Despite your capacity limitation, I propose recommending the rate previously suggested.

3. The original proposed combined-use limitation for diversion rate assumed 224 acres of flood irrigation. This has been adjusted to reflect the documentation that most of the place was actually sprinkler irrigated.
4. The combined-use limitation for acreage is adjusted to reflect the larger place of use for 31-10358.

Please call me if you have questions.

Sincerely,

Re: Notice of Error

Last week LaVar Newman visited with me in the office. At the field exam for this license, the examiner noted a system capacity of approximately 4.3 cfs. LaVar wanted the license to show that diversion rate and the examiner directed him to file an application, which was protested. LaVar states the protestant is now ready to withdraw his protest. I told LaVar that it is too late for a permit to be issued prior to the director's report, so this recommendation will have to stand per the 3.00 cfs license. He will have to wait for a permit and subsequent license.
