PICTURE #1

A61-00371A & 372: FX 09-09-94.
Photo's by RDH. Little Canyon
Creek P/D #1, view is towards
the South, located in the
NENWSW, T5S, R10E, S08. Rock
& plastic dam.

PICTURE #2

Same P/D as picture 1 with view to the North.

PICTURE #3

A61-00371A & 372: FX 09-09-94. Photo's by RDH. Little Canyon Creek Cipolletti Weir (3') located down from P/D #1 about 175'.

PICTURE #4

Little Canyon Creek P/D # 2. Located in the NWSWSW, T5S, R10E, S08. Rock and earth dam, wasn't used this year due to lack of water says Mr. Blackwell. (This is the East Ditch), P/D 1 is the West Ditch.

PICTURE #5

A61-00371A & 372: FX 09-09-94. Photo's by RDH. Little Canyon Weir for P/D #2. Northside canal company provided, it has a 6" X 1' opening.

PICTURE #6

Little Canyon Creek POU at West Ditch under road. Located in the NWNE, T5S, R10E, S19. View is to the South.

PICTURE #7

A61-00371A & 372: FX 09-09-94. Photo's by RDH. Little Canyon Place of use view and of re-aligned East ditch in field located in the NENE, T5S, R10E, S19. View is to the South. Just inside the fence from the paved road. Land to left of fence is all irrigated now by King Hill Canal District, not by this right. Note: Left of the fence would be the part of the historical POU of the East ditch prior to Transfer 3405.

1. Water Right Number(s) _____
Adjudication Claim Number(s) _____
2. The following **REQUIRED** information must be submitted with this form.
- A. A copy of the most recent DEED, TITLE POLICY, CONTRACT OF SALE, or other legal document indicating your ownership of the property and water rights or claims in question, WITH ATTACHED LEGAL DESCRIPTION.
AND
B. PLAT OF PROPERTY or SURVEY MAP for parcel of ten acres or less. (These are usually on file with the county.)
OR
C. For water rights or adjudication claims involving ten or more irrigated acres, a USDA Farm Service Agency (formerly ASCS) AERIAL PHOTO with irrigated acres outlined and point(s) of diversion clearly marked.
3. Name and Address of Former Owner/Claimant(s) SAMUEL D. BLACKWELL
4. New Owner/Claimant(s) JOYCE PEARSON
Name connector (Check one): [] AND, [] OR, [] AND/OR
New Mailing Address 142 SOUTH HIAWATHA
City, State and ZIP Code HAILEY, ID 83333
New Telephone Number (208) 788-3093
5. Date you acquired the property 04-26-96
6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.
- Number of acres actually irrigated _____ Number and type of stock _____
- Diversion rate in CFS _____ Number of homes _____ Other uses _____
cubic feet per second
- If a water right or adjudication claim is being split and you are not sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.
7. Signature of New Owner/Claimant(s) Joyce W. Pearson, trustee Date 12/10/96
Date _____
8. (Corporations or other organizations must submit a list of directors/officers demonstrating authority to sign form.)
For Snake River Basin Adjudication Claims: If you are represented by an attorney and you want IDWR to correspond directly with your attorney for all matters related to your claims, please attach a Notice of Appearance completed by your attorney.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129.

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

IDWR Western Region, 2735 Airport Way, Boise, ID 83705-5082 (208) 334-2190

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR
TRANSFER OF WATER RIGHT NO. 61-0371

SAMUEL BLACKWELL

Applicant,

RICHARD P. VINER

Protestant.

SOURCE: Little Canyon Creek

TRIBUTARY TO: Snake River

COUNTY: Elmore

PROPOSED MEMORANDUM DECISION AND ORDER
APPROVING APPLICATION FOR TRANSFER

BY HEARING OFFICER BOBBY D. FLEENOR.

Samuel Blackwell (applicant) having filed with the Department of Water Resources an Application for Transfer of a portion of decreed water right No. 61-0371; a protest having been received; and a hearing having been held, the Department finds, concludes and orders as follows:

FINDINGS OF FACT

The Application

1. On June 19, 1987, Samuel Blackwell applied to the Department of Water Resources to change the point of diversion, nature of use and place of use of a portion of decreed water right No. 61-0371. The application for transfer (hereinafter application) specifies that a flow of 0.40 cubic feet per second (cfs) is intended to be moved from the point of diversion within the NW1/4SW1/4, Sec. 8, Twp. 5 S., Rge. 10 E., B.M., to an existing diversion point located within the NW1/4NE1/4, Sec. 9, Twp. 4 S., Rge. 10 E. B.M. The

application proposes a change in nature of use from irrigation to stockwater, and proposes a change in place of use from 20 acres located in the E1/2NE1/4, Sec. 19, Twp. 5 S., Rge 10 E., B.M., to an existing open ditch called the "Morrow ditch", or the "Herron ditch", or the "Batruel ditch".

2. Notice of the application was published in the Mountain Home News on September 2 and 9, 1987.

Protest, Conference and Hearing

3. A protest against approval of the application was received from Richard Viner on September 8, 1987.

4. A conference on the application was held in Boise on October 14, 1987. At the conference the applicant was present and was represented by attorney Howard Manweiler. The protestant was also present and was represented by attorney William F. Ringert. At the conference a determination was made that a formal hearing would be required in this matter.

5. A hearing on the application was held in Boise on November 30, 1987. The applicant and protestant were both present and were represented by counsel. The principal points of objection identified by the protestant were that the water right has been forfeited, approval would result in enlargement of the existing water right and injury to other water rights, and the proposal is not in the local public interest.

Validity of the Water Right

6. The applicant owns about 160 acres of land in the Little Canyon Creek basin, located in the NE1/4, Sec. 19, Twp. 5 S., Rge. 10 E., B.M. The water rights appurtenant to this land are decreed water right No. 61-0371, in the amount of 1.2 cfs with date of priority May 2, 1872, and decreed water right No. 61-0372, in the amount of 1.6 cfs with date of priority May 6, 1892, both from Little Canyon Creek; and 0.80 cfs of water from King Hill Irrigation

District, with source of the Snake River. The decreed water rights were recorded in a decree entitled Corker v. Anthony, dated March 22, 1898.

7. The applicant stated that he intends to divert flows under this transfer during the periods from April 1 through July 15, and from October 1 through November 1, annually. The purpose for the change is to provide stockwater for about 160 head of range cattle in a Bureau of Land Management grazing allotment located in the vicinity of the Morrow ditch.

8. The applicant's "east ditch" diverts from Little Canyon Creek and is used to irrigate his land on the east side of Little Canyon Creek. Historically, the east ditch was used to irrigate a total of 28 acres in the NE1/4NE1/4, 2 acres in the NW1/4NE1/4, 12 acres in the SW1/4NE1/4, and 20 acres in the SE1/4NE1/4, for a total of 62 acres, all within Sec. 19, Twp. 5 S., Rge. 10 E., B.M. Sometime prior to 1963, water was purchased from King Hill Irrigation District, and the east ditch was re-routed to a new location situated closer to Little Canyon Creek. The lands capable of being irrigated from the new ditch consist of 16 acres in the NE1/4NE1/4, 2 acres in the NW1/4NE1/4, 11 acres in the SW1/4NE1/4, and 7 acres in the SE1/4NE1/4, for a total of 36 acres, all within Sec. 19, Twp. 5 S., Rge. 10 E., B.M.

9. The applicant also diverts flows from Little Canyon Creek via a ditch on the west side of the creek, called the "west ditch". The Corker v. Anthony decree did not specify the point of diversion or ditch used to deliver either of the applicant's two decreed water rights, so it is possible that a portion of water right No. 61-0371 is delivered via the west ditch.

10. Conflicting testimony was provided concerning the last time that water in the east ditch was beneficially used by the applicant. Some testimony indicated that the last date of use was 1985, and other testimony indicated that the last date of use was May or June of 1982.

Enlargement of the Water Right

11. The applicant desires to use the transferred portion of the decreed right for a new and additional use. The applicant has indicated a desire to reduce the use of the decreed water right at the existing location to compensate for the proposed upstream use, to result in no enlargement of the water right.

12. The flows in Little Canyon Creek diminish sometime in July during most years to the extent that water right 61-0371 cannot be satisfied. Thus, the lands irrigated with this water right do not receive, from Little Canyon Creek, the full irrigation requirement.

13. Flows diverted through the Morrow ditch do not return to Little Canyon Creek.

Potential Injury to Other Water Rights

14. There is one recorded water right on Little Canyon Creek that has a priority date senior to water right no. 61-0371. Decreed water right No. 61-0299, in the amount of 0.60 cfs with a priority date of May 1, 1871, is utilized by the protestants. Diversion systems based on this water right, as well as diversions for all other water rights in Little Canyon Creek, are required to have measuring devices installed so the watermaster can determine if the required flow is satisfied.

15. The application proposes to change the point of diversion for 0.40 cfs from the existing point to a point upstream about nine (9) miles. In this reach there are some springs which contribute to the flow, but the record is inconclusive regarding whether the reach is gaining or losing.

16. Conflicting evidence was provided regarding the ability of the watermaster to regulate the flows at the proposed point of diversion to insure that such flows would not adversely affect the downstream senior water right of

the protestant.

Local Public Interest

17. The amount of water required to supply cattle is considered to average 12 gallons per head per day. [Reference: U.S. Department of Health, Education and Welfare, Manual of Individual Water Supply Systems, 1962.] The proposed diversion of 0.40 cfs would provide enough water for more than 20,000 cattle if the delivery system were 100 per cent efficient.

18. A common means of supplying stockwater throughout Idaho is the diversion of a flow of water through an open ditch.

CONCLUSIONS OF LAW

Applicable Legal Principles

1. Idaho Code, Sec. 42-222 (Supp. 1987) states in part as follows:

The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is in the local public interest as defined in Section 42-203, Idaho Code.

2. The Director of the Department of Water Resources has jurisdiction to determine the question of abandonment and forfeiture and such is required as a preliminary step to performance of his statutory duty in determining whether or not the proposed transfer would injure other water rights. Jenkins v. State of Idaho, 103 Idaho 384 (1982).

3. Forfeitures are not favored, and clear and convincing proof is required to support a forfeiture. Gilbert v. Smith, 97 Idaho 735 552 P.2d 1220 (1976).

4. Each irrigation water right in Idaho is comprised of three components: rate of flow, total volume diverted, and volume consumptively used. To insure that an enlargement in a water right does not occur, neither the rate

of diversion, nor the total volume diverted, nor the total consumptive use is allowed to be increased.

5. Stockwatering is considered to be a beneficial use of water in Idaho.

Application of Legal Principles

Validity of the Water Right

6. Water right No. 61-0371 is not found to have been abandoned or forfeited, as clear and convincing proof has not been provided to demonstrate either abandonment or forfeiture.

7. Water right No. 61-0371 no longer applies to the 26 acres that were originally under the east ditch but have not been irrigable from the east ditch since prior to 1963. Thus, the place of use from which the water is to be removed under this transfer must be specified as acreage that is irrigable from the east ditch in its present location.

Enlargement of the Water Right

8. With respect to rate of flow, the applicant has proposed that a 0.40 cfs portion of his water right be conveyed from the present point of diversion to the upstream point of diversion. The total rate of diversion will not be increased by the transfer.

9. To insure no increase in the total volume of water diverted and volume consumptively used under this water right, the applicant must decrease the acreage irrigated under the east ditch by 20 acres. The acres from which the water is removed cannot be those from which water was removed prior to 1963, but rather must be from among the 36 acres still considered to be irrigable from the east ditch.

Potential Injury to Other Water Rights

10. If the proposed transfer is approved, additional care would be

required by the watermaster to insure that diversion at the new upstream point of diversion does not injure the senior water right on Little Canyon Creek. If this additional care is applied, the senior water right will be protected. The watermaster will need to anticipate downstream flow availability and will likely need to reduce the flow at the new upstream point of diversion several days prior to the date that the senior water right is expected to experience a shortfall.

Local Public Interest

11. Use of an open ditch to provide water for stockwater purposes allows greater losses via seepage and evaporation than use of a pipeline system. Nevertheless, the open ditch system of stockwater delivery is considered to be a beneficial use of water in Idaho.

ORDER

IT IS, THEREFORE, HEREBY ORDERED and Application for Transfer of Decreed Water Right No. 61-0371B is APPROVED subject to the following conditions:

1. Water right No. 61-0371A is defined as the 0.80 cfs which remains appurtenant to the original place of use, and water right No. 61-0371B is defined as the 0.40 cfs that is hereby transferred. Subsequent conditions of approval apply to water right No. 61-0371B.

2. This water right is subject to all existing senior water rights.

3. A measuring device and lockable diverting works of a type acceptable to the Department shall be installed and maintained at the diverting works.

4. This water right is subject to delivery by the watermaster of Water District No. 61-D, Little Canyon Creek.

5. This water right shall be delivered only from April 1 through July

15, and October 1 through November 1, during periods when delivery will not adversely impact delivery of the downstream senior water right. For purposes of protection of the downstream senior water right on Little Canyon Creek, the watermaster shall anticipate the impact of the diversion under this water right and shall discontinue delivery of this right during periods when the flows are anticipated to be required to satisfy the prior senior water right.

6. The issuance of this transfer in no way grants any right-of-way or easement for use of a delivery system owned by a person other than the water right holder. Use of water under this transfer may be affected by an agreement between the water right holder and the owner of the conveyance works.

Dated this 22nd day of April, 198⁸.

APPLICATION FOR TRANSFER OF WATER RIGHT Amended
PART 1

Name of applicant Samuel Blackwell Phone (208) 366-2265
Post Office address Route 1, Box 430, Glens Ferry, ID 83623

A. PURPOSE OF TRANSFER

1. ☐ Change point of diversion ☒ Add diversion point(s) ☒ Change place of use
☒ Change nature of use ☐ Change period of use ☐ Other _____
2. Describe the reason for the proposed changes To transfer a portion of a decreed water right to be used for stockwater purposes.

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use
<u>61-0371B</u>	<u>5/2/1872</u>	<u>0.40 cfs</u>	<u>Stockwater</u>	<u>4/1</u> to <u>11/1</u>
_____	_____	_____	_____	_____ to _____
_____	_____	_____	_____	_____ to _____
_____	_____	_____	_____	_____ to _____

2. Total amount of water being transferred 0.40 cubic feet per second and/or _____ acre-feet per annum.
3. Source of water Little Canyon Creek tributary to Snake River
4. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge.	County	Local name for diversion
		NW	NE	9	4S	10E	Elmore	Herron (Morrow) Ditch

5. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4

Total acres _____

PART 1

6. General Information:

a. Description of diversion system Headgate

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes X No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
20 acres will no longer receive water from Little Canyon Creek. Instead, they will
be watered from only King Hill Irrigation District.

d. Remarks:
Applicant proposes to transfer 0.40 cfs out of a 1.2 cfs water right to an upstream
point of diversion to allow said water to run in the Herron (morrow) ditch for
stockwater purposes.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____

And said application is hereby _____, subject to the following limitations and conditions:

Witness my hand this _____ day of _____, 19 _____

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR TRANSFER OF WATER RIGHT

PART 2

(Attach one copy for each right)

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:

- a. Decree No. 61-0371 Decreed to Jenny Glenn
in case of Charles E. Corker vs. T. H. Anthony, et al.
dated March 22, 1898 in 4th Judicial District county of Elmore
- b. License No. _____ issued by the Idaho Department of Water Resources.
- c. Claim No. _____ on file with the Idaho Department of Water Resources.
- d. Transfer No. _____ which produced this right.

2. Attach a copy of last year's tax notice for the property to which the water right is appurtenant or other documents which show ownership. Label document as attachment A. Check appropriate box below:

☒ Tax Notice ☐ Warranty Deed ☐ Other _____

3. Source of water Little Canyon Creek tributary to Snake River

4. Date or priority May 2, 1872

5. Water is used for the following purpose:

amount 1.2 cfs for Irrigation purposes from 4/1 to 11/1
(cfs/ac-ft)
amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft)
amount _____ for _____ purposes from _____ to _____
(cfs/ac-ft)

6. Total amount of water under right 1.2 cubic feet per second and/or _____ acre-feet per annum.

7. Point(s) of Diversion:

Lot	¼	¼	¼	Sec.	Twp.	Rge.	County	Local name for diversion
		NW	SW	8	5S	10E	Elmore	East Ditch

8. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE ¼				NW ¼				SW ¼				SE ¼				Totals
			NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	
5S	10E	19	28		12	20													60

Total acres 60

9. Describe any other water rights used for the same purpose as described above When Little Canyon Creek
water is removed, lands will be irrigated by King Hill Irrigation District water.

PART 2

Transfer No. _____

10. To your knowledge, has any portion of this water right undergone a period of five or more consecutive years of non-use?
 No _____ If yes, describe _____

B. DESCRIPTION OF PORTION OF RIGHT BEING TRANSFERRED

(If the entire right is to be changed by the applicant, omit part B and C.)

1. amount 0.4 cfs for Irrigation purposes from 4/1 to 11/1
 (cfs/ac-ft) _____
 amount _____ for _____ purposes from _____ to _____
 (cfs/ac-ft) _____
 amount _____ for _____ purposes from _____ to _____
 (cfs/ac-ft) _____
2. Point(s) of Diversion:

Lot	1/4	1/4	1/4	Sec.	Twp.	Rge.	County	Local name for diversion
		NW	SW	8	5S	10E	Elmore	East Ditch

3. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				Totals
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4

NOTICE OF CLAIM NOS.
A61-00371A, A61-00372 & A61-10306

Ref: Ownership change/TEL CONV February 26, 1997

Dear Joyce,

1. ENCLOSED are copies of the above referenced claims which reflects the CHANGE IN OWNERSHIP of the lands and appurtenant water rights covered by these claims.
2. FIELD EXAM FOLLOW-UP will be needed as we discussed per telephone 2/26/97 on A61-00371A, A61-00372. I will call you sometime after March 15, 1997 to set up a field exam to measure ditch loss from Canyon Creek. If you have a time in mind for this follow-up field exam, please feel free to call me ASAP.
3. If you have any questions concerning the enclosed claims, please feel free to contact this office.

Sincerely,

Ron Howerton

CLAIM/WR NO: A61-00371A, A61-00371B and A61-00372
AGENT: RON HOWERTON
DATE: February 22, 1997
REF: ANALYSIS OF TRANSFER SPLIT ORDER STOCK/IRRIGATION

1. Mr. Blackwell claimed a split of decreed right 371.
2. The decreed use was for irrigation of 1.2 CFS, he split the claim so that 20 inches was a change in nature of use for stockwater (371B) and left the remaining .8 CFS to be for irrigation (371A).
3. Mr. Blackwell also claimed decreed right 372 which was for the same lands as 371. Decreed right 372 was for 1.6 CFS. The combined irrigation CFS of both 371A & 372 is 2.4 CFS. The decree was absent from identifying points of diversion, thus both the East and West ditch could have been used for both the 371 and 372 decreed rights. The same POU is shown on both so a portion of 371 or 372 could be diverted through both ditches.
4. The adjudication field exam VERIFIED of 9/9/94 shows 68 irrigated acres of lands from West Ditch.
5. The re-aligned East Ditch right 371A has the required 16 acres irrigated. The transfer required 20 to be dried up of the 36 considered eligible by the decree.
6. The decision and order described that the East ditch had a historical use of 62 acres and was identified as right 371. The order described that the realigned East ditch had a total of 36 acres that was considered irrigated, of the 36 acres 20 of those acres were to be transferred for stock for 371B. Thus leaving 16 acres remaining of the original 62 historically irrigated. The transfer allowed .8 CFS to be still used for the original place of use, which would be 16 acres for .8 CFS. (This would be allowing excessive flows)
7. Wild flooding seems to be the use of Little Canyon Creek for Mr. Blackwell.

OF ELMORE COUNTY AREA, IDAHO, PARTS OF ELMORE, OWYHEE, AND ADA COUNTIES - SHEET NUMB

R. 9 E. | R. 10 E.

Soil Type 10 (BALDCK)

Worstell:²⁶Seepage Rates of General Soil Groups

General Soil Group	Ponding Tests	Seepage Meter Tests
	Average Rate feet/day	Average Rate feet/day
Clayey	0.23	0.65
Silty	0.80	0.55
Loamy	0.94	0.85
Sandy	1.56	1.91
Unspecified	1.01	1.13

Seepage from Lined Canals

Lining Type	Average Rate	Range
	feet/day	feet/day
Concrete	0.24	0.03 - 0.96
Compacted earth	0.17	0.01 - 0.95
Asphalt membrane	0.46	0.01 - 3.0
Soil cement	0.08	0.03 - 0.20
Chemical sealant	1.79	0.32 - 8.3
Sediment seal	0.78	0.39 - 1.3
Unlined - all soil types	0.99	0.01 - 17.6

"C", "i" and "average seepage rate" are identical factors and the tables above could be used interchangeably to assist in assigning a factor for a described soil. All of them use soil descriptions somewhat different from those now used in the National Cooperative Soil Survey. Some judgement is required in selecting coefficients.

1. The Moritz Formula

The Moritz method estimates canal dimensions based on the canal discharge and velocity. It is based on the following equation:

$$S = 0.2C\sqrt{\frac{Q}{V}} \quad \text{Eq. 11}$$

Where S = Seepage loss (cfs/mile)
 Q = Canal discharge (cfs)
 V = Velocity in canal (ft/sec)

²⁶Worstell, Robert V., "Estimating Seepage Losses from Canal Systems," Journal of the Irrigation and Drainage Division, ASCE, Vol. 102, No. IR1, Proc. Paper 11960, March, 1976, pp. 137-147.

Most seepage formulas use a unit seepage rate which some call "C" and others call "i". In English units these coefficients are expressed as cubic feet per square foot per day or simply feet per day.

The following table of "C" values is from American Civil Engineering Practice:²⁵

<u>Kind of Material</u>	<u>Loss per Day</u> (in feet)
Cemented gravel and hardpan with sandy loam	0.34
Clay and clay loam	0.41
Sandy loam	0.66
Volcanic ash	0.68
Volcanic ash with some sand	0.98
Sand and volcanic ash or clay	1.20
Sandy soil with some rock	1.68
Sandy and gravelly soil	2.20
Concrete lining	0.33

The following table of "i" values is taken from the California Department of Water Resources Inspection Manual for use with the Etcheverry formula.

<u>Kind of Material</u>	<u>Loss per Day</u> (in feet)
Impervious clay loam	0.25 - 0.35
Medium clay loam underlaid with hardpan at depth of not over 2 to 3 ft. below bed	0.35 - 0.50
Ordinary clay loam, silt soil or lava ash loam	0.50 - 0.75
Gravelly clay loam, sandy clay loam, cemented gravel, sand or clay	0.75 - 1.00
Sandy loam	1.00 - 1.50
Loose sandy soils	1.50 - 1.75
Gravelly sandy soils	2.00 - 2.50
Porous sandy soils	2.50 - 3.00
Very gravelly soils	3.00 - 6.00

The following tables of "Average Seepage Rates" is from

²⁵ Abbett, Robert W., American Civil Engineering Practice, John Wiley & Sons, Inc., New York, 1956, Vol. II, pp. 17-31, 17-32.

RE: Field Exam Scheduling Letter for the following Adjudication Claims:

A61-00341, A61-00342, A61-00371A, A61-00371B, A61-00372 &
A61-10299.

Dear Samuel and Frances,

The Adjudication Staff of the Department of Water Resources will be conducting Snake River Basin Adjudication Claim Examinations for Elmore County from July through November 1994.

Information on your claim that may need to be verified includes, source(s) of water, uses and amounts, legal descriptions of point(s) of diversion, place of use and in some cases documentation verifying the date of priority as claimed in the Snake River Basin Adjudication.

Although it is not mandatory that you accompany me, should questions arise during the exam, it would be most helpful for yourself or a knowledgeable representative to be available during the field exam. This will help in the accuracy of collecting specific information about your water right and speed up our findings.

I would appreciate your call ASAP to set-up a field exam date. I may also be calling to help speed up the scheduling due to the short field season this year.

If you have other questions prior to scheduling a date or about the field examination, feel free to call me on that too. Please call today to set-up your exam!

Sincerely,

A handwritten signature in cursive script, appearing to read 'Ron Howerton'.
