Photograph taken from NWNE, looking southwest over place of use. The circled electrical pole is the same pole circled on the next picture. Well is piped to concrete ditch to places of use. It appears that the cow pond receives well water but that use is not included in the license nor claimed.

This view shows the southern end of the place of use.

NOTES: 02/07/1997: This water right was licensed to apparently all acres on the property. The claim appears to ~~be~~ describe the entire parcel as the place of use. However the field exams did not find any delivery structures which would get water from the well to the "lower" fields next to Rattlesnake Creek. It appears that the license was reserved for too many acres. On paper it looks like a person of the license has been forfeited by non-use but in fact the water right may still be used as it always has been, albeit on not as many acres as licensed. ND

NOTES: 02/07/1997: Based on field exams & correspondence from claimant,
ground water is used on the upper fields only. License was issued on entire
property, which seems to be an error. It appears that a portion of this
right has been forfeited/abandoned through non-use. No delivery system
to the lower fields (along Rattlesnake Cr) was found. No
mention of Quaternary alluvial deposits in the area on map

RE: Notices of Claim To a Water Right Nos. A61-00273, A61-02203

Dear Mr. Knudson:

IDWR's initial investigation of the above-referenced claims indicates that there have been changes in the use of the water rights.

A61-00273:

It appears that this decreed water right is now used on lands not originally decreed as the place of use. An increased rate of diversion has also been claimed for this water right.

As of May 20, 1971, a right to surface water can be obtained only by compliance with the application for permit procedures established by statute. At this time you must provide IDWR with the date that additional water was first diverted from Rattlesnake Creek, the date the water was used on the new acres, and some evidence to support those dates. If the date additional water was diverted is previous to May 20, 1971, a beneficial use claim for the additional water is required. If the date is on or after May 20, 1971, an application for permit for the additional water is required.

An IDWR pamphlet is enclosed which explains why evidence is needed and suggests sources for evidence. This evidence will help determine the priority date of the water right for the water diverted in excess of your decreed right.

Please submit this evidence by the response date at the top of this letter. If no response is received the additional water will not be recommended to be decreed.

A61-02203:

It appears that this water right is used on acres which are not the same acres for which the water right was licensed. Enclosed are reports which summarize the water right, both as licensed and as claimed.

A water right owner who has made a change in use of a water right prior to commencement of the Snake River Basin Adjudication (SRBA) without obtaining IDWR approval may claim the change in the SRBA, as you have done. IDWR may recommend a right as changed, however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights.

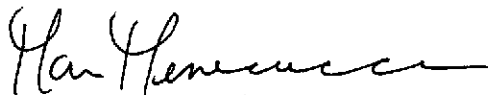

Before IDWR may recommend your claim, you must provide IDWR with the date the change in place of use was made and submit some evidence tending to support that date. An information sheet is enclosed that describes the types of evidence that can be submitted for showing the date of change.

Your response must be received by this office by the response date shown at the top of this letter. If no response is received, then the new place of use may not be recommended to the court to be decreed.

I will be conducting a verification exam on your claims on Friday, October 7, 1994. I plan to be on site by 7:30 - it would be best if you were able to assist me in reviewing your delivery system and the place of use. I will look forward to meeting with you then.

If you have any questions or need additional information, please contact this office.

Sincerely,

Maria Minicucci
Water Agent, Adjudication Bureau

RE: Claims filed in the Snake River Basin Adjudication

Dear Claimants:

We are now conducting water right claim verification examinations in your area. These exams are a result of the claims that you filed in the Snake River Basin Adjudication. An examination is needed to verify your water use in order to issue a water right license and/or decree. Information on your claims which may need to be verified include source of water, type of usage, amount of water used and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations which must be completed this summer, please contact me at (208) 334-2190 to make an appointment at your earliest convenience. Although it is not mandatory that you are present during the exam, your assistance will help insure that an accurate description of your system will be made.

If you have any questions in regard to the claim verification exam process, please feel free to contact me.

Sincerely,

MARIA MINICUCCI
Water Resource Agent
Adjudication Bureau
