Re: B33 Irr POD's objected to by BLM

POD LOCATION

T11N R26E S10 NWNENE

This legal description defines the beginning of a channelized portion of Sawmill Creek. Apparently back in the 1920'-1930's there were several attempts tried to preserve water from Sawmill Creek because the stream would "break". Among them were things like a canal dug from Sawmill Creek to Summit Creek and a channelization project aimed at cleaning and to some extent straightening the Sawmill Creek channel as it flowed across Mud Flats (ref: OQ U-82).

SAS ATTACHED
LIST OF SAs
AL RIGHT S.

In review of the adjudication claims from Sawmill Creek and the Little Lost River, it was initially considered that the source(s) could all be Little Lost River since it was difficult to determine where Little Lost River started and Sawmill Creek ended. Seeing no difference in source recommendations of Sawmill Creek claims were changed to Little Lost River. The Preliminary Director's Report was filed only to find that Sawmill Creek now occasionally breaks at the shearing corrals, which is about half-mile upstream from the confluence of Sawmill Creek and Summit Creek; The beginning of the Little Lost River. This new information seriously impacted recommendations since the Sawmill Creek claims, now changed to Little Lost River, became senior to the junior Little Lost River rights, causing injury to the junior Little Lost River appropriators.

Ultimately, the source issue was changed back to Sawmill Creek. Now a problem arose where a Point of Diversion had to be defined for the Sawmill Creek claims since actual deliveries are made from Little Lost River (except 33-00107 which is a true Sawmill Creek right, but, Decreed as a Little Lost River right). The 1927 Decree states "at the mouth of Sawmill Creek". However, there were no rights diverted at the mouth of Sawmill Creek. And, the dilemma of where was the mouth of Sawmill Creek. In consideration of the channelization project aimed at preserving waters of Sawmill Creek it was determined that the channelization had in-fact changed the streambed to a canal, saving water. Therefore, the beginning of the channelization would now become the Point of Diversion and the ending of the channelization would be a Point of injection back into the Sawmill Creek stream channel. The Point of Injection is near the shearing corrals, about half-mile upstream from the confluence of the streams. The Sawmill Creek claims Point(s) of Diversion are recommended as Points of Re-diversion from Little Lost River at or near their respective Place(s) of Use. This recommendation preserves both the source and the Sawmill Creek priority dates and, forgoes the injury issue of junior Little Lost River rights.

SCANNED

NOV 0 1 2002

T9N R27E S4 SWNWNE

This objection is a true error. Apparently a typographical error was made during the recommendation process. The TRUE Point of Diversion should read **T9N R26E S4 SWSWNE**. The claimant, Mr. Waymire has been notified and is now aware of the issue.

33-00036
00089
000930

T11NR27E S31 NESESE

BLM believes this POD should read S31 SENESE based on GPS data. However, during the field exam of these claims several Points of Diversion were identified to include the one in question. The recommended POD in-question is an actual Point of Diversion where an unnamed stream intersects with the collector ditch and can be verified using OQ V-32. The site proposed by the BLM is a drainage that was dry during the field exam, thus no recommended POD.

33-00065
33-7087

T6N R28E S2 SESWSW

Specifically named is SRBA claim 33-10995. This claim identifies private lands historically irrigated by the Hawley's, later sold without water. The Point of Diversion used during the irrigation era is on BLM but is now longer used. The claimant filed this SRBA claim and Transfer No. 4551 in an effort to preserve the acreage irrigated by surface water. The transfer is in-place awaiting the BLM objection to prompt IDWR to review and act. However, the transfer is currently protested.

33-00051 Thru
33-00060

T6N R 28E S11 SESENW

This is an historic Point of Diversion dating back to the late 1800's (according to the water right priority dates, 1885-1891) and is one of three serving the ranch. One of which previously mentioned above, T6N R28E S2 SESWSW. The other is within the private holding of the ranch.

33-10996 is an enlargement claim for acres on BLM lands that were historically irrigated by the Hawley's and is part of the Transfer No. 4551 aforementioned. BLM is aware of this claim and supports the transfer of acreage to private lands. As mentioned previously, the transfer is protested.

T7N R28E S21 NWNWSW

According to the Proof of Beneficial Use filed for this right (33-07010) this well dates to the 1940's. However, the Licensed date of priority was March 19, 1971, but then Transfer No. 3809 was filed to "unstack" surface and groundwater rights. As a result, the priority date of the well was advanced to July 2, 1990. Surface water decreed to this ranch date to 1885 to 1891.

This particular well dating to the 1940's (unsupported evidence of prior claimant) was located according to the initial survey dating to July 9, 1890, which no doubt established fence lines. A resurvey of the East line of Section 21 was done in August 1941. Then, in 1978, another resurvey was done as, evidenced by the monument caps. This 1978 resurvey puts the TRUE Point of Diversion of the 33-07010 well in the NENWSW (a BLM QQ). However, this matter was discussed with Ms Deena Teal, BLM, Idaho Falls District Office, in October of 1996, shortly after the discrepancy was found. Ms Teal indicated, at

Rocky Ross

SCANNED

NOV 01 2002

that time, that since the well predated some 1976 ruling, by which BLM operated, they (BLM) would not protest the actual POD.

This basically explains the history of the well and the recommendation; however, the listing of the POD as NWNWSW is clearly an error. The CVR shows the POD to be located as NENWSW Sec. 21, which is accurate.

TSN R28E S31 SWNWSE

This POD defines a well used solely for mitigation and is defined as an amendment to the 1927 decree as a Judgement against Orville Nicholson, 1954. The recommendation does define a Place of Use; however, this POU is by exchange with surface waters as defined in the Judgement. The period of use is 4/1 to 7/15 annually, when all this well does is deliver water to the river. The Objection is not to the Point of Diversion, but rather to the Point of Injection. And, in-fact, as recommended this Point of Injection is accurate.

T6NR29E S31 NWSWNW

This is another typographical error. The recommended POD should read T6N R29E Section 30 NWSWNW. There is a pending Transfer to correct the actual POD location to T6N R28E Section 25 NESENE.

Subject: Sawmill Creek Rights

This morning we met via teleconference with Dave Tuthill and Peter Anderson. One of the things we discussed was the Sawmill recommendations. During our call, Bill Stauffer called and reported that he had discussed the Sawmill recommendations with others, including Don Isham, James Andreason, and David Andreason. They all concur with the proposals in the January 6 letter. James Mays has sent us written concurrence.

Per Dave Tuthill's instructions to Al and me, I have gone ahead and changed the source of Sawmill Creek rights back to "Sawmill Creek, tributary to Little Lost River." The point of diversion is 11N 26E section 10, NWNENE, and the point of injection is 10N 27E section 18, NWSESW. The former points of diversion have been identified as points of redirection. I removed any comments relating to change of source and I removed condition C02.

The rights I changed were:

R33-00023B
R33-00030
R33-00043
R33-00077
R33-10070
R33-10073
R33-10084
R33-10086

I'll put a new profile report and a copy of this memo in each file.

There were other Sawmill rights which I did not change. These are:

R33-00038 1927 decree & claim list source as
Little Lost River
R33-00096B Recommended w/ source "Summit Creek"
R33-00107 Recommended originally w/ source
"Sawmill Creek"

Sawmill Creek Water Users
Water District 33
Howe, Idaho, 83244

Dear Watermaster and Water Users:

Based on the information available to the department at the time, Idaho Department of Water Resources recommended the Little Lost River as the source for water rights originally decreed with a source of Sawmill Creek. This change effectively puts the Sawmill Creek rights on a par with Little Lost River rights.

Through the Notice of Error process, additional information has been brought forward indicating that the recommendations should be changed to show the source as "Sawmill Creek" as originally decreed. This change would afford protection to holders of Little Lost River rights that have priorities junior to May 25, 1891, the priority for decrees from Sawmill Creek.

The 1927 decree lists "the mouth of Sawmill Creek" as the Point of Diversion, with implied injection into the Little Lost River and implied points of rediversion near the places of use.

It appears that the basis for these Sawmill Creek rights was a channelization or improvement of Sawmill Creek. We have tentatively selected the apparent beginning of the channelization as the recommended Point of Diversion, as illustrated on the attached maps. The confluence of Sawmill Creek and Summit Creek would be recommended as the Point of Injection, and the headgates on the Little Lost River as Points of Rediversion.

To administer Sawmill Creek rights separately from Little Lost River rights, the watermaster would have to measure the contributions of Sawmill Creek to the Little Lost River. The attached maps show the apparent historical location where these measurements were taken and a proposed alternate measurement point. The measurement point would not be specified in the water right recommendations but would be a practical matter for the watermaster's administration.

assessing losses should be recommended.

2. Status of Sawmill Creek rights:

The Sawmill rights are perplexing. The watermaster has told me that there are no diversions from Sawmill Creek, that all of the Sawmill rights are diverted from the Little Lost River somewhere below the confluence of Sawmill and Summit Creeks. The one exception to this rule is that Pancheri diverts his Sawmill rights from Wet Creek. The Sawmill-Summit Creeks confluence is where the Little Lost River begins. There are no Sawmill rights which are diverted out of priority. A review of the decree shows that the point of diversion given for most Sawmill rights is listed as 'the mouth of Sawmill Creek'. The decreed places of use for many of these rights are as far south as the Howe area. I question whether any of the decreed Sawmill rights were ever actually diverted from Sawmill Creek. My water rights list indicates that all of the Sawmill rights are delivered with some type of loss. I do not know the basis of these loss assessments and suspect that they may have been charged due to informal point of diversion transfers made subsequent to the decree. Since we do not really know where these rights were originally diverted I would not suggest changing the existing loss assessments.

3. Exchange wells:

I have not had an opportunity to generate a separate list or summary of groundwater exchange wells and their points of injection and rediversions. I do suggest that the District should adopt a resolution regarding losses associated with these wells. One of the methods for evaluating losses outlined in the Brockway paper should be adopted. As Brockway has suggested, the Uniform Linear Loss method is preferable. As discussed by users, the district should consider installing the monitor radios on exchange wells and adopt a resolution requiring such installation and that the equipment and installation cost be borne by the exchange well owners.

4. Measuring devices and headgate controls:

The watermaster reports to me that nearly all of the diversion have adequate measuring devices. Brockway's paper indicates that some diversions either do not have measuring devices, they are inadequate or that they are in need of repair or maintenance. I would suggest that the District adopt a resolution that all diversions, including groundwater exchange well diversions and rediversions be fitted with adequate measuring devices and watermaster control by a specified date and that the watermaster be directed to refuse delivery for any diversion not adequately fitted with a measuring device. I will offer the district my or the Department's assistance in reviewing the diversions and measuring devices prior to or at the beginning of the irrigation season.

Subject: RE: Wet Creek

If I you could send me copies of your 1993 memos that would help a great deal. Your recollections match what David has told me. As near as I can tell the delivery losses are assessed to those rights which have had an accomplished transfer of POU since the decree. As you say, most of the rights were decreed w/ POU near Howe but a number of them have been transferred even nearer to Howe.

I think you're right that at least some of the Sawmill rights are "savings" rights. The decree states "On account of saving through Sawmill Creek Canal..." as a prelude to 33-00006 through 33-00013. Al Ruberry and I both have recollections of people talking about annual work on Sawmill to increase delivery. That could indicate either an effort to enjoy Sawmill rights particularly, or just an effort to increase delivery in the system as a whole.

The only reason NOT to recommend an accomplished change in source would be if the watermasters had delivered Sawmill rights based on Sawmill's actual contribution to the Little Lost. David says to his knowledge, watermasters have not made that distinction. We discussed the idea that if a junior Little Lost right had historically enjoyed delivery when there was no water to deliver Sawmill rights, then changing the source on the Sawmill rights would injure that junior Little Lost right. David's response was that would never happen; junior LLR rights would be curtailed long before Sawmill began to decline.

Thanks, Bryce

Subject: RE: Wet Creek

Your description concerning delivery of Sawmill Creek rights coincides with my understanding of the matter. I spent some time studying that ball of wax and I think I described the problem in some 1993 memo's. I know I discussed with Ernie several times. Perhaps we should retrieve the 1993 file?

I believe these rights list Sawmill as a source but the decree describes the points of diversion and place of use down near Howe. I think that these rights may have resulted as some type of saved water project on Sawmill Creek. I believe the watermaster always delivered these rights with some fixed delivery loss, like 10%. I think I had leaned toward treating these as natural flow rights from the river where they are actually delivered and limiting or redoing the diversion rate to the decreed rate less any fixed shrink amount assessed by the watermaster.

Let me know if you want any stuff from the 1993 file.
Tim

SCANNED

NOV 01 2002

Many of the decreed rights list the source as "Sawmill" but David Andreason has been delivering them as "Little Lost River" rights. If this practice has a long-standing history we may want to recommend a change in source & recommend them as Little Lost River. Before we approach the legal beagles I want to get my ducks in a row.

Bryce,

Dayna showed me your message asking for some water district records in Basin 33. The 1962 records are all on microfilm. Dayna copied all the daily log book records from that year and is mailing those copies to you this morning.

You had mentioned Wet Creek. I'm not too certain what you were looking for there. For your information, I do have some stream flow and diversion measurements on Wet Creek from 1993. Brockway made some measurements there in 1992. The '93 measurements and Brockways measurements should also be in the 1993 water district file. David should at least be measuring and reporting any Wet Creek diversions (currently I think there is just the one of Pancheri's). He may have also made some stream flow measurements of the Creek after 1993. We installed a couple of staff gages on the creek in 1993 - one was above the confluence of the river and one was above the confluence of Dry Creek.

Bryce A. Contor

Re: Sawmill Creek rights

- 1) Decree point of diversion: (no legal descriptions given for points of diversion):

33-00006 through 33-00013	Headgate of Blaine County Canal Co
33-00030	Little Lost River
All others	Mouth of Sawmill

Note that USGS map V32 shows confluence of Sawmill & Summit Creeks & beginning of Little Lost River in 10N 26E 12 NESW.

- 2) Decree places of use:

5 water rights T 5N
6 water rights T 6N
3 water rights T 9N
1 water right T 10N R 27E. Note that this is likely below mouth of Sawmill
1 water right T 11N R 28E. While the decreed point of diversion for this right is
"Mouth of Sawmill," quantity description includes the notation
"to be measured at the point where it is diverted from the main channel of
Saw Mill Creek." Place of use is upstream of confluence of Sawmill Creek &
Summit Creek.

- 3) Priority Ranking vs. Little Lost River

Sawmill Rights include a few stockwater claims for 1879 priority, one claim for an amended priority of 1908, and the following decreed rights: One right with priority 3/14/1891, seven of priority 3/15/1891, thirteen of priority 5/25/1891, and one of priority 6/1/1891.

These priority dates fall smack in the middle of the priority hierarchy of the Little Lost River. Little Lost priorities begin with 9/1/1879 rights, and all rights up through 1891 are considered "older in time" rights. There are a number of 5/25/1891 Little Lost River rights which are equal priority to the bulk of Sawmill rights, and a number of 6/1/1891, 1900, 1905, 1906, 1908, 1912, and 1913 Little Lost River rights.

- 4) Confusion of names.

33-00107 (priority 1918) is decreed out of Little Lost River, with no point of diversion listed. However, the place of use is in T 12N R 26E, which is clearly upstream of the confluence of Sawmill Creek and Summit Creek, so the source must have been Sawmill Creek.

- 5) Statement of Watermaster and Watermaster records.

The attached Watermaster records appear to indicate that Sawmill Creek water is not accounted nor administered separately from Little Lost River water. David Andreason, Watermaster, confirmed this on the phone today. I asked him what effect changing the source on the Sawmill rights would have, he said, "None, that's how it's done now anyway." I asked if there was ever a determination made that Sawmill was not reaching the river & therefore to cut Sawmill rights in

SCANNED

NOV 01 2002

preference to river rights, he said, "No, by the time that happens the river is so low that the later river rights are already cut anyway."

6) Conclusion

Based on the above I recommend an accomplished change in source and change in point of diversion of Sawmill Creek rights to Little Lost River.

7) Sarah Benington reviewed decree 1 agrees that a source w/ accomplished transfer is probably appropriate for all Sawmill rights which are now delivered from LLR.

tributary and then re-diverted somewhere downstream. Some groundwater rights issued by the State recognize these exchanges in this basin. Other exchanges however are conducted without any groundwater rights which authorize such exchanges. These later exchanges may have been claimed in the adjudication.

B2) Dry Creek and Bell Mountain Creek rights: these are creeks in higher elevation canyons which are piped to lower elevations and run through hydro power plants, discharged into Wet Creek and Sawmill Creek respectively and then re-diverted at different points downstream under individual rights. You and a number of water users have consistently explained that these rights are delivered out of priority sequence and ahead of all other rights despite that these rights were decreed with 1891 priority dates. The decree specifically identifies Bell Mountain Creek as a non-tributary stream. Dry Creek does not have this same designation in the decree.

Administrative Direction:

All groundwater exchanges will be delivered with appropriate loss assessments between the points of injection and re-diversion on the river or tributary channel. Losses assigned to these exchanges will be based on the losses determined for the entire reach or reaches in which the transmission occurs. Any proposed changes in the points of injection and re-diversion or any changes which have been made since November 19, 1987 are not authorized until the water right holder has received approval from the Department under a water right transfer.

Groundwater exchanges initiated prior to November of 1987 without valid groundwater rights can continue to be delivered provided that such uses meet the three conditions outlined under category A above. In addition, any groundwater exchange not authorized by any valid water right should have been accomplished prior to March 25, 1963. All new groundwater uses initiated after March 25, 1963 were subject to mandatory permit filing requirements. Thus, if we can document that a groundwater exchange use was initiated after this date without a water right, then you would be directed to discontinue delivery of the exchange and the owner would have to file a new water right application and receive approval before the exchange could again be allowed, regardless of the owner's SRBA claims. As I think all of the exchanges without water rights in your district were accomplished prior to March of 1963, then the exchanges can continue and should be regarded as valid.

The Bell Mountain right and Dry Creek rights may continue to be delivered out of sequence and ahead of other rights. These rights will be treated similar to groundwater exchanges and losses will be assigned in delivery to the downstream re-diversion points.

C. Sawmill Creek Water and Water Rights

The decree identifies a number of rights where the source is

given as Sawmill Creek and a point of diversion listed as the mouth of Sawmill Creek. All but one of these rights have a 5/25/1891 priority date, the other has a 6/1/1891 priority. The total diversion rate under all these rights is over 16 cfs. The decreed place of use for most of these rights is a considerable distance downstream near Howe and most rights are still currently used in this area. It is not clear from the decree whether these rights should be administered as either natural flow rights or some type of saved water rights but there is evidence that these rights have always been delivered as natural flow rights. The decree gives no reason or information as to the dis-connective nature between the source and place of use but does contain some language directing that these rights be delivered with transmission losses between the mouth of Sawmill Creek and the respective points of diversion from the Little Lost River.

Administrative Direction:

No changes are recommended in the delivery of these rights as long as they meet the three conditions described above under item or category A.

D) Water Right Rotations

It is apparent that over the years a number of users have implemented water right rotations where whole water rights or portions of rights are periodically moved between two points of diversions at separate locations on the river. Many of these rotations involve moving water downstream within a losing reach.

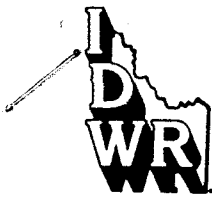

Administrative Direction: Rotations may be acceptable if they were in place prior to November of 1987 and the user's SRBA claims include both points of diversions. If the rotation occurs within a losing reach then the appropriate loss should be assigned. This loss may be based on either the actual loss between the upstream and downstream points of diversions, or the loss determined for the entire reach or reaches in which the transmission occurs. New rotations or rotation arrangements which have occurred after November of 1987 should not be continued unless a water right transfer application has been filed and then approved by the Department.

Finally, you should be aware that these directions regarding delivery of certain rights may be subject to some review and final determinations under the Snake River Basin Adjudication.

4) Measuring Devices and Headgates

All of the diversions which I have inventoried have headgates and measuring devices (except for the one exchange well injection point which you state has since been fitted with a measuring device.) However, nearly all of the measuring devices require some repair or modification and routine maintenance. A few headgates were in poor condition and/or lacked any means in which to lock the

These conditions are:
 1) claim filed,
 2) claim appears to have some merit.
 3) No injury

RE: Snake River Basin Adjudication
Water Right #33-00004(33-02000)/#33-00005(33-02134)
#33-00068/#33-00075/#33-00077/#33-00098

Dear Mr. Contor:

In response to your letter of April 10th, 1989, I have researched the above-referenced water rights. All of the water rights were Decreed in Blaine County Investment Co. vs. Robert G. Mayes, et al on March 4th, 1927.

In your letter you requested information concerning Permit Nos. 1119 and 3399. These permits were licensed as 33-02000 and 33-02134 respectively, and then decreed as 33-00004 and 33-00005 respectively. A decree normally supersede previous rights therefore, these Water Rights should probably be claimed as decreed rights #33-00004 and #33-00005.

The most current information available concerning the lands appurtenant to your Water Rights are the original Engineer's Report for 33-00004 and 33-00005, transfer 670 for 33-00098 and transfer 656 for 33-00068, 33-00075 and 33-00077. I have attached copies of these documents to the corresponding Water Rights.

In your letter you indicate that there has been unrecorded de facto transfers of water by the Canal Co., and you also express your concern about the proper method for filing these portions of your water rights. For transfers prior to May 26, 1969 no application was required therefore; the "Grandfather Clause" concerns transfers after that date and involves the

presumption that no expansion of the Water Right as Decreed has occurred (ie. no increase in the amount of water diverted). The result is that you may file your Water Right claiming the distribution and number of irrigated acres as of Nov. 19, 1987. Thus the filing of the Notice of Claim with the Snake River Basin Adjudication will in effect represent an application for transfer as well.

I hope the information and documentation enclosed will aide you in the preparation for your filing with the adjudication. I would also recommend you use our Eastern Regional Office at 150 Shoup in Idaho Falls for future assistance, as they are more accessible and familiar with the area your water rights cover.

If this office can be of any further help, please do not hesitate to contact us.

Yours Truly,

Donald V. Shaff
Manager, Adjudication Section

RE: Amended Adjudication Claims for Blaine County Canal Co.
A33-00016/00068/00075/00077/00098/10086

Dear Mr. Contor:

As we discussed enclosed are the above numbered amended adjudication claims that I have completed using the information that you supplied this office. Please review the amended claims sign in front of a notary and return to this office as soon as possible. The additional variable fee was paid and receipted under receipt #E012738.

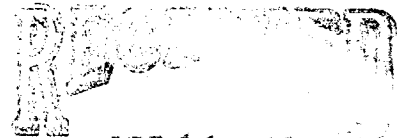

Sincerely,

Keith C. Wilson
Senior Resource Agent

Department of Water Resources

Dear Ladies and Gentlemen:

In preparation for the upcoming adjudication we are trying to find out exactly how our water rights are listed. Could you please send us a printout on the legal description of the lands to be irrigated under the following permits or licences?

Permit 1119 issued 20 Feb 1905

Permit 3399 issued 8 Feb 1908

WR-number 33-0068 priority 1 Jun 1891

WR-number 33-0075 priority 15 July 1884

WR-number 33-0077 priority 25 May 1891

WR-number 33-0098 priority 15 Apr 1891

Last summer in an information meeting in Idaho Falls I was told about a "grandfather clause" which covered cases of flood irrigation converted to sprinklers, changing acres somewhat. Over the years shares of Blaine County Canal Company have been bought, sold, traded, and moved from one parcel of land to another. Does the "grandfather clause" cover this kind of activity? How should we file on these transferred shares?

Thank you,

Bryce A. Contor
