---

Transfer 5450 combines the above referenced rights from Birch Creek and creates a 5798-acre permissible place of use for the newly formed Reno Ditch Company. The rights will have a common diversion point and water will be distributed to shareholders within the service area. This transfer resolves previous disputes among the water users.

Region water right and adjudication staff reviewed these rights and provided initial recommendations. Review of the rights as originally decreed and licensed provided further detail to each right. The total combined use under these rights is limited to a diversion rate of 77.06 cfs, a total annual diversion volume of 11,579.2 af, and the irrigation of 3,427 total acres each season within in the permissible place of use.

Season of use was identified as 04-01 to 11-01 under these rights to be consistent with previous transfers. Recommended conditions include watermaster control, measuring device and lockable controlling works, irrigation overlap, permissible place of use limits, combined right limits, and standard transfer conditions.
