NOTES: 06/09/1995: Claimant indicated on 06/07/1995 that a pipeline extends across the creek and irrigated part of the field east of the house. When the licensing exams were conducted, the licensed areas were flood irrigated. No mention is made of a pipe across the stream. The NAPP is inconclusive, but it could be argued that it shows less surface H₂O & more ground H₂O on the south east field than was found this year. See attached copy of NAPP & IDWR correspondence. ~~File~~ Review of the original license file map seems to indicate that all areas are North of creek, but inconclusively so.

NOTES: 11/02/1994: Field exam found sprinklers able to irrigate entire
POU except southeastern most field. Unable to find way
for GW to get to this field (ASCS no. 3). Northeastern
most field, not delineated by ASCS, appears to be
flood irrigated - NAPP photo seems to indicate that
this area was irrigated w/ run-off from Frenchman
Springs. Field exam found a possible diversion pt from
this run-off, but it does not appear that this diversion
is still used. See photos, attached. A ditch from GW
does run along the perimeter of this field - no sprinklers
evident. This field is not as clearly irrigated as the
other fields.

06/09/1995: McLeod, farm mgr, indicated on 06/07/1995 that
Northeastern-most field is not irrigated w/ sprinkler system.
Field exam on that day (7th) found field to be irrigated but proba-
ably from unnamed stream flowing from Frenchman Springs. This diversion

does not have

Re: Application for Permit #61-7598

Dear Mr. & Mrs. Hunt:

During a water right conference held on May 6, 1992, Mr. Preston Lord on your behalf indicated that the proposed irrigation and stock water use from Frenchman Spring on your property within Sec. 2, T03S, R07E, Elmore County is not anticipated to be changed from historic use. Thus, we determined at the conference that the appropriate filing at this time is not an application for permit to appropriate water, but rather is a notice of a claim to a water right.

After checking our records we could find no adjudication claim filed on this spring. I suggest that you contact one of our adjudication agents and file a claim with them and also complete the enclosed water right application withdrawal form.

If you have questions in this regard, please feel free to contact this office.

Sincerely,

David R. Tuthill

Re: Application for Permit of Water Right No. 61-7598

Dear Mr. & Mrs. Eckhardt:

NOTICE OF PENDING ORDER VOIDING APPLICATION

On November 1, 1989, you filed with the Department of Water Resources an application for permit of water right, no. 61-07598 to provide water for irrigation to be diverted from Frenchman Spring within Sec. 36, T02S, R07EW.

This application was protested by Mountain Home Irrigation District. A conference was held Wednesday, May 6, 1992. At the conference your representative, Mr. Preston, Lord stated that the intent of this project is to continue historic irrigation practices, not to provide water for new uses. In a letter dated June 10, 1992, this office solicited from you a withdrawal of the application, to which no response has been received.

If you fail to respond to this inquiry within thirty (30) days from the date of this letter, the Department will act to void your application. The application will be voided on the grounds that no additional use was requested.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Manager, Western Regional Office

Dear Mr. Lord:

One of the conditions of approval of your water Permit No. 61-7099 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

RE: Request for information

Dear Mr. Lord:

As per your request, I have researched our records for claims filed by the Hoffmans or Weavers in Twp. 01S, Rge. 08E, sections 19, 30, 31, and 32. Two claims have been filed by Joe and Miriam Hoffman in that area. Claim No. A61-04027 is for a spring for stockwater use and claim no. A61-07116 appears to be for the same spring for domestic use. Copies of the claims are enclosed with this letter.

Please review the claims carefully. If you have purchased the property described in the claims, please complete the enclosed Change of Ownership form and return it to this office with the documentation described on the form.

You had also requested information about your decreed water right from Rattlesnake Creek regarding its priority date relative to the rights claims by Mountain Home Irrigation District. The priority date of your right is May 1, 1875. The earliest priority date of the District's rights is June 1, 1876.

Please complete the Change of Ownership form and return it to this office. The ownership of the claims will not be changed until we receive the form along with the necessary documentation. The claim will remain in the name of the Hoffmans until the form and documentation of ownership are received by this office.

Please do not hesitate to contact me if you have any questions or need additional information.

Sincerely,

Maria Minicucci
