

3. Following our marriage, George Wilson and I lived on certain real property described in Exhibit A, attached hereto ("Property").

4. During the time that I lived on the Property, I observed the irrigation practices conducted by George Wilson on the Property.

5. Beginning in 1936, I witnessed George Wilson divert water for irrigation purposes from a drain ditch on the eastern boundary of the Property ("East Drain Ditch") located to the west of the neighboring Raney Ranch.

6. The source of the East Drain Ditch was and is runoff water from the neighboring Raney Ranch.

7. Located on the East Drain Ditch are three (3) points of diversion used to divert water for irrigation purposes on the Property.

8. George Wilson passed away in 1961.

9. I and my daughter, Tana Kerby, are the sole beneficiaries of the George Wilson Trust ("Trust") which owns the Property.

10. My daughter and I filed notices of claim to water rights in the Snake River Basin Adjudication in 1988 to protect the water rights for the Property. In December 2006, we received copies of the Recommendations of the Director of the Idaho Department of Water Resources for the water right claims we filed. We did not file any objections to the Recommendations because they were basically satisfactory.

11. My daughter and I did not file a notice of claim to water right for the waste water used on the Property because we did not understand that it would be necessary to file a claim for such water use. We thought that use of waste water from another property did not require a water right.

12. Based upon investigation of this issue with the Idaho Department of Water Resources agent, Carter Fritschle, my daughter and I determined that we should file a late notice of claim for the waste water used on the property. After consultation with our attorney, Scott L. Campbell, on May 29, 2008, we have decided we should pursue a motion for leave to file a late notice of claim.

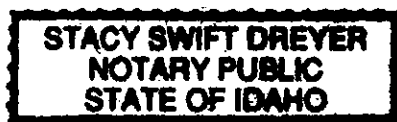

13. My daughter and I were not aware previously that we should have filed a notice of claim for water right to confirm the waste water use which has occurred on the Property since at least 1933. Had we known that such a claim would be required, we would have filed the claim in 1988 with the rest of the water right claims filed at that time.

Further your affiant sayeth naught.

CERTIFICATE OF SERVICE

I HEREBY CERTIFY that on this 15th day of July, 2008, I caused a true and correct copy of the foregoing **AFFIDAVIT OF INEZ WILSON MORRIS** to be served by U.S. Mail, postage prepaid, and addressed to each party listed on the SRBA Expedited Service List.

Scott L. Campbell

EXHIBIT A

Property Description

The Property consists of eighty (80) acres located within the SENW and NENW quarter-quarter sections of Section 29, Township 19 North, Range 20 East in New Meadows, Adams County, Idaho. Irrigation water for the Property is diverted from three (3) points of diversion located along a drain ditch near the eastern boundary of the property within the SENW quarter-quarter section of Section 29, Township 19 North, Range 20 East. The water diverted from these points of diversion is used for the irrigation of eighty (80) acres all located within the SENW and NENW quarter-quarter sections of Section 29, Township 19 North, Range 20 East. The water used to irrigate the Property is diverted from the points of diversion at a rate of 3.0 cfs. The above described irrigation practices for the Property were initiated by George Wilson in 1933.
