DESCRIPTIVE SUMMARY

This is a stipulation and order to resolve the United States' objection to water right number 57 - 11284.

STIPULATION

To resolve the dispute over the above-captioned water right, the Idaho Department of Water Resources (IDWR) and the objector, the United States of America, stipulate and agree that:

1. The above-referenced water right is accurately described in Exhibit 1, a revised page of the Director's report containing the recommended water right showing specific changes made to the Director's original recommendation in an underline/overstrike format.

2. All decrees, whether partial or final, should describe the water right as modified and described in Exhibit 1.

3. Upon entry of partial and final decrees for Water Right No. 57-11284, describing the right as shown in Exhibit 1 hereto, including the modification indicated thereon, the objection of the United States shall be deemed withdrawn.

4. Because there are no remaining objections to this water right, a partial decree may be entered for it pursuant to I.C. 42-1412(8).

5. The execution of this stipulation does not affect or limit the United States' existing right to challenge other portions of the directors' report pursuant to a timely filed objection.

6. Both parties agree to bear their own costs and attorneys' fees in connection with this matter.

Respectfully submitted,

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990). This right is based on Public Water Reserve 107. For rights having a federal basis, the director of the State of Idaho Department of Water Resources abstracts the claim. The abstract does not have any *prima facie* weight. Therefore, the burden rests with the United States to establish the factual and legal basis of the claim.

A hearing was held on the claim. Originally, the court DENIED the claim, without prejudice, because the United States failed to establish the proper quantity for the claim. *See, Order Denying Motion for Default Judgment (PWR 107)* (Nov. 16, 1998), incorporated herein by reference. Thereafter, the United States argued, and the court agreed, that the quantity for rights based on PWR 107 should be 13,000 gallons per day (0.02 cfs) consistent with other *de minimis* stock water rights decreed within the SRBA. The United States having established the factual and legal basis for these claims and there being no dual state basis for this right; now therefore,

IT IS THEREFORE RECOMMENDED that subcase 57-11284 be decreed as recommended in the attached *Partial Decree Pursuant to I.R.C.P. 54(b)*.
