Re: Acreage, Transmission Loss.

I. General Description of Mays Rights:

Mays' place of use is composed of four classes of lands. The original farm is located in E ½ of SE ¼ of section 9, section 10, section 14, and section 15. The Jensen (Cowgill) lands are the lands in the NE of section 9 and the W ½ of the SE ¼ of section 9. The enlargement lands are in the N ½ of section 16, and the permit lands are in the S ½ of section 16.

The original farm is covered by rights 17A, 18A, 19A, 20A, 21A, 22A, 31D, and 31H. It is also covered by right 23A which is part of combined right 10073 and right 86, which is a part of combined right 10074. The original rights have had formal transfers which authorize their application to all the lands irrigated on the original farm. The transfers do not list acres per quarter section.

The Jensen or Cowgill rights include 90D, 91C, a part of original right 92 now incorporated into combined right 10073, and a part of original right 93 now incorporated into combined right 10074. These rights have had an accomplished transfer to the current place of use. There are enough original CFS to justify the full acres of place of use without contemplating enlargement. File 33-00017A contains documentation of these accomplished transfers.

*and part of
16 -
See
file A33-
00017A
map.*

Rights 10984 and 10985 authorize the irrigation of the enlargement lands in section 16. The permit lands in section 16 are authorized by permit 33-07183, which was not required to be enjoined to the adjudication.

II. Acreage

To calculate allowable acres of irrigation for each water right, the following assumptions are made:

- The original decree implied .02 cfs/acre.
- The Cowgill accomplished transfers did not work any enlargement or expansion.
- Since the described places of use for transfers to the original farm cover all the historically irrigated lands, no accomplished enlargement or expansion applies to the original Mays rights.

Based on these assumptions, the Cowgill rights each have an authorized irrigated acres calculated by dividing diversion rate by 0.02. The Mays rights have an authorized irrigated acres calculated by dividing diversion rate by 0.018 cfs/acre. This rate was obtained by dividing the sum of the Mays cfs by the apparent original POU for all the rights. The groundwater rights are recommended for the licensed acres, and the enlargements are recommended for 169 acres.

The result is that the sum of the individual groundwater rights is slightly less than the permissible place of use. This is reasonable, as the Cowgill lands were never licensed for the groundwater usage. The surface water rights individually sum to slightly more than the permissible place of use. This is also reasonable, as assumptions for the Cowgill rights amounted to assuming a full 40 acres per quarter-quarter section, and less than that is actually farmed.

III. Transmission Loss

Historically, many of these rights have been assessed a transmission loss by the watermaster. Some of the formal transfers also imposed a transmission loss to some of these rights.

Comments on each individual right discuss transmission losses. More general discussion is included in file 33-00002.
