exam, but presumably the home has 2 bathrooms and a kitchen facility.

SCANNED

JUL -7 2008

The old dining facility is located approximately 100 yards east of the pump house. It has been mostly gutted since the new owners took possession and will no longer be used as a dining facility as it is being converted to classroom space. The old building had a commercial kitchen with at least three large sinks and a bathroom facility each for men and women. The new building will retain the bathroom facilities – 3 sinks and 2 toilets.

New kitchen facility, located in the building directly behind the main church building, approximately 30 yards east of the pump house. The new kitchen building has three sinks, but had no facilities before.

SCANNED

JUL - 7 2008

This is the old library building, which has been converted into a youth building. It is located approximately 100 yards east of the pump house. It has never had a water hook-up.

SCANNED
JUL -7 2008

The above 4 pictures show the second residence on the property, which has now been converted to office space. The second residence is located at the southeast corner of the property, approximately 300 yards southeast of the pump house. This facility retains three bathrooms and one kitchen in all, for a total of 5 sinks, 3 toilets and 2 showers.
