Re: Office visit of James Mays

Today James Mays came in to the office, we discussed his adjudication claims.

- I reviewed 1987 NAPP photos & interpretation of '87 POU. James Identified some lands in section 10 along the NE edge of the irrigated place of use which he asserts are irrigated pasture. This is substantiated by Al Ruberry's sketches on the composite ASCS map which Al used during his field inspection. James also identified an irrigated pasture in section 14 NESE. Al's photography also appears to substantiate this, though the color TIF's don't particularly. The attached GIS illustration includes both additional POU's.
- We discussed the lack of historical water rights on the W 1/2 of the SE 1/4 of section nine. James identified this as the "Jensen" place, formerly the "Charles Cowgill" and before that the "Foster" place. Original water right was A. H. Williams decree. This appears to be wr's 33-00031D and 33-00031H.

As we looked at AJ and WR databases, and claim files, the following sources may help:

1. Transfer 1082
2. Canceled license 33-02132
3. Transfer 423.

James' understanding is that the water was transferred first to the "Foster Place" which appears to be 80 acres in the NE 1/4 of section 10, then up to the former Lowell Jensen/Ed Miller place (6N 29E 33 SE 1/4), then back to the Jensen place in 5N 29E 9. James purchased the land from Jensen. James believes that he has documentation from filings with Butte County to substantiate these accomplished transfers, which will give additional "historical" acres.

Unless there are more water rights discovered, this will not give James any more cfs but will avoid the need to recommend an accomplished transfer from the 2103/2107/transfer 750 poll.

- James signed enlargement claims 33-10984 and 33-10985. He claimed priority of 1986 on this enlargement & plans to provide documentation. Donna will bring documentation tomorrow. He also signed an amended claim for A33-00019A which restores 0.02 cfs that Al Ruberry discovered had not previously been claimed.

1) Transfer 1082 transfers 31H to NE 1/4 SW 1/4 and NW 1/4 SE 1/4 of Section 15 5N 29E v1 POU @ Hartman Diversion.

2) License 2132 was a storage right on Summit Creek -

3) T423 - copy in file A33-10073- Parts of 90, 91, 92, & 93 to 5N 29E II N 1/2.

Re: Accomplished Transfer, PPU

Earlier reviews of the historical place of use for the Mays Land and Livestock rights failed to find historical use in the W 1/2 SE 1/4 Section 9, T5N R29E.

The attached watermaster records, deeds, and quitclaim deed document the accomplished transfer of portions of 33-00090, 33-00091, and 33-00092. Al Ruberry has documented the ownership splits. These rights are the Mays Land and Livestock "Cowgill" rights.

The deeds show the place of use also includes parts of the SE 1/4 of section 33, T6N R29E. This is currently owned by Thomas Hejtmanek. Al Ruberry's documentation of the splits of the water rights shows no conflicting claims on the water rights, and a search using AJQ4 shows no claim to these water rights associated with the section 33 POU.

Based on the above I recommend the lands in the W 1/2 SE 1/4 of section nine as part of the permissible place of use by accomplished transfer, and not enlargement.

Justification:

- 1) 1987 GIS shows irrigable acres in W $\frac{1}{2}$ NE $\frac{1}{4}$ section 9. Transfer 780 lists entire tract as allowable POU but ditch follows hwy, west of hwy cannot be gravity irrigated.
- 2) License 2107 developed ^{partially} as supplemental right, presumably all listed POU within area of transfer 780 indicates beneficial use actually developed w/ surface rights.
- 3) Absence of lands in W $\frac{1}{2}$ SE $\frac{1}{2}$ section 9 and NWNE of section 16 is either an oversight in both the transfer and the license, or it indicates that land was not part of original development. Treat as accomplished transfer if possible.

6) This same analysis applies to the accomplished transfer of well water under 33-02107.

7) Accomplished transfer under 33-2103 & 33-2107 includes the following:

8) Acres transferred from:

	<u>Original</u>	<u>GIS</u>	<u>transferred</u>

15 SE SW	38	30	8

In both cases enough acres were transferred from to justify acres transferred to.

Howe, Idaho 83244

Dear James,

Enclosed are some GIS illustrations to show what I'm planning with your Adjudication Recommendations.

Number 1 shows the place of use identified for the decrees and licenses, as farmed in 1987. I plan to recommend all the water rights and claims for that large permissible place of use. Number 2 shows the place of use recommended by the field examiner for Permit 33-07183. The permit will not likely be issued soon enough to fold it into a permissible place of use, but you could accomplish that with a transfer after the partial decree is issued.

Illustration number 3 shows the 1977 place of use overlaid on the place of use authorized by the exchange well licenses and the transfers of the decreed water. You will notice that there are about 62 acres on the west that are irrigated but not covered by licenses or transfers, and that there are even more acres on the east that are covered, but weren't irrigated in 1977. I'd like to recommend the 1977 place of use as an accomplished transfer. This preserves the original priority dates. To make this recommendation, we are asserting one of two things:

- 1) At the time of the transfers, the 1977 place of use was developed, instead of the place of use described in the transfers.

Or:

- 2) Sometime before 1977, about 62 acres of the authorized place of use on the east was dried up and the water was moved to the lands on the west that are irrigated but not authorized.

If we claim it this way, at some point we may have to present evidence that one of those things actually took place.

The other option is to simply claim the 62 acres on the west as an enlargement. This would give those 62 acres the priority date of the expansion. My aerial photography documents a 1977 priority date, but you could probably come up with evidence (ASCS photos, affidavits from yourself, neighbors, or hired help) for an earlier priority date. This is a more defensible claim, if it ever comes to that.

Map number 4 shows the 62 acres in yellow, and shows that I plan to recommend the pivot and wheelines on the west as an enlargement. The accomplished transfer and enlargement will be recommended as parts of the larger permissible place of use. The enlargement will have a priority date of the earliest date you can

document irrigation of those lands. I know it was earlier than 1987, but '87 is the earliest year I can document with what I have now.

There is another option on the wheellines and west pivot, and that is to claim those acres also as an accomplished transfer. This would preserve an early priority date for all those acres. To do that, you'd have to document that enough of the "green" acres outside the blue line had been historically farmed, and then dried up within five years of developing the pivot and wheels. Probably a tough thing to prove.

Please review these maps and possibilities, and let me know what you think of the direction I'm heading. I will be out of the office until September 29. Please call as soon as you can after then, because we are heading for a deadline. If we go with enlargement claim(s), I need to prepare those and get your notarized signatures.

Thank you,

Bryce A. Contor

Re: Acreage, Transmission Loss.

I. General Description of Mays Rights:

Mays' place of use is composed of four classes of lands. The original farm is located in E ½ of SE ¼ of section 9, section 10, section 14, and section 15. The Jensen (Cowgill) lands are the lands in the NE of section 9 and the W ½ of the SE ¼ of section 9. The enlargement lands are in the N ½ of section 16, and the permit lands are in the S ½ of section 16.

The original farm is covered by rights 17A, 18A, 19A, 20A, 21A, 22A, 31D, and 31H. It is also covered by right 23A which is part of combined right 10073 and right 86, which is a part of combined right 10074. The original rights have had formal transfers which authorize their application to all the lands irrigated on the original farm. The transfers do not list acres per quarter section.

The Jensen or Cowgill rights include 90D, 91C, a part of original right 92 now incorporated into combined right 10073, and a part of original right 93 now incorporated into combined right 10074. These rights have had an accomplished transfer to the current place of use. There are enough original CFS to justify the full acres of place of use without contemplating enlargement. File 33-00017A contains documentation of these accomplished transfers.

*and part of
16 -
see
file A33-
00017A
map.*

Rights 10984 and 10985 authorize the irrigation of the enlargement lands in section 16. The permit lands in section 16 are authorized by permit 33-07183, which was not required to be enjoined to the adjudication.

II. Acreage

To calculate allowable acres of irrigation for each water right, the following assumptions are made:

- The original decree implied .02 cfs/acre.
- The Cowgill accomplished transfers did not work any enlargement or expansion.
- Since the described places of use for transfers to the original farm cover all the historically irrigated lands, no accomplished enlargement or expansion applies to the original Mays rights.

Based on these assumptions, the Cowgill rights each have an authorized irrigated acres calculated by dividing diversion rate by 0.02. The Mays rights have an authorized irrigated acres calculated by dividing diversion rate by 0.018 cfs/acre. This rate was obtained by dividing the sum of the Mays cfs by the apparent original POU for all the rights. The groundwater rights are recommended for the licensed acres, and the enlargements are recommended for 169 acres.

The result is that the sum of the individual groundwater rights is slightly less than the permissible place of use. This is reasonable, as the Cowgill lands were never licensed for the groundwater usage. The surface water rights individually sum to slightly more than the permissible place of use. This is also reasonable, as assumptions for the Cowgill rights amounted to assuming a full 40 acres per quarter-quarter section, and less than that is actually farmed.

III. Transmission Loss

Historically, many of these rights have been assessed a transmission loss by the watermaster. Some of the formal transfers also imposed a transmission loss to some of these rights.

Comments on each individual right discuss transmission losses. More general discussion is included in file 33-00002.
