Monica:

We met at the water rights hearing Sept 10. I showed you pictures where Mr. Sopatyk had run his excavator across the ditch that supplies domestic water to the townsite. I am at the end of that ditch and have a partial water right decree for water to my house on that ditch. I have not had water in that ditch for over a week because the crossing was never repaired. In an attempt to get water, I cleaned aquatic plants from the ditch along the road, and from the road up Anderson creek to the first downed log(approx. 50 ft). After 24 hours, I barely have a trickle. This morning I will put plastic across a leak near the old head gate off the Gibbonsville Road, and possibly at the crossing since that is where the water is leaking from the ditch. Mr. Sopatyk has made no attempt to repair the damage. He is not in town and I have no way of contacting him. I will be in town when you make do your field study and hope to meet with you. I will be out of communication until Sept 26th. You can leave a message with my neighbors Mr. And Mrs. Usher at 208-865-2005 or Bob Rowe 865-2423. FYI, Bob is also out of water on the upper ditch.

Sincerely,
Janet M Bloemeke
