Re: Riverside Irrigation District Objections to Rights 63-4007 and 63-4010

Dear Nick:

At the initial hearing on these two water rights, I advised you and the Department that we had obtained additional measurements supporting the basis for the objections to these two rights. In 63-4007, the Meadows Gulch Drain, Riverside claimed a diversion rate of 10 cfs. The Department recommended 5 cfs. We asked Lee Sisco, the water master for District 63 to conduct measurements. He calculated flow at the entry to the canal from the Meadows Gulch Drain at 8.6 cfs. Riverside requests that the Department adjust its recommendation and Riverside would be willing to execute an SF5 for 8.6 cfs for the Meadows Gulch Drain right (63-4007).

The West End Drain was claimed in the rate of 70 cfs. The Department recommended 30 cfs. Last fall the water master for District 63, Lee Sisco, also measured the flow into the Canal from the West End Drain as described in his attached letter. The flow measurement was 92.83 cfs. Accordingly, the Riverside irrigation District requests that the right (63-4010) be decreed as claimed since the flow into the canal exceeds the amount of water claimed for this right.

Dear Al,

This letter is to confirm the measurement that I made on your behalf while still Watermaster of the Boise River. The measurement of the West End Drain was made on October 4th, 2007 and was done with a Double A Current Meter and the flow measured on that day was 92.83 cubic feet per second. Also, I looked at a measuring site for the Meadow Gulch Drain but there was insufficient water at the site to make a measurement. At the site there was a 24 inch culvert about twenty feet in length with evidence that at least one foot of head had regularly been against the concrete head wall above the pipe. In reviewing pipe capacity charts, I estimated that the pipe would carry about 8.6 cubic feet per second of flow under these conditions.

Should you need any additional information or help regarding these measurement, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lee Sisco".

Lee Sisco
