Memorandum

To: 65-11412

From: D. Shaff

Date: January 6, 2003

Subject: Telephone call with David Jarvis

Mr. Jarvis is a paralegal working for DOJ who is researching the history of this water right dating from the Payette River Basin Adjudication (PRBA). His question to me was the nature of a conversation I had in 1983 with Ed Thomas, a former Bureau of Reclamation engineer, about the filing of a water right claim in the PRBA for the hydro-pumps at Black Canyon dam. I told him I did not recall those conversations, although I memorialized the Thomas conversation within the PRBA file. I told Jarvis I would have to rely on the memoranda in the file for any memory I might have. I did speculate today not from memory why the United States filed in the PRBA and Emmett Irrigation District did not.

CIVIL NO. 3667

MOTION OF UNITED STATES OF AMERICA
TO PERMIT LATE FILING OF
OBJECTION TO PROPOSED FINDINGS
OF WATER RIGHTS

United States of America, hereinafter referred to as Claimant,
moves this Court for permission to file and assert an objection to the
proposed findings of water rights, in this proceeding, said motion being
based upon the following grounds and reasons:

I.

The proposed findings of water rights should be amended to include
a use of surface water for production of power with the Claimant,
applied to a beneficial use on April 1, 1925, Claimant having consis-
tently applied such water to a beneficial use since that date. The
details regarding Claimant's water right are included in Claimant's
Objection to Proposed Findings of Water Rights, attached hereto as
Exhibit 1.

II.

The power water is used to lift irrigation water to the Emmett
Irrigation District's North Side Canal. The pump is located in Black
Canyon Dam, a facility of the Boise Federal Reclamation Project owned by
the Claimant and operated by the Bureau of Reclamation. The claimant

contracted with the Emmett Irrigation District on November 18, 1921, to construct and operate a direct drive pump in Black Canyon Dam and to deliver water to the Emmett Irrigation District's North Side Canal. Said diversion replaced an upstream gravity diversion works previously operated by the Emmett Irrigation District. The claimant has used the aforesaid water right for purposes of operating said pump since April 1, 1925.

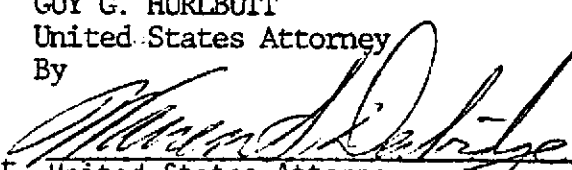

III.

The proposed findings of water rights in this proceeding do not include the aforesaid water right of Claimant and, for both legal and equitable reasons, should be amended to set forth such water right. The aforesaid water right is one of long standing and use. The recognition of the aforesaid water right will not cause damage or deprivation to any person or entity.

Accordingly, Claimant respectfully requests that this Court enter its Order permitting a late filing of Claimant's Objection (Exhibit 1) to the proposed findings of water rights in this proceeding.

Dated this 12th day of March, 1984.

OBJECTION OF UNITED STATES OF
AMERICA TO PROPOSED FINDINGS
OBJECTION TO PROPOSED FINDINGS
OF WATER RIGHTS

United States of America, hereinafter referred to as Claimant,
objects to the proposed findings of water rights upon the ground and for
the reasons that follow:

I.

Claimant has, since April 1, 1925, held a water right for the power
use of surface water from the Payette River. The water has been
diverted and applied to a continuous beneficial use at Black Canyon Dam,
and such water right remains necessary to the operation of said
facility.

II.

Claimant's water right is established and set forth in Exhibit A
(notice of claim to a water right) attached hereto, which is
incorporated herein by reference.

III.

The water right of Claimant, as established and set forth in this pleading, should be included in the Proposed Findings of Water Rights in these proceedings and should also be included in the Court's final findings, orders, and judgments which acknowledge, establish, and determine water rights.

IV.

Claimant's water right is one of long standing and use. The recognition of that water right in these proceedings will not cause damage or deprivation to any person or entity.

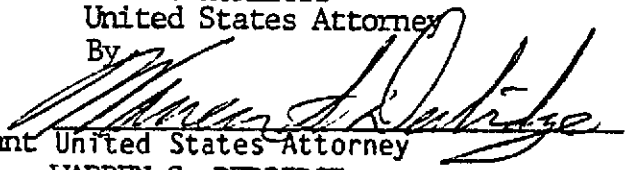

Wherefore, Claimant requests relief as follows:

1. That the Proposed Finding of Water Rights in this proceeding be amended to include Claimant's Water Right as set forth in this pleading.
2. That any final findings, orders, and judgments entered in this proceeding include Claimant's water right as judicially determined and valid, with the priority date of April 1, 1925.

Dated this 12th day of March, 1984.

IN THE MATTER OF THE GENERAL
DETERMINATION OF THE RIGHT
TO THE USE OF SURFACE AND
GROUND WATERS OF THE PAYETTE
RIVER DRAINAGE BASIN.

CIVIL NO. 3667

MOTION OF UNITED STATES OF AMERICA
TO PERMIT LATE FILING OF
OBJECTION TO PROPOSED FINDINGS
OF WATER RIGHTS

United States of America, hereinafter referred to as Claimant,
moves this Court for permission to file and assert an objection to the
proposed findings of water rights, in this proceeding, said motion being
based upon the following grounds and reasons:

I.

The proposed findings of water rights should be amended to include
a use of surface water for production of power with the Claimant,
applied to a beneficial use on April 1, 1925, Claimant having consis-
tently applied such water to a beneficial use since that date. The
details regarding Claimant's water right are included in Claimant's
Objection to Proposed Findings of Water Rights, attached hereto as
Exhibit 1.

II.

The power water is used to lift irrigation water to the Emmett
Irrigation District's North Side Canal. The pump is located in Black
Canyon Dam, a facility of the Boise Federal Reclamation Project owned by
the Claimant and operated by the Bureau of Reclamation. The claimant

contracted with the Emmett Irrigation District on November 18, 1921, to construct and operate a direct drive pump in Black Canyon Dam and to deliver water to the Emmett Irrigation District's North Side Canal. Said diversion replaced an upstream gravity diversion works previously operated by the Emmett Irrigation District. The claimant has used the aforesaid water right for purposes of operating said pump since April 1, 1925.

III.

The proposed findings of water rights in this proceeding do not include the aforesaid water right of Claimant and, for both legal and equitable reasons, should be amended to set forth such water right. The aforesaid water right is one of long standing and use. The recognition of the aforesaid water right will not cause damage or deprivation to any person or entity.

Accordingly, Claimant respectfully requests that this Court enter its Order permitting a late filing of Claimant's Objection (Exhibit 1) to the proposed findings of water rights in this proceeding.

Dated this 12th day of March, 1984.

DETERMINATION OF THE RIGHT)	
TO THE USE OF SURFACE AND)	OBJECTION OF UNITED STATES OF
GROUND WATERS OF THE PAYETTE)	AMERICA TO PROPOSED FINDINGS
RIVER DRAINAGE BASIN.)	OBJECTION TO PROPOSED FINDINGS
)	OF WATER RIGHTS

United States of America, hereinafter referred to as Claimant,
objects to the proposed findings of water rights upon the ground and for
the reasons that follow:

I.

Claimant has, since April 1, 1925, held a water right for the power
use of surface water from the Payette River. The water has been
diverted and applied to a continuous beneficial use at Black Canyon Dam,
and such water right remains necessary to the operation of said
facility.

II.

Claimant's water right is established and set forth in Exhibit A
(notice of claim to a water right) attached hereto, which is
incorporated herein by reference.

III.

The water right of Claimant, as established and set forth in this pleading, should be included in the Proposed Findings of Water Rights in these proceedings and should also be included in the Court's final findings, orders, and judgments which acknowledge, establish, and determine water rights.

IV.

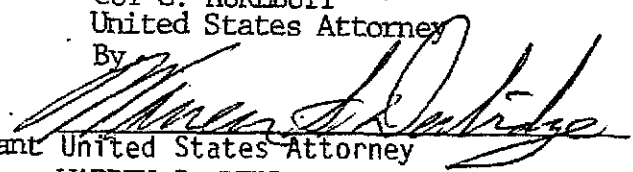

Claimant's water right is one of long standing and use. The recognition of that water right in these proceedings will not cause damage or deprivation to any person or entity.

Wherefore, Claimant requests relief as follows:

1. That the Proposed Finding of Water Rights in this proceeding be amended to include Claimant's Water Right as set forth in this pleading.
2. That any final findings, orders, and judgments entered in this proceeding include Claimant's water right as judicially determined and valid, with the priority date of April 1, 1925.

Period of Use - Add Volume : 106,911 AFY, ?

3. Give a brief explanation as to why you disagree with these portions:

Name - This portion should be changed to update information and expedite action by our agency.

Quantity - Volume data shows the annual volume that can be beneficially used under this water right.

Priority Date - Should be May 5, 1924, as identified in the Boise Project History.

Period of Use - Is not consistent with irrigation season listed on other water rights and does not match the date claimed. This right is used to facilitate delivery of irrigation water to Emmett Irrigation District under their natural flow rights and storage contracts with the Bureau of Reclamation. Therefore, the period of use should be the full irrigation season.

Volume data shows the annual volume that can be beneficially used under this water right.
