SYSTEM DESCRIPTION

CLAIMANT: BENNETT CREEK FARMS AND/OR CARL REYNOLDS & SONS

CLAIM NOS.: A61-00277, -00278, -00279, -00359, -00360, -02034,

-02092, -02225, -02236C, -02236D, -07244, -007273

The main components of the Bennett Creek Farm irrigation system consists of five on-stream reservoirs, seven pumping stations, one main diversion structure on Bennett Creek that feeds a delivery canal and a mainline system from the seven pumping stations to pressurize sprinkler systems that provide irrigation water to the fields. The names and capacities of the five reservoirs are:

Hot Springs Creek Reservoir #1--capacity	450 AF
Hot Springs Creek Reservoir #2--capacity	5334 AF
Hot Springs Creek Reservoir #3--capacity	553 AF
Upper Teapot Reservoir-----capacity	424 AF
Lower Teapot Reservoir-----capacity	812 AF

The pumping stations contain from one to three pumps. The horse power, serial numbers and manufacture's names for the motors and pumps as determined by a 1987 licensing field exam are described on Attachment "A" to this memo. Some of the equipment was upgraded and changed between the 1987 exam and a subsequent adjudication field exam in 1994. The changes are noted in parentheses.

The uppermost reservoir, Hot Springs Creek #1 receives only Hot Springs Creek (aka Warm Springs Creek) water and is also known as Hall Reservoir. Water is released back into Hot Springs Creek where it flows through the other two Hot Springs Reservoirs and then re-diverted from pumping stations in the two Teapot Reservoirs which are located on Bennett Creek.

Hot Springs Creek Reservoir #2 receives Bennett Creek water from a canal that originates at a P/D in Section 1, T04S, R08E. The canal is about 4.5 miles long from the P/D to the reservoir. Water is also released from this reservoir into Hot Springs Creek and re-diverted from pump stations in the two Teapot Reservoirs to the mainline system and sprinklers.

Hot Springs Creek Reservoir #3 fills from water released from Hot Springs #2 which is upstream. The source and P/D for #3 is the same as #2. Water released from #3 is distributed to the fields in the same manner as described for Hot Springs Reservoirs #1 & #2. The water right for this facility is covered in license 61-07561 that did not require an SRBA filing.

The two Teapot Reservoirs are located on stream in Bennett Creek. They receive water that flows through Hot Springs #2 & #3 reservoirs for re-diversion and direct flow Bennett Creek water for storage and diversion to the mainline and sprinkler system.

4a

The seven pump stations on Bennett Creek, including the three at the Teapot Reservoirs, all divert to mainlines. With the utilization of portable mainlines, the entire farm can be put under sprinkler irrigation. About one-third (1200 acres) of the place of use is currently being farmed and the remaining is enrolled in the CRP program.
