Dear Vic:

Enclosed is a copy of the sketch I included with an August 1999 memo to Harold Jones, IDWR water rights supervisor in the Eastern Region office. As we discussed on the phone, it appears that there are adequate acres of authorized place of use, currently not irrigated, to transfer to the north corners which you wish to irrigate.

This letter also confirms the outline of our conversation today:

- Transfer needed:

  Combine north places of use and south places of use into one large Permissible Place of Use.

  Correct location of Well #5 from T5N R29E Section 1 NWNWNW to T6N R29E Section 35 SESESE.

  Move some authorized place of use from south pivot corners to north pivot corners.

- Evidence of Priority for 33-10092

  The recommendation includes authorization for the small lawns on the permanent homes. The only area of concern is the large lawn associated with the trailer homes. I have a 1975 aerial photograph that documents the place of use of the large lawn area. What we need is evidence that the irrigation started prior to March of 1963. An affidavit from someone who personally saw the lawns or the irrigation would be adequate.

  We also discussed the possibility of including the large lawn in the transfer. The lawn would be identified as part of the authorized place of

use and the domestic well would be identified as an additional point of diversion.

Please feel free to call again if this is not clear or if you find other concerns with the recommendations.

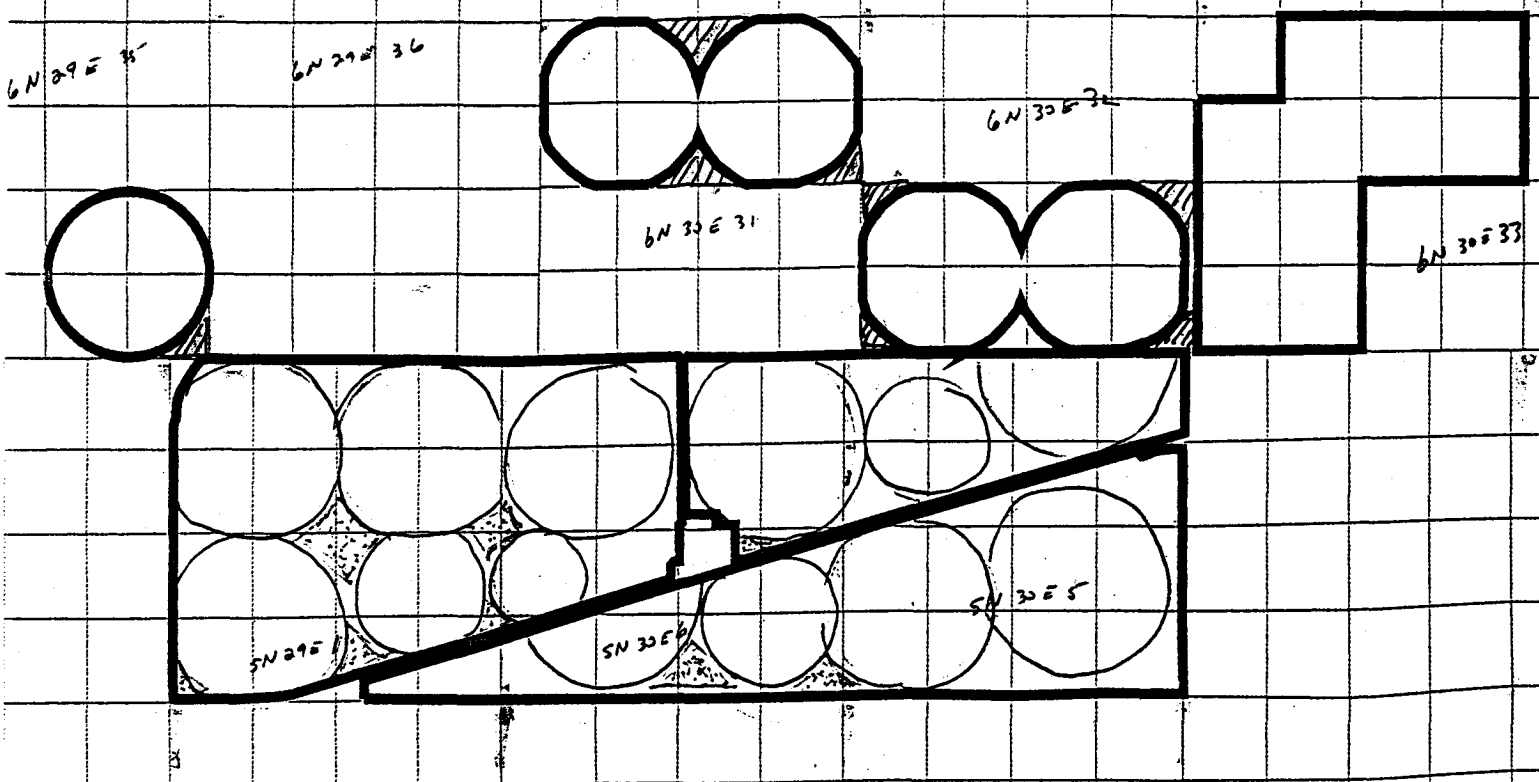

Sincerely,

Bryce A. Contor

Re: SRBA Claim Nos. A33-07061, A33-02054, A33-02075, A33-02076A, A33-02076B, A33-02125, A33-02119, A33-07007, A33-07053.

Dear Bryce:

Enclosed are the amendments for the above referenced claims. Thank you for all the help.

Sincerely,

Vic Conrad
Simplot Land and Development

10/12/99 Vic Conrad

After conferring w/ Ernie I called Vic back - told him we can't do it.

Rationale for recommendations different for WR's is enlargement statutes / accomplished transfer statutes - we can't use that to change a post-87 xfer.

I told Vic whatever he work out w/ Kay is OK for me.

10/14/ Vic Conrad -

If file application to amend - then file xfer to make PPU w/ adjustments - will this work expansion?

I told Vic no problem, outcome of transfer will be ≈ 43.7 cfs / 3002 acres = 0.0145 cfs/acre. Transfer will change PPU land list on each WR but limitation of acres, cfs, & combinations will stay on WR's.

I told Vic whether or not he signed amendments makes no diff to me. Vic said signing is better for Kay.

Vic Conrad | 389-7359 | 10/12/1999

Shelly Keen - Kay Walker → amended permit
Transfer - for right as appears on record

Wants PPA on whole place -

Water right holder - time of uncertainty -
intent is to have it cleared up in
adjudication - PPA better indicates
intent - why another Xfer -

1) Conrad still wants whole place as one PPA - I said "No, 1991 Xfer"

2) His assertion was Xfer had to be filed based on underlying WR not claims. No guidance fr. dept on how to file claim.

3) Conrad is concerned w/ signing amended permit applications because he wants entire farm as PPA.

4) Nevertheless Xfer will have to be filed for North corners & POD well #5

5) I agreed to:
1) e-mail Kay Walker dot whole place on permits PPA
2) talk to Ernie abt AJ PPA recommendation

10/12/99 Vic Conrad

After conferring w/ Ernie I called Vic back - told him we can't do it.

Rationale for recommending different fr. WRS is enlargement statutes / accomplished transfer statutes - we can't use that to change a post-87 xfer.

I told Vic whatever he work out w/ Kay is OK for me.

Subject: SIMPLOT PERMITS

Kay -

Vic Conrad called me today, he's not a completely happy camper. He wants all his water rights to reflect a Permissible Place of Use on the whole farm, as claimed. I can't recommend the existing licenses that way because of the 1991 transfer. He is concerned about signing the amended permits because they don't include the whole farm as PPU, either (even though it looks like you bent over backwards to do what you've already done).

He plans to call you, I told him I'd e-mail you.

1) I reviewed this with Ernie again, I have to base my recommendations on the 1998 transfer.

2) If you can change the permits the way he wants, it's OK with me - I would recommend according to your license. But I still couldn't change the other licenses.

3) I really can't see how he would be injured by having to file a transfer - he has to file a transfer ANYWAY to correct the POD on well #5. He also needs to either file a transfer changing place of use or quite irrigating corners for which he has no water right. So as long as he's filing a transfer, he might as well use the transfer to fix the PPU the way he wants.

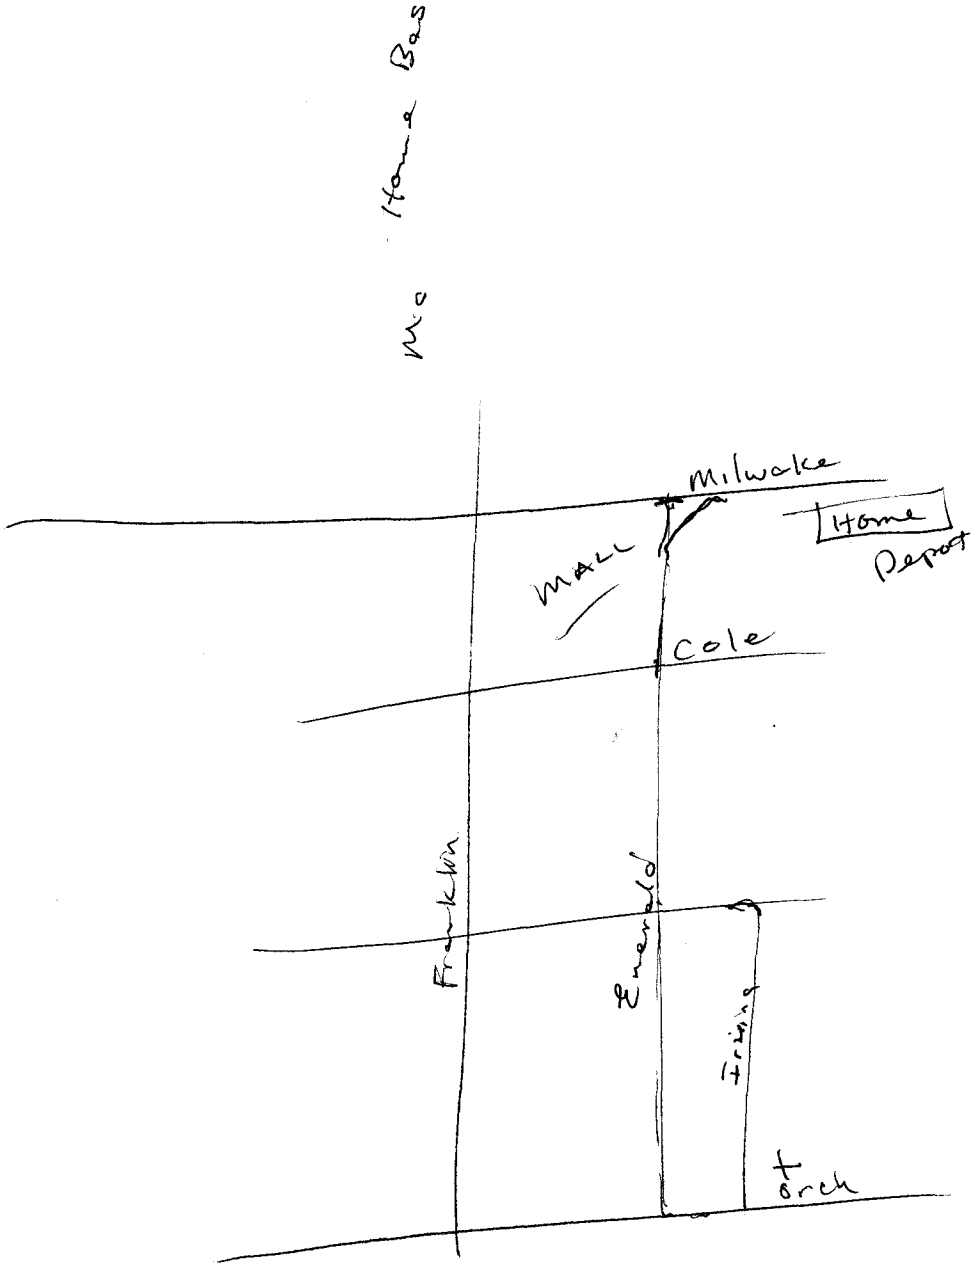

4) If he has to file a transfer anyway, he may cut to the chase and skip the amended permit. That would be no skin off my nose though probably create extra work for you.

Call or e-mail me if you want to talk more.

Contor, Bryce
To: Walker, Kay
Subject: RE: Simplot Rights in B33

33-02076b and 33-07007 have an overlap which apparently was neglected in the licensing of 07007. Limiting the total diversion rate for those two to 0.02/acre for the actual licensed acres gives just a little less than the sum of those two rights. The limitation amount, plus the sum of the other rights (including the combined limitation on 2119 & 2125), is where I got the 43.7. But if we can ignore that overlap and recommend a smidge more, it really doesn't matter until transfer time – the capacity isn't near 43.7 or 44.32 and with the costs involved is not likely ever to be.

I know you had told me about the "basin 32" and I guess I was looking in the wrong place. But I found them this time. Thanks.

I'll ask Ernie again about the volume limitation, I had thought he had said to recommend the map amounts, which are 0.5 afa higher than the WR printout.

Subject: Simplot Rights in B33

Wow, these rights are getting more complicated all the time. I got your message this morning and began where I left off last Friday. Thought I was about done with my review and printed out your new "R" records and dug myself in deeper. I have just one questions in regard to these rights...

I found the licensed capacity to be 44.32 cfs rather than 43.70 cfs as you identified. Could you double check your figures on that? Would be able to allow a little bit more water under 33-07061 if additional capacity to be had but it would also change all of the remarks on "r" records...

On your North Block claims you still have a remark showing these rights are used with a B32 right. (i.e. QNT remark) Also, I believe you should be using the licensed/transferred diversion volumes when there was one on the water right.

If you would please check out the licensed capacity and let me know, I'll begin to finish these tomorrow - hopefully. Thanks! Kay

Re: Howe Farms Adjudication Recommendations

Dear Mr. Conrad:

Last time we spoke I promised to forward a preliminary plan for recommendations on the Simplot Howe Farms adjudication claims in basin 33. These claims are related to six licenses and two permits.

I have been waiting for the IDWR people in Boise to review licensing the two permits before forwarding this preliminary plan to you., because the licensing recommendations may affect the adjudication recommendations. It now appears that the licensing recommendations will be more or less in accordance with my adjudication plans, so I'm sending you a copy of the general outline of what I plan.

I realize that you wished to make the entire farm a permissible place of use for all the water rights. You will see that this plan does not do that. This is because the north part of the farm is covered by a post-1987 transfer, and because the cleanest way to handle the permits was to allocate to them the acres that were not covered by other licenses. The planned recommendations will result in the north block of the farm being recommended per the transfer, a middle block recommended as a permissible place of use for the other existing licenses, and a west block covered by the permits.

After the partial decrees are issued, you may wish to apply for a transfer to make the entire farm a permissible place of use for all the water rights. You will also want to file a transfer to reflect the current location of well number 5.

Please review this plan and your existing claims and water rights, and contact me if you have questions or concerns. We are working toward the end of October to send out preliminary recommendations for the notice of error process.

Sincrely.

Bryce A. Contor

To: Simplot Howe Farms Adjudication File
Fr: Bryce Contor
Date: August 16, 1999

Simplot's Adjudication Claims are filed as a permissible place of use for all water rights, diverted from five wells, on a 3029 acre place of use. There is also a separate small claim for domestic use and lawn irrigation. The claims are based upon licenses, permits, and beneficial use:

Licenses

33-02054
33-02075
33-02076A
33-02076B
33-02119
33-07007

Permits

33-07053
33-07061

Beneficial Use

33-10092

I. Points of Diversion

Claim 33-10092 is for domestic use and 1.5 acres of irrigation from the domestic well at the farmstead. All the other claims are for irrigation wells on an interconnected system.

Original water rights 33-02054, 33-02075, 33-02076A, and 33-02076B were for points of diversion in a well orchard located in the northwest part of 06N 29E. The water was conveyed to the places of use via a canal. Current points of diversion are located on the places of use:

Well #1	05N 30E 06 SENE
Well #2	05N 30E 05 SWNW
Well #3	06N 30E 32 SESE
Well #4	06N 30E 31 NENE
Well #5	06N 29E 35 SESESE

A 1990 well log in file 33-02075 documents a 1990 accomplished transfer of Well #5 to the current location at 06N 29E 35 SESESE (a few hundred feet from the original location). Transfers 3722 and 3192 and the original claims list Well #5 in 05N 29E 1, the amended claims place it in 06N 29E 35.

Because the accomplished transfer occurred after 1987, Well #5 is recommended in the original location rather than the new (current) location. The water user will need to file a formal transfer to the new location.

Water rights 33-02119 and 33-02125 are recommended to be diverted from Well #3, Well #4, and Well #5, based upon transfer 3722 (1991).

Water rights 33-02054, 33-02075, 33-02076A, 33-02076B, and 33-07007 are recommended to be diverted from all five wells, based upon:

- 33-07007 original license.
- Keith Wilson's 1983 exam showing Wells #1 through #4 on an interconnected system.
- Transfer 3192 (1985) which implies Well #5 would be added to the combined system and authorizes diversion of 33-02075 from Well #5.
- 1987 claims indicating a combined delivery system.

I suggest licensing permits 33-07053 and 33-07061 for all five points of diversion, because the delivery system is interconnected.

II. Places of use

The clear intent of the claims was for all water rights to be recommended for the entire farm, as a permissible place of use. However, transfer 3722 post-dates the Adjudication Claims and assigns 33-02119 and 33-02125 to specific places of use. Furthermore, licenses have not been issued for permits 33-07053 and 07061. In reviewing licenses, transfers, permits, and overlaps, it appears best to recommend three separate places of use as illustrated in the attachment:

1) North Block.

Water rights 33-02119 and 33-02125 are recommended as per transfer 3722. 33-02119 is recommended for 504 acres and 32-02125 is recommended for 634. There is an overlap of 64 acres, so irrigated lands for these two rights total 1074 acres.

2) Middle Block

Water rights 33-02054, 33-02075, 33-02076A, and 33-02076B are recommended for a permissible place of use covering the farmed acres in 05N 30E sections five and six, and parts of 05N 30E 01.

Licenses 33-02054, 33-02075, and 02076A cover virtually the same original place of use. None of the other original water rights cover this place of use, and the three rights sum to approximately 0.02 cfs/acre.

License 33-07007 was issued for 4.68 cfs on 442 acres, which is approximately 0.011 cfs/acre. License 33-02076B was issued for 6.80 cfs on 340 acres (0.02 cfs/acre). There is an overlap of approximately 240 acres which was not considered in the analysis of 33-07007. Considering overlaps, the original licenses authorize irrigation of a total of 544 acres. There is no other overlap on these acres.

Recommended accomplished transfers include:

- Move approximately 20 acres of 33-02054, 33-02075, and 33-02076A from the farmstead and waste areas to unlicensed lands in 05N 30E 05.

- Move seven acres of 33-07007 from 05N 29E 01 to unlicensed lands in 05N 30E 05.

- Move 80 acres of 33-02076B from 05N 30E 08 to unlicensed lands in 05N 30E 05.

Note that the unlicensed places of use in section five are not included in the authorized places of use for the two permits.

Apparent clerical errors resulted in the electronic records for 33-02076A and 33-02076B each being one 40-acre tract short of the original licenses. These were restored in the recommendations.

The middle block as recommended contains 1540 acres, which is the full acreage authorized by the original licenses.

3) West Block

When the original water rights are allocated as above, 388 acres of unlicensed place of use remain on the west side of 05N 29E 01. These places of use are approved for irrigation under permits 33-07053 and 33-07061.

The licensing examiner's recommendation for these two permits is for a permissible place of use of 595 acres. However, this includes an overlap of about 200 acres with 33-02054, 33-02075, and 33-02076B, which already authorize a full 0.02 cfs/acre.

I propose licensing the two permits with a permissible place of use of only the 388 acres not covered by other licenses. This is illustrated in an attached GIS map.

While these recommendations do not preserve the claimant's desire to make the whole farm a permissible place of use, they honor the post-claim transfers and perhaps make the licensing of the permits more straightforward. After the licenses and partial decrees are issued, the claimant could file a transfer to make the entire farm a permissible place of use for all the rights.

III. Rate of Diversion – Existing Licenses

North Block

Rights 33-02119 and 33-02125 have individual licensed rates of 10.08 and 10.00 cfs respectively, based on 1976 measurements of Well #3 and Well #4. The original licenses limit the combined diversion rate to 12.9 cfs. This amounts to approximately 0.012 cfs/acre. Per transfer 3722, these are recommended at the licensed rates, with the combined limitation.

Middle Block

Rates of diversion for 33-02054, 33-02075, and 33-02076A are based on measurements of the well orchard. They sum to approximately 0.02 cfs/acre and are recommended at the licensed rates:

- 33-02054 2.32 cfs
- 33-02075 10.12 cfs
- 33-02076A 7.50 cfs

Rate of diversion for 33-02076B is based upon measurements of the well orchard, and the rate for 33-07007 is based upon a 1982 reading of an installed flow meter at Well #2. These rights are recommended at the original licensed rates, which sum to 11.48 cfs. Due to the 240 acre overlap, the recommendations include a combined limitation of 10.88 cfs, which is 0.02 cfs/acre on 544 acres.

The middle-block recommendations will include a combined limitation of 30.80 cfs, which is 0.02 cfs/acre on the permissible place of use.

IV. Rates of Diversion – Permits

The licensing examiner's recommendation was for a combined limitation of 6.49 cfs on the two permits, based on measurements of Well #1.

Because the system is interconnected, I suggest using total per-acre capacity to derive authorized diversion rates for the permits. Existing licenses imply an original system capacity of 43.70 cfs, and the attached analysis shows that current system capacity is no greater. Transfer 3722 allocates 12.9 cfs of the total to the north 1074 acres. This leaves 30.80 cfs for the southern part of the farm. These lands total 1928 acres.

Based on the above, I suggest licensing the two permits for a total of (30.80/1928) * 388 = 6.20 cfs, with a condition limiting the combined diversion rate of the permits and the "middle block" licenses to 30.80 cfs.

V. Summary

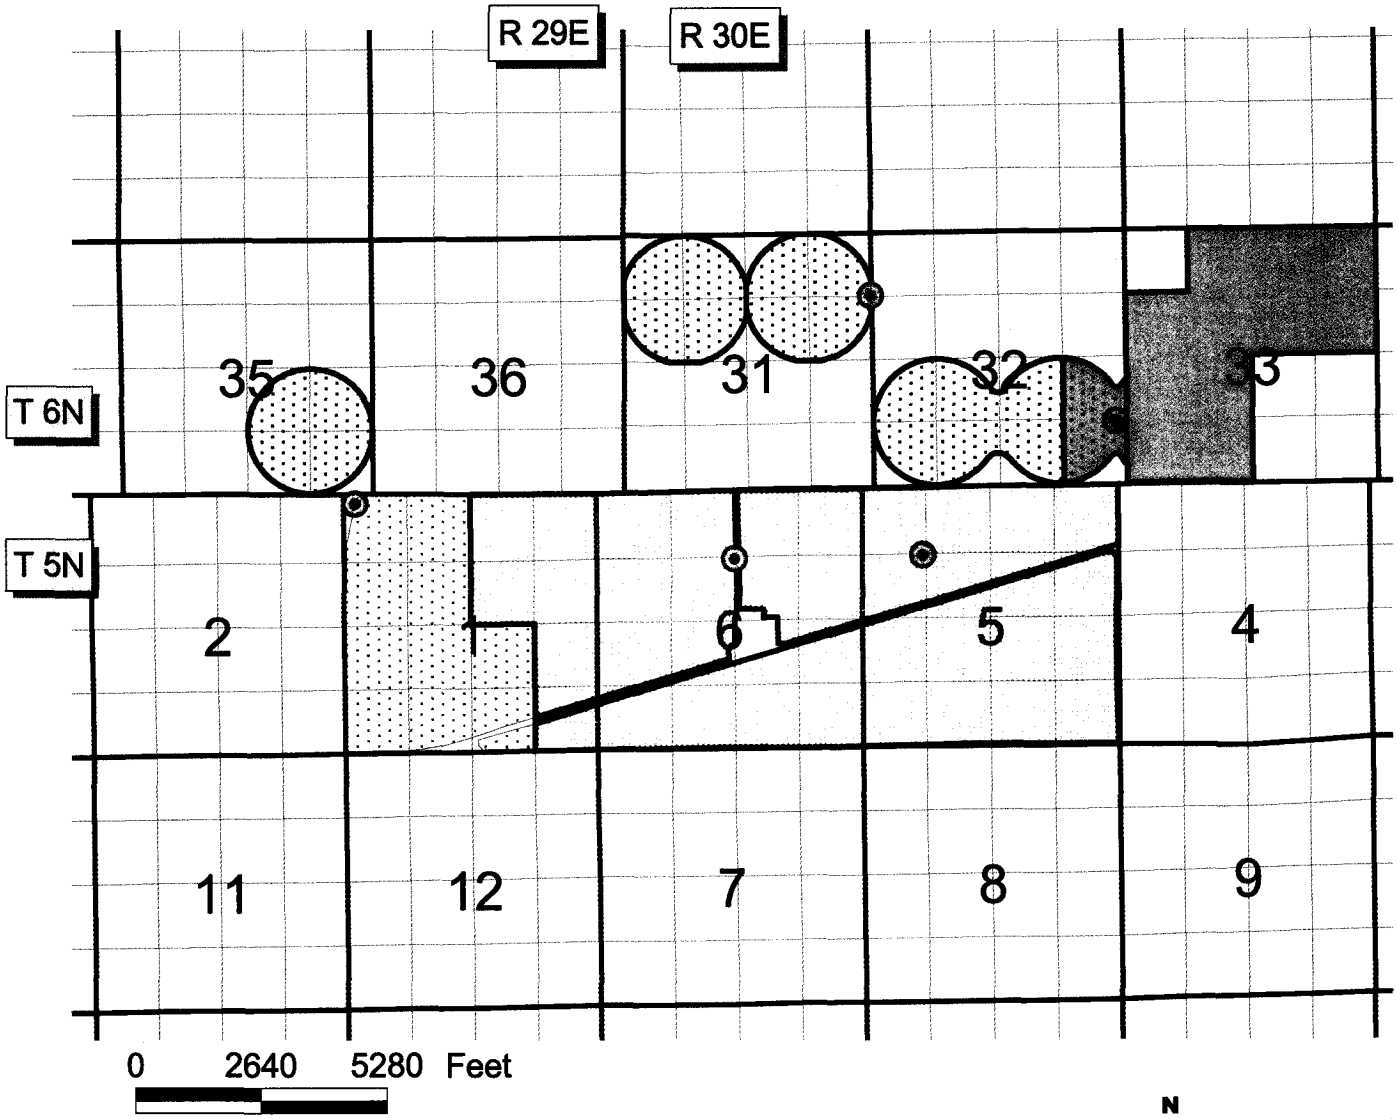

These recommendations divide the place of use into three blocks, with water rights assigned to each block based on post-claim transfers and original licenses. The north block is authorized for 0.012 cfs/acre based upon transfer 3722 and the original licenses. The middle block is recommended for 0.02 cfs/acre based upon the original licenses. The west block is suggested at 0.016 cfs/acre, based upon system capacity.

Wells # 3, 4, and 5 are recommended as points of diversion for the north block, based upon the transfer. All five wells are recommended or suggested for the other rights, based upon the fact that the system has been fully interconnected since at least 1983.

These recommendations allow irrigation of all 3002 farmed acres identified in a GIS analysis of the claimed place of use.

Analysis of Simplot System Capacity

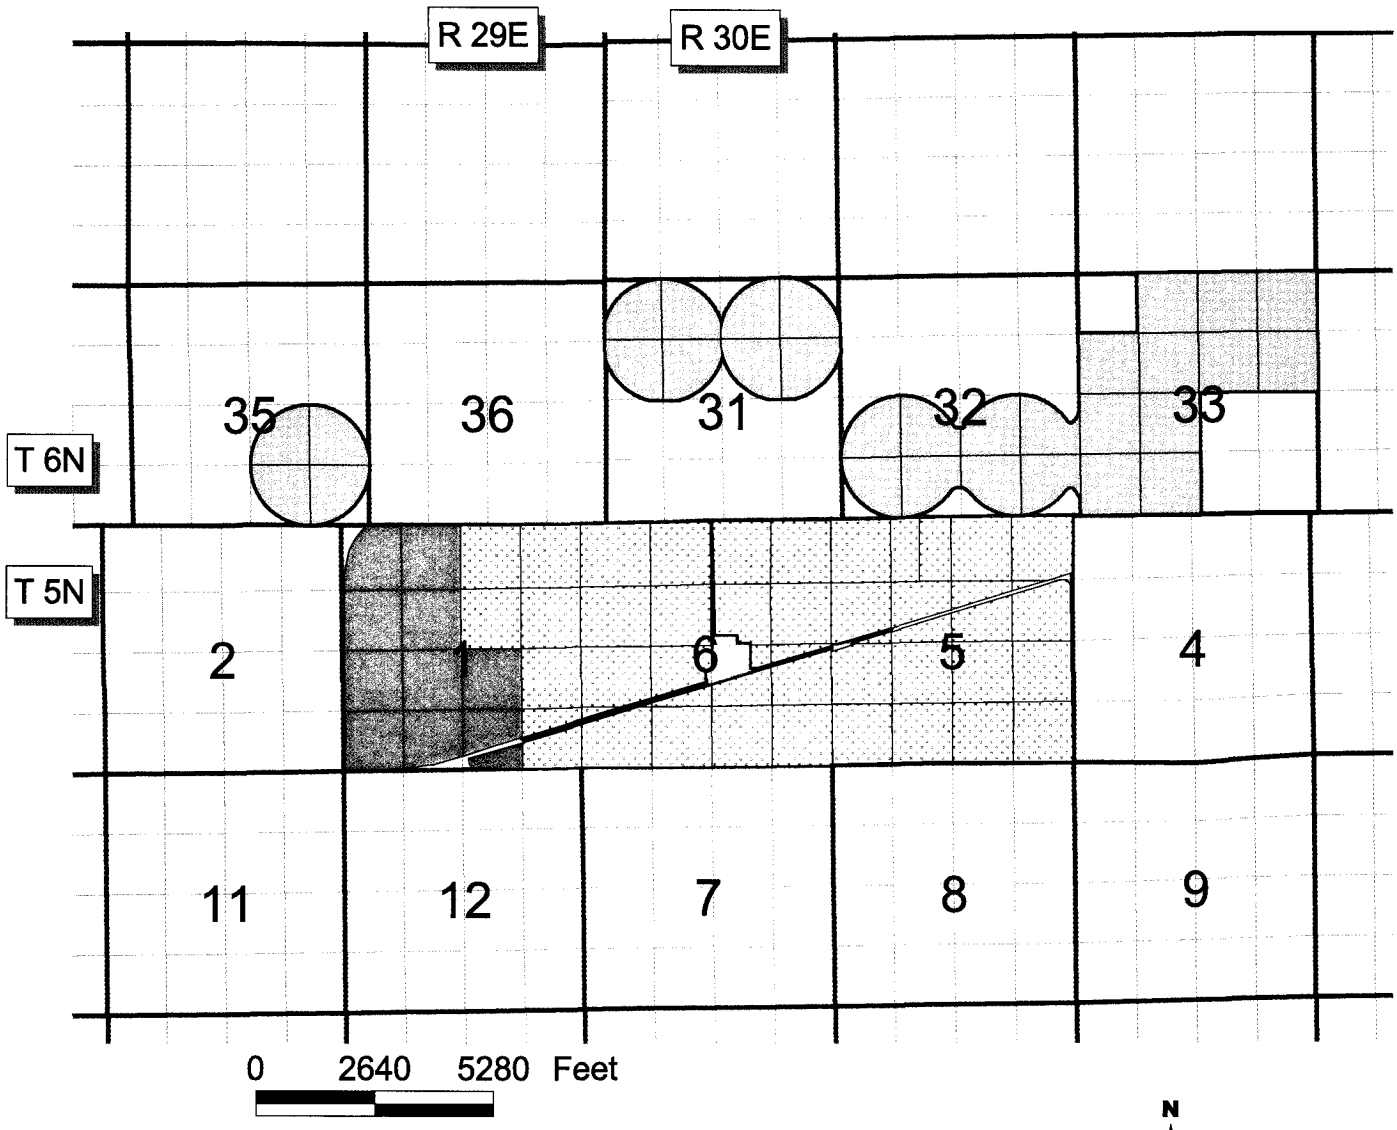

Pumps 1 through 4 have been measured at some point in the past, and on August 10 I timed power meter disks and recorded operating pressures to do theoretical calculations on all the pumps. The farm manager told me that last winter when pump #2 was pulled, the static water level was 306 feet. Based on these measurements and data, approximate system capacity is:

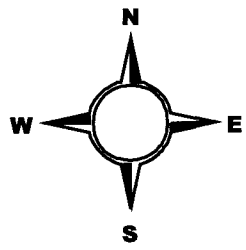

Well #1	1983 measurement	6.49 cfs
	Theoretical – '83 data	6.8 cfs
	Theoretical – '99 data	6.6 – 7.3 cfs
Well #2	1982 measurement	4.68 cfs
	Theoretical – '82 data	6.8 cfs
	Theoretical – '99 data	6.7 – 7.4 cfs
Well #3	1977 measurement	5.46 cfs
	Theoretical – '99 data	6.0 – 6.6 cfs
Well #4	1997 measurement	7.44 cfs
	Theoretical – '99 data	6.3 – 6.9 cfs
Well #5	Theoretical – '99 data	6.5 – 7.2 cfs

Using the most generous value for each well gives an approximate current capacity of 35 cfs.

$$\frac{2.32 \text{ cfs}}{996 \text{ acres}} = 0.0023 \text{ cfs/acre}$$

6 NO. 2 East, of the Boise Meridian.

Township No.5 North, Range No.30 East, of

To: Files 32-02054, 32-02075, 32-02076A
Fr: Bryce Contor
Date. 8/11/1995

These wr's cover the same POU on the original licenses, and the cfs Σ = 0.0198/acre on original acres, 996 or 997 (depending on license).

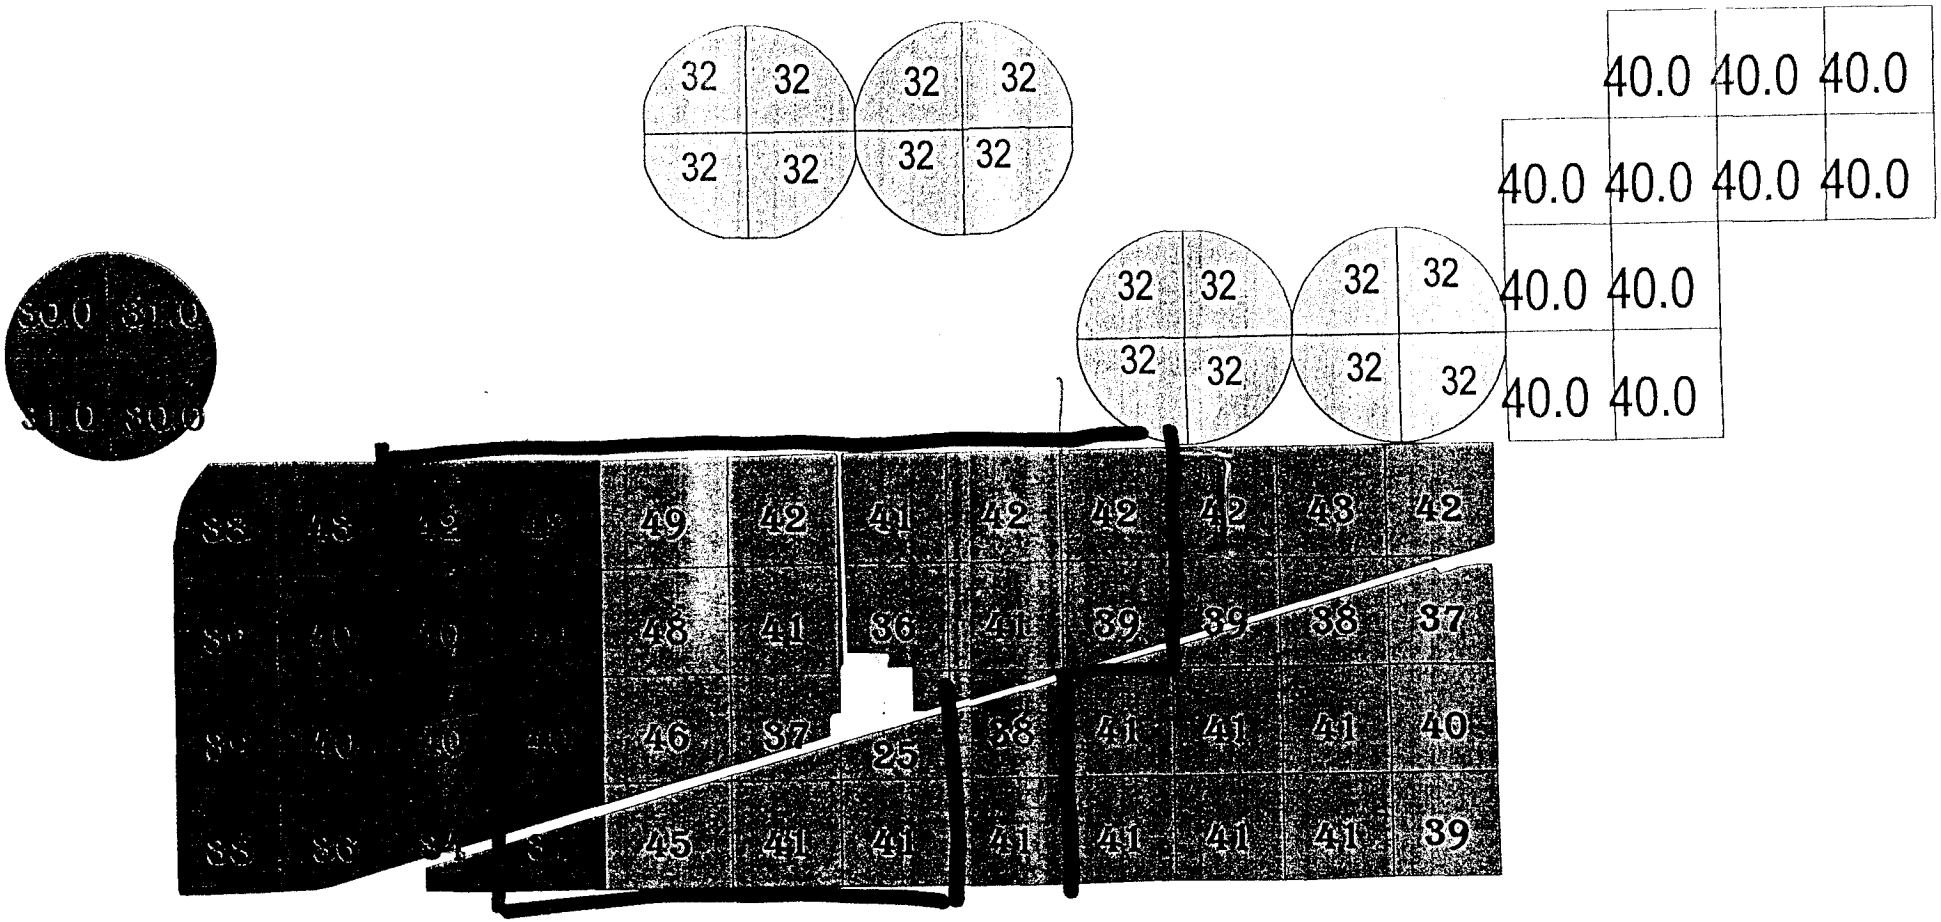

GIS POU w/ original legals Σ = 976 acres. I moved 20 acres to 5N 30E 5 NENW to help cover accomplished transfer in POU to N½ NE¼ and NENW of section 5.

Accomplished -Δ POD is from well orchard in Northern part of 6N 29E to wells on farm as claimed. Keith Wilson's 1983 and 1988 field exams document existence of wells # 1-4, transfer 3192 and 3722 document well #5. I personally know that well orchard was abandoned prior to my moving to Howe in 1983 but 1985 transfer 3192 asserts well orchard was still in use.

Note that well #5 is transferred & claimed to 5N 29E 1 NWNW. That is what is recommended, though the well currently used is in 6N 29E 35 SESESE. Because the

accomplished transfer took place after 1987 (per well log referenced in Fax fr. Shelley Kaem 8/9/99) the 5N 29E location is recommended.

Re: Field Inspection

Today I visited Simplot's Howe Farms operation in regard to Adjudication Recommendations for 33-02054, 33-02075, 33-02076A, 33-02076B, 33-02119,. 33-02125, 33-07007, 33-07053, 33-07061, and 33-10092. Pedro Gomez, farm manager, accompanied me to the pumps, provided the attached company map, sketched the non-irrigated pivot corners and wells, and coached me on my sketch of mainlines.

These are my findings:

1) Unauthorized places of use. See the attached memo.

2) Well number 5 is located in 06N 29E 35 SESESE, not in 05N 29E 1 NWNW as claimed, and as listed on transfers 3722 and 3192. Per Mr. Gomez, there is an unused well in 05N 29E 01 NWNW. I saw a post marking something in the weeds as we drove by but did not walk over to it. It is located at the southern end of the triangle formed by the intersection of the county roads at the township corner.

3) I timed the power meter disks and recorded operating pressures to calculate theoretical pump capacity on all pumps. I used the depth that Mr. Gomez reported was measured last winter when the pump at Well #2 was pulled for repairs. The attached calculations show a total system capacity of approximately 32 to 36 cfs.

4) In 1983 and 1988 Keith Wilson measured flow at Well #1 and got about the same flow as I had calculated, but a booster was present at that time. However, the attached calculations show that if the older system present during Keith's exam used higher pressures, my results are consistent with his.

5) Tony Kozlowski's 1982 field exam for 33-07007 reports 4.68 cfs for Well #2, which is inconsistent both with my calculations and Keith's measurements for Well #1. Tony used the owner's installed flow meter. Water Measurement District work has shown that these meters can sometimes be in error.

6) Mr. Gomez pointed out the POD for claim 33-10092. It appears to be in 06N 30E 6 NWSE as claimed. The GIS coverage in the file shows that the POU for the houses is in 06N 30E 06 NESW, rather than the NWSE as claimed. The large irrigated lawn which shows in the 1977 and 1987 NAPP photography is not longer present. The remaining lawns probably total less than ½ acre of irrigation.

7) From my own personal knowledge from the time I lived in the Howe valley, I know that the points of diversion in the northern part of 06N 29E were abandoned sometime prior to 1983. These are listed on the older "2000" licenses but not on the transfers or claims.

Re: Unauthorized use, 33-02119, 33-02125, transfer 3722

Transfer 3722 changes place of use of these two water rights by drying up 16 pivot corners in 06N 30E 31 and 32, and transferring these irrigated acres to a new pivot in 06N 29E 35 SE 1/4.

This morning I observed irrigated crops on nine of the "dried up" corners and on one unauthorized corner of the new pivot. These are marked in blue on the attached sketch.

The ~~permit~~ transfer authorizes 122 acres of irrigation on the new pivot. Per Debbie at the Farm Service Agency in ~~Boise,~~ Azo the 1998 acreage of that pivot was 125.6 acres, with an additional 4.4 acres in the irrigated corner. She cautioned me that Simplot has installed new pivots on some of its fields, so the 1998 data are questionable. 1999 data are not available.

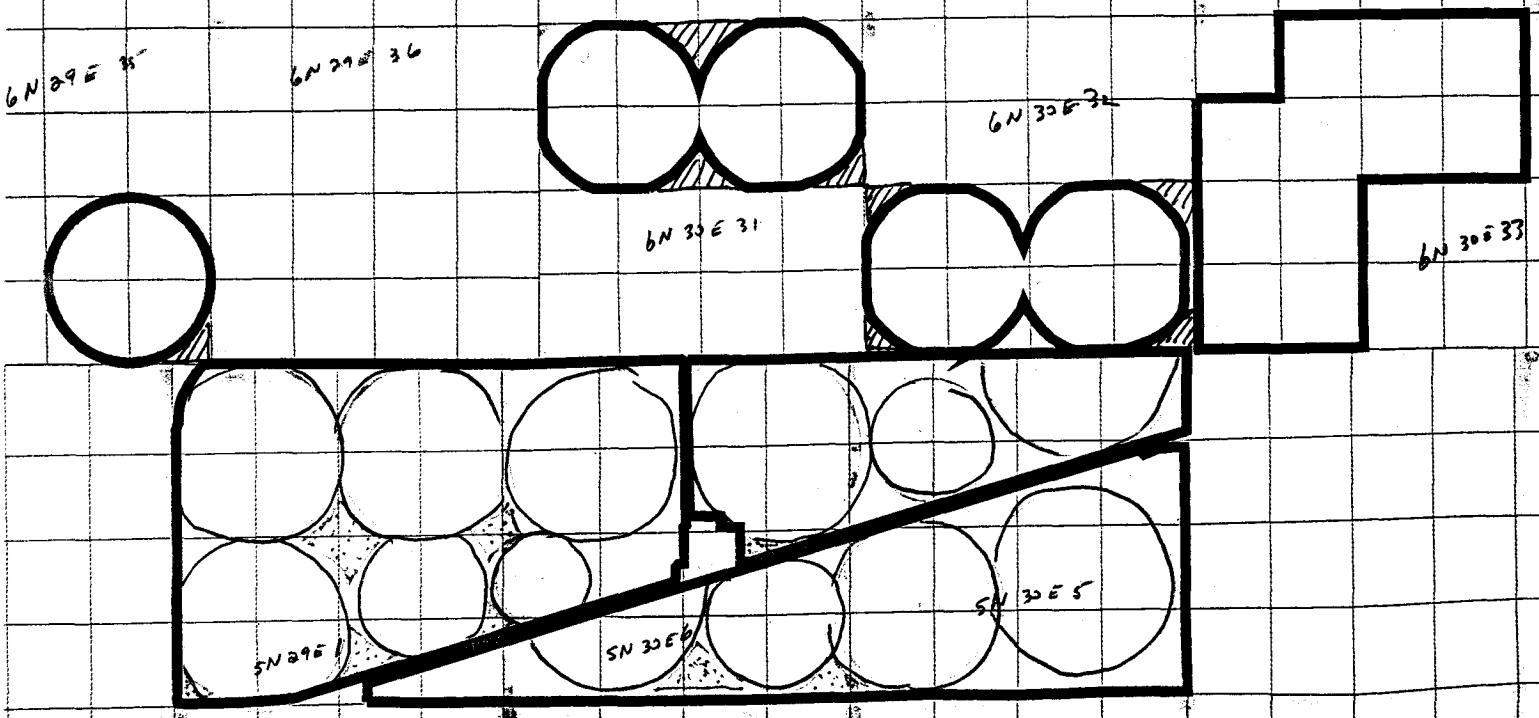

This unauthorized use is offset by pivot corners that have been dried up on the southern part of the farm, covered by water rights 33-02054, 33-02075, 33-02076A, 33-02076B, 33-07007, 33-07053, and 33-07061. These are marked in red on the sketch. However I don't find any transfer authorizing a change in place of use.

As you know, Simplot is a high profile operator in the Little Lost, and this morning another water user in the area mentioned that people are wondering about the status of these corners.

67 psi owner

ABB 02372078 demand 3.44 × 120 = 412.8

3.6 × 1.2 × 120 × 30 / 38.3 = 406.1 Kw

Pump 5

GE 500 hp NBOS303?

61 psi owner gage

ABB 01 837 924 demand 5.13 × 80 = 410.4

3.6 × 1.8 × 80 × 30 / 38.1 = 408.2 KW

Theoretical Calculations

Assume: – use reported SWL of 306 feet + 50 ft drawdown for "low" Q, use zero draw down for "high" Q
- 70% efficiency
- Owner gages are accurate.
- 25 ft friction

Pump 1

$$GPM_{low} = \frac{\text{Water hp} \times 3960}{TDH} = \frac{392.7 \times 1.34 \times .70 \times 3960}{(306 + 50 + 25 + 50 \times 2.31)}$$

$$= 2938 \text{ gpm} = 6.55 \text{ cfs}$$

$$GPM_{high} = \frac{392.7 \times 1.34 \times .70 \times 3960}{(306 + 25 + 50 \times 2.31)} = 3267 \text{ gpm} = 7.28 \text{ cfs}$$

Pump 2

$$GPM_{low} = \frac{432 \times 1.34 \times .70 \times 3960}{(306 + 50 + 25 + 65 \times 2.31)} = 3021 \text{ gpm} = 6.73 \text{ cfs}$$

$$GPM_{high} = \frac{432 \times 1.34 \times .70 \times 3960}{(306 + 25 + 65 \times 2.31)} = 3335 \text{ gpm} = 7.43 \text{ cfs}$$

Pump 3

$$GPM_{low} = \frac{382.1 \times 1.34 \times .70 \times 3960}{(306 + 25 + 50 + 63 \times 2.31)} = 2696 \text{ gpm} = 6.01 \text{ cfs}$$

$$GPM_{high} = \frac{382.1 \times 1.34 \times .70 \times 3960}{(306 + 25 + 63 \times 2.31)} = 2978 \text{ gpm} = 6.64 \text{ cfs}$$

Pump 4

$$GPM_{low} = \frac{406.1 \times 1.34 \times .70 \times 3960}{(306 + 25 + 50 + 67 \times 2.31)} = 2815 \text{ gpm} = 6.27 \text{ cfs}$$

$$GPM_{high} = \frac{406.1 \times 1.34 \times .70 \times 3960}{(306 + 25 + 67 \times 2.31)} = 3105 \text{ gpm} = 6.92 \text{ cfs}$$

Pump 5

$$GPM_{low} = \frac{408.2 \times 1.34 \times .70 \times 3960}{(306 + 25 + 50 + 61 \times 2.31)} = 2905 \text{ gpm} = 6.47 \text{ cfs}$$

$$GPM_{high} = \frac{408.2 \times 1.34 \times .70 \times 3960}{(306 + 25 + 61 \times 2.31)} = 3213 \text{ gpm} = 7.16 \text{ cfs}$$

Comparison w/ excavs

33-07053 / 33-07061

K. Wilson, annuban 6.49 cfs, 6.73 cfs.

500 hp main motor, 150 hp booster

33-07007 Tony Ko

Tony Kozlowski, 4.68 cfs w/ installed McCrometer

S.N. 76/10/2173 500 hp main motor 150 hp booster

Theoretical assuming 90 psi discharge (friction)

$$\frac{650 \times .70 \times 3960}{(306 + 25 + 50 + 90 \times 2.31)} = 3059 \text{ gpm} = 6.82 \text{ cfs}$$

Total Capacity

1) Assume Keith's exam represents all five pumps:

$6.49 \times 5 = 32.5$ cfs

2) Assume Keith's / Tony's represent all five

$\left(\frac{6.49 + 4.68}{2}\right) \times 5 = 27.9$ cfs

3) Reduce Keith's exam by amt of booster hp & apply to 5 pumps by horsepower

$\frac{6.49}{650} = 0.01$ cfs/hp

$(500 \times 4 + 450) \times 0.01 = 24.5$ cfs

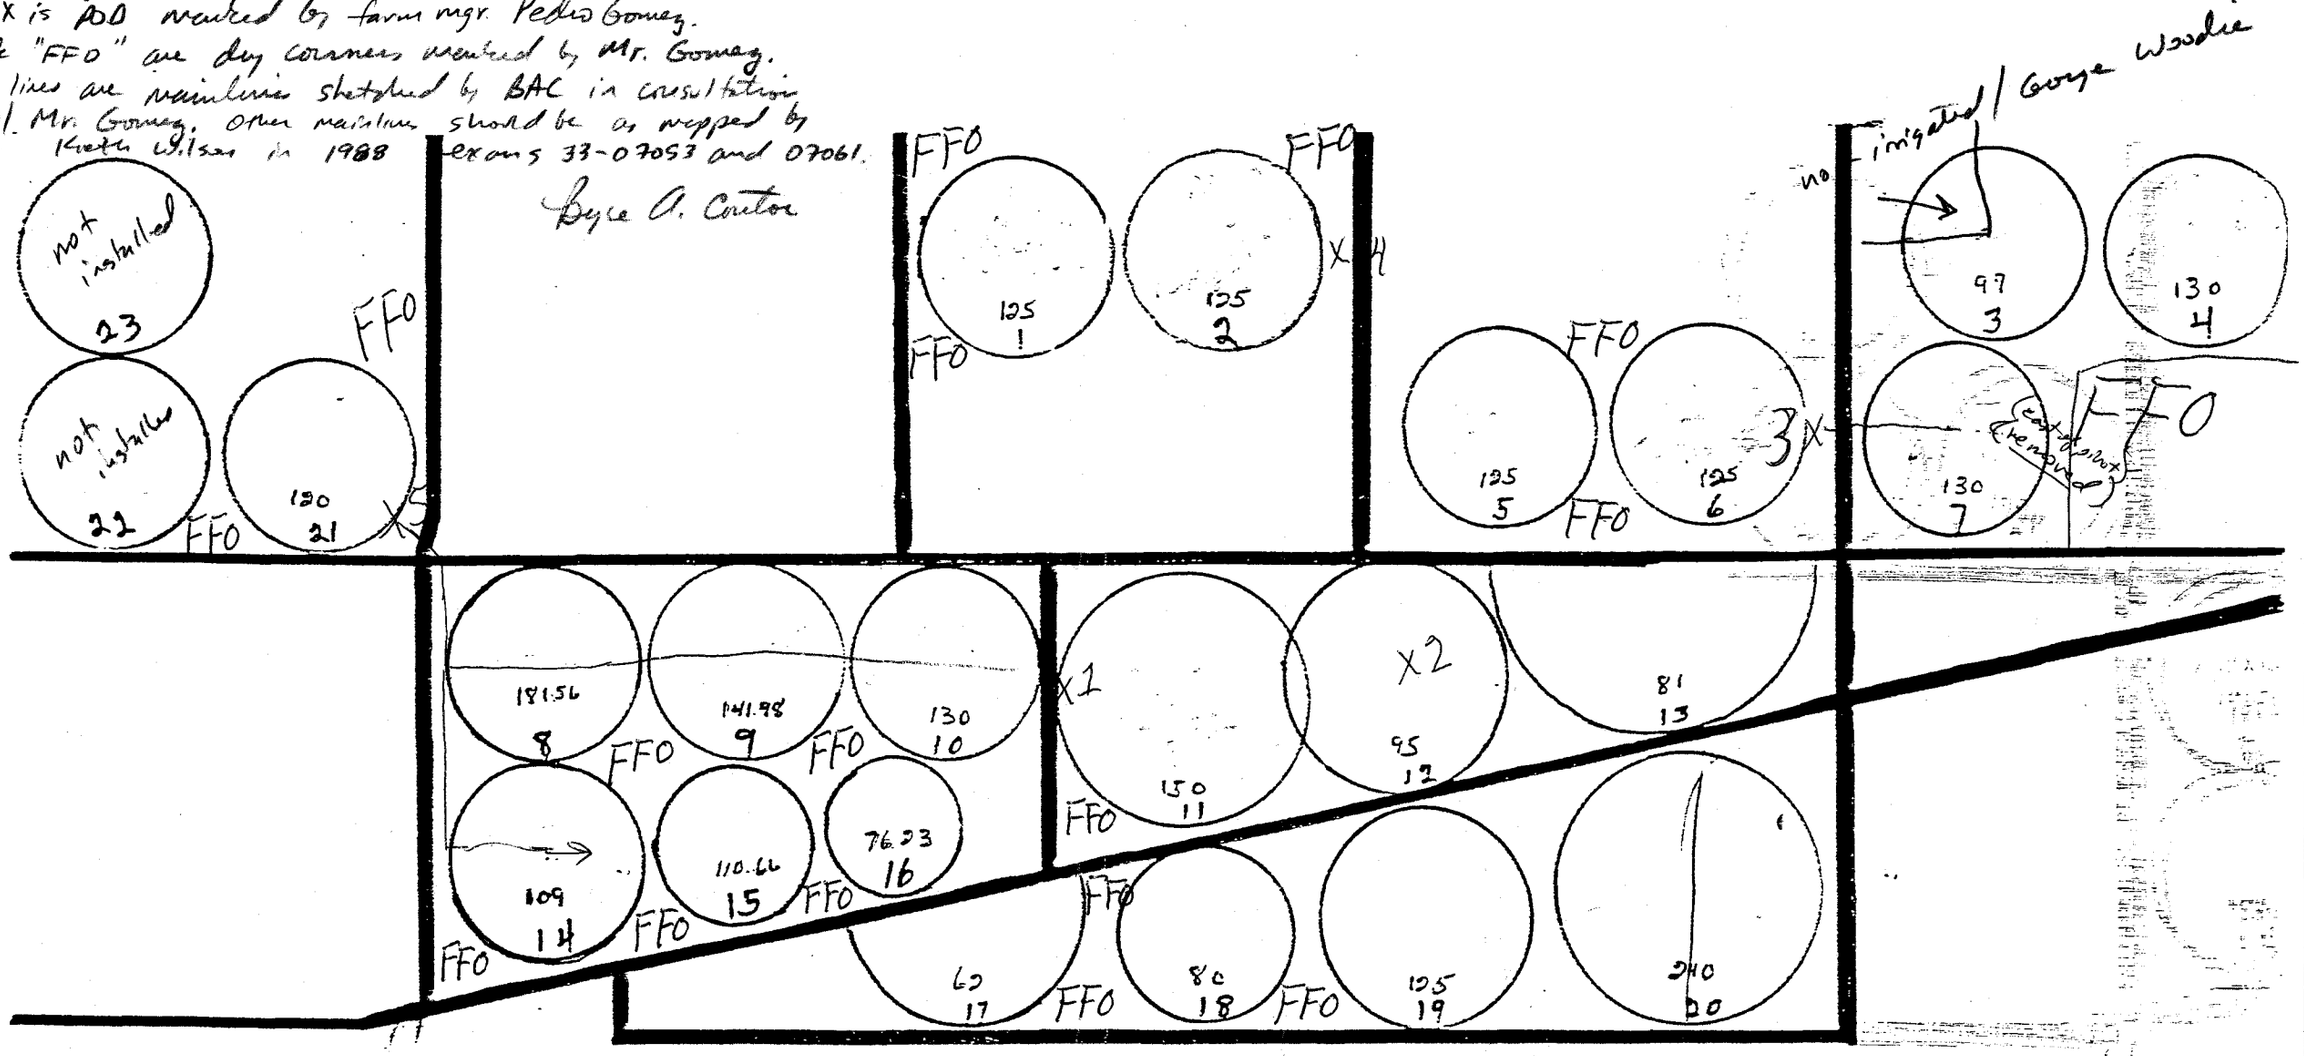

4) Σ of theoretical's from 8/10/99 data

Pump	low	high
#1	6.6	7.3
#2	6.7	7.4
#3	6.0	6.6
#4	6.3	6.9
#5	6.5	7.2
Σ =	32.1	35.4

Re: Adjudication Claims, Howe Farms

Vic –

I hope to have talked to you on the phone about these by the time you get them.

The enclosed amended claims correct the legal location of the wells. There are no other changes.

Please sign and notarize these and return them AS SOON AS POSSIBLE!!! Call me at 208-525-7161 if you have any questions.

Thank you,

Bryce A. Contor

RE: Snake River Basin Adjudication (SRBA)
Co-counsel for J. R. Simplot Company

Dear Ms. Pepe:

Our records were modified May 19, 1994, to reflect Terry Uhling and Gray Young as co-counsel for J. R. Simplot Company. Bruce Belzer was removed from the water right claim records on which he appeared as counsel.

Thank you for your assistance. If you have any questions, please contact me.

Sincerely,

Sally Sherman
Secretary, Adjudication Bureau

RE: Snake River Basin Adjudication
Case No. 39576 and Subcase Nos. 36-13320 & 57-02203A

Dear Mr. Shaff:

In response to your letter of March 24, 1994, please modify your records to reflect that Terry T. Uhling and Gray Young are co-counsel of record in the above referenced matter. Mr. Uhling and Mr. Young are in-house counsel for J. R. Simplot Company, and, therefore, would be apprised of all matters relating to the claims of Simplot and its related company subsidiaries and affiliates as a matter of course. The attached Exhibit A does represent all water rights we are aware of at this time to which the Notice applies.

For your information, I have also enclosed a copy of a letter and attached Notice of Withdrawal from Diana Delaney, Chief Deputy Clerk of the Snake River Basin Adjudication Clerk's Office, which indicates that Bruce Belzer never was recorded as being counsel for J. R. Simplot Company.

If you have any questions, feel free to call me at 389-7201.

Sincerely,

Holly Pepe

RE: Appearance of J. R. Simplot in Subcase Nos. 36-13320 and 57-02203A

Dear Mr. Young and Mr. Uhling:

Enclosed I am returning your *Notice of Withdrawal of Counsel* which was received by the court on April 5, 1994, and which stated that Bruce L. Belzer was withdrawing as counsel for J. R. Simplot Company in the above-referenced subcases.

After a search of the files for the above subcase, I am unable to locate any appearance by Bruce L. Belzer. However, on January 28, 1994, a *Notice and Entry of Appearance* was filed on behalf of J. R. Simplot in these subcases. That notice listed Gray Young and Terry Uhling as counsel for J. R. Simplot.

Sincerely,

Diana R. Delaney
Chief Deputy Clerk

RE: Permit No. 20863

Mr. J. Edwin True
1806 Kimberly Road
Twin Falls, Idaho

Dear Mr. True:

We have your letter of March 8 and everything seems to be alright except the location of the wells. You state that the two wells completed are located in the SE¼NE¼ and NE¼NE¼ Section 29, Township 5 North, Range 29 East B.M. But Permit No. 20863 does not show any wells in Section 29. According to our records these wells are located as follows and we have no record of any of the "Land and Water Company wells in Section 29":

Well No. 1 in the NW¼NW¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 2 in the SW¼NW¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 3 in the NW¼SW¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 4 in the SW¼SW¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 5 in the SE¼SW¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 6 in the SW¼NE¼ Section 16, Twp. 6 N., Rge. 29 E.
Well No. 7 in the SE¼SE¼ Section 16, Twp. 6 N., Rge. 29 E.
Well Nos. 8 & 9 in the NE¼NE¼ Sec.21, Twp. 6 N., Rge. 29 E.
Well Nos.10 & 11 in the SW¼NE¼ Sec.21, Twp. 6 N., Rge. 29 E.
Well No. 12 in the SE¼NE¼ Section 21, Twp. 6 N., Rge. 29 E.

If there has been a change the Permit will have to be amended and we enclose a form of application for amendment herewith.

If you are coming to Boise next week perhaps we can take care of the whole mater at that time.

Don't worry about causing us any trouble. It's no trouble at all and any way that's what we are here for.

Very truly yours,

MARK R. KULP
State Reclamation Engineer
