Dear Special Master Bilyeu:

Enclosed is a Notice of Completed Administrative Proceeding (NCAP) for the above water rights. The recommendation for the above water rights does not change. However, a permit related to the rights was recently approved and I am providing this NCAP to let the court know that the administrative process has concluded. I expect that the claimant, through his attorney, Ray Rigby will be withdrawing the objection to these subcases shortly. Otherwise, we can discuss these subcases further at the hearing on July 17, 2002.

If you have any questions concerning this matter, please contact me at (208) 327-5404.

Gentlemen:

In reviewing the approval of rights No. 32-6019/32-6007/22-6006,
I note that limitation #4, limiting the maximum volume
of water to be diverted to 372.0 acre ft/annum constitutes
an UNEXPECTED change in the decreed rights, which grants
continuous flow of the rights from 1990 to 1990 of each year.

Parties involved have been using those right continuous
for the past scores of years, and a denial of the
continuous flow right would greatly damage the people
involved.

I therefore request a hearing to be scheduled
with the department in the near future.

Sincerely,

BHA & WATCO

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION)
FOR TRANSFER NO. 32-0014/0015/)
0016/2049/2071/2079 IN THE NAME OF)
WHAOO & BHA, INC.)

PROPOSED
MEMORANDUM DECISION AND
ORDER ISSUED ON REHEARING

The application to transfer water right Licenses No. 32-2049, 32-2071, and 32-2079 first came before the Department of Water Resources on May 10, 1976, when Grant Ashcraft, President of WHAOO & BHA, INC., applied to the Department to consolidate the points of diversion for six different rights to a new point of diversion located in the NE1/4SW1/4, Sec. 36, Twp. 12N, Rge. 34E B.M., Clark County.

As a result of the requisite advertising in the Enterprise Citizen several protests to the granting of this application were received from water users in Water District No. 32-C. A conference and/or hearing in the matter was set for August 12, 1976. Based upon the information presented at the conference and upon the records and field inspection of the Department, the parties agreed to allow the Department to reach a decision in the matter. By its Memorandum Decision and Order issued February 9, 1977, the Department approved a change in the point of diversion of the decreed rights 32-0014, 32-0015 and 32-0016 but denied the transfer of the three licensed rights.

The applicant petitioned for rehearing of the Department's decision and requested opportunity to submit evidence. On February 8, 1979, the matter came before the Department for rehearing.

Department Jurisdiction

The applicant argues that, "the Department was without jurisdiction to refuse to grant the application for the change in point of diversion and went beyond its jurisdiction in making a

conclusion of law to the effect that a water right had been forfeited through nonuse." The applicant further asserts that, "the law is clear that the Department simply does not have jurisdiction to adjudicate the existence, the forfeiture or abandonment of water rights"

The arguments which the applicant raises must be analyzed in view of Section 42-222 of the Idaho Code which provides the legal mechanism for transferring water rights. This section requires the following of the applicant, the director, and those wishing to protest an application for transfer:

1) Any person "who shall desire to change the point of diversion or place of use . . . shall first make application to the department of water resources for approval of such change."

2) "It shall be the duty of the director of the department of water resources to examine same . . . and cause notice of proposed change to be published. . . ."

3) "Such notice shall advise that anyone who desires to protest the proposed change shall file notice of protests with the department. . . ."

4) "It shall be the duty of the director of the department of water resources to investigate the same and conduct a hearing thereon."

5) "He (the director) shall also advise the watermaster of the district in which such water is used of the proposed change . . . and the director of the department of water resources shall not finally determine the action on the application for change until he has received from such watermaster his recommendation thereof" (emphasis added)

6) "The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby and the change does not constitute an enlargement in use of the original

rights." (emphasis added)

7) "All rights to the use of water . . . shall be lost and forfeited by a failure for the term of five (5) years to apply it to the beneficial use for which it was appropriated. . . ."

8) "Upon proper showing before the director of the department of water resources of good and sufficient reason for non-application to beneficial use of such water for such term of five (5) years the director of the department of water resources is hereby authorized to grant an extension of time for forfeiture of title . . . for a period not to exceed five (5) additional years."

It is clear from the above referenced provisions of Section 42-222, Idaho Code, the Director has a number of specific responsibilities to fulfill before he grants any change in the point of diversion or place of use of a water right. However, the primary responsibility placed upon the Director by this section of the code is that emphasized in No. 6 above, i.e., the protection of other water rights.

The question that must be asked is, "How can a water right be injured?" To answer this, one must first remember that the watermaster is elected and called to deliver water rights according to the existing decrees and licenses; and therefore, it is apparent that when the watermaster is called, the water supply is insufficient to meet the demand.

Thus, any factor which would tend to reduce normal water supplies will tend to injure other water rights. These factors can include increased percolation, evaporation and conveyance losses. This also includes diverting more water from the source than has normally been diverted. This may result from irrigating more land with a given water right or commencing the use of a water right that has not been used for many years. This is clearly the reason that the forfeiture provisions are included in 42-222.

Thus, if the Director finds that the right described on an application for transfer has not been exercised for a time period exceeding five years, and that a resumption of the use of such right would result in injury to established water rights, he cannot approve the application for transfer. If the Director fails in his responsibility at this point, the injured parties may be left with no recourse except a costly court action to protect their rights against the resumption of a forfeited right. A recent decision of the District Court of Idaho, Harshbarger v. Idaho Department of Water Resources, Fremont Co. No. 7264 (Dist. Ct. 7th Jud. Dist, Sept. 4, 1979), has held that the prior loss or relinquishment of a water right sought to be transferred is an issue which the Director may consider in order "to avoid a multiplicity of law suits."

The Department thus continues the position that it may properly consider whether a water right sought to be transferred has been lost and forfeited by a failure for the term of five years to apply it to the beneficial use for which it was appropriated.

Applicant's other argument is that the Department lacks jurisdiction to adjudicate water rights in its administrative proceedings. The order portion of the Department's February 9, 1977 Memorandum Decision and Order in this matter does not purport to be an adjudication of the rights described therein. What the order does is approve certain rights for transfer and deny certain other rights based upon criteria set out in Section 42-222, Idaho Code. The partial denial is based upon evidence that certain of the rights to be transferred have not been used since 1955 and thus have been forfeited through nonuse pursuant to Section 42-222(2), Idaho Code. Consideration of the issue of forfeiture by the Department was proper. See, Harshbarger, supra. The decision and order denies an application to transfer the rights in question based upon evidence showing that such rights have in fact been statutorily forfeited.

It is the determination of the Director that the evidence submitted by the applicant at the February 8, 1979 rehearing was not substantially different from the information presented at the August 12, 1976 conference.

The applicant weakly asserts that water was diverted under licensed rights 32-2049, 32-2071 and 32-2079 by its predecessor in interest, Mr. A. G. Eddie. However, the evidence is unrefuted that only 124 acres have ever been irrigated under the combination of six rights shown on the application for transfer. The three decreed rights authorized to be transferred by the Department represents a total diversion rate of 4.82 cubic feet per second. Utilized on 124 acres, this represents a diversion rate of 0.038 cfs per acre or nearly twice the normal rate of 0.02 cfs per acre. It has not been shown that an even greater diversion rate is needed to irrigate these lands.

Further, no new evidence or testimony was produced at the rehearing to show that the lands listed under the three licensed rights have been irrigated since 1955, or that water has been diverted at the licensed points of diversion. The findings of fact and the conclusions of law made in the original order are incorporated in this decision as though fully set forth herein.

NOW THEREFORE, IT IS HEREBY ORDERED that the Memorandum Decision and Order of the Director entered herein on February 9, 1977 is hereby reaffirmed in all respects.

DATED this 6 day of May, 1980.

BOBBY D. FLEENOR
Hearing Officer

The record books turned in by the watermaster at the end of the season, indicate Mr. Eddies last recorded delivery to be in the amount of 4.82 c.f.s., on Sept. 30, 1975. The watermaster and his deputy terminated their services that year on October 1, 1975, the reason being no demand for any further irrigation waters, or regulations of such waters.

In conclusion, it should be pointed out that there is not one definite piece of evidence that Eddies ever used licensed waters. There is no recorded piece of evidence that licensed waters were ever used. The applicant or his predecessor didn't have a diversion works, control structure, measuring devices at any of the licensed points of diversion. There is no water user that can remember licensed waters ever being used. It is stated in the duties of a watermaster that only the record of the daily record books can be used in a dispute or a lawsuit. All testimony by applicant, concerning amounts of water was estimated. All testimony by Mr. Eddie was not conclusive to time, dates, or amounts. It is felt that the applicants new evidence presented at the re-hearing has been nil, and in any event the applicant has failed to prove affirmatively, evidence of use of water license #32-2049, 3 -2071, and 32-2079.

The protestors agree to the finding of fact, conclusions of law, and memorandum decision and order placed down on the 9th day of Feb. 1977, by the Department of Water Resources.

Dated this 10th day of April, 1979.

Ronald W. Shenton
Donald W. Shenton
Representative for Protestors

It is clear the Department has the authority by the proceeding statement to grant in whole, or in part, or upon condition, provided, there is no injury to other rights, or an enlargement of the original right. Then surely the Department can disapprove a change that will injure others right, or disapprove a change that will enlarge the original right. The protestors feel there is an injury to all existing water licenses and permits which is quite clearly defined by the following protest, which was filed by the protestors June 3, 1976.

We the undersigned do hereby protest the transfer of water right and change of point of diversion in the name of WHIAOO AND BHA INC. The reasons for protest are that portion of transfer #32-2049, #32-2071, #32-2079 which are licensed rights and have not been used for many years. You will find this is evidenced by your own daily record books and records. You will also find these waters have been used by other users and by this use have become dependent upon them, while the applicant and the preceding owner have abandoned said waters by non-use.

We therefore ask that the license numbers listed in this protest be denied as waters not available for diversion by applicant.

The change could result in a reduction of the amount of water available to fill other water rights. (Refer to lines 8, 9, 10, paragraph 1, page 3 of applicants brief.)

It is clear the applicant has already enlarged his original right by the transfer of rights #32-0014, 32-0015, 32-0016. (Decreed and stipulated)

The following is a response to the briefs filed with your Department by the applicants attorney, Mr. C. Rich Andrus on March 30, 1979.

Attached also are some comments we wish to make the Department aware of when considering conclusions on the re-hearing.

On Page 1, the applicant charges the Department is without jurisdiction to refuse to grant the application of point of diversion

The Director of the Department of Water Resources shall examine all the evidence and available information and shall approve and change in whole, or in part, or upon conditions, provided no other water rights are injured thereby and the change does not constitute an enlargement in the use of the original right." NAME OF WAHOO & BHA, INC.,)

Applicants, WAHOO, INC. and BHA, INC., hereby request
a rehearing on the subject matter of the memorandum decision and
order entered in the above entitled case dated February 9, 1977,
and request the opportunity to submit evidence and call witnesses.

This request for rehearing is made on the grounds that

as it orders that that portion of application for transfer involving
rights No. 32-2049, 32-2071 and 32-2079 is denied.

Claimants respectfully request that the Director of
Water Resources establish a date for a rehearing on the matter

(The election of this remedy shall not preclude the Seller from recovering damages against the Purchasers for waste upon or destruction to the premises and improvements.

As a further alternative, the Seller shall have the right, at the Seller's option, to declare the entire balance as immediately due and payable upon any such default as aforesaid, and may treat this contract as a note and purchase money mortgage on said real property and a security agreement on any personal property and pass title to the Purchasers subject to such mortgage and security agreement and proceed immediately to foreclose the same in accordance with the laws of the State of Idaho; to have the property sold and the proceeds applied to the payment of the balance due including accrued interest, any advancements made upon taxes, assessments, to protect Seller's security, costs and attorney's fees and the Seller shall have a deficiency judgment for any balance which may remain.

In the event an action is brought to enforce any of the terms of this agreement, the successful party to such action shall be entitled to recover from the losing party a reasonable attorney's fee, together with such other costs as may be authorized by law.
