	) DECREE TO CORRECT CLERICAL
	) ERROR; I.R.C.P. 60(a), <i>NUNC PRO</i>
	) <i>TUNC</i>

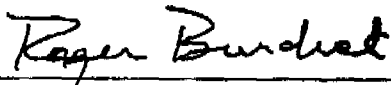

A *Partial Decree* was issued for the above-captioned water right on October 27, 2000. However, due to a computer coding error, the following "shoulder" remark was inadvertently omitted from the period of use element of the *Partial Decree*.

The use of water for irrigation under this right may begin as early as April 1 and may continue to as late as October 31, provided other elements of the right are not exceeded. The use of water before April 15 and after October 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

Therefore, pursuant to I.R.C.P. 60(a), IT IS ORDERED that water right 32-02051 is hereby decreed as set forth in the attached *Amended Partial Decree Pursuant to I.R.C.P. 54(b)*.

This order is being entered *nunc pro tunc* as of October 27, 2000, and is not intended to modify any subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

MEMORANDUM

TO: FILE NO. 32-02051
FROM: PAM SKAGGS/STATE OFFICE
SUBJECT: TRANSFER NO. 4844
DATE: January 17, 1997

=====

Transfer No. 4844 was filed to change the point of diversion, place of use, and source under Right No. 32-02051. The place of use is also reduced from 100 to 81 acres.

The transfer proposes to move this right to an existing system diverted from Indian Creek upstream from it's confluence with Medicine Lodge Creek. Water under Indian Creek Right Nos. 32-00006 and 32-00052 is delivered through the same pipeline and sprinkler system.

The application and watermaster comment form appear to contradict each other. The application notes that watermaster records indicate water has been delivered, while the comment form states that there is no record of delivery. It appears that the right was listed in the 1995 Adopted Budget for the water district and the applicant was charged.

The deputy watermaster, Greg Shenton, told region staff that the original ditch was washed out and delivery for the last few years has not occurred. He also endorsed the approval of this transfer. The SRBA Claim for this right claimed the place of use under the Indian Creek system. It would appear that the applicant has been diverting from the transfer point of diversion for some time and is attempting to correct the record.

Season of use and diversion volume were adjusted to the current standards. Rate of diversion was reduced to reflect the licensed rate of 0.02 cfs/acre for 81 acres, or 1.62 cfs. The remaining portion 0.38 cfs will be considered abandoned through approval of this transfer.

Recommended conditions include watermaster control, measuring device & lockable controlling works, irrigation overlap, right-of-way, abandoned portion, availability from original source, measuring device at original point of diversion and standard transfer conditions.
