RE: DELIVERY SYSTEM AND USE OF WATER

There are two diversions from Bennett Creek that serve the above referenced decreed rights. The diversion in the NESW, Sec. 1, is described in the decree to service 61-00284. It diverts water into a ditch that flows South about 3/4 mile where it crosses a canal through a flume. It continues South about another 3/4 mile where it goes under a county road to the place of use on the Walker property.

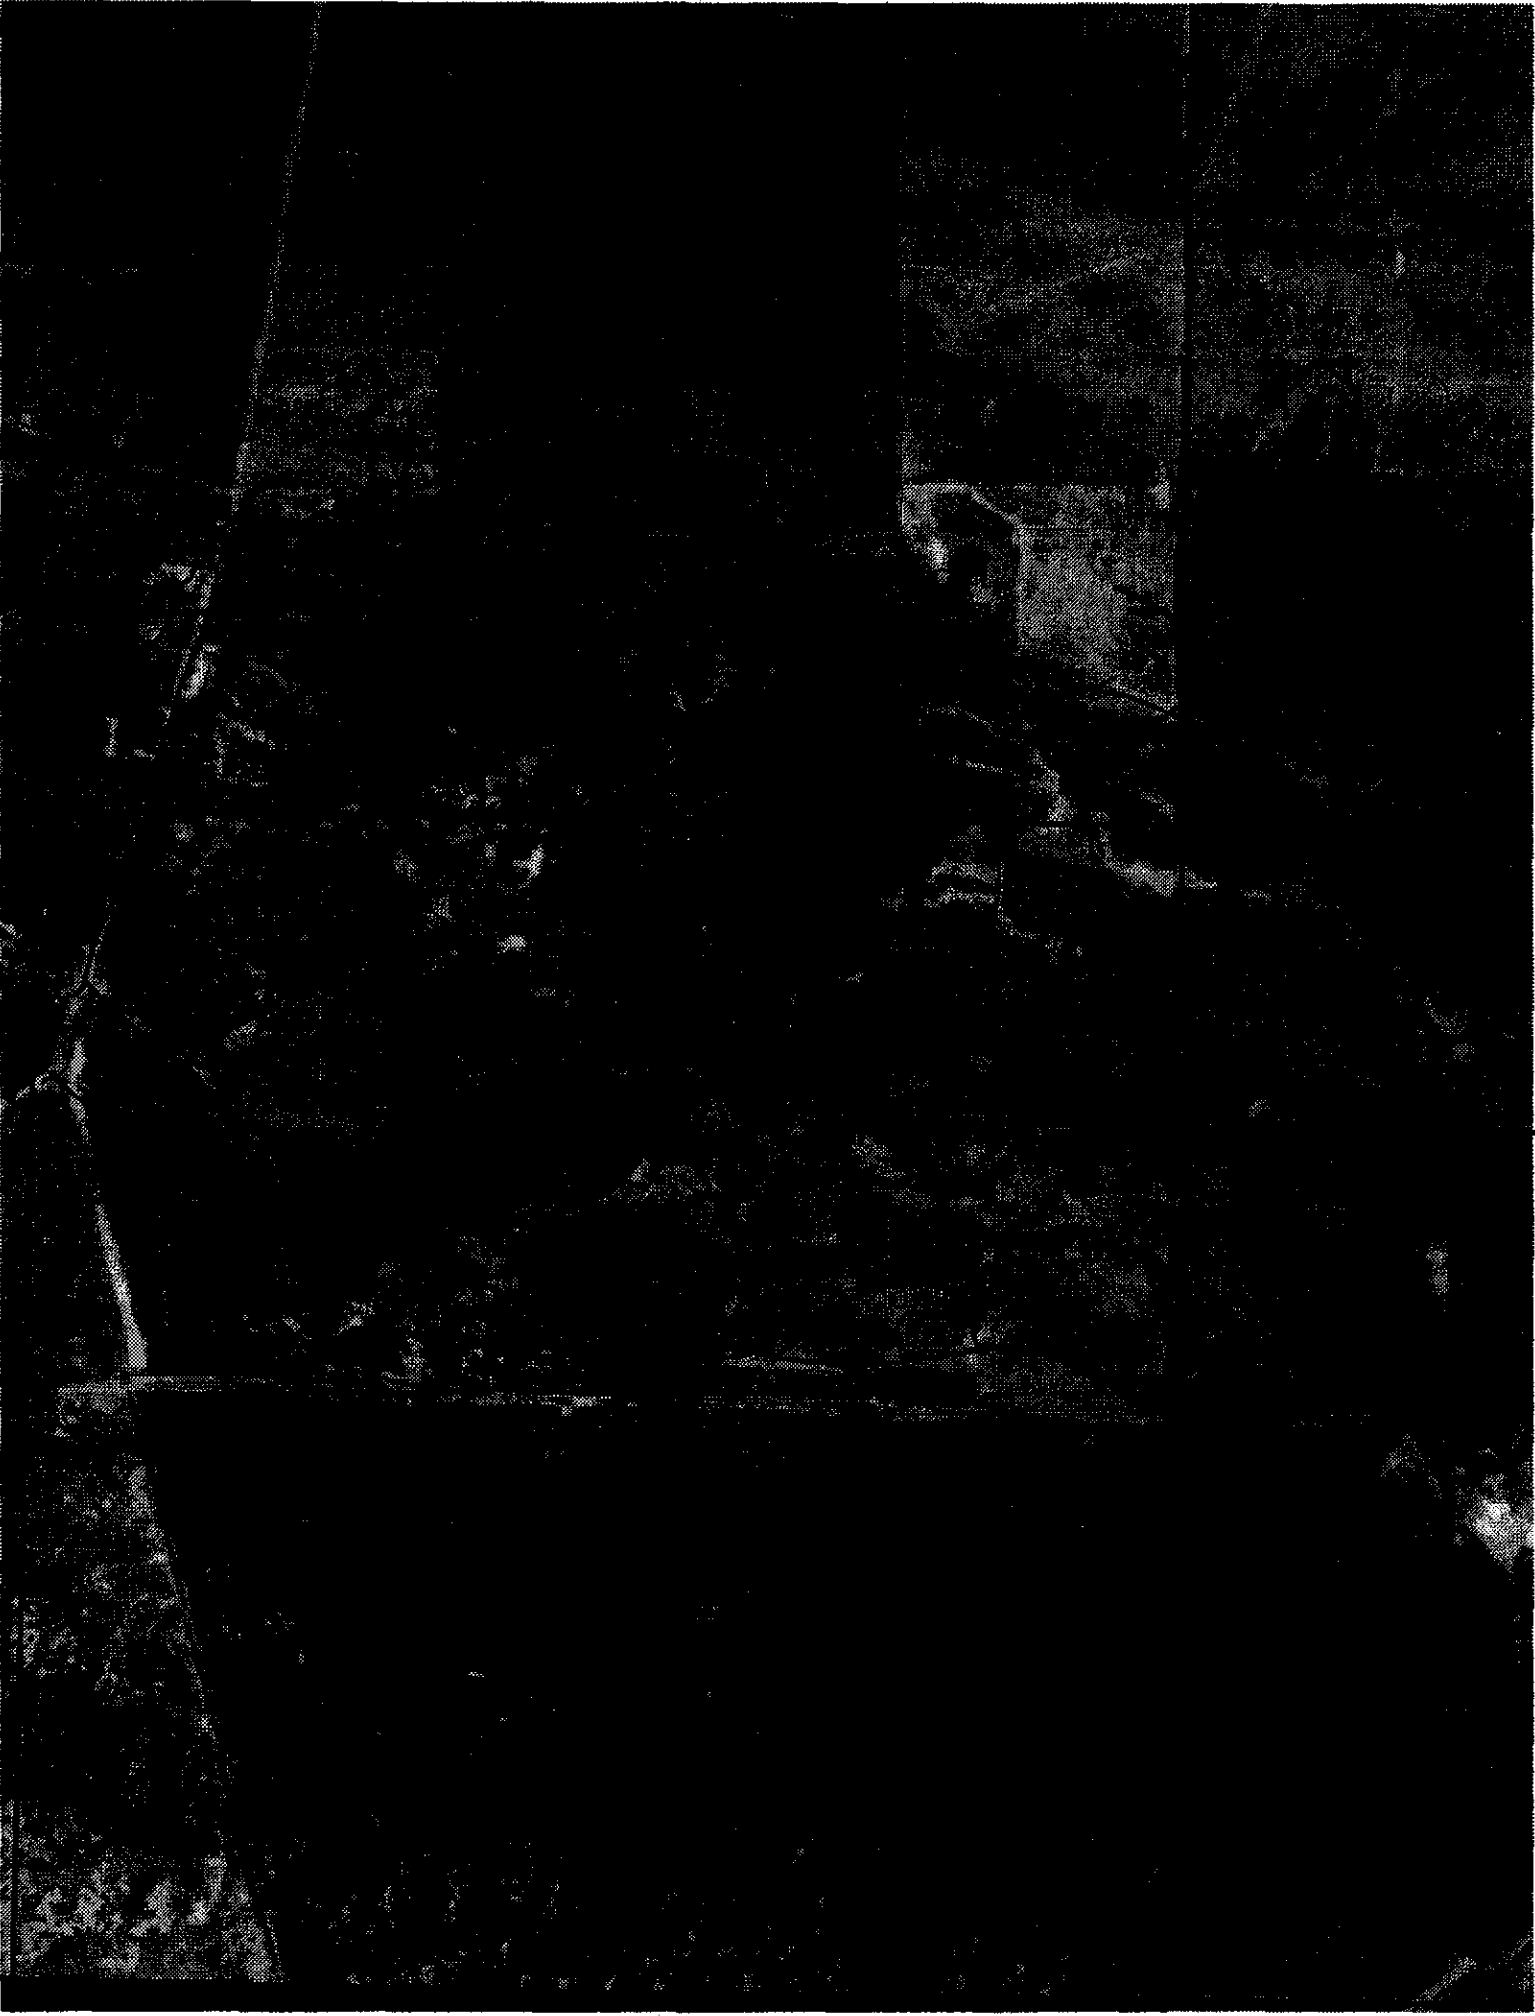

The second diversion is in the SWSW, S12. It delivers water about 1/4 mile to the beginning of the place of use for 61-00283. This diversion is described as being specifically for this right.

The delivery system within the place of use for both rights is a series of delivery ditches, pickup ditches and small collection ponds. Throughout the system runoff water (waste water) from most fields is picked up and commingled with new water and then delivered again to other fields. Consequently, it can become impossible to distinguish what is waste water from any of the rights and what is live flow water from any one of the rights. Waste water from 61-00283 is used on land appurtenant to 61-00284 and waste water from 61-00284 is used on land appurtenant to 61-00283.

It appears the claimant is attempting to comply with the terms of the decree in his application of the water subject to these rights. However, to develop a system that most efficiently uses the water, it was necessary to deliver the water as described above. Bennett Creek has a short season for water being available and efficiency in use is critical.
