RE: 63-19649 & 63-19650

Dear Mr. & Mrs. Lewis:

I'm writing in response to your letter dated 12/7/1998 concerning the above referenced water rights. Enclosed is a Notice of Change of Water Right Ownership form for you to complete to change the ownership of 63-19649. Please complete the form and return it with a copy of the deed that conveys Lena Lewis' interest in the property to you. We will then change the records to reflect your ownership in the appurtenant water right.

In researching your concern that the two residences, three beefalo and 1 1/2 acres irrigation are covered by water rights, I discovered the following. Rights 63-10949 & 63-10950 as single domestic uses allow up to 1/2 acre of irrigation each with one home plus the beefalo. The rest of the irrigation is covered by your license 63-11063, copy enclosed, that was issued in 1992. The total of all three rights cover the two domestic uses, the stockwater and the 1 1/2 acres of irrigation.

I discovered in my review of your water rights that the legal description for the Point of Diversion (well) in 63-19049 & 63-19050 is incorrect. It appears to be a clerical error so we will make the necessary correction. A field exam conducted in 1991 for license 63-11063 places your well in NESENE, S34 rather than the SENENE, S34.

Please call me at the number below if you have any questions.

Sincerely,

Mel Schulte

Dear Sir or Madam:

I am writing to you concerning water rights for Permit #63-19649 and Permit # 63-19650. The property which was owned by Lena Lewis was deeded to Marvin & Joanne Lewis. Therefore, it appears that Permit #63-19649 should be changed to Marvin & Joanne Lewis.

The land is three (3) acres with two (2) residences and 1 1/2 acres which are irrigated to support three (3) beefalo. It appears that you are allowing only 13,000 gallons per day for this right. We are currently pumping approximately 24,000 gallons per day. We ask that this water right remain at this level.

Sincerely,

Marvin & Joanne Lewis

A 6" diameter well with a $\frac{3}{4}$ Hp submersible pump diverts water through a 1" buried pipe about 200' to a single family residence. About 30' from the home a pipe takes water about 40' to a hydrant where garden hoses are used to sprinkle irrigate. At the well a hydrant is also used to sprinkle irrigate by garden hose. 2 Hydrants from the home are also used for the same purpose. This system also provides water for the domestic and stockwater use under A63-19650 and the domestic and stockwater under A63-19649. See Remarks on page 4 for continuation

H. REMARKS AND OVERLAP REVIEW ANALYSIS

The pressure gauge at the well was not serviceable. This permit when combined with A 63-19650 ^{and A 63-19649} cannot exceed the system capacity of .03 cfs.
63-9918 is an irrigation right West of this permit and has no effect on this permit.
The pump in this system appears to be underpowered for all of the demand on the system.
