DESCRIPTIVE SUMMARY

This document is the Stipulation to Resolve Subcases, filed by McGrew Ranch LLC
("McGrew") and the United States of America ("United States").

STIPULATION

McGrew and the United States (Collectively "Parties") by and through their respective undersigned counsel, hereby stipulate and agree as follows as to the above captioned water right numbers.

1. WITHDRAWAL OF OBJECTIONS BY UNITED STATES. The United States agrees to dismiss with prejudice its objections to water right numbers 63-31031, 63-31459 and 63-31460. The Parties agree and stipulate that the elements of each water right listed should be decreed as described below.

2. WATER RIGHT DESCRIPTIONS. The Parties agree and stipulate that water right claim numbers 63-31031, 63-31459 and 63-31460 shall be decreed consistent with the following provision, as well as all remaining provisions in this Stipulation:

Claim number 63-31031. The point of diversion and place of use in the NWNE of Section 22, T1N, R10E shall be deleted from the water right description. The resulting water right is wholly on private land and should be decreed to McGrew.

Claim numbers 63-31459 and 63-31460. These water rights shall be split between McGrew and the United States. Claim number 63-31459 shall be split and renumbered as 63-31989 to McGrew and 63-31990 to the United States. Claim number 63-31460 shall be split and renumbered as 63-31991 to McGrew and 63-31992 to the United States. As a result of the splits, 63-31459 and 63-31460 should be disallowed.

Purpose and Place of Use of Water Rights. The Parties agree that the purpose of use of water right numbers 63-31989, 63-31990, 63-31991 and 63-31992 is only for the

watering of livestock lawfully within a permitted federal grazing allotment and that the number of livestock within the allotment shall not exceed the amount authorized by a federal grazing permit. The Parties further agree that the place of use of water right numbers 63-31989, 63-31990, 63-31991 and 63-31992 shall remain *in situ*.

3. CONFORMING DOCUMENTS. The Parties agree that they will execute and file any necessary documents with the SRBA Court and IDWR to conform the elements of water right claim numbers 63-31031, 63-31989, 63-31990, 63-31991 and 63-31992 to the provisions described in this Stipulation.

4. GRAZING PERMITS AND MANAGEMENT OF FEDERAL LANDS. The Parties agree that water right numbers 63-31989, 63-31990, 63-31991 and 63-31992 shall not alter the rights of a permittee under a valid grazing permit nor impede the authority of the United States to manage federal lands.

5. UNITED STATES' PERMITTING ACTION. McGrew agrees that the imposition of terms and conditions by any federal authority on any grazing permit, or any action by any federal authority to limit, modify, revoke, or terminate any grazing permit, and any consequent limitation or elimination of the ability of McGrew or any successor thereto to divert, store, or use water, shall not be construed to be a taking, in whole or in part, of any water right.

6. NO FURTHER CLAIMS. McGrew agrees that they will not file additional claims in the SRBA for water rights where the place of use or point of diversion is located on federal lands and the United States agrees that it will not file additional claims in the SRBA for water rights where the place of use or point of diversion is located on federal lands underlying the federal Grazing Allotments on which McGrew is the grazing permittee, except by agreement between the

United States and McGrew. This paragraph shall not affect or apply to any claims already filed in the SRBA by any Party as of the effective date of this Stipulation.

7. ISSUANCE OF PARTIAL AND FINAL DECREES BY THE COURT. If for any reason the Court does not issue partial and final decrees for any of water rights numbers 63-31031, 63-31989, 63-31990, 63-31991 and 63-31992 pursuant to the terms of this Stipulation, this Stipulation is null and void and shall have no effect, and the Parties shall proceed with a determination of their water rights and/or objections under applicable law.

8. STIPULATION NOT TO BE USED AGAINST THE PARTIES. The Parties agree that this Stipulation has been entered into based upon good faith negotiations for the purpose of resolving legal disputes, including pending litigation, by compromise and settlement and that nothing in this Stipulation, or any offers or compromises made in the course of negotiating this Stipulation, shall be construed as admissions against interest or tendered or used as evidence to show the validity or invalidity of any water right claims made by the Parties, or as an admission or concession of wrongdoing or liability, or shall be used in any manner by any party in the SRBA in any future proceedings in the SRBA, in any appellate proceedings concerning the SRBA, or in any other proceeding, other than those seeking approval of this Stipulation by the SRBA Court, for interpretation or enforcement of this Stipulation, or for a purpose contemplated by Idaho Rule of Evidence 408.

9. RESERVATIONS. The Parties agree that this Stipulation has been entered into based upon good faith negotiations for the purpose of resolving legal disputes, including pending litigation, by compromise and settlement and that nothing herein shall be construed as precedent in any other proceeding or context. Nothing in this Stipulation shall be construed to deprive any

federal official of authority to revise, amend, or promulgate regulations. Nothing in this Stipulation shall be construed to commit any federal official to expend funds not appropriated by Congress.

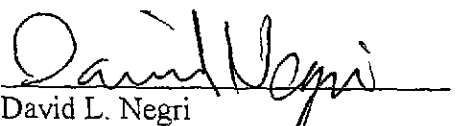

10. VOLUNTARY EXECUTION. This Stipulation was entered into and executed voluntarily by the Parties in good faith, and without any fraud, misunderstanding, overreaching, misrepresentation, duress, or undue influence.

11. BINDING EFFECT. This Stipulation shall be binding on any and all successors, assigns, heirs, executors, and administrators of each of the Parties.

12. COSTS AND ATTORNEY FEES. Each Party shall bear their own costs and attorney fees.

13. EFFECTIVE DATE. This Stipulation shall become effective upon execution by all of the Parties.

DATED this 13th day of October, 2004.

I recorded the Settlement Stipulation in Mountain Home this morning. As we had previously finished up the water right descriptions for the "split" water rights there was a blank for the date and a blank for the instrument number the needed to be filled in on them. The information for each water right is the same. The date of recording is October 19, 2004 and the instrument number is 360953. The descriptions as I received them the last time from the Department are attached. I've also filled in the two blanks.

We've been sharing information with Charlie Honsinger. The last information we received is that McGrew Ranch LLC's address has been changed by the Post Office from the old rural route to a rural street address that is more conducive for local fire, ambulance and law enforcement locating. I remember this happening throughout Lost River when I was in Mackay. The old address of Rt 1, Box 463 needs to be changed to 15600 NE Hot Creek Road, if it is at all possible at this stage. I did not make this address change on the attachments for 63-31989 and 63-31991 because that would be your decision. If you determine to allow this address change, then the water right description for 63-31031 should also be changed accordingly.

When you get this information entered into your computer system for each water right description, would you please e-mail them back to me? Then I'll print them so they can be included with the individual SF5's and begin circulating final documents for signature and filing with the court. Thank you. If you have any questions about this matter please contact me.

	)	
Case No. 39576	)	Standard Form 5
	)	
	)	AMENDED CLAIM
	)	FOR DOMESTIC & STOCKWATER RIGHTS
_____	)	

This form is used to report the stipulated elements of one "domestic and/or stockwater" right acquired under state law and/or one federal reserved water right and to amend the Notice of Claim. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the elements of the resulting water rights should be described per the attached. The parties and IDWR agree and stipulate that this claim shall be "split" into two claims, claim numbers 63-31991 and 63-31992, and the use of these claims will be limited to a total combined diversion rate of .02 cfs and a total combined quantity of 13,000 gallons per day. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages. The parties and IDWR further agree and stipulate that water right 63-31460 should be disallowed.

The DeVenys' settlements were early in the process when the stockwater settlements were coming fast and furious. IDWR relented for those specific cases as an exception IDWR does not intend to repeat. Any divisions of reported (recommended) rights create new water right descriptions that necessitate new numbers for the splits. This approach reduces the workload at IDWR for several staff and reduces confusion in the future for the path from recommended rights to decrees issued by the Court. If the USFS would like IDWR to contact McGrew about the settlement, that could be done.

Subject: Splits

With respect to the proposed McGrew water right splits resulting from a recent settlement agreement, this is identical other similar cases we've had where only one party (either the FS or permittee) filed a claim and the other party objected to the recommendation. The settlement agreement called for the water right to be split between the two parties and both water rights to have conjunctive use language appear on the face of the water right description that accompanied the SF5. These were subsequently decreed by the Court as they appeared in the SF5.

One situation I remember is with DeVenys' in Basin 78 with the big stockwater settlement. Out of about 35 objections there were 6 cases where the FS had claims to locations where the DeVenys' did not. So FS claims were split to give DeVenys' a claim to the same source. This was the case with FS claim nos. 78-04224 (78-12180), 78-04249 (78-12181), 78-10629 (78-12182), 78-10630 (78-12183), 78-12010 (78-12184), and 78-10656 (78-12185). And exactly the opposite where DeVenys' had claims to 2 sources 78-10338G (78-12178) and 78-10339B (78-12179) where the FS had filed no claim.

The "split" resulted in a new number, shown above in parenthesis. The new numbers are consecutive regardless of which party had the original claim. So this all happened at the same time for settlement with DeVenys. Jamie handled this for us. It was an accepted way to finish the business at that time. McGrew also wanted something similar to the "stockwater settlement". Consequently a similar stipulation was agreed upon and this is what prompted the proposed splits you have in front of you today for the McGrew cases. I recall some other splits under similar terms with other permittees, but my memory isn't quite as clear and I'd have to research further for other examples.

Please contact me if there is anything else I can do to help this along. Thank you.
