OK - you are correct, I did not address the disposition of the acres in the NENW Section 13. I did say that since Mr. Suitts could only show possession of about 38 acres under the right, he should only get that proportionate share. According to typical WR strategy, that would be 0.38 cfs at the licensed rate of flow per acre. The SRBA recommendation for this right awards 38 acres at a rate of flow of .65 cfs. This represents a proportionate share based on 48 acres found and total flow of 0.82 cfs, and assumes that Mr. Suitts stills owns the 33 acres within NENW Section 13 and thus still retains interest in the corresponding right.

I asked Kay W, who prepared the R record, if she knew who owned the lands in NENW and she did not. She had assumed that Mr. Suitts still owned them. We called Elmore Assessor, and found that the lands north and east of the canal in NENW Section 13 are owned by one Warren F. Borchert of Mountain Home.

SOOOOOOOOO...The missing info is whether or not Suitts withheld water rights from Borchert when the land was sold. If so, I agree with the SRBA recommended flow of 0.65 cfs. If not, the rate of flow will have to be cut. Kay concurs. Since you are in the position to request final information, I will let you solicit a copy of the Suitts-Borchert warranty deed, unless you think we should do it.

There you have it!!!!!! cjh (with kw)

RE: Application for Transfer 4647

Dear Mr. Suitts:

The above-referenced application for transfer, which proposes to change the place of use under water right no. 61-02133, has been reviewed and submitted for advertising. Notice dates were July 5 and 12, 1995, in the Mountain Home News. Final day for protests to be received is Monday, July 24.

This transfer application is based on a right which has recently been verified and recommended for inclusion in the Snake River Adjudication Basin 61 Director's Report. The transfer approval will be contingent upon the recommended version of the right. Because the recommendation may or may not exactly match the previously recorded version of the right, you should have opportunity to review the recommendation before the transfer reaches the final processing stage. Normally, you would receive this opportunity later in the adjudication process.

Accordingly, enclosed is a profile report of right number R61-02133 as it is proposed to be recommended in the Director's Report. Please take time to review it carefully, and contact Kay Walker of this office if you have questions or conflict with any portion of the recommendation.

Prior to final transfer review and approval, you will need to submit an additional piece of information. When your application was received at our office, you indicated that you intended to obtain deliverable shares of surface water from Mountain Home Irrigation District, to be applied to the 40 acres in NESW Section 12. The ground water right 61-02133 was developed or has been used as supplemental to surface water applications. It cannot be transferred into NESW Section 12 as a primary irrigation right, as this would constitute an expansion in use.

Please forward verification of shares which you have obtained from Mountain Home Irrigation District. Once this verification is received, final transfer review may begin. In order to avoid delays, please submit this information by July 24, 1995.

Thank you for your cooperation. Please don't hesitate to call if you have questions.

Sincerely,

Cindy Hodges
Sr. Water Resource Agent

FROM: Cindy Hodges

RE: SRBA recommendation, transfer limitations

This transfer is similar to transfer 3569 in that it references a Basin 61 right which has recently been verified. Final approval of the transfer will necessarily be contingent on the B61 recommendation of the right.

In this case, the right has been found to be partially forfeited. The applicant is aware of this and in fact offered the information during the field exam. The balance of the right was found to be still valid. However, all but 8 of the valid acres have been sold by the applicant, with the ground water rights under 61-02133 withheld for some acres but not all. The applicant wishes to transfer all reserved portions under the right into NESW S12, where the 8-acre portion of the right already resides.

By QQ, current status of the right is as follows:

NESW Section 12: Licensed acres = 8
Owned by applicant Suitts, evidenced by 1995 copy of Elmore county tax notice. 8 acres irrigated within past 5 years. New place of use for up to 32 acres additional irrigation.

SESW Section 12: Licensed acres = 40
Originally owned by Suitts, irrigated within past 5 years, split and sold in 1994 in three parcels:
Dees-Jones received approximately 18.7 acres. Warranty deed excludes ground water rights.
Vandomelen received 11.7 acres. A notarized release of rights submitted.
Unidentified party received 9.6 acres. Water rights were not retained by Suitts. No SRBA claim filed on this portion of right.

NENW Section 13: Licensed acres = 33 (forfeited portion)
Dry portion southwest of Canal sold to Wolfe, along with some dry land in NWNW. No water rights ever established for this parcel.
Unknown who owns 33 acres northeast of canal; per Suitts, this 33 acres has not received ground water for a number of years but still receives Mountain Home ID shares.

SRBA recommendation is attached. Note that 48 acres of irrigation was found, but only 38 may be awarded to Suitts because of the 10 acre parcel in SESW S12 sold with the ground water rights intact. Because no claim has been filed on that portion, it is likely that it will not be included in the Director's Report. However, there is always a chance that the owner will come forward, and at this time there is still a valid claim under 61-02133. Perhaps the water right record should be split to accomodate this potential for the 10 remaining acres? The balance of the right reserved from 30 acres in SESW is properly documented and may be moved into NESW Section 12, under one condition.

61-02133 was developed or has been used in SESW S12 as supplemental to surface water from Mountain Home I. D. This surface water is not proposed to be included on the transfer, and no surface water is used in NESW S12 at this time. Applicant has indicated that he is obtaining I. D. shares to apply within NESW S12. If this can be done, then the transfer of 61-02133 from SESW to NESW S12 may be accomplished as a transfer of supplemental water, without an issue of expansion. A letter has been prepared to send to applicant requesting verification of purchased shares.

Suggest (for clarity) Suitts awarded part "B", with remainder under part "A".
(43ac) When AJ record is modified, part "B" recommended in Bld for Suitts, part "A" can then provide a record on host temp as basis for disallowance of SRBA file due to forfeiture &/or no claim filed.

Bend, OR 97702

Dear Mr. Suitts:

I have received your correspondence of February 24, 1995, along with the power records for your well for the 1990/91 irrigation season and the copy of warranty deed from you to Dees & Jones.

It would be to your advantage to submit the transfer application at your earliest convenience. Transfer applications take some time to process, and if you are planning on planting a crop this fall, you need to have the transfer approved before using any water on the crop. Once you submit the transfer application, I will attach the documents you have submitted showing which lands have been sold without water and the affidavit you submitted from the Vandomelens releasing any claim to your well. Please note there is a \$100.00 filing fee for submittal of the transfer application.

If you have any questions in regard to the transfer application, please feel free to contact any of the agents in our office. Our appropriations section will be processing the transfer application once it is received.

Sincerely,

KAY WARKER

Dear Kay:

After meeting with you on February 13, 1995 regarding my irrigation well, I travelled to Mountain Home the next day and obtained the enclosed two documents from Idaho Power Company's records. The two documents support my statements to you that the pump and well were used in 1991. Idaho Power Co. employee, Patti Osborn, assisted me and signed the documents.

The other document enclosed, a copy of a Warranty Deed in the name of Dees-Jones, is submitted as proof that I removed the well water rights from this 17.75 acre piece of land before selling it.

I am making arrangement for a crop to be planted this fall, and, depending upon the amount of rainfall received, activating the pump either later this fall or in the spring of 1996 for irrigation.

If you should need anything further from me regarding this matter please let me know.

Very truly yours,

Nature of Contact Re: transfer to move well water all up to N/2SW, Sec. 12 where well is located.

Substance of Communication Mr. Suits brought in a waiver of portion of Licensed place of use - also told me he had sold N $\frac{1}{2}$ SWSE, Sec. 12 without water $\rightarrow$ will send in a copy of that document. We discussed land sold to Catherine Wolfe - that land never received water from the well; it was dry ground historically. $\rightarrow$ Will be submitting proof of use of well for '91 irig. season - only used for a short time as well had problem that year.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information **MUST** be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

RE: Transfer of Water Right

Richard O. Suitts
61060 Sky Harbor Dr.
Bend, OR 97702

Dear Mr. Suitts:

Pursuant to our discussion on September 22, 1994, enclosed you will find a partially completed application for transfer form. Please complete the items indicated with red, sign the form in the presence of a notary public and return it to this office for processing. The application for transfer will be advertised in the Elmore County newspaper, once it has been submitted.

Please note that you must submit proof of ownership of the lands that you are moving the water off of. If any of this land was sold without a statement on the deed that water rights from your well were not included, the water rights would be appurtenant to that land and you must get a release from the current property owner. This is also discussed in the instructions for filing an application for transfer of a water right which are enclosed for your information.

If you have any questions in regard to the transfer application, please feel free to contact any of the agents in our office. Our appropriations section will be processing the transfer application once it is received.

Sincerely,

A handwritten signature in cursive script that reads "Kay Walker".

Dear Kay:

I have been out of Idaho lately and did not receive your letter of August 5, 1994 until yesterday afternoon, at which time I called your office. In your absence I left my name and telephone number but have not received any communication.

In reading your letter I find that it is urgent that I meet with you on my property where my well is located so that you can complete a field examination. I will be in Boise on September 21st on business and will make myself available to meet with you for a 5 day period straddling this date. If your time allows a meeting with my wife and I on any of these days please let me know. I can be reached at: 61060 Sky Harbor Drive, Bend, Oregon 97702, (503) 388-2680.

On the chance that it may help you I will enclose the following information regarding the well and water right: The date of priority is March 12, 1961; the point of diversion is on a 40 acre parcel of land we own which is the NE1/4 SW1/4 of Section 12 in Township 3S, Range 6E, Elmore County; the water is diverted by means of a 15 HP pump and is used for irrigation from April 15 to October 1; total consumptive use is 120 acre feet per annum.

Because of our age, my wife and I have cut back on our farming operations in the past few years and have been selling parcels of the irrigated ground. Our immediate plans for this well, provided the aquifer is adequate, is to sprinkle irrigate the 40 acre parcel which the well is situated on. - - that being the NE1/4 SW1/4 of said Section 12 above.

Very truly yours,

RE: Claims filed in the Snake River Basin Adjudication

Richard O. Suitts
Rt. 3, Box 675
Mountain Home, ID 83647

Dear Claimant:

We are now conducting water right claim verification examinations in your area. An examination is needed to verify your water use in order to recommend the water right for decree. Information on your claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which **must be completed this summer**, please contact me at (208)334-2190 to make an appointment at a time that is convenient for you. I will be scheduling appointments for the last two weeks in August, and through September. Although it is not mandatory that you accompany me, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany me it would be appreciated.

If you have any questions in regard to the exam verification, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Kay Walker".
