CLAIM NOS.: A61-00277, -00278, -00279, -00359, -00360, -02034,
-02092, -02225, -02236C, -02236D, -07244, -007273

The main components of the Bennett Creek Farm irrigation system consists of five on-stream reservoirs, seven pumping stations, one main diversion structure on Bennett Creek that feeds a delivery canal and a mainline system from the seven pumping stations to pressurize sprinkler systems that provide irrigation water to the fields. The names and capacities of the five reservoirs are:

Hot Springs Creek Reservoir #1--capacity	450 AF
Hot Springs Creek Reservoir #2--capacity	5334 AF
Hot Springs Creek Reservoir #3--capacity	553 AF
Upper Teapot Reservoir-----capacity	424 AF
Lower Teapot Reservoir-----capacity	812 AF

The pumping stations contain from one to three pumps. The horse power, serial numbers and manufacture's names for the motors and pumps as determined by a 1987 licensing field exam are described on Attachment "A" to this memo. Some of the equipment was upgraded and changed between the 1987 exam and a subsequent adjudication field exam in 1994. The changes are noted in parentheses.

The uppermost reservoir, Hot Springs Creek #1 receives only Hot Springs Creek (aka Warm Springs Creek) water and is also known as Hall Reservoir. Water is released back into Hot Springs Creek where it flows through the other two Hot Springs Reservoirs and then re-diverted from pumping stations in the two Teapot Reservoirs which are located on Bennett Creek.

Hot Springs Creek Reservoir #2 receives Bennett Creek water from a canal that originates at a P/D in Section 1, T04S, R08E. The canal is about 4.5 miles long from the P/D to the reservoir. Water is also released from this reservoir into Hot Springs Creek and re-diverted from pump stations in the two Teapot Reservoirs to the mainline system and sprinklers.

Hot Springs Creek Reservoir #3 fills from water released from Hot Springs #2 which is upstream. The source and P/D for #3 is the same as #2. Water released from #3 is distributed to the fields in the same manner as described for Hot Springs Reservoirs #1 & #2. The water right for this facility is covered in license 61-07561 that did not require an SRBA filing.

The two Teapot Reservoirs are located on stream in Bennett Creek. They receive water that flows through Hot Springs #2 & #3 reservoirs for re-diversion and direct flow Bennett Creek water for storage and diversion to the mainline and sprinkler system.

The seven pump stations on Bennett Creek, including the three at the Teapot Reservoirs, all divert to mainlines. With the utilization of portable mainlines, the entire farm can be put under sprinkler irrigation. About one-third (1200 acres) of the place of use is currently being farmed and the remaining is enrolled in the CRP program.

Dear Mr. Reynolds;

In regard to our field exam of Thursday, October 27, I am sending some information outlining the water rights on Bennett creek.

An overlap map is included which shows all the water rights, as claimed, with their respective quantities and acres. Each right is color coded. The sections are outlined in yellow highlighter and the squares within each section represent 40 acre tracts. The bottom of this map has the key showing the water right with the acreage and quantity. Note that sections 2 and 3 are shown at the top of the map. These sections are actually the southern land locations (where pumping station 7 is located). They had to be listed this way because of the layout of the form.

One thing I noticed as I was compiling this information is that there is a difference in location of place of use between the claims filed in the adjudication and the field exam findings from permit numbers 61-07244, 61-02236A and 61-07273. This exam was completed on July 10, 1987. The SRBA claims corresponding to these rights will need to be amended.

I did not find any claims filed for domestic uses from the wells. Claim numbers A61-02034 and A61-02225 include domestic use for lawn irrigation but these are from Bennett and Warm Springs creek. I am enclosing two Notices of Claim form which you can use to file for the groundwater uses.

Your adjudication claims will be reviewed and prepared for recommendation sometime during the winter. At this time I will contact you in regard to the discrepancy in places of use along with any other questions which may arise. In the meantime, if you have any questions please don't hesitate to contact me.

Sincerely,

Re: Applications for Amendment

On this date the Place of Use land list on the Applications for Amendment for the Permits described above were changed by myself and Steve Reynolds. The alteration deleted the NE1/4, Sec 25, 04S, 08E from the Place of Use. This parcel is not owned by Reynolds & Sons Partnership but by a Mr & Mrs Ensley. It has however been included in their farm's operation for many years. Due to the non-ownership issue they do not want their water rights to become appurtenant to this land.

The history of the Ensley property as understood and explained by Steve Reynolds is as follows: The prior owner, Frank Galey, by virtue of some kind of lease arrangement, included this land in his farming operation in the late 1970's or early 1980's. He supposedly raised potatoes on the land for one year using his own water but didn't continue irrigating the land in future years due to a lack of water. The Reynolds family began leasing Mr Galey's farm in 1986 and purchased it in 1989. In 1987 a large part of the Galey farm, including the Ensley parcel, was entered into the CRP program. The Reynolds family, at the request of Mr Ensley, planted the Ensley property with a dry land cover crop to meet the CRP requirements but never irrigated the land.

The ownership of the Ensley parcel was not known when the licensing amendments were prepared. This issue was subsequently discovered and rather than re-print the amendment applications they were altered at the time they were executed by Steve Reynolds on 2/9/1996.
