WATER RESOURCES

Objections to the Amended Directors Report

Subcase Nos. 24-4069

Civil Case No. 3956

September 10, 2008

These are Peter & Judy Riede's Objections to the Amended directors Report.

DISCUSSION

The original aerial photo dated 4/30/01 shows 14 acres being irrigated by this water right. I agree this is too much because we are only irrigating east of Books Spring, however the 2.5 Acres called for in the Amended Directors report is too small. A study of the aerial maps in our possession and an inspection of the land support an irrigated acreage of 6 acres by my calculations. I admit that my computing technique is not as accurate as the Department of Water Resources so I am willing to accept the 5 acres called for in your report of 11/17/06. If this is not acceptable I would encourage you to visit the area so that we can reach a mutually acceptable agreement.

Peter M. Riede

Judy M. Riede
